

# Annexure 5 PPE Branding Guide

Bidder to note that branding specification is subject to change but the below style and guide will mostly apply

		 <b>forestry, fisheries and the environment</b> Department: Forestry, Fisheries and the Environment REPUBLIC OF SOUTH AFRICA		 <b>WORKING FOR WATER</b>		 <b>EXPANDED PUBLIC WORKS PROGRAMME</b>	
Natural Resource Mangement (NRM)-Working for Water Branding Guidelines							
No	Item Description	PPE Specifications	Front	Back			
1	Safety Vest	The safety vest with reflective strips (50mm wide) is an optional item					
2	Overall Jacket	Overalls (general) should be manufactured from POLYESTER. Logos to be printed in single colour. Note that the pant size is usually two sizes smaller than the jacket so make sure that when ordering, the measurements given are for the jacket. Jackets should have two patch pockets for the hands and one patch pocket on the left breast. Breast pocket is stitched in slightly at the top to make it more secure. Breast pocket has a flap that can be secured as well as a concealed zip.					
3	Overall Pants	Overalls (general) should be manufactured from POLYESTER. Logos to be printed in single colour. Note that the pant size is usually two sizes smaller than the jacket so make sure that when ordering, the measurements given are for the jacket. Generally, branding on the right thigh must be in yellow, and it must be positioned so that it is not covered by the jacket. Good quality zips – preferably fire resistant metal – are to be used. A high-quality elastic must be used in the waist of the pants. Belt loops are to be at least 75mm to accommodate the standard security web belt. The button should preferably be a metal popper with button hole. On green overall pants, reflective strips must be silver and should be 50mm wide. Reflective strips must go right around both legs and must be below the knee. All overall pants must have a minimum			50		
5	T-Shirt	T-shirt material is to be 100% cotton and a minimum of 160gsm.			Silver reflective strips 50 mm wide		
6	Hard Hat	Hard hats must have a printed application of the relevant programme logos in full colour or one colour on the front of the helmet. This may be done as an adhesive/sticker. Hard hats are industry standard yellow (Pantone 108). Note that the First Aid, and Safety, Health and Environment (SHE) representatives must have orange (industry standard colour) hard hats. The helmet must be lightweight plastic and made of a durable quality material, which must withstand exposure to sun, heat, cold, dust, vibration and falling objects (hand tools). Tested and approved according to SANS 1397:2003 Standards. Hard hat must include: A shell with brim & peak, Harness with sweatband – 6 point suspension with 25mm webbing lining, 3 Point chin strap (optional – where required according to risk assessment), Sun Brim with neck flap, UV Resistant & Antistatic. Note Any part of the hard hat that can be adjusted, removed, or replaced shall be designed in such a way that it can be achieved without using tools.					

Please note branding of PPE must be done with approval from the department.
