2. INTRODUCTION

LEDA (Limpopo Economic Development Agency) was established in terms of the Limpopo Economic Development Agency Act no. 5 of 2016. It is a juristic entity operating as a Provincial Government Business Enterprise. LEDA's mandate is to promote and carry out the economic development of the Limpopo Province in sectors such as agriculture, commerce, finance, industry, mining, transport, housing finance, export promotion, and investment attraction.

3. PROJECT BACKGROUND

The current infrastructure at LEDA consists of legacy hardware and software systems that are becoming increasingly difficult to maintain, scale, and support. The existing environment lacks sufficient capacity and redundancy to meet the growing demands of LEDA's operations.

As a result, LEDA is seeking to modernize its infrastructure to improve performance, enhance scalability, and ensure high availability. The current virtual machines (VMs) need to be migrated into a new virtualized environment with updated hardware and software systems to provide the required resources, flexibility, and reliability.

LEDA ICT is currently operating in a hybrid infrastructure model, utilizing a combination of on-premises and cloud resources. The on-premises infrastructure consists of Dell servers, which host both virtual and physical servers for critical LEDA information assets. These infrastructure assets have been in production since 2016 and are now due for an upgrade, as they have reached the end of their service life. There are four Dell PowerEdge R540 servers located in the Lebowakgomo server room that are part of this aging infrastructure.
