<b>PART A</b> <b>REQUEST FOR AN EXPRESSION OF INTEREST (EOI) /REQUEST FOR INFORMATION(RFI)</b>			
<b>Description of the works/goods/services</b>	<p>Eskom is faced with the ageing and ailing fleet of power stations which require extensive and innovative maintenance approach. This, in turn, requires a turnkey project to procure, supply, install and commission including training for operating and maintenance personnel, of the technologically advanced versatile vertical boring milling CNC machine with Siemens control sinumerik840dsl, latest version thereof, that is versatile hence multifunctional with various vertical milling attachments of latest technological state of the art capabilities, like multiple axis, including double live spindles with multiple attachments, 8m diameter rotary table, to efficiently machine to desired sizes, various turbine components like casings, diaphragms, valves nozzles, blade carriers, steam chests, flanges of bellows, mill drums, mill trunnions, crusher frames plus girth gears and other components of similar nature.</p> <p>Different Eskom components for various power stations need to be refurbished during shutdown for returning to the unit or for use as a spare for the next shutdown, and this refurbishment requires to be done in a shortest possible span of time hence the need for a faster, versatile, and programmable CNC vertical boring milling machine with multiple axis and multiple attachments for various activities like machining multiple landings, bore landings or outer landings milling, facing, grinding and boring/drilling capabilities from a vertical position of the spindle. During refurbishment the components get welded to build-up various landings or landings need to be reduced to fit the interfacing part thereof, thus necessitate machining of the component to be machined to desired sizes. This requires to be done using a machine that is agile and capable of machining multiple landings and quickly do other various activities as required like drilling, facing, grinding etc.</p>
