

ANNEXURE A: Proposed designs of pot plants

The Scope of Works consists of the following;

The Appointment of an experienced service provider to supply, deliver, install and maintain indoor and outdoor plants on a rental basis at King Phalo Airport for a period of 60 months. The preventative maintenance will be on a Bi-weekly basis.

The Preventative maintenance of the indoor/outdoor plants must include the following:

- Regular cleaning of the plants, including removal of dust on the leaves and removal of dead leaves.
- Regular watering of plants;
- Bi -Weekly cleaning of all pots;
- Bi-Weekly removal of weeds around the plants;
- Application of insecticides as required;
- Fertilizing the plants as required;
- Replacement of any plants that are considered to be below acceptable standards. As the various flora have different maintenance requirements, the service provider is to ensure that these requirements are meticulously met.
- Any damaged plants or plants requiring replacement are to be removed and replaced within 48 hours (2 working days).
- Plants must be pruned and trimmed monthly and humus mixtures added were necessary
- All units to be fitted with a self-watering system. No external drainage areas in pots are allowed that will leak water onto the floor and or carpets where the units will be situated. Any such damages will be for the contractor's account.

The areas of services are as follows;
