RFQ Terms of Reference for services – Annexure H: To conduct 4x4 off road drivers training for SAWS employees

1 DESCRIPTION

The South African Weather Service (SAWS) seek to appoint a reputable training provider to conduct 4x4 off road training for the **forty-four** SAWS employees in Gauteng to provide the necessary knowledge, skills and confidence to drive a vehicle in any off-road condition. The training shall be conducted on the site of the appointed service provider and utilizing off-road vehicles for the appointed service provider. *The training site of the service provider must be within Pretoria, Johannesburg or Midrand area.*

2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organisation plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

3 BACKGROUND

The South African Weather Service (SAWS) plays a critical role in providing essential meteorological services, including weather forecasting, climate monitoring, and early warnings for severe weather events. Many of these functions require SAWS employees to operate in remote, challenging, and often off-road environments. This makes specialized 4x4 off-road driver training not just beneficial, but an absolute necessity for SAWS. The OHS Act, 85 of 1993 places a significant burden on employers to protect the health and safety of their employees and other people affected by their work activities. While the Act doesn't specifically mention "4x4 off-road driving training," its general provisions create a clear legal imperative for such training when 4x4 vehicles are used in the course of employment. Section 8, of the OHS Act is the cornerstone of employer responsibility, it states that every employer shall provide and maintain, as far as is reasonably practicable, a working environment that is safe and without risk to the health of his employees. This includes: Providing and maintaining systems of work, plant and machinery that are safe and without risk to health (Section 8(2)(a)): 4x4 vehicles, especially when operated off-road, are "plant and machinery." If not operated correctly, they pose significant risks. Training ensures the "system of work" (driving the vehicle) is safe.
