CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

1. PURPOSE

- 1.1 To appoint a service provider to evaluate the impact of the training interventions within the Branch: Environmental Programmes (EP).

2. INTRODUCTION AND BACKGROUND

- 2.1 Environmental Programmes (EP) is the branch within the Department of Forestry, Fisheries and the Environment (DFFE) responsible for identifying and ensuring implementation of programmes that employ Expanded Public Works Programmes (EPWP) principles to contribute towards addressing unemployment in line with the “decent employment through inclusive economic growth” outcome, by working with communities to identify local opportunities that will benefit the communities. Over the years the EP has implemented the interventions including the training interventions, which would have been evaluated however there have been some developments in-between that are necessitating that an evaluation and assessment be conducted. Where an evaluation is defined as a process that critically examines a programme. It involves collecting and analysing information about a program’s activities, characteristics, and outcomes, and/or to inform programming judgments about a programme, to improve its effectiveness, and/or to inform programming decisions (Patton, 1987).
- 2.2 Skills development through accredited training is an integral part of the EP. This links to one of the fundamental principles of the programme to enable unemployed citizens to participate in mainstream economic development. The programme recognises that lack of skills is a significant factor contributing to unemployment and consequently poverty, thus, work opportunities created by EP were accompanied by training opportunities.

3. OBJECTIVES

- 3.1 Given that the programmes are implemented under the auspices of the EPWP, their respective impacts and implementation lessons (challenges or otherwise) need to be assessed and documented periodically to be able to improve and create sustainability. It is against this backdrop that the Department (DFFE) hereby invites a suitable service provider to:
 1. Identify lessons learnt and good practices related to all the learning interventions implemented;
 2. Take stock of what has been achieved by the participants in terms of changes in skill sets, knowledge, attitudes, etc.,
 3. Assess and document the respective impacts, successes and implementation challenges, or otherwise).

4. SCOPE AND EXTENT OF WORK

4.1 Purpose of the Evaluation

4.1 The primary purpose of the evaluation is to assess the socio-economic impacts of all the training interventions implemented by the DFFE through the EPWP. It is expected that the evaluation will identify the training intervention strengths and weaknesses, and draw forward-looking recommendations to inform future programme implementation. The evaluation period will be from 2018 to 2021, and will cover all the interventions implemented by the EP Branch in the nine (9) provinces.

4.2 This includes (a) assessment of programme results to date; (b) assessment of programme implementation, including its management and administrative systems, processes and procedures; (c) assessment of programme impacts, with an emphasis on programme sustainability, and (d) make recommendations for programme improvement/enhancement.

4.2 EVALUATION FOCUS

4.2.1 Evaluation Questions

Impact evaluations seek to understand the changes brought about by an intervention, at outcome and impact level. The impact evaluation is focused on the impact relative to programme objectives, the assessment of the training intervention's current design, and the validation of the underlying Theory of Change (TOC) with a view of enhancing the programme design and implementation in subsequent years.

To achieve the foregoing objectives, the evaluation will seek to answer the following overarching questions:

- a) What socio-economic impact has emerged from the various training interventions?
- b) What impacts can be attributed to the training interventions?
- c) What are the unintended impacts of the training interventions?
- d) How did the Training intervention attain/not attain objectives? And why were the objectives not attained?
- e) What have been the main enabling and hindering factors in the implementation of the interventions?

The impact evaluation of the training interventions is expected to provide evidence and options that will be employed by the Programme to make adjustments to the interventions where appropriate. It is

worthy to note that in the evaluation of the impact of the training interventions, the input of all stakeholders will be necessary, in the same manner as are inputs from implementers and partners participating in the implementation.

4.3 Evaluation Scope

The evaluation timeframe will span from the period when the interventions were introduced to date, with appropriately selected sites/project sites within each of the nine provinces.

4.4 METHODOLOGY/EVALUATION APPROACH

The evaluation design details the service provider's systematic plan to undertake the evaluation study. It is important that the design of an evaluation is not confused with the type of evaluation (in this case, an impact evaluation). The evaluation design seeks to define the methodological approach and specific methodology to be employed in the study, the type of evaluation (diagnostic, design, implementation, economic, and impact) and, data collection methods and a statistical analysis plan.

It is essential to note that in the proposal submission, the service provider is expected to specifically outline and discuss its approach to impact evaluation measurement of training interventions. Related to this, a multi-method approach will be used to evaluate assess the relevance and appropriateness, effectiveness, efficiency, sustainability, and impact.

The service provider must employ a mixed method (qualitative and quantitative). While the final methodology will be a result of discussion between the Evaluation Steering Committee and the successful bidder, the use of various techniques in evaluations, such as random sampling, interviews, focus groups and questionnaires, etc. are suggested. The sample size and geographical focus will be the outcome of the discussions between the service provider and the officials of the Department Forestry, Fisheries and the Environment (DFFE).
