  - c. To do basic geoscience research into the nature and origin of rocks, ores, minerals and the history and evolution of life and to understand the geological evolution of the earth. These findings are published in peer reviewed geoscience publications nationally and internationally;
  - d. To collect and curate all geoscience knowledge for the country into the National Geoscience Repository and to make such information available to the public as far as it is possible;
  - e. To render geoscience knowledge services and advice to the State to enable informed and scientifically based decisions on the use of the earth's surface and its resources within the territory of South Africa;
