

Question (Bidders)	Answer (TFR)
<ul style="list-style-type: none"> Is there any form of electrical power on the Wagons that can be utilized for the tracking device? If there is electrical power on each wagon - what are the specs of the electrical current (e.g.: AC or DC, Watts, Amps... 	<ul style="list-style-type: none"> Transnet freight wagons do not have any on board power supply, and active track and trace devices are required to be completely battery powered. This is articulated in clause 4.1 of the device technical standard.
<ul style="list-style-type: none"> We would like to confirm if Transnet will accept a proposal with several different types of hardware units and platforms or if we will need to submit this through different companies? 	<ul style="list-style-type: none"> This is discouraged, because it may lead to one company submitting devices of other companies (that is, a company bidding on behalf of other companies)
<ul style="list-style-type: none"> Some small errors in the RFP document on page 13, Table 1, first row, "Annexure 1 Component A" is mentioned. However, in Annexure 1 the column "Component" starts with "B: Device Requirements". Further down on Page 15 (top) the header is Stage 4 however the preceding header on Page 14 is Stage 4, so the final stage is Stage 5. The intention is clear but for the purpose of clarity in discussion these should be ratified. In the briefing session notes on page 10, the following statement is made in respect to the base platform: <i>"It is against this background that TFR has decided to create a platform that enables stakeholders interested in the track and trace capability to collaborate with TFR in the provision of the service"</i>. Can Transnet clarify if the platform is already created as a well as the nature of the collaboration sought. This will enable us to better understand what additional information regarding our platform needs to be included in our response. 	<ul style="list-style-type: none"> Noted, we will fix accordingly The provisioning of a platform for sharing data is a longer-term goal of TFR and will not be part of this procurement process.
