Dear Service Provider

REQUEST FOR PROPOSAL /QUOTATION (RFQ) – SCOPE OF WORK/SERVICE

2. INTRODUCTION

2.1.MANDATE

The AIDC is the dedicated developmental agency of the Gauteng Growth and Development Agency (GGDA) in relation to the specific industrial, infrastructure and training needs required by the automotive and allied sector - those based in the Gauteng province. The AIDC is thus tasked by GGDA with special developmental type projects aimed at enhancing and possibly expanding the automotive and allied-related sector with a focus on enterprise development; also, in the support of government's aims at BBBEE SMME development and the radical transformation of various townships. The AIDC otherwise explores other developmental projects, external to the objectives of the GGDA in support of the AIDC's own business development processes. These include projects related to the transport and energy sectors, as well as the development of the Tshwane Auto City. The AIDC's focus, in terms of the 2016 Gauteng Economic Development Plan/Framework (GEDP/F), is towards the automotive sector in the Northern Corridor of the Gauteng City Region (GCR) framework.

2.2. VISION

The Vision of the AIDC is:

To be the leading implementation agency delivering creative, efficient, best practice and value-based solutions in support of government programmes related to the automotive and allied sectors.

2.3.MISSION

The Mission of the AIDC, in pursuit of its Vision, is to provide innovative customized solutions:

To develop the automotive manufacturing sector to globally competitive standards of excellence through a world-class value proposition which enables effective and sustainable socio-economic growth.

3. RFQ OBJECTIVES

The aim is to request experienced and certified extraction cleaning service providers who specialize in cleaning and maintenance of canteen kitchen canopy extraction.

Extraction systems were designed for two main functions: These being, the reduction of heat in the kitchen and the extraction of smoke caused by cooking. The smoke is made up of oil particles, and these

particles turn to liquid oil when they cool. The filters are designed to catch a large portion of the oil and need to be cleaned at regular intervals.

A fair amount of oil still passes through the filters and as so, these oil deposits accumulate in ducting, motors and the blades. You now have a major fire and health hazard developing. Canopy Cleaning comes in. It is very important to have your whole system cleaned at regular intervals, depending on how much cooking is done in your kitchen. Most systems are serviced every 3 months.

It is the responsibility of the shop/restaurant owner as well as the landlord to ensure that kitchen grease extract systems (canopies, filters, ducting, and fans) in all commercial kitchens are compliant - as required by the buildings insurance policy, in accordance with Fire Safety and Workplace (Health, Safety & Welfare) Regulations. As well as the SANS act 1850:2014 (ed.2.00)

The service provider must provide the Extractor cleaning certificate after every cleaning service. An Extractor certificate is a legal requirement that we need to comply with, according to the Health and Safety Regulations and per SANS. Every commercial kitchen needs to comply with the regulations as set out by SANS. Not only is a non-compliant commercial kitchen at risk for a fire hazard, but they are endangering the lives of the employees as well. Failing to comply with the National Health & Safety Regulations, might result in a hefty fine and for-closure of the restaurant.

4. RFQ SCOPE

The quotation should be as per below. The suppliers who will not be quoting as per the specification below, their submission will not be considered. Scope of work will be as follows:

1. To clean canopies (interior and exterior).
(This includes for sealing joints in the canopies that may leak, and labor and chemicals used)
2. To clean ducting where accessible (This includes for riveting joints that have pulled loose and labor and chemicals used)
3. To clean and repair all filters if necessary (This includes for labor and rivets and chemicals used)
4. To seal all leaks (This includes for labor and silicone and silver sealant and bandages used)
5. To clean motors and fan blades (This includes for labor and chemicals used to clean Motor, Drum, Fan Blades & Discharge Unit)
6. To take photos before and after the cleaning and provide them to AIDC.
7. To check extraction efficiency before and after the clean.
8. To ensure that the system is clean.
9. Detailed laminated certificates to be provided.
10. Issue a canopy cleaning certificate on completion of every service, stating the service, service procedure and next due date. These certificates are required by the Fire department, Health department, Insurance companies for inspection purposes & in the event of a fire starting in the kitchen.
