ANNEXURE H -TECHNICAL EVALUATION CRITERIA

The technical evaluation team will receive tender packs from suppliers that meet the commercial requirements and evaluate their technical returnables. The evaluation will assess each supplier's ability to purchase, collect and remove non-ferrous scrap metal from Eskom in line with Eskom standards, buyer's guide documents, South African National Standards and the user requirements in the commercial strategy.

This will be achieved through a desktop evaluation of the enquiry returnables. In addition, the technical evaluation team will undertake a site assessment and verification to review the service provider's vehicles, tools and equipment. Tenderers will be informed accordingly by the Eskom buyer.

The technical evaluation team will evaluate the submissions. The submissions shall be subjected to a progressive series of evaluation levels. Passing of each level is a prerequisite for proceeding to the next evaluation level.

The evaluation levels are as follows:

- Level 1 Mandatory Requirements Evaluation
- Level 2 Functional (Scoring) Requirements Evaluation
- Level 3 Site Assessment & Verification
- Level 4 Contractual Evaluation

Level 1: Mandatory Requirements Evaluations

This level will evaluate the mandatory requirements. There will be no scoring linked to these requirements. The evaluator shall indicate with a **Yes / No** whether each requirement is met. Full compliance is required; the tenderer must meet all mandatory requirements to proceed to Level 2 for the technical functionality evaluation. If the tenderer does not meet all mandatory requirements, the tenderer will be deemed unsuccessful for this contract.

Level 1 criteria will be evaluated independently by a minimum of two evaluators. Clear justification will be required where any criterion is found not to be met. The independent results will be compared after the evaluations are completed. The outcome of this level will determine whether the submissions proceed to the next evaluation level.

Level 2: Functional Requirements Evaluations

Level 2 criteria will also be evaluated independently by a minimum of two evaluators. Clear justification will be required where any criterion is found not to be met. The independent results will be compared after the evaluations are completed.

Tenderers that meet the minimum threshold will proceed to Level 3. Tenderers that fail to meet the minimum threshold will not be evaluated further and will be deemed unsuccessful.

		Review Date	April 2031		

Level 3: Site Assessment & Verification

This level will assess and verify the service provider's vehicles, tools and equipment required for the work. Site assessment and verification will require the evaluation team to inspect the facility, vehicles, tools and equipment, and assessment results will be recorded. Tenderers will be notified by the Eskom buyer regarding the site visit arrangements.

Level 4: Contractual Evaluation

This will be the final evaluation level for this enquiry. Tenderers that meet the Level 2 requirements will be requested by the Disposal Officer to submit the contractual requirements.

These requirements must be met before tender award, as they have been identified as important for the scope of this enquiry. Although they will not form part of the desktop evaluation, they may be submitted during the tender stage. Compliance with these requirements must be met and verified before the tender award stage.

TENDER TECHNICAL EVALUATION CRITERIA AND RETURNABLE

The technical requirements will be divided into four consecutive levels, namely Level 1: Mandatory Requirements, Level 2: Functional Requirements, Level 3: Site Assessment and Verification, and Level 4: Contractual Requirements. Tenderers will be required to meet the requirements of each level before proceeding to the next level.

Note: The technical returnable must be submitted in a separate technical file, or as a clearly labelled technical section, and must be indexed in a logical manner.

Note: Sharing of resources among service providers is not allowed under this contract. If a company is found to be sharing resources, it will be disqualified.

Mandatory Requirements

Table 1 below lists the mandatory documents that must be submitted by the tenderer. If any of the requested documentation is not submitted, the tender application will be discarded or disqualified without requesting the tenderer to submit outstanding documentation. There will be no scoring linked to these requirements. The evaluator shall indicate with a **Yes / No** whether each requirement is met. Once the mandatory requirements have been satisfied through evaluation, the technical evaluation for functionality evidence will proceed.
