Dear Sir/Madam

**Tender Clarification (6) for MWP1534TX (Current Transformers (CTs))**

Please find below Eskom's response to the following queries that have been received from various tenderers:

**Query 1**

The NEC3 documents include a Z14 Nuclear clause. Is there any chance that any of the current transformers (CTs) could be installed at Koeberg Power Station by Eskom? We understand Koeberg's Transmission substation is a GIS substation, so we would think not.

**Response to query 1**

It's true that Koeberg is a GIS substation and chances of the new current transformers (CTs) landing at Koeberg are almost zero.
