The purpose of these specifications is to invite prospective service provider/bidders for the provision of Offsite Storage facility for the records and files of Lepelle Northern Water for a period of five years.

The service provider needs to comply with Protection of Personal Information (POPI) Act 4 of 2013

2. BACKGROUND

Lepelle Northern Water has experienced a shortage of storage facilities for archiving organizational documents within its premises (Head Office and storage facilities at Phalaborwa and Ebenezer). The organization, through its approved processes, generates a lot of documents which require sufficient storage as per the file plan, and the retention plan, hence the need for storage facilities.

Lepelle Northern Water Records Management unit is tasked to ensure safe and secure document management services in line with the provision of the National Archives Act 43 of 1996, which now it's challenging to align with the act.

The current storage facilities at the Head office, Phalaborwa and ebenezer are all full and not all meet the requirements as per the National Archives Act.

Considering the above, there's a need for offsite storage with a resourced Service provider which aligns with the National Archives Act to assist with the storage, disposal and scanning of organizational documents.

- The service provider should be able to destroy documents which are due for disposal in line with disposal procedures upon request by Lepelle Northern Water and issue a destruction certificate as outlined in the National archives Act 43 of 1996.
- The turnaround time for delivery of retrieved documents should be within 48 hours upon request by Lepelle Northern Water.
- An acceptable and effective records management system to enable the tracking and retrieval of documents.
- Retrieval services for the documents stored at an off-site location and delivery to LNW offices.
- Service providers should be able to collect documents from Lepelle Northern Water offices to their off-site storage in a secure transport /delivery facility when need arises.
- The service provider must be able to provide packaging boxes, stationery and consumables and staff to render indexing service before records are removed from LNW
- Service providers should attach a list of detailed bills of quantities which are cost per item and summary of totals for monthly cost and overall cost for a period of 60 months

4. OUTPUT AND /OUTCOMES

- The service providers are required to provide offsite storage, retrieval, scanning and disposal of records.
- The storage process entails receipt of files by the Service Provider, the indexing of the files, the storage of files and the retrieval of files from time to time
- Document management services required, amongst other things includes, onsite file management, data protection, backup, and paper management, labelling and indexing of boxes

5. TURN- AROUND TIME FOR RETRIEVAL
