	Date	Supplier Clarification Question	Eskom Response
1	2026-07-31	Historically, Eskom had not been able to provide a Specification for cold insulation, as a result our current contract has no rates for cold insulation, instead this is currently being dealt with on a cost + basis. Would it be acceptable if we tender on this basis, or is Eskom able to issue a specification for cold insulation this time?	Eskom currently does not have a cold insulation specification available. As such, our approach is to issue the cold insulation requirements on a cost-plus basis, subject to approval and agreement on the proposed scope and costs. Therefore, it would be acceptable to proceed on a cost-plus basis for this work.
