- VENUE FOR SITE VISIT/CLARIFICATION MEETING** : Du Noon Sewer Pump Station, 01 Potsdam Rd, Killarney Gardens, Tableview Co-ordinates : 18° 31' 22.10" , -33° 49' 59.95"] or join via MS Teams link [Join conversation \(microsoft.com\)](#)
- TENDER BOX & ADDRESS** :
- Tender Box as per front cover** at the **Tender & Quotation Boxes Office**, 2nd Floor (Concourse Level), Civic Centre, 12 Hertzog Boulevard, Cape Town.
 - The Tender Document (which includes the Form of Offer and Acceptance) completed and signed in all respects, plus any additional supporting documents required, must be submitted in a sealed envelope with the name and address of the tenderer, the endorsement **"TENDER NO. 287S/2024/25: CLEANING OF SEWER PUMP STATION WET WELLS (CITY WIDE)"**, the tender box number. and the closing date indicated on the envelope. The sealed envelope must be inserted into the appropriate official tender box before closing time. If the tender offer is too large to fit into the abovementioned box or the box is full, please enquire at the public counter (Tender Distribution Office) for alternative instructions. It remains the tenderer's responsibility to ensure that the tender is placed in either the original box or as alternatively instructed.
- CCT TENDER REPRESENTATIVE** : Email: **[SCM.Tenders10@capetown.gov.za]**

TENDERERS MUST NOTE THAT WHEREVER THIS DOCUMENT REFERS TO ANY PARTICULAR TRADE MARK, NAME, PATENT, DESIGN, TYPE, SPECIFIC ORIGIN OR PRODUCER, SUCH REFERENCE SHALL BE DEEMED TO BE ACCOMPANIED BY THE WORDS "OR EQUIVALENT"

T.2 CONDITIONS OF TENDER

2.1 General

2.1.1 Actions

2.1.1.1 The City of Cape Town (hereafter referred to as the "CCT") and each tenderer submitting a tender offer (hereinafter referred to as the "tenderer" or the "supplier") shall comply with item T.2 of this Tender Document Goods and Services (hereinafter referred to as these "Conditions of Tender"). The tenderer and the CCT shall collectively hereinafter be referred to as the "Parties" and individually a "Party"). In their dealings with each other, the Parties shall discharge their duties and obligations as set out in these Conditions of Tender, timeously and with integrity, and behave equitably, honestly and transparently, and shall comply with all legal obligations imposed on the Parties herein and in accordance with all applicable laws.

The Parties agree that this tender Tender Document Goods and Services (hereinafter referred to as the "Tender" / "Tender Document"), its evaluation and acceptance and any resulting contract shall also be subject to the CCT's Supply Chain Management Policy ('SCM Policy') that was applicable on the date the bid was advertised and as amended from time to time. If the CCT adopts a new SCM Policy which contemplates that any clause therein would apply to the Contract emanating from this tender (hereinafter referred to as the "Contract"), such clause shall also be applicable to that Contract. Please refer to this document contained on the CCT's website.

Abuse of the supply chain management system is not permitted and may result, inter alia, (1) in the tender being rejected; (2) cancellation of the contract; (3) restriction of the supplier, and/or (4) the exercise by the CCT of any other remedies available to it as provided for in the SCM Policy and/or the the Contract and/or this tender and/or any applicable laws .

2.1.1.2 The CCT, the tenderer and their agents and employees involved in the tender process shall avoid conflicts of interest and where a conflict of interest is perceived or known, declare any such conflict of interest, indicating the nature of such conflict. Tenderers shall declare any potential conflict of interest in their tender submissions. Employees, agents and advisors of the CCT shall declare any conflict of interest to the CCT at the start of any deliberations relating to the procurement process or as soon as they become aware of such conflict, and abstain from any decisions where such conflict exists or recuse themselves from the procurement process, as appropriate.

2.1.1.3 The CCT shall not seek, and a tenderer shall not submit a tender, without having a firm intention and capacity to proceed with the contract.

2.1.2 Interpretation

2.1.2.1 The additional requirements contained in Annexure F to the contract (hereinafter referred to as the "returnable documents" / "Returnable Schedules") are part of these Conditions of Tender and are specifically hereby incorporated into these Conditions of Tender.

2.1.2.2 These Conditions of Tender and returnable Documents which are required for CCT's tender evaluation purposes herein, shall form part of the Contract arising from the CCT's corresponding invitation to tender.

2.1.3 Communication during tender process

Verbal or any other form of communication, from the CCT, its employees, agents or advisors during site visits/clarification meetings or at any other time prior to the award of the Contract, will not be regarded as binding on the CCT, unless communicated by the CCT in writing to suppliers / tenderers by its Director: Supply Chain Management or his nominee. Similarly, any communication of the tenderer / supplier that is not reduced to writing by the tenderer / supplier, its employees, agents or advisors, shall not be regarded as binding on the CCT, unless communicated to the CCT in writing by the suppliers / tenderers, or their duly authorised representatives.

2.1.4 The CCT's right to accept or reject any tender offer

2.1.4.1 The CCT may accept or reject any tender offer and may cancel the corresponding tender process or reject all tender offers at any time before the formation of a contract. The CCT may, prior to the award of the tender, cancel a tender if:

- (a) due to changed circumstances, there is no longer a need for the services, works or goods requested; or
- (b) funds are no longer available to cover the total envisaged expenditure; or
- (c) no acceptable tenders are received;
- (d) there is a material irregularity in the tender process; or
- (e) the Parties are unable to negotiate market related pricing.

The CCT shall not accept or incur any liability to a tenderer for such cancellation or rejection, but will give written reasons for such action upon receiving a written request to do so.

2.1.5 Procurement procedures

2.1.5.1 General

Unless otherwise stated in the Conditions of Tender, a contract will be concluded with the tenderer who scores the highest number of tender adjudication points.

For the purposes of this tender, **four (4) Regions** within the City of Cape Town municipal area have been identified and are outlined in the table below

Region Number	Area	Work Areas
1	South	Refer to the map in Schedule F.13 for the boundaries of each region (where ambiguity exists as to the exact location of the boundary, i.e. if the boundary is shown as being directly on a road, then the boundary shall always be either to the north or the east of the road in question).
2	East	
3	North	
4	West	

The CCT intends to appoint four (4) tenderers per region (i.e. the highest ranked tenderer for the region as ("the Winner") and three Alternatives based on their ranking. **Each tenderer will be limited to a maximum of one (1) region as a "Winner" and will be appointed as an "Alternative" on the remaining regions.**

The CCT reserves the right to appoint fewer tenderers, or not to appoint any tenderers if insufficient responsive bids are received, or based on capacity constraints or value for money considerations

Suppliers, once appointed and subject to operational requirements, will be invited to deliver services on a "winner-takes-all" basis, whereby the order will always be offered and, if accepted, allocated to the highest ranked tenderer ("the winner") for that respective region, and only if he refuses will the work be offered to the next highest ranked tenderer "Alternative No.1" for that respective region.

The contract period shall be for a period of **[36 months]** from the commencement date of the contract.

2.1.5.2 Proposal procedure using the two stage-system

A two-stage system will not be followed.

2.1.5.3 Nomination of Standby Bidder

"Standby Bidder" means a bidder, identified by the CCT at the time of awarding a bid that will be considered for award should the contract be terminated for any reason whatsoever. In the event that a contract is terminated during the execution thereof, the CCT may consider the award of the contract,

or non-award, to the Standby Bidder in terms of the procedures included its SCM Policy, as amended from time to time.

2.1.6 Objections, complaints, queries and disputes/ Appeals in terms of Section 62 of the Systems Act/ Access to court

2.1.6.1 Disputes, objections, complaints and queries

In terms of Regulations 49 and 50 of the Local Government: Municipal Finance Management Act, 56 of 2003 Municipal Supply Chain Management Regulations (Board Notice 868 of 2005):

- a) Persons aggrieved by decisions or actions taken by the CCT in the implementation of its supply chain management system, may lodge within 14 days of the decision or action, a written objection or complaint or query or dispute against the decision or action.

2.1.6.2 Appeals

- a) In terms of Section 62 of the Local Government: Municipal Systems Act, 32 of 2000 a person whose rights are affected by a decision taken by the CCT, may appeal against that decision by giving written notice of the appeal and reasons to the City Manager within 21 days of the date of the notification of the decision.
- b) An appeal must contain the following:
 - i. Must be in writing
 - ii. It must set out the reasons for the appeal
 - iii. It must state in which way the Appellant's rights were affected by the decision;
 - iv. It must state the remedy sought; and
 - v. It must be accompanied with a copy of the notification advising the person of the decision
- c) The relevant CCT appeal authority must consider the appeal and **may confirm, vary or revoke** the decision that has been appealed, but no such revocation of a decision may detract from any rights that may have accrued as a result of the decision.

2.1.6.3 Right to approach the courts and rights in terms of Promotion of Administrative Justice Act, 3 of 2000 and Promotion of Access to Information Act, 2 of 2000

The sub- clauses above do not influence any affected person's rights to approach the High Court at any time or its rights in terms of the Promotion of Administrative Justice Act (PAJA) and Promotion of Access to Information Act (PAIA).

2.1.6.4 All requests referring to sub clauses 2.1.6.1 and 2.1.6.2 must be submitted in writing to:

The City Manager - C/o the Manager: Legal Compliance Unit, Legal Services Department, Office of the City Manager

Via hand delivery at: 20th Floor, Tower Block, 12 Hertzog Boulevard, Cape Town 8001

Via post at: Private Bag X918, Cape Town, 8000

Via email at: MSA.Appeals@capetown.gov.za

2.1.6.5 All requests referring to clause 2.1.6.3 must be submitted in writing to:

The City Manager - C/o the Manager: Access to Information Unit, Legal Service Department, Office of the City Manager

Via hand delivery at: 20th Floor, Tower Block, 12 Hertzog Boulevard, Cape Town 8001

Via post at: Private Bag X918, Cape Town, 8000

Via email at: Access2info.Act@capetown.gov.za

2.1.6.6 The minimum standards regarding accessing and 'processing' of any personal information belonging to another in terms of Protection of Personal Information Act, 2013 (POPIA).

For purposes of this clause 2.1.6.6, the contract and these Conditions of Tender, the terms "data subject", "Personal Information" and "Processing" shall have the meaning as set out in section 1 of POPIA, and "Process" shall have the corresponding meaning.

The CCT, its employees, representatives and sub-contractors may, from time to time, Process the tenderer's and/or its employees', representatives' and/or sub-contractors' Personal Information, for purposes of, and/or relating to, the tender, the contract and these Conditions of Tender, for research purposes, and/or as otherwise may be envisaged in the CCT's Privacy Notice and/or in relation to the CCT's Supply Chain Management Policy or as may be otherwise permitted by law. This includes the

Processing of the latter Personal Information by the CCT's due diligence assurance provider, professional advisors and the Appeal Authority as applicable. The CCT's justification for the processing of such aforesaid Personal Information is based on section 11(1)(b) of POPIA, i.e., in terms of which the CCT's Processing of the said Personal Information is necessary to carry out actions for the conclusion and/or performance of the contract, to which the applicable data subject (envisaged in this clause 2.1.6.6 above) is a party.

All requests relating to data protection must be submitted in writing to:
The City Manager - C/o the Information Officer, Office of the City Manager
Via hand delivery at: 20th Floor, Tower Block, 12 Hertzog Boulevard, Cape Town 8001
Via post at: Private Bag X9181, Cape Town, 8000
Via email at: Popia@capetown.gov.za.

2.1.6.7 Compliance to the CCTs Appeals Policy.

In terms of the CCT's Appeals Policy, a fixed upfront administration fee will be charged. In addition, a surcharge may be imposed for vexatious and frivolous or otherwise manifestly inappropriate tender related appeals.

The current approved administration fee is R300.00 and may be paid at any of the Municipal Offices or at the Civic Centre in Cape Town using the GL Data Capture Receipt attached as Annexure F.13: Appeal Application Form. Alternatively, via EFT into the CCT's NEDBANK Account: CITY OF CAPE TOWN and using Reference number: 198158966. You are required to send proof of payment when lodging your appeal.

The current surcharge for vexatious and frivolous or otherwise manifestly inappropriate tender related appeals will be calculated as $\frac{1}{2}$ (Administrative cost of the tender appeal) + 0.25 % (Appellant's tender price).

Should the payment of the administration fee of R300.00 or the surcharge not be received, such fee or surcharge will be added as a Sundry Tariff to the bidder's municipal account.

In the event where the bidder does not have a Municipal account with the CCT, the fee or surcharge may be recovered in terms of the CCT's Credit Control and Debt Collection By-law, 2006 (as amended) and its Credit Control and Debt Collection Policy.

2.1.7 CCT Supplier Database Registration

Tenderers are required to be registered on the CCT Supplier Database as a service provider. Tenderers must register as such upon being requested to do so in writing and within the period contained in such a request, failing which no orders can be raised or payments processed from the resulting contract. In the case of Joint Venture partnerships this requirement will apply individually to each party of the Joint Venture.

Tenderers who wish to register on the CCT's Supplier Database may collect registration forms from the Supplier Management Unit located within the Supplier Management / Registration Office, 2nd Floor (Concourse Level), Civic Centre, 12 Hertzog Boulevard, Cape Town (Tel 021 400 9242/3/4/5). Registration forms and related information are also available on the CCT's website www.capetown.gov.za (follow the Supply Chain Management link to Supplier registration).

It is each tenderer's responsibility to keep all the information on the CCT Supplier Database updated.

2.1.8 National Treasury Web Based Central Supplier Database (CSD) Registration

Tenderers are required to be registered on the National Treasury Web Based Central Supplier Database (CSD) as a service provider. Tenderers must register as such upon being requested to do so in writing and within the period contained in such a request, failing which no orders can be raised or payments processed from the resulting contract. In the case of Joint Venture partnerships this requirement will apply individually to each party of the Joint Venture.

Tenderers who wish to register on the National Treasury Web Based Central Supplier Database (CSD) may do so via the web address <https://secure.csd.gov.za>.

It is each tenderer's responsibility to keep all the information on the National Treasury Web Based Central Supplier Database (CSD) updated.

2.2 Tenderer's obligations

2.2.1 Eligibility Criteria

2.2.1.1 Tenderers are obligated to submit a tender offer that complies in all aspects to the conditions as detailed in this tender document and the Conditions of Tender. An 'acceptable tender must "COMPLY IN ALL" aspects with the tender, Conditions of Tender, all Specifications (i.e., item C.5 below, hereinafter the "Specifications"), pricing instructions herein and the Contract including its conditions.

2.2.1.1.1 Submit a tender offer

Only those tender submissions from which it can be established, *inter alia* that a clear, irrevocable and unambiguous offer has been made to CCT, by whom the offer has been made and what the offer constitutes, will be declared responsive.

2.2.1.1.2 Compliance with requirements of CCT SCM Policy and procedures

Only those tenders that are compliant with the requirements below will be declared responsive:

- a) A completed **Details of Tenderer** to be provided (applicable schedule below to be completed);
- b) A completed **Certificate of Authority for Partnerships/ Joint Ventures/ Consortiums** to be provided authorising the tender to be made and the signatory to sign the tender on the partnership /joint venture/consortium's (applicable schedule below to be completed);
- c) A copy of the partnership / joint venture / consortium agreement to be provided, where applicable.
- d) A completed **Declaration of Interest – State Employees** to be provided and which does not indicate any non-compliance with the legal requirements relating to state employees (applicable schedule below to be completed);
- e) A completed **Declaration – Conflict of Interest and Declaration of Bidders' past Supply Chain Management Practices** to be provided and which does not indicate any conflict or past practises that renders the tender non-responsive based on the conditions contained thereon (applicable schedules below to be completed);
- f) A completed **Certificate of Independent Bid Determination** to be provided and which does not indicate any non-compliance with the requirements of the schedule (applicable schedule below to be completed);
- g) The tenderer (including any of its representatives, directors or members), has not been restricted in terms of abuse of the Supply Chain Management Policy,
- h) The tenderer's tax matters with SARS are in order, or the tenderer is a foreign supplier that is not required to be registered for tax compliance with SARS;
- i) The tenderer is not an advisor or consultant contracted with the CCT whose prior or current obligations creates any conflict of interest or unfair advantage;
- j) The tenderer is not a person, advisor, corporate entity or a director of such corporate entity, who is directly or indirectly involved or associated with the bid specification committee;
- k) A completed **Authorisation for the Deduction of Outstanding Amounts Owed to the CCT** to be provided and which does not indicate any details that renders the tender non-responsive based on the conditions contained thereon (applicable schedules below to be completed);
- l) The tenderer (including any of its representatives, directors or members), has not been found guilty of contravening the Competition Act 89 of 1998, as amended from time to time;
- m) The tenderer (including any of its representatives, directors or members), has not been found guilty on any other basis listed in the Supply Chain Management Policy.

2.2.1.1.3 Compulsory clarification meeting

Not Applicable

2.2.1.1.4 Minimum score for functionality

Only those tenders submitted by tenderers who achieve the minimum score for functionality as stated below will be declared responsive.

The description of the functionality criteria and the maximum possible score for each is shown in the table below. The score achieved for functionality will be the sum of the scores achieved, in the evaluation process, for the individual criteria.

Table 1: Functionality Criteria

Description of Functionality Criteria	Maximum possible score (Ms)
1. Cleaning team (Plant, Equipment and key Personnel)	50
2. Tenderer's Experience	50
Maximum possible score for Functionality	100

The minimum qualifying score for functionality is [60] out of a maximum of [100]. Tenderers that fail to achieve the minimum score for functionality will be declared as non-responsive and will not be eligible to have their tenders further evaluated.

Tenderers shall ensure that all relevant information has been submitted with the tender offer in the prescribed format to ensure optimal scoring of functionality points for each Evaluation Criteria. Failure to provide all information **IN THIS TENDER SUBMISSION** could result in the tenderer not being able to achieve the specified minimum scoring.

A more detailed explanation of the functionality criteria is given below:

Table 2: List of Relevant Returnable Schedules

Functionality Criteria	Returnable Schedule
Cleaning team	Schedule F.13
Tenderer's Experience	Schedule F.13

Evaluation criteria will be assessed with respect to the contract specific Scope of Work as outlined under Part C.5 Specification(s).

Table 3: Cleaning team

Cleaning team	
Score: 0	No information provided / irrelevant information provided / owns or leases less than four (4) Combination Super Sucker units / Less than four (4) Supervisors/Drivers per region / Less than eight (8) Operators per region / Super Sucker Units do not comply with the minimum specifications stipulated below / Supervisors do not meet the minimum experiential requirements stipulated below / Operators do not meet the minimum experiential requirements stipulated below
Score: 30	<p>*Own or lease four (4) Combination Super Sucker Units per REGION, that each comply with the minimum specifications outlined below, to be considered as a "Winner" for a respective region.</p> <p>AND</p> <p>**Four (4) Supervisors/ Drivers per REGION each satisfying the minimum</p>

Score: 50	<p>*Own or lease six (6) or more Combination Super Sucker Units per REGION, that each comply with the minimum specifications outlined below, to be considered as a “Winner” for a respective region.</p> <p>AND</p> <p>**Six (6) or more Supervisors/Drivers per REGION each satisfying the minimum experiential requirements outlined below to be considered as a “Winner” for a respective region.</p> <p>AND</p> <p>***Twelve (12) or more Operators per REGION each satisfying the minimum experiential requirements outlined below to be considered as a “Winner” for a respective region.</p>
<p>NOTE:</p> <p>a) *The tenderer is required to provide Proof of Registration and ownership of all Combination Super Sucker Units in the form of the Motor Vehicle Licence (MVL1) or LCO documents documents and Certificate of Registration (RC1) documents for each Combination Super Sucker Units submitted in Schedule F.13.</p> <p>b) *When considering leased plant, the tenderer must provide the Letter of Commitment /Intent from the leasing company with the listed combination super sucker units/ equipment available for rent, including the Motor Vehicle Licence documents and Certificate of Registration Documents per combination/ super sucker unit. The letter of Commitment /Intent must list this specific tender number and the duration of this project explicitly.</p> <p>c) *Each Combination Super Sucker Unit must satisfy the following minimum specifications which must be included in Schedule F.13.</p> <ul style="list-style-type: none"> i. The debris tank with a capacity of not less than 12 m³ ii. The free airflow of at least 556 litres per second capable of continuous running iii. The flexible suction hose must not be smaller than 150mm (6”) diameter iv. Wet or dry material removed from the wetwell should be contained in a sealed container (debris tank) v. Discharge from the debris tank will be at the rear by means of hydraulically opened door, to a minimum angle of 50 degrees. 	

vi.	Jetting equipment capable of providing a minimum jetting pressure of at least 120Bar at 250l/min.
vii.	The jetting hose must be a minimum of 25mm diameter with a minimum operational length of 120m.
viii.	The jetting hose shall be wound onto a hose reel, which is power driven in both the clockwise and anti-clockwise directions.
ix.	One (1) of the four (4) required combination super sucker units must have a blower silencer or exhauster to maintain 75 decibels at 7 meter range
d)	<p>**The minimum experiential requirements to be satisfied by each Supervisors/Drivers is as follows:</p> <p>Each Supervisors/Drivers <u>must have acted as a Supervisor</u> for a minimum of two (2) years on projects relating to the cleaning of sewer pump station wet wells and proof of such must be submitted as per Schedule F.13.</p> <p>Each Supervisors/Drivers must have a valid Code 10 Drivers license (or equivalent as confirmed by the relevant authority in case of foreign licenses) and a valid PDP and proof of such must be submitted as per Schedule F.13.</p> <p>Typical duties of a Supervisors/Drivers are considered to include the driving of plant, oversight and management of a team or individuals to ensure effective performance and completion of tasks as well as adherence to Health and Safety Regulations.</p>
e)	<p>***The minimum experiential requirements to be satisfied by each Operator is as follows:</p> <p>Each Operator must have a minimum of two (2) years experience in the operation of Combination Units/ Super Suckers on projects relating to the cleaning of sewer pump station wet wells as per Schedule F.13.</p> <p>Typical duties of a Operator are considered to include operation of machinery and execution of tasks.</p>
f)	The key staff listed under Schedule F.13 are expected to occupy their respective roles during the execution of the proposed works. Should any key staff member change during the framework contract then the tenderer shall submit to the CCT CVs of new key personnel who are required to meet the experiential benchmarks and relevant requirements as set out in the table above.
g)	In order to be declared responsive, the tenderer must have the key personnel, as described above, in its permanent employ at time of tender closing. Alternatively, leasing agreements listing the relevant key personnel may be accepted.
The CCT shall reserve the right to suspend the works for failure to comply with the above requirements.	

Table 4: Tenderer's Experience

Tenderer's Experience	
Score: 0	No information provided / irrelevant information provided / no relevant experience / less than two (2) years of relevant experience
Score: 30	Two (2) – Three (3) years of experience relating to the cleaning of sewer pump station wet wells.
Score: 40	Greater than Three (3) years and up to Four (4) years of experience relating to the cleaning of sewer pump station wet wells.

Score: 50	Greater than Four (4) years of experience relating to the cleaning of sewer pump station wet wells.
------------------	--

Note:

1. Proof of relevant projects completed must be submitted in the form of certificates of completion, completion letters, reference Letters from the relevant Employers to be attached to the tender document. Failure to submit valid certificates of completion shall result in the project not being considered as part of the evaluation.
2. The onus is on the tenderer to ensure that the contact details provided for the relevant Employers are correct as failure to do so may prejudice the assessment of the tenderer's experience.

2.2.1.1.7 Provision of samples

Only those tenders submitted by tenderers who provided acceptable samples as stated in the Tender Specifications will be declared responsive.

2.2.2 Cost of tendering

The CCT will not be liable for any costs incurred in the preparation and submission of a tender offer, including the costs of any testing necessary to demonstrate that aspects of the offer complies with requirements.

2.2.3 Check documents

The documents issued by the CCT for the purpose of a tender offer are listed in the index of this tender document.

Before submission of any tender, the tenderer should check the number of pages, and if any are found to be missing or duplicated, or the figures or writing is indistinct, or if the Price Schedule contains any obvious errors, the tenderer must apply to the CCT at once to have the same rectified.

2.2.4 Confidentiality and copyright of documents

The tenderer shall treat as strictly confidential all matters arising in connection with the tender. Use and copy the documents issued by the CCT only for the purpose of preparing and submitting a tender offer in response to the invitation.

2.2.5 Reference documents

The tenderer shall obtain, as necessary for submitting a tender offer, copies of the latest versions of standards, specifications, Conditions of Contract and other publications, which are not attached but which are incorporated into the tender document(s) by reference.

2.2.6 Acknowledge and comply with notices

The tenderer shall acknowledge receipt of notices to the tender documents, which the CCT may issue, and shall fully comply with all instructions issued in the said notices, and if necessary, apply for an extension of the closing time stated on the front page of the tender document, in order to take the notices into account. Notwithstanding any requests for confirmation of receipt of the said notices issued, the tenderer shall be deemed to have received such notices if the CCT can show proof of transmission thereof via electronic mail, facsimile, or registered post or other lawful means.

2.2.7 Clarification meeting

The tenderer shall attend, where required, a clarification meeting at which tenderers may familiarise themselves with aspects of the proposed work, services or supply and pose questions. Details of the meeting(s) are stated in the General Tender Information (i.e., in item T.1 above).

Tenderers should be represented at the site visit/clarification meeting by a duly authorised person who is suitably qualified and experienced to comprehend the implications of the work involved.

2.2.8 Seek clarification

The tenderer shall request clarification of the tender documents, if necessary, by notifying the CCT at least one week before the closing time stated in the General Tender Information (i.e., in item T.1 above), where possible.

2.2.9 Pricing the tender offer

2.2.9.1 The tenderer shall comply with all pricing instructions as stated on the Price Schedule.

2.2.10 Alterations to documents

The tenderer shall not make any alterations or additions to the tender documents, except to comply with instructions issued by the CCT in writing, or necessary to correct errors made by the tenderer. All signatories to the tender offer shall initial all such alterations.

2.2.11 Alternative tender offers

2.2.11.1 Unless otherwise stated in the Conditions of Tender, the tenderers may submit alternative tender offers only if a main tender offer, strictly in accordance with all the requirements of the tender documents, is also submitted.

If a tenderer wishes to submit an alternative tender offer, he/she/it shall do so as a separate offer on a complete set of tender documents. The alternative tender offer shall be submitted in a separate sealed envelope clearly marked "Alternative Tender" in order to distinguish it from the main tender offer.

Only the alternative of the highest ranked acceptable main tender offer (that is, submitted by the same tenderer) will be considered, and if appropriate, recommended for award.

Alternative tender offers of any but the highest ranked main tender offer will not be considered.

An alternative tender offer to the highest ranked acceptable main tender offer that is priced higher than the main tender offer may be recommended for award, provided that the ranking of the alternative tender offer is higher than the ranking of the next ranked acceptable main tender offer.

The CCT will not be bound to consider alternative tenders and shall have sole discretion in this regard.

In the event that the alternative is accepted, the tenderer warrants that the alternative offer complies in all respects with the CCT's standards and requirements as set out in the tender document.

2.2.11.2 Acceptance of an alternative tender offer by the CCT may be based only on the criteria stated in the Conditions of Tender or applicable criteria otherwise acceptable to the CCT.

2.2.12 Submitting a tender offer

2.2.12.1 The tenderer is required to submit one tender offer only on the original tender documents as issued by the CCT, either as a single tendering entity or as a member in a joint venture to provide the whole of the works, services or supply identified in the Conditions of Contract and described in the Specifications. Only those tenders submitted on the tender documents as issued by the CCT together with all Tender Returnable Documents duly completed and signed will be declared responsive.

- 2.2.12.2** The tenderer shall return the entire tender document to the CCT after completing it in its entirety, either electronically (if they were issued in electronic format) or by writing legibly in non-erasable ink.
- 2.2.12.3** The tenderer shall sign the original tender offer where required in terms of the Conditions of Tender. The tender shall be signed by a person duly authorised by the tenderer to do so. Tenders submitted by joint ventures of two or more firms shall be accompanied by the document of formation / founding document of the joint venture or any other document signed by all Parties, in which is defined precisely the conditions under which the joint venture will function, its period of duration, the persons authorised to represent and obligate it, the participation of the several firms forming the joint venture, and any other information necessary to permit a full appraisal of its functioning. Signatories for tenderers proposing to contract as joint ventures shall state which of the signatories is the lead partner.
- 2.2.12.4** Where a two-envelope system is required in terms of the Conditions of Tender, place and seal the returnable documents listed in the Conditions of Tender in an envelope marked "financial proposal" and place the remaining returnable documents in an envelope marked "technical proposal". Each envelope shall state on the outside the CCT's address and identification details stated in the General Tender Information (i.e., item T.1 above), as well as the tenderer's name and contact address.
- 2.2.12.5** The tenderer shall seal the original tender offer and copy packages together in an outer package that states on the outside only the CCT's address and identification details as stated in the General Tender Information. . If it is not possible to submit the original tender and the required copies (see 2.2.12.3) in a single envelope, then the tenderer must seal the original and each copy of the tender offer as separate packages marking the packages as "ORIGINAL" and "COPY" in addition to the aforementioned tender submission details.
- 2.2.12.6** The CCT shall not assume any responsibility for the misplacement or premature opening of the tender offer if the outer package is not sealed and marked as stated.
- 2.2.12.7** Tender offers submitted by facsimile or e-mail will be rejected by the CCT, unless stated otherwise in the Conditions of Tender.
- 2.2.12.8** By signing the offer part of the Form of Offer (**Section 5, Part A hereto**) the tenderer warrants and agrees that all information provided in the tender submission is true and correct.
- 2.2.12.9** Tenderers shall properly deposit its bid in the designated tender box (as detailed on the front page of this tender document) on or before the closing date and before the closing time, in the relevant tender box at the Tender & Quotation Boxes Office situated on the 2nd floor, Concourse Level, Civic Centre, 12 Hertzog Boulevard, Cape Town. If the tender submission is too large to fit in the allocated box, please enquire at the public counter for assistance.
- 2.2.12.10** The tenderer must record and reference all information submitted contained in other documents for example cover letters, brochures, catalogues, etc. in the Returnable Schedule titled **List of Other Documents Attached by Tenderer**.
- 2.2.13 Information and data to be completed in all respects**
- Tender offers, which do not provide all the data or information requested completely and in the form required, may be regarded by the CCT as non-responsive.
- 2.2.14 Closing time**
- 2.2.14.1** The tenderer shall ensure that the CCT receives the tender offer, together with all applicable documents specified herein, at the address specified in the General Tender Information herein prior to the closing time stated on the front page of the tender document.
- 2.2.14.2** If the CCT extends the closing time stated on the front page of the tender document for any reason, the requirements of these Conditions of Tender apply equally to the extended deadline.
- 2.2.14.3** The CCT shall not consider tenders that are received after the closing date and time for such a tender (late tenders).

2.2.15 Tender offer validity and withdrawal of tenders

2.2.15.1 The tenderer shall warrant that the tender offer(s) remains valid, irrevocable and open for acceptance by the CCT at any time for a period of 120 days after the closing date stated on the front page of the tender document.

2.2.15.2 Notwithstanding the period stated in clause 2.2.15.1 above, bids shall remain valid for acceptance for a period of twelve (12) months after the expiry of the original validity period, unless the CCT is notified in writing of anything to the contrary by the bidder. The validity of bids may be further extended by a period of not more than six months subject to mutual agreement by the parties, administrative processes and upon approval by the City Manager, unless the required extension is as a result of an appeal process or court ruling.

In circumstances where the validity period of a tender has expired, and the tender has not been awarded, the tender process is considered "completed", despite there being no decision (award or cancellation) made. This anomaly does not fall under any of the listed grounds of cancellation and should be treated as a "non award". A "non award" is supported as a recommendation to the CCT's Bod Adjudication Committee ("BAC") for noting.

2.2.15.3 A tenderer may request in writing, after the closing date, that its tender offer be withdrawn. Such withdrawal will be permitted or refused at the sole discretion of the CCT after consideration of the reasons for the withdrawal, which shall be fully set out by the tenderer in such written request for withdrawal. Should the tender offer be withdrawn in contravention hereof, the tenderer agrees that:

- a) it shall be liable to the CCT for any additional expense incurred or losses suffered by the CCT in having either to accept another tender or, if new tenders have to be invited, the additional expenses incurred or losses suffered by the invitation of new tenders and the subsequent acceptance of any other tender;
- b) the CCT shall also have the right to recover such additional expenses or losses by set-off against monies which may be due or become due to the tenderer under this or any other tender or contract or against any guarantee or deposit that may have been furnished by the tenderer or on its behalf for the due fulfilment of this or any other tender or contract. Pending the ascertainment of the amount of such additional expenses or losses, the CCT shall be entitled to retain such monies, guarantee or deposit as security for any such expenses or loss, without prejudice to the CCT's other rights and/or remedies available to it in accordance with any applicable laws.

2.2.16 Clarification of tender offer, or additional information, after submission

Tenderer's shall promptly provide clarification of its tender offer, or additional information, in response to a written request to do so from the CCT during the evaluation of tender offers within the time period stated in such request. No change in the competitive position of tenderers or substance of the tender offer is sought, offered, or permitted.

Note: This clause does not preclude the negotiation of the final terms of the contract with a preferred tenderer following a competitive selection process, should the CCT elect to do so.

Failure, or refusal, to provide such clarification or additional information within the time for submission stated in the CCT's written request may render the tender non-responsive.

2.2.17 Provide other material

2.2.17.1 Tenderer's shall promptly provide, upon request by the CCT, any other material that has a bearing on the tender offer, the tenderer's commercial position (including joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the CCT for the purpose of the evaluation of the tender. Should the tenderer not provide the material, or a satisfactory reason as to why it cannot be provided, by the time for submission stated in the CCT's request, the CCT may regard the tender offer as non-responsive.

2.2.17.2 The tenderer shall provide, on written request by the CCT, where the transaction value inclusive of VAT **exceeds R 10 million**:

- a) audited annual financial statement for the past 3 years, or for the period since establishment if established during the past 3 years, if required by law to prepare annual financial statements for auditing;
- b) a certificate signed by the tenderer certifying that the tenderer has no undisputed commitments for municipal services towards a municipality or other service provider in respect of which payment is overdue for more than 30 days;
- c) particulars of any contracts awarded to the tenderer by an organ of state during the past five years, including particulars of any material non-compliance or dispute concerning the execution of such contract;
- d) a statement indicating whether any portion of the goods or services are expected to be sourced from outside the Republic, and, if so, what portion and whether any portion of payment from the municipality or municipal entity is expected to be transferred out of the Republic.

Each entity to a Consortium/Joint Venture bid shall submit separate certificates/statements in the above regard.

2.2.17.3 Tenderers shall be required to undertake to fully cooperate with the CCT's external service provider appointed to perform a due diligence review and risk assessment upon receipt of such written instruction from the CCT.

2.2.18 Samples, Inspections, tests and analysis

Tenderers shall provide access during working hours to premises for inspections, tests and analysis as provided for in the Conditions of Tender or Specifications.

If the Specifications requires the tenderer to provide samples, these shall be provided strictly in accordance with the instructions set out in the Specification.

If such samples are not submitted as required in the bid documents or within any further time stipulated by the CCT in writing, then the bid concerned may be declared non-responsive.

The samples provided by all successful bidders will be retained by the CCT for the duration of any subsequent contract. Bidders are to note that samples are requested for testing purposes therefore samples submitted to the CCT may not in all instances be returned in the same state of supply and in other instances may not be returned at all. Unsuccessful bidders will be advised by the Project Manager or dedicated CCT Official to collect their samples, save in the aforementioned instances where the samples would not be returned.

2.2.19 Certificates

The tenderer must provide the CCT with all certificates as stated below:

2.2.19.1. Preference Points for Specific Goals

In order to qualify for preference points for HDI and/or Specific Goals, it is the responsibility of the tenderer to submit documentary proof (Company registration certification, Central Supplier Database report, BBBEE certificate, Proof of Disability, Financial Statements, commissioned sworn affidavits, etc.) in support of tenderer claims for such preference for that specific goal.

Tenderers are further referred to the content of the Preference Schedule for the full terms and conditions applicable to the awarding of preference points.

2.2.19.2 Evidence of tax compliance

Tenderers shall be registered with the South African Revenue Service (SARS) and their tax affairs must be in order and they must be tax compliant subject to the requirements of clause 2.2.1.1.2.h. In this regard, it is the responsibility of the Tenderer to submit evidence in the form of a valid Tax Compliance Status PIN issued by SARS to the CCT at the Supplier Management Unit located within the Supplier Management / Registration Office, 2nd Floor (Concourse Level), Civic Centre, 12 Hertzog Boulevard, Cape Town (Tel 021 400 9242/3/4/5),

or included with this tender. The tenderer must record its Tax Compliance Status PIN number on the **Details of Tenderer** pages of the tender submission.

Each party to a Consortium/Joint Venture shall submit a separate Tax Compliance Status Pin.

Before making an award the CCT must verify the bidder's tax compliance status. Where the recommended bidder is not tax compliant, the bidder should be notified of the non-compliant status and be requested to

submit to the CCT, within 7 working days, written proof from SARS that they have made arrangement to meet their outstanding tax obligations. The proof of tax compliance submitted by the bidder must be verified by the CCT via CSD or e-Filing. The CCT should reject a bid submitted by the bidder if such bidder fails to provide proof of tax compliance within the timeframe stated herein.

Only foreign suppliers who have answered "NO" to all the questions contained in the Questionnaire to Bidding Foreign Suppliers section on the **Details of Tenderer** pages of the tender submission, are not required to register for a tax compliance status with SARS.

2.2.20 Compliance with Occupational Health and Safety Act, 85 of 1993

Tenderers are to note the requirements of the Occupational Health and Safety Act, 85 of 1993. The Tenderer shall be deemed to have read and fully understood the requirements of the above Act and Regulations and to have allowed for all costs in compliance therewith.

In this regard the Tenderer shall submit **upon written request to do so by the CCT**, a Health and Safety Plan in sufficient detail to demonstrate the necessary competencies and resources to deliver the goods or services all in accordance with the Act, Regulations and Health and Safety Specification.

2.2.21 Claims arising from submission of tender

By responding to the tender herein, the tenderer warrants that it has:

- a) Inspected the Specifications and read and fully understood the Conditions of Contract.
- b) Read and fully understood the whole text of the Specifications and Price Schedule and thoroughly acquainted himself with the nature of the goods or services proposed and generally of all matters which may influence the Contract.
- c) visited the site(s) where delivery of the proposed goods will take place, carefully examined existing conditions, the means of access to the site(s), the conditions under which the delivery is to be made, and acquainted himself with any limitations or restrictions that may be imposed by the Municipal or other Authorities in regard to access and transport of materials, plant and equipment to and from the site(s) and made the necessary provisions for any additional costs involved thereby.
- d) requested the CCT to clarify the actual requirements of anything in the Specifications and Price Schedule, the exact meaning or interpretation of which is not clearly intelligible to the Tenderer.
- e) Received any notices to the tender documents which have been issued in accordance with the CCT's Supply Chain Management Policy.

The CCT will therefore not be liable for the payment of any extra costs or claims arising from the submission of the tender.

2.3 The CCT's undertakings

2.3.1 Respond to requests from the tenderer

2.3.1.1 Unless otherwise stated in the Conditions of Tender, the CCT shall respond to a request for clarification received up to one week (where possible) before the tender closing time stated on the front page of the tender document.

2.3.1.2 The CCT's duly authorised representative for the purpose of this tender is stated on the General Tender Information page above.

2.3.2 Issue Notices

If necessary, the CCT may issue addenda in writing that may amend or amplify the tender documents to each tenderer during the period from the date the tender documents are available until one week before the tender closing time stated in the Tender Data. The CCT reserves its rights to issue addenda less than one week before the tender closing time in exceptional circumstances. If, as a result a tenderer applies for an extension to the closing time stated on the front page of the tender document, the CCT may grant such extension and, shall then notify all tenderers who drew documents.

Notwithstanding any requests for confirmation of receipt of notices issued, the tenderer shall be deemed to have received such notices if the CCT can show proof of transmission thereof via electronic mail, facsimile or registered post.

2.3.3 Opening of tender submissions

2.3.3.1 Unless the two-envelope system is to be followed, CCT shall open tender submissions in the presence of tenderers' agents who choose to attend at the time and place stated in the Conditions of Tender.

Tenders will be opened immediately after the closing time for receipt of tenders as stated on the front page of the tender document, or as stated in any Notice extending the closing date and at the closing venue as stated in the General Tender Information.

2.3.3.2 Announce at the meeting held immediately after the opening of tender submissions, at the closing venue as stated in the General Tender Information, the name of each tenderer whose tender offer is opened and, where possible, the prices indicated.

2.3.3.3 Make available a record of the details announced at the tender opening meeting on the CCT's website (<http://www.capetown.gov.za/en/SupplyChainManagement/Pages/default.aspx>.)

2.3.4 two-envelope system

2.3.4.1 Where stated in the Conditions of Tender that a two-envelope system is to be followed, the CCT shall open only the technical proposal of tenders in the presence of tenderers' agents who choose to attend at the time and place stated in the Conditions of Tender and announce the name of each tenderer whose technical proposal is opened.

2.3.4.2 The CCT shall evaluate the quality of the technical proposals offered by tenderers, then advise tenderers who have submitted responsive technical proposals of the time and place when the financial proposals will be opened. The CCT shall open only the financial proposals of tenderers, who have submitted responsive technical proposals in accordance with the requirements as stated in the Conditions of Tender, and announce the total price and any preference claimed. Return unopened financial proposals to tenderers whose technical proposals were non responsive.

2.3.5 Non-disclosure

The CCT shall not disclose to tenderers, or to any other person not officially concerned with such processes, information relating to the evaluation and comparison of tender offers and recommendations for the award of a contract, until after the award of the contract to the successful tenderer.

2.3.6 Grounds for rejection and disqualification

The CCT shall determine whether there has been any effort by a tenderer to influence the processing of tender offers and instantly disqualify a tenderer (and his tender offer) if it is established that he engaged in corrupt or fraudulent practices.

2.3.7 Test for responsiveness

2.3.7.1 Appoint a Bid Evaluation Committee and determine after opening whether each tender offer properly received:

- a) complies with the requirements of these Conditions of Tender,
- b) has been properly and fully completed and signed, and
- c) is responsive to the other requirements of the tender documents.

2.3.7.2 A responsive tender is one that conforms to all the terms, conditions, and specifications of the tender documents without material deviation or qualification. A material deviation or qualification is one which, in the CCT's opinion, would:

- a) Detrimentially affect the scope, quality, or performance of the goods, services or supply identified in the Specifications,
- b) Significantly change the CCT's or the tenderer's risks and responsibilities under the contract, or
- c) affect the competitive position of other tenderers presenting responsive tenders, if it were to be rectified.

Reject a non-responsive tender offer, and not allow it to be subsequently made responsive by correction or withdrawal of any material deviation or qualification.

The CCT reserves the right to accept a tender offer which does not, in the CCT's opinion, materially and/or substantially deviate from the terms, conditions, and specifications of the tender documents.

2.3.8 Arithmetical errors, omissions and discrepancies

2.3.8.1 Check the responsive tenders for:

- a) The gross misplacement of the decimal point in any unit rate;
- b) Omissions made in completing the Price Schedule; or
- c) Arithmetic errors in:
 - i) line item totals resulting from the product of a unit rate and a quantity in the Price Schedule; or
 - ii) The summation of the prices; or
 - iii) Calculation of individual rates.

2.3.8.2 The CCT must correct the arithmetical errors in the following manner:

- a) Where there is a discrepancy between the amounts in words and amounts in figures, the amount in words shall govern.
- b) If pricing schedules apply and there is an error in the line item total resulting from the product of the unit rate and the quantity, the line item total shall govern and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line item total as tendered shall govern, and the unit rate shall be corrected.
- c) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if Price Schedules apply) to achieve the tendered total of the prices.

Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of the arithmetical error in the manner described above.

2.3.8.3 In the event of tendered rates or lump sums being declared by the CCT to be unacceptable to it because they are not priced, either excessively low or high, or not in proper balance with other rates or lump sums, the tenderer may be required to produce evidence and advance arguments in support of the tendered rates or lump sums objected to. If, after submission of such evidence and any further evidence requested, the CCT is still not satisfied with the tendered rates or lump sums objected to, it may request the tenderer to amend these rates and lump sums along the lines indicated by it.

The tenderer will then have the option to alter and/or amend the rates and lump sums objected to and such other related amounts as are agreed on by the CCT, but this shall be done without altering the tender offer in accordance with this clause.

Should the tenderer fail to amend his tender in a manner acceptable to and within the time stated by the CCT, the CCT may declare the tender as non-responsive.

2.3.9 Clarification of a tender offer

The CCT may, after the closing date, request additional information or clarification from tenderers, in writing on any matter affecting the evaluation of the tender offer or that could give rise to ambiguity in a contract arising from the tender offer, which written request and related response shall not change or affect their competitive position or the substance of their offer. Such request may only be made in writing by the Director: Supply Chain Management using any means as appropriate.

2.3.10 Evaluation of tender offers

2.3.10.1 General

2.3.10.1.1 The CCT may reduce each responsive tender offer to a comparative price and evaluate them using the tender evaluation methods and associated evaluation criteria and weightings that are specified in the Conditions of Tender. The following tender evaluation procedures will be followed:

- a) The tenderer will be evaluated separately for each region.
- b) Tender evaluation points scored for each region shall be ranked in descending order and the highest ranked tenderer for the Region shall be awarded as the "Winner" for that region. The remaining tenderers shall be awarded as Alternatives for that region based on their ranking order.
- c) Each tenderer will be limited to **one (1) Region as a Winner**.
- d) Should a tenderer be ranked the highest in more than one region then the City shall award the tenderer as the Winner in their region of preference as indicated in Schedule F.13C. For the remaining regions where the tenderer has been ranked as the highest, CCT shall consider the second highest ranked tenderer to be the Winner for the region. This process shall be repeated to ensure that tenderers are only limited to one (1) region as the winner.

2.3.10.1.2 For evaluation purposes only, the effects of the relevant contract price adjustment methods will be considered in the determination of comparative prices as follows:

- a) If the selected method is based on bidders supplying rates or percentages for outer years, comparative prices would be determined over the entire contract period based on such rates or percentages.
- b) If the selected method is based on a formula, indices, coefficients, etc. that is the same for all bidders during the contract period, comparative prices would be the prices as tendered for year one.
- c) If the selected method is based on a formula, indices, coefficients, etc. that varies between bidders, comparative prices would be determined over the entire contract period based on published indices relevant during the 12 months prior to the closing date of tenders.
- d) If the selected method includes an imported content requiring rate of exchange variation, comparative prices would be determined based on the exchange rates tendered for the prices as tendered for year one. The rand equivalent of the applicable currency 14 days prior to the closing date of tender will be used (the CCT will check all quoted rates against those supplied by its own bank).
- e) If the selected method is based on suppliers' price lists, comparative prices would be the prices as tendered for year one.
- f) If the selected method is based on suppliers' price lists and / or rate of exchange, comparative prices would be determined as tendered for year one whilst taking into account the tendered percentage subject to rate of exchange (see sub clause (d) for details on the calculation of the rate of exchange).

2.3.10.1.3 Where the scoring of functionality forms part of a bid process, each member of the Bid Evaluation Committee must individually score functionality. The individual scores must then be interrogated and calibrated if required where there are significant discrepancies. The individual scores must then be added together and averaged to determine the final score.

2.3.10.2 Decimal places

Score financial offers, preferences and functionality, as relevant, to two decimal places.

2.3.10.3 Scoring of tenders (price and preference)

2.3.10.3.1 Points for price will be allocated in accordance with the formula set out in this clause based on the price per item / rates as set out in the **Price Schedule (Section 7)**:

- Based on the sum of the prices/rates in relation to a typical project/job.

2.3.10.3.2 Points for preference will be allocated in accordance with the provisions of **Preference Schedule** and the table in this clause.

2.3.10.3.3 The terms and conditions of **Preference Schedule** as it relates to preference shall apply in all respects to the tender evaluation process and any subsequent contract.

2.3.10.3.4 Applicable formula:

The 90/10 price/preference points system will be applied to the evaluation of responsive tenders above a Rand value of R50'000'000 (all applicable taxes included), whereby the order(s) will be placed with the tenderer(s) scoring the highest total number of adjudication points.

Price shall be scored as follows:

$$Ps = 90 \times \left(1 - \frac{(Pt - Pmin)}{Pmin}\right)$$

Where: Ps is the number of points scored for price;
Pt is the price of the tender under consideration;
Pmin is the price of the lowest responsive tender.

Preference points shall be based on the Specific Goal as per below:

Table B2: Awards above R50 mil (VAT Inclusive)

#	Specific goals allocated points	Preference Points (90/10) <i>Above R50 mil</i>	Evidence	Additional Guidance
<i>Persons, or categories of persons, historically disadvantaged- (HDI) by unfair discrimination on the basis of</i>

*Ownership: main tendering entity

2.3.10.5 Risk Analysis

Notwithstanding compliance with regard to any requirements of the tender, the CCT will perform a risk analysis in respect of the following:

- reasonableness of the financial offer
- reasonableness of unit rates and prices
- the tenderer's ability to fulfil its obligations in terms of the tender document, that is, that the tenderer can demonstrate that he/she possesses the necessary professional and technical qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, capacity, experience, reputation, personnel to perform the contract, etc.; the CCT reserves the right to consider a tenderer's existing contracts with the CCT in this regard
- any other matter relating to the submitted bid, the tendering entity, matters of compliance, verification of submitted information and documents, etc.

The conclusions drawn from this risk analysis will be used by the CCT in determining the acceptability of the tender offer.

No tenderer will be recommended for an award unless the tenderer has demonstrated to the satisfaction of the CCT that he/she has the resources and skills required.

2.3.11 Negotiations with preferred tenderers

The CCT may negotiate the final terms of a contract with tenderers identified through a competitive tendering process as preferred tenderers provided that such negotiation:

- Does not allow any preferred tenderer a second or unfair opportunity;
- Is not to the detriment of any other tenderer; and
- Does not lead to a higher price than the tender as submitted.

If negotiations fail to result in acceptable contract terms, the City Manager (or his delegated authority) may terminate the negotiations and cancel the tender, or invite the next ranked tenderer for negotiations. The

original preferred tenderer should be informed of the reasons for termination of the negotiations. If the decision is to invite the next highest ranked tenderer for negotiations, the failed earlier negotiations may not be reopened by the CCT.

Minutes of any such negotiations shall be kept for record purposes.

The provisions of this clause will be equally applicable to any invitation to negotiate with any other tenderers.

In terms of the CCT's SCM Policy, tenders must be cancelled in the event that negotiations fail to achieve a market related price with any of the three highest scoring tenderers.

2.3.12 Acceptance of tender offer

Notwithstanding any other provisions contained in the tender document, the CCT reserves the right to:

2.3.12.1 Accept a tender offer(s) which does not, in the CCT's opinion, materially and/or substantially deviate from the terms, conditions, and specifications of the tender document.

2.3.12.2 Accept the whole tender or part of a tender or any item or part of any item or items from multiple manufacturers, or to accept more than one tender (in the event of a number of items being offered), and the CCT is not obliged to accept the lowest or any tender.

2.3.12.3 Accept the tender offer(s), if in the opinion of the CCT, it does not present any material risk and only if the tenderer(s):

- a) is not under restrictions, has any principals who are under restrictions, or is not currently a supplier to whom notice has been served for abuse of the supply chain management system, preventing participation in the CCT's procurement,
- b) can, as necessary and in relation to the proposed contract, demonstrate that he or she possesses the professional and technical qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience and reputation, expertise and the personnel, to perform the contract,
- c) has the legal capacity to enter into the contract,
- d) is not insolvent, in receivership, under Business Rescue as provided for in chapter 6 of the Companies Act, 2008, bankrupt or being wound up, has his affairs administered by a court or a judicial officer, has suspended his business activities, or is subject to legal proceedings in respect of any of the foregoing, complies with the legal requirements, if any, stated in the tender data, and
- e) is able, in the opinion of the CCT, to perform the contract free of conflicts of interest.

If an award cannot be made in terms of anything contained herein, the CCT reserves the right to consider the next ranked tenderer(s).

2.3.12.4 The CCT reserves the right not to make an award, or revoke an award already made, where the implementation of the contract may result in reputational risk or harm to the CCT as a result of (inter alia):

- a) reports of poor governance or unethical behaviour, or both;
- b) association with known notorious individuals and family of notorious individuals;
- c) poor performance issues, known to the CCT;
- d) negative media reports, including negative social media reports;
- e) adverse assurance (e.g. due diligence) report outcomes; and
- f) circumstances where the relevant vendor has employed, or is directed by, anyone who was previously employed in the service of the state (as defined in clause 1.53 of the SCM Policy), where the person is or was negatively implicated in any SCM irregularity.

2.3.12.5 The CCT reserves the right to nominate an StandbyBidder at the time when an award is made and in the event that a contract is terminated during the execution thereof, the CCT may consider the award of the contract, or non-award, to the Standby Bidder in terms of the procedures included its SCM Policy.

2.3.13 Prepare contract documents

2.3.13.1 If necessary, revise documents that shall form part of the contract and that were issued by the CCT as part of the tender documents to take account of:

- a) Notices issued during the tender period,
- b) Inclusion of some of the returnable documents, and
- c) Other revisions agreed between the CCT and the successful tenderer.

2.3.13.2 Complete the schedule of deviations attached to the form of offer and acceptance, if any.

2.3.14 Notice to successful and unsuccessful tenderers

2.3.14.1 Before accepting the tender of the successful tenderer the CCT shall notify the successful tenderer in writing of the decision of the CCT's Bid Adjudication Committee to award the tender to the successful tenderer. No rights shall accrue to the successful tenderer in terms of this notice

2.3.14.2 The CCT shall, at the same time as notifying the successful tenderer of the Bid Adjudication Committee's decision to award the tender to the successful tenderer, also give written notice to the other tenderers informing them that they have been unsuccessful.

2.3.15 Provide written reasons for actions taken

Provide upon request written reasons to tenderers for any action that is taken in applying these Conditions of Tender, but withhold information which is not in the public interest to be divulged, which is considered to prejudice the legitimate commercial interests of tenderers or might prejudice fair competition between tenderers.

C.2 FORM OF OFFER AND ACCEPTANCE

TENDER NO. 287S/2024/25: CLEANING OF SEWER PUMP STATION WET WELLS (CITY WIDE)

C.2.1 Offer (To Be Completed by the Tenderer as Part of Tender Submission)

The tenderer, identified in the offer signature table below,

HEREBY AGREES THAT by signing the *Form of Offer and Acceptance*, the tenderer:

1. confirms that it has examined the documents listed in the Index (including Schedules and Annexures) and has accepted all the Conditions of Tender;
2. confirms that it has received and incorporated any and all notices issued to tenderers issued by the CCT;
3. confirms that it has satisfied itself as to the correctness and validity of the tender offer; that the price(s) and rate(s) offered cover all the goods and/or services specified in the tender documents; that the price(s) and rate(s) cover all its obligations and accepts that any mistakes regarding price(s), rate(s) and calculations will be at its own risk;
4. offers to supply all or any of the goods and/or render all or any of the services described in the tender document to the CCT in accordance with the:
 - 4.1 terms and conditions stipulated in this tender document;
 - 4.2 specifications stipulated in this tender document; and
 - 4.3 at the prices as set out in the **Price Schedule**.
5. accepts full responsibility for the proper execution and fulfilment of all obligations and conditions devolving on it in terms of the Contract.

FORM OF OFFER AND ACCEPTANCE (continued)

TENDER NO: 287S/2024/25: CLEANING OF SEWER PUMP STATION WET WELLS (CITY WIDE)

C.2.2 Acceptance (To Be Completed by the CCT)

By signing this part of this *Form of Offer and Acceptance*, the CCT accepts the tenderer's (if awarded the Supplier's) offer. In consideration thereof, the CCT shall pay the Supplier the amount due in accordance with the conditions of contract. Acceptance of the Supplier's offer shall form an agreement between the CCT and the Supplier upon the terms and conditions contained in this document.

The terms of the agreement are contained in the Contract (as defined) including drawings and documents or parts thereof, which may be incorporated by reference.

Deviations from and amendments to the documents listed in the tender data and any addenda thereto as listed in the *Tender Returnable Documents* as well as any changes to the terms of the offer agreed by the tenderer and the CCT during this process of offer and acceptance, are contained in the *Schedule of Deviations* attached to and forming part of this *Form of Offer and Acceptance*. No amendments to or deviations from said documents are valid unless contained in the *Schedule of Deviations*.

The Supplier shall within 2 (two) weeks after contract commencement contact the CCT to arrange the delivery of any securities, bonds, guarantees, proof of insurance and any other documents to be provided in terms the *Special Conditions of Contract*. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation / breach of the agreement.

Unless indicated otherwise in the Deviation Schedule, this agreement comes into effect on the Commencement Date, being the date upon which the Supplier confirms receipt from the CCT of 1 (one) complete, signed copy of the Contract, including amendments or deviations contained in the *Schedule of Deviations* (if any).

C.2.3 Schedule of Deviations (To be Completed by the CCT upon Acceptance)

Notes:

1. The extent of deviations from the tender documents issued by the CCT before the tender closing date, is limited to those permitted in terms of the conditions of tender.
2. A tenderer's covering letter shall not be included in the final Contract document. Should any matter in such letter, which constitutes a deviation as aforesaid, become the subject of agreements reached during the process of offer and acceptance, the outcome of such agreement shall be recorded here.
3. Any other matter arising from the process of offer and acceptance either as a confirmation, clarification or change to the tender documents and which it is agreed by the Parties to become an obligation of the Contract, shall be recorded here.
4. Any change or addition to the tender documents arising from the above agreements and recorded here, shall form part of the Contract.

Pricing Instructions:

- 5.1 State the rates and prices in Rand unless instructed otherwise in the Conditions of Tender.
- 5.2 Include in the rates, prices, and the tendered total of the prices (if any) all duties, taxes (except Value Added Tax (VAT), and other levies payable by the successful tenderer, such duties, taxes and levies being those applicable 14 days before the closing time stated in the General Tender Information.
- 5.3 All prices tendered must include all expenses, disbursements and costs (e.g. transport, accommodation etc.) that may be required for the execution of the tenderer's obligations in terms of the Contract, and shall cover the cost of all general risks, liabilities and obligations set forth or implied in the Contract as well as overhead charges and profit (in the event that the tender is successful). All prices tendered will be final and binding.
- 5.4 All prices shall be tendered in accordance with the units specified in this schedule.
- 5.5 Where a value is given in the Quantity column, a Rate and Price (the product of the Quantity and Rate) is required to be inserted in the relevant columns.
- 5.6 The successful tenderer is required to perform all tasks listed against each item. The tenderer must therefore tender prices/rates on all items as per the section in the Price Schedule. **An item against which no rate is/are entered, or if anything other than a rate or a nil rate (for example, a zero, a dash or the word "included" or abbreviations thereof) is entered against an item, it will also be regarded as a nil rate having been entered against that item, i.e. that there is no charge for that item. The**

Tenderer may be requested to clarify nil rates, or items regarded as having nil rates; and the CCT may also perform a risk analysis with regard to the reasonableness of such rates.

- 5.7 Provide fixed rates and prices for the duration of the contract that are not subject to adjustment except as otherwise provided for in clause 17 of the Conditions of Contract and as amplified in the Special Conditions of Contract.
- 5.8 In order to be considered responsive for this tender, the tenderers are required to price for all regions when tendering.

C.5 SPECIFICATION(S)

1. EMPLOYER'S OBJECTIVE

The Service Provider(s) is to undertake the cleaning operation for the sewer pump station wet wells, the removal of the debris from the wet wells and placement into water-tight tanks when required, the transportation of this sewage debris to the designated waste disposal site and dispose of the sewage debris as prescribed by current legislation.

Tenderer shall take note that the term Council Representative referred herein this framework tender refers to the following City staff;

- Regional Operations Manager
- Depot Manager (Pump Station Manager)

2. DESCRIPTION OF WORKS (SERVICE)

The City of Cape Town has ±432 sewer pump stations in four region, which require cleaning on an adhoc basis through the removal of the sewage debris that tends to accumulate in the wet wells. Service Provider(s) will be required to assist with routine and emergency cleaning of the sewer pump station wet wells when Council resources are not available. These pump stations are situated at various locations through-out the municipal area which have been divided into four regions. The sewage debris removed from the wet wells must be safely transported to the Vissershok Waste Management Facility for disposal purposes.

3. SERVICING SPECIFICATIONS FOR CLEANING OF SEWER PUMP STATION WETWELLS

3.1 Nature of the works

The required cleaning service consists include but not limited to the removal of sewage silt/debris from sewer pump station wet wells is hazardous, complicated and dirty and Service Provider(s) will be required to take all precautions to protect their workers, other site staff and the general public while working on site.

3.1.1 Composition of the works

The works comprises:

- the cleaning of sewer pump station wet wells;
- the cleaning of sewer pump station wet wells in emergency situations, this includes weekends, public holidays and after hours;
- the placement of sewage debris into water-tight tanks
- transportation of the sewage debris from the pump station to the disposal site
- the disposal of all the sewage debris at Vissershok Waste Management Facility.
- high pressure cleaning of wet wells
- control of sewage by over-pumping.
- emergency call-out to clear blocked sewer pipes in the event of emergencies. Subject to prior approval from the Contracts Manager.
- cleaning of sewer sand traps in the event of emergencies -Subject to prior approval from the Contracts Manager.
- Routine maintenance of sewer infrastructure - Subject to prior approval from the Contracts Manager

3.1.2 Location of the works

The location of the works will be at the sewer pump station sites and the sewer related reticulation infrastructure which are located City Wide.

3.1.3 Pump station cleaning program

Service Provider(s) will be provided with a program(s) for the cleaning of sewer pump station wet wells. However, the clean-out programs for the wet wells may vary and the sequence and clean-out cycles may be adjusted depending on the circumstances and as per the Council Representative's instruction. The Service Provider(s) will be required to complete the wet well clean-out within the time limit specified for the operational task and on the day(s) as stipulated on the program unless otherwise permitted by the Council Representative.

Should severe inclement weather be expected on the day(s) that the clean-out task is scheduled, the Service Provider(s) must make arrangements with the Council Representative to re-schedule the task. It is anticipated that the smaller pump stations wet wells can be cleaned in less than a day whereas the larger pump station wet wells may take more than a day.

Service Provider(s) will be deemed to have familiarised themselves with site conditions and all restrictions which may affect their provision of a service contract in the various areas prior to submission of this tender.

4. Planned work

Planned works will be executed from Monday – Friday from 07h30 until 16h30 as required by the City.

5. Emergency work

5.1 Cleaning of Wet wells, emergency work and other scope related works

a) Wet well Cleaning

- 1) The cleaning operation must be performed with Combination Super Sucker Units.
- 2) The successful Service Provider(s) must have sufficient equipment available to undertake the cleaning operation within the stipulated time limit as stated by the Council Representative to complete the task.
- 3) The apparatus and methods used to clean the various wet wells shall not cause any damage to pipes, manholes, property or fixtures and any damage as may be caused will be repaired by the Council at the Service Provider's expense.
- 4) The Council Representative may instruct the Service Provider(s) to cease work if the cleaning method is deemed to be unsatisfactory, a danger or inconvenience to the public and/or surroundings.
- 5) The Council Representative's decision as to whether a wet well is adequately cleaned will be final and will be based on whether it is reasonable and practical to remove any additional debris.

(b) The Minimum Requirements of each Combination Super Sucker Unit:

- 1) The debris tank with a capacity of not less than 5m³
- 2) The free airflow of 1000 litres per second capable of continuous running
- 3) The flexible suction hose must not be smaller than 150mm (6") diameter
- 4) Wet or dry material removed from the wet well should be contained in a sealed container. (Debris tank)
- 5) Discharge from the debris tank will be at the rear by means of hydraulically opened door, to a minimum angle of 50 degrees.
- 6) A jetting equipment capable of providing a minimum jetting pressure of at least 120Bar at 250l/min
- 7) The jetting hose must be a minimum of 25mm diameter with a minimum operational length of 120m
- 8) The jetting hose shall be wound unto a hose reel, which is power driven in both the clockwise and anti-clockwise directions
- 9) One of the three required combination super sucker units per area must have a blower silencer or exhaustor to maintain 75 decibels at 7 meter range.

(a) Other requirements

The Service Provider must have a pump available to aid with the removal of excess liquid if required. The pump must be a vortex flow type pump, with 150mm branch, flow rate of at least 100 l/s, 24KW power output, 100mm solids handling, 9.1m max lift, at least 20m head, auto prime and be capable of dry running. Suction hose of at least 10m and 120m layflat to be provided.

Kanaflex or similar 150mm diameter and 10m length of suction hose. Suction hose to be fitted with a 40mm strainer.

(b) Manual labour

The use of manual labour ONLY will not be permitted Due to the size of the structures, the volume of sewage debris to be removed, the restrictive nature and access to the structures and the time required to complete the work, the use of manual labour only is not permitted. However, some manual labour will be required for setting up of equipment and managing machinery.

c) Resources

The Service Provider must provide sufficient resources to accomplish the clean-out task within the stipulated time as per the Council Representative's instruction. The Service Provider must take cognisance of notes of section 2.2 (minimum scoring functionality and schedule F.13) in this regard. The minimum staffing requirement per Combination Super Sucker Unit is 1 x Supervisor/ Driver and 2 x Operator/s Assistants.

5.2 Notification to Council Supervisory Staff

The Service Provider(s) shall be required to advise the Council Representative of the time of arrival on site of the cleaning team to enable the Council Representative to monitor the cleaning operation. The Service Provider shall complete and submit the daily worksheet at every cleaning operation.

5.3 Shutting off incoming sewage flows and removal of excess liquid

The Service Provider(s) shall await confirmation that the shutoff procedure has been completed by the City's operational team. In the event of defective equipment at the pump station, the Service Provider(s) will be required to provide alternative equipment, such as bladders / inflatable stoppers, to be inserted into the incoming pipes to shut off the sewage inflow into the pump station.

NOTE: Only the City of Cape Town's officials will be allowed to operate equipment belonging to the Council. Removal of excess sewage liquid from inside the wet wells may be by means of operating the pumps which is the responsibility of the Service Provider.

5.4 Cleaning Pump Station Wet well and Reinstating Flows

- a) The Service Provider will not be allowed on the site without a duly completed Work Permit
- b) After removing all excess sewage liquid, the sewage debris must be removed from the wet well and placed into closed or custom made vehicles or containers for the transportation of the sewage debris to the Vissershok Waste Management Facility.
- c) Once all the debris has been removed from the wet well, the walls of the structure must be cleaned using high pressure water jetting to remove all dirt and grime.
- d) For all excess debris, sand, sludge, and screenings that cannot be loaded directly onto a Combination Super Sucker Unit, the Service Provider(s) must make available 10m³ sealed containers on the site which must be removed to the disposal site by the end of the working day.
- e) When the pump station wet well is clean and the walls have been cleaned, the flow must be reinstated by activating the valves, the covers shall be closed, locked where necessary and the area tidied up.

- f) The Council Representative and/or operators will be responsible for activating all the valves unless permission has been granted to the Service Provider(s) to carry out the function.
- g) The Service Provider(s) shall be responsible for ensuring that the backing up of sewage does not cause flooding or nuisance to surrounding or low-lying areas.
- h) Bladders / Inflatable stoppers may be needed for blocking off of flows on an as and when required basis. The use of bladders / inflatable stoppers must be signed off by the Council Representative. The provision of bladders / inflatable stoppers will be for pipe ranges as per the Pricing Schedule.
- i) Due to the dangers attached to the use of bladders / inflatable stoppers, the Service Provider(s) shall cover this aspect in both the Health and Safety Plan and in the Detailed Method Statement.
- j) The Service Provider(s) shall notify the Council Representative immediately of any defects discovered in the wet well during the course of performing the clean-out works.
- k) The Service Provider shall make sure that all shut-off valves activated to block the sewage inflow to the wet well are open when the cleaning operation is completed.
- l) The Service Provider shall exercise the utmost care in order to ensure that in so far as possible all solid material dislodged from the wet wells is removed and carted away to the Vissershok Waste Management Facility.

5.5 Site Clearance

The Service Provider(s) shall always make sure that the site is thoroughly clean and free of bad odours/smells that may affect the nearby community. This is especially important in areas where the pump stations are surrounded by residential or other properties.

The Service Provider(s) shall on departure from a pump station facility always make sure that all covers are properly closed and that gates are locked before leaving site.

5.5.1 Signing off of Cleaning Task

The Service Provider(s) shall, prior to departure from site, advise the relevant Council Representative of completion of the cleaning task. The Council Representative will have sole discretion if the work has been completed satisfactorily and will be required to sign off the worksheet, **Annexure I** for the cleaning task. **Failure to obtain the necessary signature will result in no payment for this task.**

5.6 Vaccination certificates

The successful Service Provider(s) will be required to provide proof of applicable vaccination certificates for all staff involved with the cleaning task before issuing of any purchase order, as preventative measure, to ensure the health and safety of all field employees.

6. TRANSPORTATION AND DISPOSAL OF SEWAGE DEBRIS MATERIAL

6.1 Arrangements and Organising

The Service Provider(s) will be required to arrange for tipping of all sewage debris with the management of the **Vissershok Waste Management Facility (Pty) Ltd, Frankdale Road, Milnerton**. The Service Provider(s) will be responsible for organising the disposal of the sewage/silt debris material at the waste site including all permits and fees, access and times of tipping, etc, which may include work undertaken after hours or over week-ends.

6.2 Transpiration of Material

Cost for transport will only be reimbursed from the pump station site to the waste facility. All Combination Super Sucker Unit trucks are required to go directly to the waste facility after the cleaning operation and logbooks must be available at all times upon request.

6.3 Dumping at the Waste Disposal Site – Vissershok Waste Management Facility

All material taken from the pump station wet wells is to be completely removed, transported to and dumped at Vissershok Waste Management Facility, Frankdale Road, Milnerton which is situated off the N7 on the Frankdale Road.

The Service Provider is responsible to obtain the **WIR (Waste Information Regulation)** number from the Council Representative in the District in which the services are being rendered. This is a requirement by the Department of Environmental Affairs and Development Planning for all waste generators and waste transporters.

This site is only open between the hours 07:45 and 16:00 – Monday to Friday and 07:30 to 15:30 on Saturdays

NAME OF WASTE DISPOSAL SITE	LOCATION	CONTACT NUMBER(S)
Vissershok Waste Management Facility (Pty) Ltd	Off the N7, on the Frankdale Road	(021) 557 3309 (021) 556 3593

6.4 Spillage during transportation

Please note that any spillage of transported material on public roads will result in heavy traffic fines as well as clearing up costs and will be for the Service Providers expense.

6.5 Storage overnight

No material may be stored overnight on site. Debris removed from site must be transported in watertight vessels to prevent spillage. Areas where waste material has been spilt shall be cleared up, washed and disinfected with chloride of lime.

6.6 Cost of tipping

The cost of tipping the material at Vissershok Waste Management Facility must be included in the Pricing Schedule. All disposal charges will be for the Service Provider's account who will be required to supply proof of tipping by submitting copies of tipping slips with their monthly claim certificates.

6.7 Illegal dumping

Service Provider(s) who are found illegally dumping material or leaving material on site will be fined as per current City of Cape Town By-Laws and/or National Legislation. **Illegal dumping must be reported to the Call Centre 086 010 3089.**

Penalties of R3000 will be imposed if the Service Provider is found to be illegally dumping.

7. STANDARD OF WORKMANSHIP

7.1 Personnel requirements

The Supervisor(s) shall receive and execute, on behalf of the Service Provider(s), any directions and instructions from the Council's Representative.

The Supervisor(s) is to be constantly on site at the works and shall give their whole time to the Superintendent of the works.

In the event that the nominated Supervisor and/or Operator as submitted indicated with this tender are changed, the replacement of such personnel must conform to the tender specifications and the Council Representative must approve the replacement appointment in writing.

The service provider is to ensure that a supervisor and a minimum of 2 operators are available with one combination unit at all times depending on the labour requirements and size of the pump station wet well to be serviced.

7.2 Sub-contracting

No sub-contracting of the main cleaning operation will be permitted. The successful Service Provider(s) must provide all the resources, equipment and transportation to perform the activities required to clean the various pump station wet wells. In exceptional circumstances additional resources may be obtained with the approval of the Contracts Manager.

7.3 Identification and Uniforms

Service Provider(s) shall provide all their staff with identification cards, with their name, photo, telephone and identification number and require them to carry the said identification cards at all times for monitoring purposes. When requested to do so by the Council's representative the Service Provider(s) shall submit their staff identification cards for inspection.

Service Provider(s) shall provide a readily recognizable, level two type (minimum) bright / fluorescent orange, red-orange or yellow in colour with reflective vests (as indicated in Chapter 13 of Volume 2 of the South African Road Traffic Signs Manual SARTSM) bibs with the Service Provider(s) name clearly displayed, to all its workers to be worn at all times when performing works for this contract, so that they can be easily identified and their performance can be readily monitored. Bibs shall be replaced as they become worn or damaged and on, at least, a semi-annual basis.

8. CONTROL AND ACCOMODATION OF TRAFFIC

The Service Provider(s) shall provide all road signs, barriers, flagmen, warning signs, lights, or any other measures required by the Council's Representative, Traffic Control Branch or the relevant Roads Branch District Manager. Unless otherwise required he/she shall abide by the requirements of the South African Road Traffic Signs Manual (SARTSM) – Volume 2 – Chapter 13. All of the Service Provider's staff assisting with traffic control/accommodation will be conversant with the above legislation.

9. VEHICLES, PLANTS AND EQUIPMENT

NOTE: VEHICLES IN THIS SECTION REFERS TO COMBINATION SUPER SUCKER UNITS

9.1 Condition of vehicles, plant and equipment

The vehicles, plant and equipment provided by the Service Provider(s) must be in a good working condition at all times and the Council Representative will have sole discretion if the working condition of the vehicles, plant and equipment is satisfactorily and the Service Provider(s) will be required to replace non-working or defective resources.

9.2 Roadworthy, license and identification

All vehicles to be used for this contract are to be roadworthy and licensed for use on public roads at all times and must make provision for the safe and lawful transportation of workers. Those vehicles used to transport debris removed from the sewer pump station wet wells must be able to do so in a safe and non-offensive manner and must have the Service Provider's name and telephone number prominently displayed. All vehicles to be used for this contract must conform to the Road Traffic Act, Act 93 of 1996. Successful tenderers will be required to submit copies of proof of licensing and ownership at contractual stage. In the event where the Contractor leases the plant, proof of lease agreement shall be provided at contractual stage and shall comply with the above Road Traffic Act, Act 93 of 1996.

9.3 Performance and Mechanical Breakdown

The Service Providers vehicles and equipment used for performing services shall be adequate to perform the services required by the tender, as may reasonably be determined by the Council's representative from time to time. As the vehicles and equipment become fully depreciated or reach the end of their useful lifespan, the Service Provider shall immediately purchase, rent, or lease vehicles and equipment

to satisfy such requirements or replace such retired vehicles and equipment.

All plant and equipment that is power operated shall be maintained in a clean and serviceable condition.

Any mechanical breakdown of plant shall receive attention as soon as possible after the occurrence. When repairs cannot be effected within a reasonable time, the faulty equipment shall be removed from the site and replaced by serviceable equipment within 2 hours. The Council's Representative must be notified when removal of equipment occurs. Where vehicles, plant, machinery, equipment and containers are removed from site due to breakdown or other incident, example strike action, the Council's Representative must be notified as soon as possible after the removal.

The Service Provider is to provide a replacement Combination Super Sucker Unit within 24Hrs of breakdown to the required site, should a breakdown of the vehicle occur. Failure to do so will lead to a dissatisfaction notice being implemented or raised against the Service Provider by The City of Cape Town.

Service Providers shall keep all vehicles and equipment used for performing services in good repair, appearance and sanitary condition. Each vehicle shall have at least one broom and shovel at all times to clean up solid waste that may be spilled or otherwise scattered during the process of collection. All lights, horns, warning devices, mufflers, fuel tanks and emission controls on the said vehicles and equipment shall be kept operable at all times, with an average fleet downtime of no more than 24 hours.

9.4 Registration and Operation

Service Provider's vehicles and equipment shall be registered by the Service Provider and are to be licensed and operated in accordance with the Road Traffic Act, Act 29 of 1989 and current Road Traffic Regulations and shall operate in compliance with all applicable central, provincial, and local laws and regulations.

All vehicles and equipment shall be operated by qualified and licensed operators, so as not to harm human health or the environment. All vehicles shall be sufficiently secure so as to prevent any spilling or littering of solid waste and/or leakage of fluid. No vehicles shall be wilfully overloaded.

9.5 Location of all vehicles, plant and equipment

The Service Provider(s) shall be required to advise the Council's Representatives monitoring this contract of the location of all vehicles, plant and equipment which is being used for this contract, when requested to do so, and provide substantiated proof of this data which could be used for auditing purposes.

9.6 Environmental

All vehicles and equipment shall meet environmental emission requirements and the noise level during operations shall not exceed seventy-five (75) decibels at a distance of seven meters above the ground.

9.6.1 Management of the environment

The Service Provider shall comply in all respects with the requirements outlined under the City of Cape Town's Environmental Management Programme (EMPr) which is attached hereto under Annexure I.

The Service Provider shall confine his operation to as small area of the site as may be practical for the purpose of cleaning works to limit the impact or interference to the surrounding environment.

Only those trees and shrubs directly affected by the works, and such others as the Purchaser may direct in writing, shall be cut down and stumped. The natural vegetation, grassing and other plants shall not be disturbed other than in areas where it is essential for the execution of the work or where directed by the Purchaser.

All costs incurred by the Service Provider in complying with the requirements of the EMPr (including root-cutting equipment) shall be deemed to be included in the tendered rates and no separate payment shall be made in this regard. Should the Service Provider fail to comply with the provisions of the EMP then the Service Provider shall be held liable for any penalties that may be imposed.

10) AVAILABLE FACILITIES

10.1 Facilities

No toilet, water, electricity or storage facilities are available and Service Provider(s) are to make their own arrangements with regard thereto.

10.2 Water Supply

The Service Provider(s) shall make their own arrangements for the supply of water for the cleaning operations. Only Council metered standpipes shall be used and these can be obtained from the Waterworks Depots against a deposit. Normal charges will be levied to the contractor for water consumption.

10.3 Watching, Fencing and Lighting

The Contractor shall provide and maintain at his own cost all lights, guards, fencing and watching necessary for the safety, health, wellbeing and convenience of the public. No open sewer manholes are to be left unattended. Any work falling outside the fenced pump station perimeter shall be cordoned off and made safe.

11) HEALTH AND SAFETY

11.1 Occupational Health and Safety Act 1994 (Act no. 85 of 1993)

Service Provider(s) shall comply with the Occupational Health and Safety Act 1994 (Act no. 85 of 1993) and in particular with its Construction Regulations of 2014.

All the work included in this Contract shall, for the purpose of complying with the OHS Act and the Construction regulations, be deemed to be "construction work".

To comply with the requirements of legislation, Schedule 10: Occupational Health and Safety must be completed. The schedule will take effect when the contract is awarded to the successful Tenderer(s).

The Service Provider(s) shall apply all the relevant safety regulations and requirements to the works.

Service Provider(s) who will be working with live sewers shall be required to observe those sections of the Act and Regulations which deal with working in confined spaces and dealing with hazardous gases. All confined spaces and the wet well shall be tested for hazardous gases on a continuous basis to ensure worker safety. Service Provider(s) shall ensure that the necessary functional gas testing equipment is available on site at all times and breathing apparatus shall be available as and when required.

11.2 Factories, Machinery and Building Work Act of 1941

All equipment provided and used and all work carried out under this Contract shall meet the requirements of the Occupational Health Safety Act and those Regulations under the Factories, Machinery and Building Work Act of 1941 still remaining in force.

11.3 Personnel Protective Equipment

Service Provider(s) shall provide all their workers with all the necessary protective clothing for use at all times which facilitates their work and limits their direct contact with the sewage debris/silt material and shall ensure that, at least, the following list of personnel protective equipment is in general use:

- Safety harnesses for working in confined spaces.
- Breathing apparatus for toxic gases and oxygen deficient areas.
- Hard hats
- Calibrated Gas detectors with proof of valid certification
- Gloves for cut resistance.
- Ear muffs or ear plugs for noise from machines.
- Overalls for body protection

- Spare overall and clothing in cases of contamination. Safety shoes/boots with steel toe caps for foot protection.
- Waders and waterproof jackets.
- Portable Fans
- Hand sanitizers, towels and necessary body cleaning equipment in cases of contamination

11.4 Health and Safety Plan

The tenderer shall submit a **Health and Safety Plan** specific to pump station wet well cleaning operations. It must cover all the requirements as listed below: The Service Provider shall make and show adequate provision for the cost of adequate and required health and safety measures during the cleaning process as required within the OHS Act 1994 (**Act no. 85 of 1993**).

The Service Provider will be required to prepare and submit a Health and Safety File to the City's Health and Safety Agent, including a Health and Safety Plan, upon commencement of the framework contract in terms of Regulation 7 of the Occupational Health and Safety Act, 85 of 1993, Construction Regulations 2014.

No works may commence on site until the Service Provider's Health and Safety File has been approved. The approved file shall cover all works under the framework contract and the Service Provider shall ensure a copy of the approved Health and Safety File at all active sites. The City's Health and Safety Agent shall conduct a minimum of two (2) monthly site visits which includes site audits.

11.5 Health and Safety Policy

As contained in OHS Act Section 7, the Principal Contractor shall submit and maintain in the health and safety file a Health and Safety Policy signed by the current Operations Manager of the company. Such policy must outline the health and safety objectives of the organisation, how the said objectives will be achieved and implemented by the company and who shall be responsible for such implementation.

11.6 Project Details

The site of the proposed work is situated City wide in Cape town, Western Cape. The commencement date, project details can only be issued and confirmed at contractual stage.

11.6.1 Nature of the works:

The nature of the work in dealing with the removal of sewage silt/debris from sewer pump station wet wells is hazardous, complicated and dirty and Service Provider(s) will be required to take all precautions to protect their workers, other site staff and the general public.

Overview of the Works:

- 11.6.1.1 the cleaning of sewer pump station wet wells;
- 11.6.1.2 the placement of sewage debris into water-tight tanks
- 11.6.1.3 transportation of the sewage debris from the pump station to the disposal site
- 11.6.1.4 the disposal of all the sewage debris at Vissershok Waste Management Facility.
- 11.6.1.5 high pressure cleaning of wet well

Important factors to consider:

- The Service Provider(s) shall be responsible for ensuring that the backing up of sewage does not cause flooding or nuisance to surrounding or low-lying areas.
- Bladders / Inflatable stoppers may be needed for blocking off of flows on an as and when required basis. The use of bladders / inflatable stoppers must be signed off by the Council Representative. The provision of bladders / inflatable stoppers will be for pipe ranges as per the Pricing Schedule.
- Due to the dangers attached to the use of bladders / inflatable stoppers, the Service Provider(s) shall cover this aspect in both the Health and Safety Plan and in the Detailed Method Statement.

- The Service Provider(s) shall notify the Council Representative immediately of any defects discovered in the wet well during the course of performing the clean-out works.
- The Service Provider shall make sure that all shut-off valves activated to block the sewage inflow to the wet well are open when the cleaning operation is completed.
- The Service Provider shall exercise the utmost care in order to ensure that in so far as possible all solid material dislodged from the wet wells is removed and carted away to the Vissershok Waste Management Facility.
- The Service provider to take caution when using existing staircase and need to make provision for safe access if existing is not safe for use.

11.7 Existing Environment

Hazards particular to this project by virtue of location: Located in the hub of existing operational infrastructure and residential areas, the specific hazards to be addressed by the Service Provider are the interface between construction vehicles and public road users, including pedestrians.

The potential for high risk periods exists at the beginning and end of each work day, as well as the middle of the day when pedestrian traffic and volumes of vehicles in proximity to the construction area will increase exponentially. The Service Provider is to make adequate provision for access control, traffic management including the interface between construction vehicles and public vehicles and the protection of pedestrians. All aspects for potential public liability are to be adequately addressed.

Overhead, above ground and underground services crossing the site:

Overhead: As identified by Service Provider

Underground: Existing electricity, water and sewerage pipelines.

Ground level: As identified by the Service Provider

Permits required: To be confirmed by the Service Provider and or City of Cape Town Representative on site.

Isolations required: As identified by the Contract Manager/City of Cape Town Representative and Service Provider.

Existing ground conditions: The ground conditions within the package work area is known to be tarred or paved road in close proximity to residential areas.

11.8 Hazard Identification and Risk Assessments (CR 9)

Due to the nature of the construction process and the associated risks, each activity must define individual tasks associated with that identified activity in a detailed method statement, and the hazards associated with those tasks identified. These and all other associated hazards must be identified and listed in the risk assessment. This ensures that critical tasks and associated hazards are not overlooked.

This HIRA (hazard identification and risk assessment) process is to include the need for and identification of any specialised PPE which may be required for tasks. These can include for example, vibration, noise, confined spaces, thermal conditions, ergonomics etc.

The risk assessment shall include, at least:

- The identification of the risks and hazards to which persons may be exposed to
- The analysis and evaluation of the risks and hazards identified
- A documented plan of safe work procedures (SWP) to mitigate, reduce or control the risks and hazards that have been identified
- A monitoring plan

Based on the risk assessments, the contractor must develop a set of H&S rules that will be applied to regulate the H&S aspects of the work.

NB: A risk assessment shall be performed for all unplanned work or activities and submitted to the City of Cape Town Representative for assessment prior to such work or activity commencing.

11.9 Administrative Controls and the Health and Safety File (CR7(1))

As required by Construction Regulation 7(1)(b), the Service Provider will open and maintain a Health and Safety File on site containing the records of information on aspects of the project, required legal documentation as outlined in the OHS Act and Regulations..

NB: Any serious non-compliance must be dealt with immediately. In the event of a serious or life-threatening non-compliance to legal requirements, work activities may be curtailed until such time as the non-compliance has been adequately addressed with Contract Manager/City of Cape Town Representative on site.

11.9.1 General Induction Training:

The Contractor shall ensure that all personnel appointed according the OHS Act and Regulations are competent and that all training required for executing the work safely and without risk to health, has been completed prior to the commencement of construction.

11.10 Accident and Incident Recording, Reporting and Investigation:

Accident and Incident Recording: The Service Provider shall open and maintain an Accident and Incident Register and be responsible for Accident and Incident occurred during work execution, which register shall record all accidents and incidents resulting in lost time injuries, injuries requiring medical treatment and injuries requiring first aid treatment.

11.11 Duty to Inform

Referencing Section 13 of the OHS Act and General Administrative Regulation 8, without derogating from any specific duty imposed on an employer by this Act, every employer (contractor) shall:

- as far as reasonability practicable, cause every employee to be made conversant with the hazards to his health and safety attached to any work which he has to perform, any article or substance which he has to produce, process, use, handle, store or transport and any plant or machinery which he is required or permitted to use, as well as with the precautionary measures which should be taken and observed with respect to those hazards;
- inform the health and safety representative concerned beforehand of inspections, investigations or formal inquiries of which he has been notified by an inspector, and of any application for exemption made by him in terms of section 40; and
- inform a health and safety representative as soon as reasonably practicable of the occurrence of an incident in the workplace or section of the workplace for which such representative has been designated.

12. First Aid (GSR 3):

The Service Provider will be responsible for First Aid required on site should there be injuries occurred while the work is being performed.

Where specialised first aid treatment and equipment may be required for work in confined spaces, use of chemicals, falls from height etc., the Service Provider shall ensure that first aiders are available on site and any required First Aid provision will be the responsibility of Service Provider.

Arrangements for speedily and promptly transporting injured/ill person/s to a medical facility or of securing emergency medical aid to person/s that may require will be Service Provider's responsibility.

13. Alcohol and Other Drugs (GSR 2A):

Referencing General Safety Regulation 2A, Contractors shall develop a Drug and Alcohol Policy and communicate such policy to their employees and sub-contractors, proof of such policy and communication to be retained in the health and safety file.

No alcohol and drugs will be allowed on site. No person may be under the influence of alcohol or any drug or have in his/her possession any alcohol or drug while on the construction site. Any person appearing to be under the influence of alcohol, or any drug shall not be permitted to remain on site or be granted entry onto the site.

Any person suspected of being under the influence of alcohol or other drugs shall be removed from site.

14. Personal Protective Equipment (PPE) (GSR 2):

The Service Provider is required to identify the hazards in the workplace, communicate with the City of Cape Town Representative on site for corrective measures. Service Provider must either eliminate hazards example use of gas monitors proper PPE to make it possible for its workers to work safely and without risk to health and safety under the hazardous conditions.

Where the risk assessment for any task indicates the need for specialised personal protective equipment, such as extraction fans or blowers can be arranged with City of Cape Town Representative on site.

It is a further requirement that the Service Provider maintain this PPE and that he instructs and trains the employees in the correct use and maintenance of the PPE as required in GSR 2(5). PPE shall be fit for purpose at all times and provide the required and intended protection.

No person, including management, the Client, client employees and members of the professional team, shall be permitted to work on the site if the correct PPE is not used. The Service Provider shall ensure that the prescribed, required and correct PPE is used by the employees and all other persons as per GSR 2(6) at all times.

Employees shall comply to OHS Act Section 14(b) and (c) and do not have the right to refuse to utilise or wear the personal protective equipment prescribed by the employer and, if it is not possible for an employee to use or wear any prescribed personal protective equipment correctly as intended, through health or any other reason, the employee may not be allowed to continue working under the hazardous condition/s for which the personal protective equipment was prescribed.

All employees, visitors and non-employees shall, as a minimum, be required to wear the following PPE on any of **City of Cape Town** sites:

- Protective overalls (employees only)
- Protective footwear
- Protective headwear
- Eye protection
- Hearing protection
- High visibility vests/jackets
- Fall arrest equipment when working in elevated positions
- Fall prevention equipment where fall arrest equipment is not practicable
- Chin straps on protective headwear when working in excavations and elevated positions or wearing other head coverings under hard hats.
- Breathing Apparatus and Respirators
- Life jackets
- Rescue tripod
- Gas monitor/detector
- Impermeable/water resistant overalls/wader when exposed to raw sewage
- Rescue equipment consisting of a full body harness and rescue lanyard/rope secured to a rescue tripod at the surface when working in manholes

15. Public Health and Safety (OHS Act Sec. 9):

Non-employees entering the site for whatever reason, the surrounding community, passers-by to the site (pedestrians and road users) and the general public.

Appropriate signage warning of construction related hazards must be posted in prominent positions in and around the construction site and all employees on site must be instructed to ensure that non-employees not allowed on site where wet well cleaning is being performed.

16. Fall Protection (CR 10(2),(3),(4)(a),(b),(c)(i); GSR 7):

Referencing Construction Regulation 10(2) and General Safety Regulation 7, a pre-emptive Risk Assessment and Fall Protection Plan will be required for any work to be carried out below two metres from the ground or any floor level. The fall protection plan shall contain all the requirements of Construction Regulation 10(2) and in

addition a procedure addressing the review of the fall protection plan and a documented disciplinary process for non-compliance to the fall protection plan.

As far as is practicable, any person working in proximity to an opening in the ground, such as wet wells, manholes are at least as safe as if he/she is working at ground level and whilst working in this position be wearing and using a **work positioning system** that will be worn to prevent the person falling into the wet well or opening.

This safety harness will be, as far as is possible, secured to a point away from the edge over which the person might fall and the double lanyard must be of such a length that the person will not be able to move over the edge. Where work is conducted in close proximity to edges, work positioning belts/lanyards shall be utilised to prevent persons from falling.

In addition, any platform or surface forming an edge over which a person may fall must be fitted with guard rails of adequate strength and stability to prevent the fall of persons.

Medical certificates of fitness for all employees working at height must be available on site. All medical certificates must be issued by a registered Occupational Health Practitioner.

17. Housekeeping and General Safeguarding (CR 27):

The requirements of Construction Regulation 27 shall be implemented by Service Provider on the site and maintained at all times. Work and access areas and walkways shall be kept clear of materials and equipment for use at all times and scrap, waste and debris removed at appropriate intervals. Designated areas are to be demarcated for tools, equipment, scrap and waste in all active work areas, and the use of such designated areas enforced at all times. The Service Provider shall ensure that the construction site is adequately hoarded with controlled access points to prevent unauthorised access.

18. Pressure Equipment and Gas Cylinders (PER):

The Service Provider ensure that all employees shall comply with the requirements of the Pressure Equipment Regulations, including:

- Providing competency and awareness training for operators and/or users
- Providing relevant and adequate PPE and clothing and enforcing the use of such PPE and clothing. PPE issued for the use of pressure equipment shall be regularly inspected and replaced when necessary.
- Inspect equipment on a monthly basis and keep records of inspections
- Provide appropriate firefighting equipment on hand

Where pressure equipment is utilised on the site, the Service Provider shall keep a register of such equipment as well as valid pressure test certificates not older than 36 months, and an inspection checklist for each item of equipment in the site safety file

19. Work in Confined Spaces (GSR 5):

Work in confined spaces shall be deemed to be any work in an enclosed, restricted or limited space where a hazardous substance may accumulate or an oxygen deficient atmosphere may occur, including any chamber, tunnel, pipe, pit, sewer, container, or similar construction in which a dangerous liquid or dangerous concentration of gas, vapour, dust or fumes may be present.

For the **287S/2024/25**, wet well deeper than 1.5 metres, completed chambers and manholes will be classified as a confined space. The Service Provider shall ensure that all the requirements of general safety regulation 5 are strictly complied with and that such confined space shall only be entered by an employee or any other person after the air therein has been tested and evaluated by a person competent to pronounce the safety thereof. Confined space entry permits, DSTI and Toolbox talks to be completed for all employees entering confined spaces. Equipment used for testing air quality or the presence of hazardous gasses, will be calibrated according to the manufacturer's instructions by a competent person/entity and valid calibration certificates available in the safety file. The Service Provider will supply all employees entering confined spaces with the correct PPE (wader, breathing apparatus, gas detector, safety harness, lifelines and rescue tripods). Rescue tripods and lifelines are to be utilised when entering confined spaces. The Service Provider is to ensure safe access and egress for all employees entering confined spaces.

The Service Provider shall develop a method statement, risk assessment and safe work procedure for work in confined spaces and such procedure shall outline the requirements of general safety regulation 5 as well as the safety requirements and rescue procedure for the retrieval of employees if required.

Should the task specific risk assessment indicate that manual evacuation of persons from a confined space will not be possible, the Service Provider is to provide a suitable mechanical rescue system and the rescue team is to be trained in the correct use of such rescue system in order to effect speedy and incident free rescues if required.

Effective breathing apparatus shall be provided to any and all persons entering a confined space and the contractor shall keep available apparatus for resuscitation where work is conducted in confined spaces.

NB: All employees entering confined spaces to be trained, certified and have a valid medical certificate of fitness. All medical certificates must be issued by a registered Occupational Health Practitioner.

20. Waste Management

The Service Provider shall include in their health and safety file a comprehensive waste management plan, outlining the methodology for ensuring effective management and disposal of waste, eliminating as far as possible all impact on the environment. The waste management plan should include, as a minimum:

- Planned waste stream management to ensure removal of waste is effective and timeous;
- Service Provider shall issue certificates of safe disposal where required and proof of delivery of waste to an approved recycling facility (oil, chemicals etc.);
- Procedure in the event of spills to prevent environmental impact;
- Proof of communication of waste management plan to all employees.

21. Hazardous Biological Agents

The Service Provider is to identify all potential HBA's prior to the commencement of works. All employees who is or might be in contact with HBA will be Service Provider's responsibility.

22. GENERAL INFORMATION

22.1 Supply all equipment

Service Provider(s) are to supply all equipment required to undertake and complete the work as specified and no additional payment will be entertained.

22.2 Communication

Service Provider(s) are to provide their supervisory and operational staff with cellular phones for communication and contact purposes for the duration of the contract. All managerial, supervisory and operational staff to be contactable at all reasonable times for the duration of the contract.

The onus remains on the Service Providers to inform the Council Representative immediately should the given contact numbers change or be out of service.

22.3 Security

Service Provider(s) are responsible for their own security and this has been allowed for in the schedule of rates.

The Service Provider shall be responsible for the safety and security of his personnel, plant/equipment on site and the working area in general and at all times, from establishment to de-establishment.

The Service Provider shall therefore acquaint himself with the current situation in the area with regard to safety and security (liaising with the local police as necessary) and shall provide all security measures, including the employment of accredited security services, as deemed necessary to comply with the requirements under this clause of the Contract.

All security staff employed on site must be registered with the Private Security Industry Regulatory Authority (PSiRA). Proof of such registration must be made available upon request. The security arrangements must be discussed with, and approved by the Council representative prior to commencement of the work.

Unarmed is defined as any non-lethal equipment such as a baton, stun gun, or pepper spray. Armed shall include a firearm along with the relevant South African Police Service firearm competency. Armed guards will only be utilised under extraordinary circumstances and will require the written approval of the relevant Contract Manager.

The unit of measure for items 8.1 – 8.6 of the pricing schedule, shall be the number of hours that the security guard(s) have worked and shall be measured from the time the person(s) arrives at their post until the time they leave. This item shall only be paid for additional security guards requested or instructed by Employers Agent or as agreed in advance between the Contracts Manager/ Project Manager and Contractor. **Security not agreed on in advance shall not be payable.**

The tendered rate shall be based on the PSIRA published rates for the applicable grade and cover the cost of wages, transport to and from site, all personal protective equipment, any other costs, profit and mark up.

22.4 Office hours for administration purposes

Office Hours are from 08h00 until 16h00 on weekdays for administration purposes.

22.5 Working hours

Normal working hours are Monday to Friday from 07h30 until 16h30 with 30 minutes for lunch break for planned and programmed works.

Emergency works will include Normal working hours, after hours, weekends and Public Holidays.

Normal working day From 07h30 until 16h30 with 30 minutes for lunch.

Overtime Any time before 07h30 and after 16h30 on week days.

Weekend From midnight Friday to midnight Sunday.

Public Holiday Any proclaimed Public Holiday.

22.6 Local Office

In the event that a company is based outside the municipal area of the City of Cape Town a local office must be established within two (2) weeks after date of commencement of the Contract.

22.7 Human Remains

The Service Provider's supervisory agent at the site must be aware of the correct procedures to be followed if human remains are found in the course of normal cleaning operations. This includes corpses, body parts, infant corpses, etc. The SA Police Service must be notified immediately, and work must be suspended until a Police Officer has viewed the situation and given appropriate instructions.

22.8 Commencement of Work and Access to Site

No work may commence without an official **Purchase Order** notification for the type of work to be done by the Service Provider(s). The appointed Service Provider(s) will be required to have all resources (labour, plant and equipment) in place prior to any site handover. In addition, the Service Provider(s) will be required to liaise with various regional staff with regards to the service that is to be provided.

Access to the site will only be given to the Service Provider(s) once they have complied with the above mentioned requirements. Commencement of the works shall be in terms of the tender specification.

22.9 Payment, Invoices and Tipping Slips

Payment for the work to be undertaken will be as per the Purchase Order for the specific pump station wet well.

The Invoice must be accompanied by a copy of the signed off work sheet by the Council Representative as per Annexure I, **failing which no payment will be made.**

Service Provider(s) must supply proof of tipping by submitting copies of the tipping slips when submitting invoices for the cleaning work undertaken.

22.10 Work Permits

The Service Provider(s) will be required to obtain **Work Permits** before commencing with the wet well cleaning works. The Council Representative must be contacted for such permits.

23. Work Allocation Procedures for Planned Works

The work is to be allocated into Citywide Pump Stations which are situated across various regions, which are further divided into specific areas within each region. The procedures for the allocation of planned cleaning works are to be read in conjunction with Part T.2 Conditions of Tender. The City reserves the right to allocate works under the framework contract at its sole discretion and as described in this document. The City will only order those quantities of work items which are required for the execution of the works on an ad-hoc basis. The City reserves the right not to order any quantities at all depending on circumstances, budget availability and subject to operational requirements. Works shall be executed within four (4) Regions on a "winner-takes-all" basis. These procedures include applying the approved framework contract rates in order to arrive at a financial offer, receiving the Supplier's acceptance of the works, and allocating the works to the Supplier. The work will always be offered and, if accepted, allocated to the highest ranked tenderer ("the Winner") under the framework contract for that Region (subject to the Supplier not being suspended/terminated), and only if he refuses will the work be offered to the Alternative Service Provider for that region. In terms of the foregoing, "the Supplier" in the procedures outlined below is the Supplier under consideration (starting with "the Winner") for the allocation of the works. The works allocation procedures are summarised under the stages below wherein the City (acting through his agent) shall:-

23.1 Stage 1: Council Representative prepares the Bill of Quantities using the Supplier's Framework Contract rates for the Region

- (a) select a work area within the Region for the execution of the works;
- (b) prepare a Bill of Quantities for the works;
- (c) prepare the Works Acceptance/Refusal Form;

Note: The quantities provided by the Supplier shall be regarded as estimates only and shall be subject to re-measurement during the execution of the works. The final Contract Price for each completed Purchase Order shall be computed from the actual quantities of work done, valued at the final approved tendered rates accepted by the Purchaser under the framework contract.

23.2 Stage 2: City offers work to the Supplier

Council Representative Submit Works Acceptance/Refusal Form and Bill of Quantities to the Supplier via email;

23.3 Stage 3: Supplier to accept/reject the works offer

Supplier to return the signed Works Acceptance/Refusal Form to the City via email within 24 hours

(2) days of issue by the City;

If the Supplier -

- 1) refuses the works offer by returning a signed Works Acceptance/Refusal Form; or
- 2) does not respond to the City's request within the prescribed time; then the Supplier shall be excluded from further participation in the works allocation procedure for that particular request. Should the Supplier be excluded from further participation in the works allocation process then steps the above must be repeated with the Alternative Service Providers in accordance with their order of ranking for their respective region.

23.4 Stage 4: Works allocation to the Supplier

Allocation of work to the Supplier will be done by issuing a Purchase Order within seven (7) days of receipt of the signed acceptance form;

23.5 Stage 5: Contract commencement and initial contractual obligations

The Council Representative to record the contract commencement date i.e. date of receipt of the Purchase Order by the Supplier; Supplier to submit initial contractual documentation to the Purchaser within 14 days of the contract commencement date which shall include –

- 1) Health and Safety File
- 2) Letter of Good Standing from the Compensation Commissioner (if not insured with a Licensed Compensation Insurer)
- 3) Evidence of Insurance
- 4) Proof of Registration / Letter of Good Standing with the Bargaining Council
- 5) The Employer's Agent to review and confirm acceptance of the Supplier's documentation;

23.6 Stage 6: Commencement of works

The Employer's Agent to hand-over the site to the Supplier and monitor compliance in accordance with the requirements of the framework contract.

24. Allocation work procedures for emergency works

In the case of Emergency situations and due to the nature of the work, the successful Service Provider will be required to be available within four (4) hours of notification by the Council Representative. The Service Provider to provide required equipment as per the plant and equipment minimum specification.

Should the Winner fail to respond within in the required four (4) hours of notification, the City reserves the right to contact the Alternative Service Provider immediately to attend to the Emergency for service delivery to continue.

Service Providers must make available at least two (2) contactable numbers which will be accessible at all times in case of emergencies.

The following processes shall apply for the allocation of Emergency Works by the Purchaser –

- a) The Superintendent and or Technician for the depot will contact the Supplier and notify him of the emergency works.
- b) Supplier to confirm his availability to carry out the works.
- c) Supplier to meet the relevant depot staff on site within two (2) hours of confirmation of works (between 7:30 to 16:00) and within four (4) hours of confirmation of works (after normal working hours and over weekends).
- d) Supplier to return the signed Works Acceptance/Refusal Form to the Purchaser upon confirmation of the scope of work to be carried out. Emergency/ Unplanned Contractor Appointment Process which summarises the procedures for the allocation of emergency works under the framework contract.

25. PERFORMANCE MONITORING

Key Performance Indicators (KPIs) have been pre-defined and will be used to measure the Supplier's ongoing performance under the contract. KPIs will be evaluated and scored by the Purchaser on a monthly basis and the Supplier is required to ensure that his overall performance is satisfactory. Where continuous unsatisfactory performance is recorded for the Supplier then the necessary remedial measures shall be taken.

TENDERERS MUST NOTE THAT WHEREVER THIS DOCUMENT REFERS TO ANY PARTICULAR TRADE MARK, NAME, PATENT, DESIGN, TYPE, SPECIFIC ORIGIN OR PRODUCER, SUCH REFERENCE SHALL BE DEEMED TO BE ACCOMPANIED BY THE WORDS 'OR EQUIVALENT'

[26] TRADE NAMES OR PROPRIETARY PRODUCTS

Tenderers/Suppliers must note that wherever this document refers to any particular trade mark, name, patent, design, type, specific origin or producer, such reference shall be deemed to be accompanied by the words "or equivalent".

[27] EMPLOYMENT OF SECURITY PERSONNEL

All security staff employed by the Supplier on behalf of the CCT or at any CCT property must be registered with Private Security Industry Regulatory Authority (PSiRA). Proof of such registration must be made available to the CCT or its agent, upon request.

[28] FORMS FOR CONTRACT ADMINISTRATION

Not applicable to this tender.

C.6 SPECIAL CONDITIONS OF CONTRACT

The following Special Conditions of Contract, referring to the National Treasury – Conditions of Contract (revised July 2010), are applicable to this agreement.

1. Definitions

Insert new clause 1.1A with the following:

- 1.1A “Commencement Date” means the date the Supplier confirms receipt from the Purchaser of 1 (one) complete, signed copy of the Contract, the *Schedule of Deviations* (if any).
- 1.1B “Conditions of Contract” means the general conditions of contract and special conditions of contract including all other contract data incorporated by reference.

Delete Clause 1.15 and substitute with the following

- 1.15 The word ‘Goods’ is to be replaced everywhere it occurs in the GCC with the phrase ‘Goods and / or Services’ which means all of the equipment, machinery, materials, services, products, consumables, etc. that the Supplier is required to deliver to the Purchaser under the agreement. This definition shall also be applicable, as the context requires, anywhere where the words “supplies” and “services” occurs in the GCC.

Delete Clause 1.19 and substitute with the following

- 1.19 The word ‘Order’ is to be replaced everywhere it occurs in the GCC with the words ‘Purchase Order’ which means the official purchase order authorised and released on the Purchaser’s SAP System.

Delete Clause 1.21 and substitute with the following:

- 1.21 ‘Purchaser’ means the City of Cape Town. The address of the Purchaser is 12 Hertzog Boulevard, Cape Town, 8001 (chosen domicilium citandi et executandi).

Add the following after Clause 1.25:

- 1.26 ‘Supplier’ means the provider of Goods and / or Services with whom the Contract is concluded also referred to as “contractor” in the GCC.
- 1.27 "Intellectual Property" means any and all intellectual property rights of any nature anywhere in the world whether registered, registerable or otherwise, including patents, trademarks, registered designs and domain names, applications for any of the foregoing, trade or business names, copyright and rights in the nature of copyright, design rights, rights in databases, know-how, trade secrets and any other intellectual property rights which subsist in computer software, computer programs, websites, documents, information, techniques, business methods, drawings, logos, instruction manuals, lists and procedures and particulars of customers, marketing methods and procedures and advertising literature, including the "look and feel" of any websites
- 1.28 “Working Day” means Monday to Friday excluding weekends and Public Holidays (in the Republic of Sotuh Africa).

3. General Obligations

Delete Clause 3.2 in its entirety and replace with the following clauses.

- 3.2 The Parties will be liable to each other arising out of or in connection with any breach of the obligations detailed or implied in this contract, subject to clause 28.
- 3.3 If the Supplier is a joint venture, all parties in a joint venture or consortium shall be jointly and severally liable to the Purchaser in terms of the Contract and shall carry individually the minimum levels of insurance stated in the Contract, if any.
- 3.4 The Parties shall comply with all laws, regulations and bylaws of local or other authorities having

jurisdiction regarding the Delivery of the Goods and/or Services and give all notices and pay all charges required by such authorities.

- 3.4.1 The Parties agree that this Contract shall also be subject to the CCT's Supply Chain Management Policy ("SCM Policy") that was applicable on the date the bid was advertised as amended from time to time. If the Purchaser adopts a new SCM Policy which contemplates that any clause therein would apply to the Contract emanating from this tender, such clause shall also be applicable to the Contract. Please refer to this document contained on the CCT's website.
- 3.4.2 Abuse of the supply chain management system is not permitted and may result in termination of the Contract, restriction of the Supplier, and/or the exercise by the CCT of any other remedies available to it as described in the SCM Policy or in law.
- 3.5 The Supplier shall:
- 3.5.1 Arrange for the documents listed below to be provided to the Purchaser prior to the issuing of the Purchase Order by the Purchaser and no later than the periods as set out in the Contract:
- a) Proof of Insurance (Refer to Clause 11) or Insurance Broker's Warrantee,
 - b) Letter of good standing from the Compensation Commissioner, or a licensed compensation insurer (Refer to Clause 11),
 - c) Initial delivery programme, and
 - d) Other requirements as detailed in the Contract.
- 3.5.2 Only when notified of the acceptance of the bid on the Date of Commencement of Contract, the Supplier shall commence with and carry out the Delivery of the Goods and/or Services in accordance with the Contract, to the satisfaction, of the Purchaser.
- 3.5.3 Provide all of the necessary materials, labour, plant and equipment required for the delivery of the Goods and/or Services including any temporary services that may be required.
- 3.5.4 Insure his workmen and employees against death or injury arising out of the delivery of the Goods.
- 3.5.5 Be continuously represented during the Delivery of the Goods and/or Services by a competent representative duly authorised to execute instructions.
- 3.5.6 In the event of a loss resulting in a claim against the insurance policies stated in clause 11, pay the first amount (excess) as required by the insurance policy.
- 3.5.7 Comply with all written instructions from the Purchaser subject to clause 18.
- 3.5.8 Complete and Deliver the goods within the period stated in clause 10, or any extensions thereof in terms of clause 21.
- 3.5.9 Make good at his own expense, all incomplete and defective Goods during the warranty period.
- 3.5.10 Pay to the Purchaser any penalty for delay as due on demand by the Purchaser. The Supplier hereby consents to such amounts being deducted from any payment due to the Supplier.
- 3.5.11 Comply with the provisions of the OHAS Act & all relevant regulations.
- 3.5.12 Comply with all laws relating to wages and conditions generally governing the employment of labour in the Cape Town area and any applicable Bargaining Council agreements.
- 3.5.13 Deliver the Goods in accordance with the Contract and with all reasonable care, diligence and skill in accordance with generally accepted professional techniques and standards.
- 3.6 The Purchaser shall:
- 3.6.1 Issue Purchaser Orders for the Goods and/or Services required under this Contract. No liability for payment will ensue for arising out of the Delivery of the Goods and/or Services, unless a Purchase Order has been issued to the Supplier.

- 3.6.2 Make payment to the Supplier for the Goods and/or Services as set out herein.
- 3.6.3 Take possession of the Goods and /or Services upon Delivery by the Supplier.
- 3.6.4 Regularly inspect the Goods to establish that it is being delivered in compliance with the Contract.
- 3.6.5 Give any instructions and/or explanations and/or variations to the Supplier including any relevant advice to assist the Supplier to understand the Contract.
- 3.6.6 Grant or refuse any extension of time requested by the Supplier of the period stated in clause 10.
- 3.6.7 Inspect the Goods and/or Services to determine if, in the opinion of the Purchaser, it has been delivered in compliance with the Contract, alternatively in such a state that it can be properly used for the purpose for which it was intended.
- 3.6.8 Brief the Supplier and issue all documents, information, etc. in accordance with the contract.

5. Use of contract documents and information; inspection, copyright, confidentiality, etc.

Add the following after clause 5.4:

- 5.5 Copyright of all documents prepared by the Supplier in accordance with the relevant provisions of the Copyright Act (Act 98 of 1978) relating to the Contract shall be vested in the Purchaser. Where copyright is vested in the Supplier, the Purchaser shall be entitled to use the documents or copy them only for the purposes for which they are intended in regard to the agreement and need not obtain the Supplier's permission to copy it for such use. Where copyright is vested in the Purchaser, the Supplier shall not be liable in any way for the use of any of the information other than as originally intended in terms of the agreement and the Purchaser hereby indemnifies the Supplier against any claim which may be made against it by any person / entity, arising from the use of such documentation for other purposes.

The ownership of data and factual information collected by the Supplier and paid for by the Purchaser shall, after payment, vest with the Purchaser.

- 5.6 **Publicity and publication**
The Supplier shall not release public or media statements or publish material related to the services or agreement within two (2) years of Delivery of the Goods, without the written approval of the Purchaser, which approval shall not be unreasonably withheld.
- 5.7 **Confidentiality**
Both Parties shall keep all information obtained by them in the context of the agreement, confidential and shall not divulge it without the written approval of the other Party.
- 5.8 **Intellectual Property**
 - 5.8.1 The Supplier acknowledges that it shall not acquire any right, title or interest in or to the Intellectual Property of the Purchaser.
 - 5.8.2 The Supplier hereby assigns to the Purchaser, all Intellectual Property created, developed or otherwise brought into existence by it for the purposes of the agreement, unless the Parties expressly agree otherwise in writing.
 - 5.8.3 The Supplier shall, and warrants that it shall:
 - 5.8.3.1 Not be entitled to use the Purchaser's Intellectual Property for any purpose other than as contemplated in the agreement;
 - 5.8.3.2 not modify, add to, change or alter the Purchaser's Intellectual Property, or any information or data related thereto, nor may the Supplier produce any product as a result of, including and/or arising from any such information, data and Intellectual Property, and in the event that it does produce any such product, the product shall be, and be deemed in law to be, owned by the Purchaser;
 - 5.8.3.3 Not apply for or obtain registration of any domain name, trademark or design which is similar to any Intellectual Property of the Purchaser;

- 5.8.3.4 Comply with all reasonable directions or instructions given to it by the Purchaser in relation to the form and manner of use of the CCT Intellectual Property, including without limitation, any brand guidelines which the Purchaser may provide to the Supplier from time to time;
- 5.8.3.5 Ensure that its employees, directors, members and contractors comply strictly with the provisions of this Clause 5.8.4 above unless the Purchaser expressly agrees to the contrary, in writing and only after obtaining due internal authority for such agreement.
- 5.8.4 The Supplier represents and warrants to the Purchaser that, in providing Goods and/or Services for the duration of the agreement it will not infringe or make unauthorised use of the Intellectual Property rights of any third party and hereby indemnifies the Purchaser from any claims, liability, loss, damages, costs, and expenses arising from the infringement or unauthorised use by the Supplier of any third party's Intellectual Property rights.
- 5.8.5 Upon expiry of the contract period and in the event that the Contract is terminated, ended or is declared void, any and all of the Purchaser's Intellectual Property, and any and all information and data related thereto, shall be immediately handed over to the Purchaser by the Supplier and no copies thereof shall be retained by the Supplier unless the Purchaser expressly and in writing, after obtaining due internal authority, agrees otherwise.

Add the following after clause 5.8:

5.9 Protection of Personal Information Act of 2013

By submitting a tender to the Purchaser, (and by concluding any ensuing related agreement with the City of Cape Town, if applicable), the Tenderer thereby acknowledges and unconditionally agrees:

- 5.9.1 that the tenderer has been informed of the purpose of the collection and processing of its personal information as defined in the Protection of Personal Information Act of 2013 ("POPIA"), which, for the avoidance of doubt is for, and in relation to, the tender process and the negotiation, conclusion, performance and enforcement of the ensuing agreement, if applicable, as well as for the City of Cape Town's reporting purposes;
- 5.9.2 to the collection and processing of the tenderer's personal information by the City of Cape Town and agrees to make available to the City of Cape Town, all information reasonably required by the City of Cape Town for the above purposes;
- 5.9.3 that the personal information the City of Cape Town collects from the tenderer or about the tenderer may be further processed for other activities and/or purposes which are lawful, reasonable, relevant and not excessive in relation to the purposes set out above, for which it was originally collected;
- 5.9.4 that, the tenderer indemnifies the City of Cape Town and its officials, employees, and directors and undertakes to keep the City of Cape Town and its officials, employees, and directors indemnified in respect of any claim, loss, demands, liability, costs and expenses of whatsoever nature which may be made against the City of Cape Town (including the costs incurred in defending or contesting any such claim) in relation to the tenderer or the tenderer's employees', representatives' and/or sub-Suppliers' non-compliance with POPIA and/or the City of Cape Town's failure to obtain the tenderer's consent or to notify the tenderer of the reason for the processing of the tenderer's personal information;
- 5.9.5 to the disclosure of the tenderer's personal information by the City of Cape Town to any third party, where the City of Cape Town has a legal or contractual obligation to disclose such personal information to the third party (or a legitimate interest exists therein);
- 5.9.6 that, under POPIA, the tenderer may request to access, confirm, request the correction, destruction, or deletion of, or request a description of, personal information held by the City of Cape Town in relation to you, subject to applicable law; and that under POPIA, subject to applicable law, the tenderer also has the right to be notified of a personal information breach and the right to object to, or restrict, the City of Cape Town's processing of its personal information.

5.10 PERFORMANCE MONITORING

- 5.10.1 As required by section 116(2)(b) of the Local Government: Municipal Financial Management Act 56 of 2003, the CCT shall monitor the performance of the Supplier on at least a monthly basis, and the Supplier agrees to provide the CCT with its full cooperation in this regard.

7. Performance Security

Delete clause 7.1 and replace with the following:

- 7.1 Within 14 (fourteen) days of Commencement Date the Supplier shall furnish to the Purchaser the performance security:

- 7.1.1 For the Guarantee Sum equal to **R 150 000.00 [One Hundred and Fifty Thousand] which shall be a** blanket performance guarantee under the framework contract

- 7.1.2 The Performance Security/Guarantee furnished shall be issued by an Approved Financial Institution listed in the Pro Forma Performance Security/Guarantee as at [28 February 2023] (being institutions approved for issue of contract guarantees by the Purchaser).

Delete clause 7.3 and replace with the following:

- 7.3 The performance security shall be furnished strictly in accordance with the terms and conditions set out in Form of Performance Security/ Guarantee.

Delete clause 7.4 and replace with the following:

- 7.4 The performance security will be discharged by the Purchaser and returned to the Supplier strictly in accordance with the terms and conditions set out in the Performance Security/ Guarantee.

8. Inspections, tests and analyses

Delete Clause 8.2 and substitute with the following:

- 8.2 If it is a bid condition that Goods and/or Services to be produced or services to be rendered should at any stage during production or execution or on completion be subject to inspection, the premises of the bidder or Supplier shall be open, at all reasonable hours, for inspection by a representative of the Purchaser or an organisation acting on behalf of the Purchaser.

10. Delivery and documents

Delete clauses 10.1 and 10.2 and replace with the following:

- 10.1 Delivery of the goods shall be made by the Supplier in accordance with the terms specified in the contract. The time for Delivery of the goods shall be the date as stated on the Purchase Order. In the case of agreements for Delivery of goods in terms of framework or panel agreements, Purchase Orders for the supply and delivery of goods may be raised up until the expiry of a framework or panel agreement, provided that the goods can be delivered within 30 (thirty) days of expiry of the framework or panel agreement. In this context, the "goods" does not include services and carries its ordinary meaning. All Purchase Orders other than for the supply and Delivery of goods (i.e. supply of services, professional services or constructions works), must be completed prior to the expiry of the contract period.

- 10.2 The Purchaser shall determine, in its sole discretion, whether the Goods and/or Services have been delivered in compliance with the Contract, alternatively in such a state that it can be properly used for the purpose for which it was intended. When the Purchaser determines that the Goods and/or Services have been satisfactorily delivered, the Purchaser must issue an appropriate certification, or written approval, to that effect. Invoicing may only occur, and must be dated, on or after the date of such written acceptance of the Goods.

11. Insurance

Add the following after clause 11.1:

- 11.2 Without limiting the obligations of the Supplier in terms of this Contract, the Supplier shall effect and maintain the following additional insurances:
- 11.2.1 Public liability insurances, in the name of the Supplier, covering the Supplier and the Purchaser against liability for the death of or injury to any person, or loss of or damage to any property, arising out of or in the course of this Contract, in an amount not less than **[R20 million]** for any single claim;
- 11.2.2 Motor Vehicle Liability Insurance, in respect of all vehicles owned and / or leased by the Supplier, comprising (as a minimum) "Balance of Third Party" Risks including Passenger Liability Indemnity;
- 11.2.3 Registration / insurance in terms of the Compensation for Occupational Injuries and Disease Act, Act 130 of 1993. This can either take the form of a certified copy of a valid Letter of Good Standing issued by the Compensation Commissioner, or proof of insurance with a licenced compensation insurer, from either the Supplier's broker or the insurance company itself (see the Pro Forma Insurance Broker's Warranty).
- 11.2.4 In the event of under insurance or the insurer's repudiation of any claim for whatever reason, the Purchaser will retain its right of recourse against the Supplier.
- 11.3 The Supplier shall be obliged to furnish the Purchaser with proof of such insurance as the Purchaser may require from time to time for the duration of this Contract. Evidence that the insurances have been effected in terms of this clause, shall be either in the form of an insurance broker's warranty worded precisely as per the pro forma version contained in the Pro forma Insurance Broker's Warranty or copies of the insurance policies.

15. Warranty

Add to Clause 15.2:

- 15.2 The warranty for this Contract shall remain valid for six (6) months from date of Delivery of the Goods and/or Services.

16. Payment

Delete Clause 16.1 in its entirety and replace with the following:

- 16.1 Payment of invoices will be made:
- 16.1.1 Within 30 (thirty) days of receiving the relevant invoice or statement from the Supplier, unless otherwise prescribed for certain categories of expenditure or specific contractual requirements in accordance with any other applicable policies of the Purchaser.
- 16.1.2 Notwithstanding anything contained above, the Purchaser shall not be liable for payment of any invoice that pre-dates the date of delivery of any Goods and/or Services.

Delete Clause 16.2 in its entirety and replace with the following:

- 16.2 The Supplier shall furnish the purchaser's Accounts Payable Department with an original tax invoice, clearly showing the amount due in respect of each and every claim for payment.

Add the following after clause 16.4

- 16.5 Notwithstanding any amount stated on the Purchase Order, the Supplier shall only be entitled to payment for Goods and/or Services actually delivered in terms of the Specification and Drawings, or any variations thereof made in accordance with clause 18. Any contingency sum included shall be for the sole use, and at the discretion, of the Purchaser.
- 16.6 The Purchaser will only make advanced payments to the Supplier in strict compliance with the terms and conditions as contained in the Pro forma Advanced Payment Guarantee and only once the authenticity of such guarantee has been verified by the Purchaser's Treasury Department.

- 16.6.1 The Advance Payment Schedule applicable to this Contract is set out below. The items of plant and materials which have been identified by the Purchaser as being suitable for advance payment in terms of this Contract are listed in the table below, and for which the Purchaser is prepared to make advance payment to the Supplier, subject to the conditions below. Should an item or items be added to the list at tender stage by a tenderer, no obligation to advance payment shall be incurred by the Purchaser, for such items added by the tenderer except as provided for herein.

Plant and materials which have been manufactured and are stored by the supplier	Plant and materials yet to be manufactured and for which a deposit with order is required from the supplier by a third party manufacturer/supplier, and which may be stored by the supplier:

- 16.6.2 The Supplier can only rely on advance payment being permitted by the Purchaser in respect of the plant and materials listed in the table above. The Purchaser may, however, permit advance payment for other plant and materials in exceptional circumstances and at its sole discretion, during the course of the Contract, and upon reasonable request from the Supplier.
- 16.6.3 Advance payment for the purposes of deposits will only be provided up to a limit of **[N/A]** the value of any one item being claimed.
- 16.6.4 The Supplier shall provide the Purchaser with documentary evidence of the terms and conditions for which a deposit with order is required by a third party manufacturer/supplier, together with the advance payment guarantee.
- 16.6.5 The Supplier will also be permitted to obtain advance payment for the balance of the value of the plant and materials in respect of which he has paid a deposit, for an item which after manufacture is stored by the Supplier. The Supplier shall, in respect of such payment, provide an advance payment guarantee, either for such balance or, if the advance payment guarantee in respect of the deposit is to be returned by the Purchaser upon request, for the whole value of the item.

17. Prices

Add the following after clause 17.1

- 17.2 If as a result of an award of a contract beyond the original tender validity period, the contract execution will be completed beyond a period of twelve (12) months from the expiry of the original tender validity period, then the contract may be subject to contract price adjustment for that period beyond such twelve (12) months. An appropriate contract price adjustment formula will be determined by the Purchaser delegated authority if such was not included in the bid documents.
- 17.3 If as a result of any extension of time granted, the contract execution will be completed beyond a period of twelve (12) months from the expiry of the original tender validity period, then contract price adjustment may apply to that period beyond such twelve (12) months. An appropriate contract price adjustment formula will be determined by the Director: Supply Chain Management if such was not included in the bid documents.
- 17.4 The prices for the goods and/or Services delivered and services performed shall be subject to contract price adjustment in terms of Schedule F.1 Contract Price Adjustment and/or Rate of Exchange Variations and the following conditions will be applicable:

18. Contract Amendments

Delete the heading of clause 18 and replace with the following:

18. Contract Amendments and Variations

Add the following to clause 18.1:

Variations means changes to the Goods and/or Services, extension of the contract period or increases in the value of the Contract as a result of written instructions issued by the Purchaser to the Supplier. Such changes are subject to prior approval by the Purchaser's delegated authority. Should the Supplier deliver any Goods not described in a written instruction from the Purchaser, the Purchaser's liability for payment shall not arise until such time as the change has been duly approved and such approval communicated to the Purchaser.

20. Subcontracts

Add the following after clause 20.1:

- 20.2 The Supplier shall be liable for the acts, defaults and negligence of any subcontractor, his agents or employees as fully as if they were the acts, defaults or negligence of the Supplier.
- 20.3 Any appointment of a subcontractor shall not amount to a contract between the Purchaser and the subcontractor, or a responsibility or liability on the part of the Purchaser to the subcontractor and shall not relieve the Supplier from any liability or obligation under the Contract.

21. Delays in the supplier's performance

Delete Clause 21.2 in its entirety and replace with the following:

- 21.2 If at any time during the performance of obligations contained in the Contract the Supplier or its subcontractors should encounter conditions beyond their reasonable control which impede the timely delivery of the Goods and/or Services, the Supplier shall notify the Purchaser in writing, within 7 (seven) days of first having become aware of these conditions, of the facts of the delay, its cause(s) and its probable duration. As soon as practicable after receipt of the Supplier's notice, the Purchaser shall evaluate the situation, and may at his discretion extend the time for Delivery.

Where additional time is granted, the Purchaser shall also determine whether or not the Supplier is entitled to payment for additional costs in respect thereof. The principle to be applied in this regard is that where the Purchaser or any of its agents are responsible for the delay, reasonable costs shall be paid. In respect of delays that were beyond the reasonable control of both the Supplier and the Purchaser, additional time only (no costs) will be granted.

The Purchaser shall notify the Supplier in writing of his decision(s) in the above regard.

- 21.3 No provision in this Contract shall be deemed to prohibit the obtaining of Goods and/or Services from a national department, provincial department, or a local authority.

22. Penalties

Delete clause 22.1 and replace with the following:

- 22.1 Subject to GCC Clause 25, if the Supplier fails to deliver any or all of the Goods and/or Services within the period(s) specified in the Contract, the Purchaser shall, without prejudice to its other remedies under the Contract, deduct from amounts payable, as a penalty, a sum as stated herein for each day of the delay until actual Delivery or performance.

The penalty for this contract shall be **[R3 550.00] per day**

- 22.2 The Purchaser shall, without prejudice to its other remedies under the contract, deduct from amounts payable, financial penalties as contained on the Preference Schedule for breaches of the conditions upon which preference points were awarded.

23. Termination for default

Delete the heading of clause 23 and replace with the following

23. Termination

Add the following to the end of clause 23.1:

If the Supplier fails to remedy the breach in terms of such notice.

Add the following after clause 23.7:

23.8 In addition to the grounds for termination due to default by the Supplier, the Contract may also be terminated:

23.8.1 Upon the death of the Supplier who was a Sole Proprietor, or a sole member of a Close Corporation, in which case the contract will terminate forthwith.

23.8.2 If the Parties, by mutual agreement, terminate the Contract.

23.8.3 If a material irregularity vitiates the procurement process leading to the conclusion of the Contract, rendering the procurement process and the conclusion of the resulting Contract unfair, inequitable, non-transparent, uncompetitive or not cost-effective the Contract may be terminated by the Purchaser (upon conclusion of applicable processes by the City Manager as described in the Purchaser's SCM Policy).

23.8.4 Reputational risk or harm to the Purchaser

The Purchaser, without prejudice to any other remedy for breach of contract, by written notice of default sent to the Supplier, may terminate the contract if the implementation of the contract may result in reputational risk or harm to the Purchaser as a result of (inter alia):

- a) reports of poor governance and/or unethical behaviour;
- b) association with known notorious individuals and family of notorious individuals;
- c) poor performance issues, known to the Purchaser
- d) negative social media reports;
- e) adverse assurance (e.g. due diligence) report outcomes; or
- f) circumstances where the relevant vendor has employed, or is directed by, anyone who was previously employed in the service of the state (as defined in clause 1.53), where the person is or was negatively implicated in any SCM irregularity.

By or in relation to the Supplier, the Contract may be terminated by the Purchaser after providing notice to the Supplier.

23.9 If the Contract is terminated in terms of clause 23.8, all obligations that were due and enforceable prior to the date of the termination, must be performed by the relevant Party.

26. Termination for insolvency

Delete clause 26.1 and replace with the following:

26.1 In the event of the Supplier becoming bankrupt or otherwise insolvent the Purchaser may elect to:

26.1.1 At any time, terminate the Contract by giving written notice to the Supplier; or

26.1.2 Accept a Supplier's proposal (via the liquidator) to render delivery utilising the appropriate contractual mechanisms or takes steps to ensure its rights are protected and any negative impact on service delivery is mitigated.

26.2 In the event of the Purchaser electing to cancel the Contract in accordance with clause 26.1.1 above, the Purchaser shall make payment of all verified and signed off invoices. In the event of there being any dispute in respect of any outstanding invoices such dispute shall be dealt with in accordance with the dispute resolution mechanism in the Contract.

27. Settlement of Disputes

Amend clause 27.1 as follows:

- 27.1 If any dispute or difference of any kind whatsoever, with the exception of termination in terms of clause 23 arises between the Purchaser and the Supplier in connection with or arising out of the Contract, the Parties shall make every effort to resolve such dispute or difference amicably, by mutual consultation.

Delete Clause 27.2 in its entirety and replace with the following:

- 27.2 Should the Parties fail to resolve any dispute by way of mutual consultation, either party shall be entitled to refer the matter for mediation before an independent and impartial person appointed by the City Manager in accordance with Regulation 50(1) of the Local Government: Municipal Finance Management Act, 56 of 2003 – Municipal Supply Chain Management Regulations (Notice 868 of 2005). Such referral shall be done by either party giving written notice to the other of its intention to commence with mediation. No mediation may be commenced unless such notice is given to the other party.

Irrespective whether the mediation resolves the dispute, the Parties shall bear their own costs concerning the mediation and share the costs of the mediator and related costs equally.

The mediator shall agree the procedures, representation and dates for the mediation process with the Parties. The mediator may meet the Parties together or individually to enable a settlement.

Where the Parties reach settlement of the dispute or any part thereof, the mediator shall record such agreement and on signing thereof by the Parties the agreement shall be final and binding.

Save for reference to any portion of any settlement or decision which has been agreed to be final and binding on the Parties, no reference shall be made by or on behalf of either party in any subsequent court proceedings, to any outcome of an amicable settlement by mutual consultation, or the fact that any particular evidence was given, or to any submission, statement or admission made in the course of amicable settlement by mutual consultation or mediation.

28. Limitation of Liability

Delete clause 28.1 (a) and (b) and replace with the following:

- (a) notwithstanding any provision to the contrary contained in this contract, neither the supplier nor any of its officers, directors, employees, agents contractors, consultants or other representatives shall be liable to the purchaser, whether in contract, tort, or otherwise, for any indirect, incidental, special or consequential loss or damage of any kind, including without limitation the loss of use, loss of production, or loss of profits or interest costs, loss of goodwill, lost or damaged data or software, costs of substitute products/services and/or loss of business or business opportunities (whether foreseeable or unforeseeable), provided that this exclusion shall not apply to any obligation of the supplier to pay penalties and/or damages to the purchaser;
- (b) the aggregate liability of the Supplier to the Purchaser, whether under the Contract, in tort or otherwise, shall not exceed the sums insured in terms of clause 11 in respect of insurable events, or where no such amounts are stated, to an amount equal to twice the Contract price, provided that this limitation shall not apply to the cost of repairing or replacing defective equipment.

Add the following after clause 28.1:

- 28.2 Without detracting from, and in addition to, any of the other indemnities in this Contract, the Supplier shall be solely liable for and hereby indemnifies and holds harmless the Purchaser against all claims, charges, damages, costs, actions, liability, demands and/or proceedings and expense in connection with:

- a) personal injury or loss of life to any individual;
- b) loss of or damage to property;

arising from, out of, or in connection with the performance by the Supplier in terms of this Contract, save to the extent caused by the gross negligence or wilful misconduct of the Purchaser.

- 28.3 The Supplier and/or its employees, agents, concessionaires, suppliers, sub-contractors or customers

shall not have any claim of any nature against the purchaser for any loss, damage, injury or death which any of them may directly or indirectly suffer, whether or not such loss, damages, injury or death is caused through negligence of the Purchaser or its agents or employees.

- 28.4 Notwithstanding anything to the contrary contained in this Contract, under no circumstances whatsoever, including as a result of its negligent (including grossly negligent) acts or omissions or those of its servants, agents or contractors or other persons for whom in law it may be liable, shall any party or its servants (in whose favour this constitutes a *stipulatio alteri*) be liable for any indirect, extrinsic, special, penal, punitive, exemplary or consequential loss or damage of any kind whatsoever, whether or not the loss was actually foreseen or reasonably foreseeable), sustained by the other party, its directors and/or servants, including but not limited to any loss of profits, loss of operation time, corruption or loss of information and/or loss of contracts.
- 28.5 Each party agrees to waive all claims against the other insofar as the aggregate of compensation which might otherwise be payable exceeds the aforesaid maximum amounts payable.

31. Notices

Delete clauses 31.1 and 31.2 and replace with the following:

- 31.1 Any notice, request, consent, approvals or other communications made between the Parties pursuant to the Contract shall be in writing and forwarded to the addresses specified in the Contract and may be given as set out hereunder and shall be deemed to have been received when:
- a) hand delivered – on the day delivery of delivery or the next Working Day,
 - b) sent by registered mail – five (5) Working Days after mailing,
 - c) sent by email or telefax – one (1) Working Day after transmission.

32. Taxes and Duties

Delete the final sentence of 32.3 and replace with the following:

- . In this regard, it is the responsibility of the Tenderer to submit evidence in the form of a valid Tax Compliance Status PIN issued by SARS to the CCT at the Supplier Management Unit located within the Supplier Management / Registration Office, 2nd Floor (Concourse Level), Civic Centre, 12 Hertzog Boulevard, Cape Town (Tel 021 400 9242/3/4/5), or included with this tender.

Add the following after clause 32.3:

- 32.4 The VAT registration number of the CCT is 4500193497.

ADDITIONAL CONDITIONS OF CONTRACT

Add the following Clause after Clause 34:

35. Reporting Obligations

- 35.1 The Supplier shall complete, sign and submit with each delivery note, all the documents as required in the Specifications including Monthly Project Labour Reports (Annexure B). Any failure in this regard may result in a delay in the processing of payments.

34. Prohibition of restrictive practices

1. Definitions

1. The following terms shall be interpreted as indicated:

- 1.1 'Closing time' means the date and hour specified in the bidding documents for the receipt of bids.
- 1.2 'Contract' means the written agreement entered into between the purchaser and the supplier, as recorded in the contract form signed by the Parties, including all attachments and appendices thereto and all documents incorporated by reference therein.
- 1.3 'Contract price' means the price payable to the supplier under the contract for the full and proper performance of his or her contractual obligations.
- 1.4 'Corrupt practice' means the offering, giving, receiving, or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution.
- 1.5 'Countervailing duties' are imposed in cases in which an enterprise abroad is subsidised by its government and encouraged to market its products internationally.

- 1.6 'Country of origin' means the place where the goods were mined, grown or produced or from which the services are supplied. Goods are produced when, through manufacturing, processing or substantial and major assembly of components, a commercially recognised new product results that is substantially different in basic characteristics or in purpose or utility from its components.
- 1.7 'Day' means calendar day.
- 1.8 'Delivery' means delivery in compliance with the conditions of the contract or order.
- 1.9 'Delivery ex stock' means immediate delivery directly from stock actually on hand.
- 1.10 'Delivery into consignee's store or to his site' means delivered and unloaded in the specified store or depot or on the specified site in compliance with the conditions of the contract or order, the supplier bearing all risks and charges involved until the supplies are so delivered and a valid receipt is obtained.
- 1.11 'Dumping' occurs when a private enterprise abroad markets its goods on its own initiative in the RSA at lower prices than that of the country of origin, and which action has the potential to harm the local industries in the RSA.
- 1.12 'Force majeure' means an event beyond the control of the supplier, not involving the supplier's fault or negligence, and not foreseeable. Such events may include, but are not restricted to, acts of the purchaser in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions and freight embargoes.
- 1.13 'Fraudulent practice' means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of any bidder, and includes collusive practice among bidders (prior to or after bid submission) designed to establish bid prices at artificial, non-competitive levels and to deprive the bidder of the benefits of free and open competition.
- 1.14 'GCC' means the General Conditions of Contract.
- 1.15 'Goods' means all of the equipment, machinery, and/or other materials that the supplier is required to supply to the purchaser under the contract.
- 1.16 'Imported content' means that portion of the bidding price represented by the cost of components, parts or materials which have been or are still to be imported (whether by the supplier or his subcontractors) and
which costs are inclusive of the costs abroad, plus freight and other direct importation costs such as landing costs, dock dues, import duty, sales duty or other similar tax or duty at the South African place of entry as well as transportation and handling charges to the factory in the Republic where the supplies covered by the bid will be manufactured.
- 1.17 'Local content' means that portion of the bidding price which is not included in the imported content, provided that local manufacture does take place.
- 1.18 'Manufacture' means the production of products in a factory using labour, materials, components and machinery, and includes other, related value-adding activities.
- 1.19 'Order' means an official written order issued for the supply of goods or works or the rendering of a service.
- 1.20 'Project site', where applicable, means the place indicated in bidding documents.
- 1.21 'Purchaser' means the organisation purchasing the goods.
- 1.22 'Republic' means the Republic of South Africa.
- 1.23 'SCC' means the Special Conditions of Contract.

1.24 'Services' means those functional services ancillary to the supply of the goods, such as transportation and any other incidental services, such as installation, commissioning, provision of technical assistance, training, catering, gardening, security, maintenance, and other such obligations of the supplier covered under the contract.

1.25 'Written' or 'in writing' means handwritten in ink or any form of electronic or mechanical writing.

2. Application

2.1 These general conditions are applicable to all bids, contracts and orders, including bids for functional and professional services, sales, hiring, letting and the granting or acquiring of rights, but excluding immovable property, unless otherwise indicated in the bidding documents.

2.2 Where applicable, special conditions of contract are also laid down to cover specific supplies, services or works.

2.3 Where such special conditions of contract are in conflict with these general conditions, the special conditions shall apply.

3. General

3.1 Unless otherwise indicated in the bidding documents, the purchaser shall not be liable for any expense incurred in the preparation and submission of a bid. Where applicable, a non-refundable fee for documents may be charged.

3.2 With certain exceptions, invitations to bid are only published in the Government Tender Bulletin. The Government Tender Bulletin may be obtained directly from the Government Printer, Private Bag X85, Pretoria 0001, or accessed electronically from www.treasury.gov.za.

4. Standards

4.1 The goods supplied shall conform to the standards mentioned in the bidding documents and specifications.

5. Use of contract documents and information; inspection.

5.1 The supplier shall not, without the purchaser's prior written consent, disclose the contract, or any provision thereof, or any specification, plan, drawing, pattern, sample, or information furnished by or on behalf of the purchaser in connection therewith, to any person other than a person employed by the supplier in the performance of the contract. Disclosure to any such employed person shall be made in confidence and shall extend only as far as may be necessary for the purposes of such performance.

5.2 The supplier shall not, without the purchaser's prior written consent, make use of any document or information mentioned in GCC clause 5.1, except for purposes of performing the contract.

5.3 Any document, other than the contract itself, mentioned in GCC clause 5.1 shall remain the property of the purchaser and shall be returned (all copies) to the purchaser on completion of the supplier's performance under the contract if so required by the purchaser.

5.4 The supplier shall permit the purchaser to inspect the supplier's records relating to the performance of the supplier and to have them audited by auditors appointed by the purchaser, if so required by the purchaser.

6. Patent rights

6.1 The supplier shall indemnify the purchaser against all third-party claims of infringement of patent, trademark, or industrial design rights arising from the use of the goods or any part thereof by the purchaser.

7. Performance Security

7.1 Within 30 (thirty) days of receipt of the notification of contract award, the successful bidder shall furnish to the purchaser the performance security of the amount specified in the SCC.

- 7.2 The proceeds of the performance security shall be payable to the purchaser as compensation for any loss resulting from the supplier's failure to complete his obligations under the contract.
- 1.3 The performance security shall be denominated in the currency of the contract or in a freely convertible currency acceptable to the purchaser, and shall be in one of the following forms:
- a) a bank guarantee or an irrevocable letter of credit issued by a reputable bank located in the purchaser's country or abroad, acceptable to the purchaser, in the form provided in the bidding documents or another form acceptable to the purchaser; or
 - b) A cashier's or certified cheque.
- 7.4 The performance security will be discharged by the purchaser and returned to the supplier not later than 30 (thirty) days following the date of completion of the supplier's performance obligations under the contract, including any warranty obligations, unless otherwise specified in the SCC.

8. Inspections, tests and analyses

- 8.1 All pre-bidding testing will be for the account of the bidder.
- 8.2 If it is a bid condition that supplies to be produced or services to be rendered should at any stage during production or execution or on completion be subject to inspection, the premises of the bidder or contractor shall be open, at all reasonable hours, for inspection by a representative of the Department or an organisation acting on behalf of the Department.
- 8.3 If there are no inspection requirements indicated in the bidding documents and no mention of such is made in the contract, but during the contract period it is decided that inspections shall be carried out, the purchaser shall itself make the necessary arrangements, including payment arrangements with the testing authority concerned.
- 8.4 If the inspections, tests and analyses referred to in clauses 8.2 and 8.3 show the supplies to be in accordance with the contract requirements, the cost of the inspections, tests and analyses shall be defrayed by the purchaser.
- 8.5 Where the supplies or services referred to in clauses 8.2 and 8.3 do not comply with the contract requirements, irrespective of whether such supplies or services are accepted or not, the cost in connection with these inspections, tests or analyses shall be defrayed by the supplier.
- 8.6 Supplies and services which are referred to in clauses 8.2 and 8.3 and which do not comply with the contract requirements may be rejected.
- 8.7 Any contract supplies may on or after delivery be inspected, tested or analysed and may be rejected if found not to comply with the requirements of the contract. Such rejected supplies shall be held at the cost and risk of the supplier, who shall, when called upon, remove them immediately at his own cost and forthwith substitute them with supplies which do comply with the requirements of the contract. Failing such removal, the rejected supplies shall be returned at the suppliers cost and risk. Should the supplier fail to provide the substitute supplies forthwith, the purchaser may, without giving the supplier further opportunity to substitute the rejected supplies, purchase such supplies as may be necessary at the expense of the supplier.
- 8.8 The provisions of clauses 8.4 to 8.7 shall not prejudice the right of the purchaser to cancel the contract on account of a breach of the conditions thereof, or to act in terms of Clause 23 of the GCC.

9. Packing

- 9.1 The supplier shall provide such packing of the goods as is required to prevent their damage or deterioration during transit to their final destination, as indicated in the contract. The packing shall be sufficient to withstand, without limitation, rough handling during transit and exposure to extreme temperatures, salt and precipitation during transit, and open storage. Packing, case size and weights shall take into consideration, where appropriate, the remoteness of the goods' final destination and the absence of heavy handling facilities at all points in transit.

- 9.2 The packing, marking, and documentation within and outside the packages shall comply strictly with such special requirements as shall be expressly provided for in the contract, including additional requirements, if any, specified in the SCC, and in any subsequent instructions ordered by the purchaser.

10. Delivery and documents

- 10.1 Delivery of the goods shall be made by the supplier in accordance with the terms specified in the contract. The details of shipping and/or other documents to be furnished by the supplier are specified in the SCC.
- 10.2 Documents to be submitted by the supplier are specified in the SCC.

11. Insurance

- 11.1 The goods supplied under the contract shall be fully insured, in a freely convertible currency, against loss or damage incidental to manufacture or acquisition, transportation, storage and delivery in the manner specified in the SCC.

12. Transportation

- 12.1 Should a price other than an all-inclusive delivered price be required, this shall be specified in the SCC.

13. Incidental Services

- 13.1 The supplier may be required to provide any or all of the following services, including additional services (if any) specified in the SCC:
- (a) performance or supervision of on-site assembly, and/or commissioning of the supplied goods;
 - (b) furnishing of tools required for the assembly and/or maintenance of the supplied goods;
 - (c) furnishing of a detailed operations and maintenance manual for each appropriate unit of the supplied goods;
 - (d) performance or supervision or maintenance and/or repair of the supplied goods, for a period of time agreed by the Parties, provided that this service shall not relieve the supplier of any warranty obligations under this contract; and
 - (e) training of the purchaser's personnel, at the supplier's plant and/or on-site, in assembly, start-up, operation, maintenance, and/or repair of the supplied goods.
- 13.2 Prices charged by the supplier for incidental services, if not included in the contract price for the goods, shall be agreed upon in advance by the Parties and shall not exceed the prevailing rates charged to other Parties by the supplier for similar services.

14. Spare parts

- 14.1 As specified in the SCC, the supplier may be required to provide any or all of the following materials, notifications, and information pertaining to spare parts manufactured or distributed by the supplier:
- (a) such spare parts as the purchaser may elect to purchase from the supplier, provided that this election shall not relieve the supplier of any warranty obligations under the contract; and
 - (b) in the event of termination of production of the spare parts:
 - (i) Advance notification to the purchaser of the pending termination, in sufficient time to permit the purchaser to procure needed requirements; and
 - (ii) following such termination, furnishing at no cost to the purchaser, the blueprints, drawings, and specifications of the spare parts, if requested.

15. Warranty

- 15.1 The supplier warrants that the goods supplied under the contract are new, unused, of the most recent or current models, and that they incorporate all recent improvements in design and materials unless provided otherwise in the contract. The supplier further warrants that all goods supplied under this contract shall have no defect arising from design, materials, or workmanship (except when the design and/or material is required by the purchaser's specifications), or from any act or omission of the supplier, that may develop under normal use of the supplied goods in the conditions prevailing in the country of final destination.

15.2 This warranty shall remain valid for 12 (twelve) months after the goods, or any portion thereof, as the case may be, have been delivered to and accepted at the final destination indicated in the contract, or for 18 (eighteen) months after the date of shipment from the port or place of loading in the source country, whichever period concludes earlier, unless specified otherwise in the SCC.

15.3 The purchaser shall notify the supplier promptly, in writing, of any claims arising under this warranty.

15.4 Upon receipt of such notice, the supplier shall, within the period specified in the SCC and with all reasonable speed, repair or replace the defective goods or parts thereof, without costs to the purchaser.

15.5 If the supplier, having been notified, fails to remedy the defect(s) within the period specified in the SCC, the purchaser may proceed to take such remedial action as may be necessary, at the supplier's risk and expense and without prejudice to any other rights which the purchaser may have against the supplier under the contract.

16. Payment

16.1 The method and conditions of payment to be made to the supplier under this contract shall be specified in the SCC.

16.2 The supplier shall furnish the purchaser with an invoice accompanied by a copy of the delivery note and upon fulfilment of any other obligations stipulated in the contract.

16.3 Payments shall be made promptly by the purchaser, but in no case later than 30 (thirty) days after submission of an invoice or claim by the supplier.

16.4 Payment will be made in Rand unless otherwise stipulated in the SCC.

17. Prices

17.1 Prices charged by the supplier for goods delivered and services performed under the contract shall not vary from the prices tendered by the supplier in his bid, with the exception of any price adjustments authorized in the SCC or in the purchaser's request for bid validity extension, as the case may be.

18. Contract Amendments

18.1 No variation in or modification of the terms of the contract shall be made except by written amendment signed by the Parties concerned.

19. Assignment

19.1 The supplier shall not assign, in whole or in part, its obligations to perform under the contract, except with the purchaser's prior written consent.

20. Subcontracts

20.1 The supplier shall notify the purchaser in writing of all subcontracts awarded under this contract if not already specified in the bid. Such notification, in the original bid or later, shall not relieve the supplier from any liability or obligation under the contract.

21. Delays in the supplier's performance

21.1 Delivery of the goods and performance of services shall be made by the supplier in accordance with the time schedule prescribed by the purchaser in the contract.

21.2 If at any time during the performance of the contract, the supplier or its subcontractor(s) should encounter conditions impeding timely delivery of the goods and performance of services, the supplier shall promptly notify the purchaser in writing of the fact of the delay, its likely duration and its cause(s). As soon as practicable after receipt of the supplier's notice, the purchaser shall evaluate the situation and may at his or her discretion extend the supplier's time for performance, with or without the imposition of penalties, in which case the extension shall be ratified by the Parties by amendment of contract.

- 21.3 No provision in a contract shall be deemed to prohibit the obtaining of supplies or services from a national department, provincial department, or a local authority.
- 21.4 The right is reserved to procure, outside of the contract, small quantities of supplies; or to have minor essential services executed if an emergency arises, or the supplier's point of supply is not situated at or near the place where the supplies are required, or the supplier's services are not readily available.
- 21.5 Except as provided under GCC Clause 25, a delay by the supplier in the performance of its delivery obligations shall render the supplier liable to the imposition of penalties, pursuant to GCC Clause 22, unless an extension of time is agreed upon pursuant to GCC Clause 21.2 without the application of penalties.
- 21.6 Upon any delay beyond the delivery period in the case of a supplies contract, the purchaser shall, without cancelling the contract, be entitled to purchase supplies of a similar quality and up to the same quantity in substitution of the goods not supplied in conformity with the contract and to return any goods delivered later at the supplier's expense and risk, or to cancel the contract and buy such goods as may be required to complete the contract and, without prejudice to his other rights, be entitled to claim damages from the supplier.

22. Penalties

- 22.1 Subject to GCC Clause 25, if the supplier fails to deliver any or all of the goods or to perform the services within the period(s) specified in the contract, the purchaser shall, without prejudice to its other remedies under the contract, deduct from the contract price, as a penalty, a sum calculated on the delivered price of the delayed goods or unperformed services, using the current prime interest rate, calculated for each day of the delay until actual delivery or performance. The purchaser may also consider termination of the contract pursuant to GCC Clause 23.

23. Termination for default

- 23.1 The purchaser, without prejudice to any other remedy for breach of contract, by written notice of default sent to the supplier, may terminate this contract in whole or in part:
- (a) if the supplier fails to deliver any or all of the goods within the period(s) specified in the contract, or within any extension thereof granted by the purchaser pursuant to GCC Clause 21.2;
 - (b) if the supplier fails to perform any other obligation(s) under the contract; or
 - (c) if the supplier, in the judgment of the purchaser, has engaged in corrupt or fraudulent practices in competing for or in executing the contract.
- 23.2 In the event the purchaser terminates the contract in whole or in part, the purchaser may procure, upon such terms and in such manner as it deems appropriate, goods, works or services similar to those undelivered, and the supplier shall be liable to the purchaser for any excess costs for such similar goods, works or services. However, the supplier shall continue performance of the contract to the extent not terminated.
- 23.3 Where the purchaser terminates the contract in whole or in part, the purchaser may decide to impose a restriction penalty on the supplier by prohibiting such supplier from doing business with the public sector for a period not exceeding 10 years.
- 23.4 If a purchaser intends imposing a restriction on a supplier or any person associated with the supplier, the supplier will be allowed a time period of not more than 14 (fourteen) days to provide reasons why the envisaged restriction should not be imposed. Should the supplier fail to respond within the stipulated 14 (fourteen) days the purchaser may regard the intended penalty as not objected against and may impose it on the supplier.
- 23.5 Any restriction imposed on any person by the Accounting Officer/Authority will, at the discretion of the Accounting Officer/Authority, also be applicable to any other enterprise or any partner, manager, director or other person who wholly or partly exercises or exercised or may exercise control over the enterprise of the first-mentioned person, and with which enterprise or person the first-mentioned person is or was, in the opinion of the Accounting Officer/Authority, actively associated.

23.6 If a restriction is imposed, the purchaser must, within 5 (five) working days of such imposition, furnish the National Treasury with the following information:

- (i) the name and address of the supplier and/or person restricted by the purchaser;
- (ii) the date of commencement of the restriction;
- (iii) the period of restriction; and
- (iv) the reasons for the restriction.

These details will be loaded in the National Treasury's central database of suppliers or persons prohibited from doing business with the public sector.

23.7 If a court of law convicts a person of an offence as contemplated in sections 12 or 13 of the Prevention and Combating of Corrupt Activities Act, Act 12 of 2004, the court may also rule that such person's name be endorsed on the Register for Tender Defaulters. When a person's name has been endorsed on the Register, the person will be prohibited from doing business with the public sector for a period of not less than five years and not more than 10 years. The National Treasury is empowered to determine the period of restriction, and each case will be dealt with on its own merits. According to section 32 of the Act the Register must be open to the public. The Register can be perused on the National Treasury website.

24. Anti-dumping and countervailing duties and rights

24.1 When, after the date of bid, provisional payments are required, or anti-dumping or countervailing duties are imposed, or the amount of a provisional payment or anti-dumping or countervailing right is increased in respect of any dumped or subsidised import, the State is not liable for any amount so required or imposed, or for the amount of any such increase. When, after the said date, such a provisional payment is no longer required or any such anti-dumping or countervailing right is abolished, or where the amount of such provisional payment or any such right is reduced, any such favourable difference shall, on demand, be paid forthwith by the contractor to the State, or the State may deduct such amounts from moneys (if any) which may otherwise be due to the contractor in regard to supplies or services which he or she delivered or rendered, or is to deliver or render in terms of the contract or any other contract or any other amount which may be due to him or her.

25. Force majeure

25.1 Notwithstanding the provisions of GCC Clauses 22 and 23, the supplier shall not be liable for forfeiture of its performance security, damages, or termination for default if, and to the extent that, his delay in performance or other failure to perform his obligations under the contract is the result of an event of force majeure.

25.2 If a force majeure situation arises, the supplier shall notify the purchaser promptly, in writing, of such condition and the cause thereof. Unless otherwise directed by the purchaser in writing, the supplier shall continue to perform its obligations under the contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the force majeure event.

26. Termination for insolvency

26.1 The purchaser may at any time terminate the contract by giving written notice to the supplier if the supplier becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the supplier, provided that such termination will not prejudice or affect any right of action or remedy which has accrued or will accrue thereafter to the purchaser.

27. Settlement of Disputes

27.1 If any dispute or difference of any kind whatsoever arises between the purchaser and the supplier in connection with or arising out of the contract, the Parties shall make every effort to resolve such dispute or difference amicably, by mutual consultation.

27.2 If, after 30 (thirty) days, the Parties have failed to resolve their dispute or difference by such mutual consultation, then either the purchaser or the supplier may give notice to the other party of his intention to commence with mediation. No mediation in respect of this matter may be commenced unless such notice is given to the other party.

27.3 Should it not be possible to settle a dispute by means of mediation, it may be settled in a South African court of law.

27.4 Mediation proceedings shall be conducted in accordance with the rules of procedure specified in the SCC.

27.5 Notwithstanding any reference to mediation and/or court proceedings herein,

- (a) the Parties shall continue to perform their respective obligations under the contract unless they otherwise agree; and
- (b) the purchaser shall pay the supplier any monies due to the supplier.

28. Limitation of Liability

28.1 Except in cases of criminal negligence or wilful misconduct, and in the case of infringement pursuant to Clause 6:

- (c) the supplier shall not be liable to the purchaser, whether in contract, tort, or otherwise, for any indirect or consequential loss or damage, loss of use, loss of production, or loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the supplier to pay penalties and/or damages to the purchaser; and
- (d) the aggregate liability of the supplier to the purchaser, whether under the contract, in tort or otherwise, shall not exceed the total contract price, provided that this limitation shall not apply to the cost of repairing or replacing defective equipment.

29. Governing language

29.1 The contract shall be written in English. All correspondence and other documents pertaining to the contract that is exchanged by the Parties shall also be written in English.

30. Applicable Law

30.1 The contract shall be interpreted in accordance with South African laws, unless otherwise specified in the SCC.

31. Notices

31.1 Every written acceptance of a bid shall be posted to the supplier concerned by registered or certified mail, and any other notice to him shall be posted by ordinary mail, to the address furnished in his bid or to the address notified later by him in writing; and such posting shall be deemed to be proper service of such notice.

31.2 The time mentioned in the contract documents for performing any act after such aforesaid notice has been given, shall be reckoned from the date of posting of such notice.

32. Taxes and Duties

32.1 A foreign supplier shall be entirely responsible for all taxes, stamp duties, licence fees, and other such levies imposed outside the purchaser's country.

32.2 A local supplier shall be entirely responsible for all taxes, duties, licence fees, etc., incurred until delivery of the contracted goods to the purchaser.

32.3 No contract shall be concluded with any bidder whose tax matters are not in order. Prior to the award of a bid the Department must be in possession of a tax clearance certificate submitted by the bidder. This certificate must be an original issued by the South African Revenue Services.

33. National Industrial Participation (NIP) Programme

33.1 The NIP Programme administered by the Department of Trade and Industry shall be applicable to all contracts that are subject to the NIP obligation.

34 Prohibition of Restrictive practices

34.1 In terms of section 4 (1) (b) (iii) of the Competition Act, Act 89 of 1998, as amended, an agreement between or concerted practice by firms, or a decision by an association of firms, is prohibited if it is between Parties in a horizontal relationship and if a bidder(s) is/are or a contractor(s) was/were involved in collusive bidding (or bid rigging).

- 34.2 If a bidder(s) or contractor(s), based on reasonable grounds or evidence obtained by the purchaser, has/have engaged in the restrictive practice referred to above, the purchaser may refer the matter to the Competition Commission for investigation and possible imposition of administrative penalties as contemplated in the Competition Act, Act 89 of 1998.
- 34.3 If a bidder(s) or contractor(s) has/have been found guilty by the Competition Commission of the restrictive practice referred to above, the purchaser may, in addition and without prejudice to any other remedy provided for, invalidate the bid(s) for such item(s) offered, and/or terminate the contract in whole or part, and/or restrict the bidder(s) or contractor(s) from conducting business with the public sector for a period not exceeding 10 (ten) years and/or claim damages from the bidder(s) or contractor(s) concerned.

Signed: _____

For: _____ (Supplier’s Insurance Broker)

Annexure B – Monthly Project Labour Report

ANNEX 1

CITY OF CAPE TOWN
MONTHLY PROJECT LABOUR REPORT

Instructions for completing and submitting forms

General

- 1 The Monthly Project Labour Reports must be completed in full, using typed, proper case characters; alternatively, should a computer not be available, handwritten in black ink.
- 2 Incomplete / incorrect / illegible forms will not be accepted.
- 3 Any conditions relating to targeted labour stipulated in the Contract (in the case of contracted out services or works) shall apply to the completion and submission of these forms.
- 4 This document is available in Microsoft Excel format upon request from the City's EPWP office, tel 021 400 9406, email EPWPLR@capetown.gov.za.

Project Details

- 5 If a field is not applicable insert the letters: NA
- 6 Only the Project Number supplied by the Corporate EPWP Office must be inserted.
The Project Number can be obtained from the Coordinator or Project Manager or from the
e-mail address in point 4 above.
- 7 On completion of the contract or works project the anticipated end date must be updated to
reflect the actual end date.

Beneficiary Details and Work Information

- g Care must be taken to ensure that beneficiary details correspond accurately with the beneficiary's ID document.

- 9 A new beneficiary is one in respect of which a new employment contract is signed in the
current month. A certified ID copy must accompany this labour report on submission.
- 10 Was the beneficiary sourced from the City's job seeker database?
- 11 The contract end date as stated in the beneficiary's employment contract.
- 12 Where a beneficiary has not worked in a particular month, the beneficiary's name shall not be
reflected on this form at all for the month in question.
- 13 Training will be recorded separately from normal working days and together shall not
exceed the maximum of 23 days per month
- 14 Workers earning more than the maximum daily rate (currently R450 excluding any benefits)
shall not be reflected on this form at all.
- Submission of Forms**
- 15 Signed hardcopy forms must be scanned and submitted to the City's project manager in
electronic (.pdf) format, together with the completed form in Microsoft Excel format.
- 16 Scanned copies of all applicable supporting documentation must be submitted along with
each monthly project labour report. Copies of employment contracts and ID documents are
only required in respect of new beneficiaries.
- 17 If a computer is not available hardcopy forms and supporting documentation will be accepted.

Annexure C - Pro Forma Performance Security/ Guarantee

GUARANTEE PERFORMANCE SECURITY

GUARANTOR DETAILS AND DEFINITIONS

"Guarantor" means:

Physical address of Guarantor:

"Supplier" means:

"Contract Sum" means: The accepted tender amount (INCLUSIVE OF VAT) of R

Amount in words:

"Guaranteed Sum" means: The maximum amount of R

Amount in words:

"Contract" means: The agreement made in terms of the Form of Offer and Acceptance for tender no ...and such amendments or additions to the contract as may be agreed in writing between the Parties.

PERFORMANCE GUARANTEE

- 1. The Guarantor's liability shall be limited to the amount of the Guaranteed Sum.
- 2. The Guarantor's period of liability shall be from and including the date of issue of this Guarantee/Performance Security up to and including the termination of the Contract or the date of payment in full of the Guaranteed Sum, whichever occurs first.
- 3. The Guarantor hereby acknowledges that:
 - 3.1 any reference in this Guarantee/Performance to "Contract" is made for the purpose of convenience and shall not be construed as any intention whatsoever to create an accessory obligation or any intention whatsoever to create a suretyship;
 - 3.2 Its obligation under this Guarantee/Performance Security is restricted to the payment of money.
- 4. Subject to the Guarantor's maximum liability referred to in 1, the Guarantor hereby undertakes to pay the CCT the sum due and payable upon receipt of the documents identified in 4.1 to 4.2:
 - 4.1 A copy of a first written demand issued by the CCT to the Supplier stating that payment of a sum which is due and payable has not been made by the Supplier in terms of the Contract and failing such payment within seven (7) calendar days, the CCT intends to call upon the Guarantor to make payment in terms of 4.2;
 - 4.2 A first written demand issued by the CCT to the Guarantor at the Guarantor's physical address with a copy to the Supplier stating that a period of seven (7) days has elapsed since the first written demand in terms of 4.1 and the sum has still not been paid.
- 5. Subject to the Guarantor's maximum liability referred to in 1, the Guarantor undertakes to pay to the CCT the Guaranteed Sum or the full outstanding balance upon receipt of a first written demand from the CCT to the Guarantor at the Guarantor's physical address calling up this Guarantee / Performance Security, such demand stating that:
 - 5.1 The Contract has been terminated due to the Supplier's default and that this Guarantee/Performance Security is called up in terms of 5; or

- 5.2 a provisional or final sequestration or liquidation court order has been granted against the Supplier and that the Guarantee/Performance Guarantee is called up in terms of 5; and
- 5.3 The aforesaid written demand is accompanied by a copy of the notice of termination and/or the provisional/final sequestration and/or the provisional liquidation court order.
6. It is recorded that the aggregate amount of payments required to be made by the Guarantor in terms of 4 and 5 shall not exceed the Guarantor's maximum liability in terms of 1.
7. Where the Guarantor has made payment in terms of 5, the CCT shall upon the termination date of the Contract, submit an expense account to the Guarantor showing how all monies received in terms of this Guarantee/Performance Security have been expended and shall refund to the Guarantor any resulting surplus. All monies refunded to the Guarantor in terms of this Guarantee/Performance Security shall bear interest at the prime overdraft rate of the CCT's bank compounded monthly and calculated from the date payment was made by the Guarantor to the CCT until the date of refund.
8. Payment by the Guarantor in terms of 4 or 5 shall be made within seven (7) calendar days upon receipt of the first written demand to the Guarantor.
9. The CCT shall have the absolute right to arrange its affairs with the Supplier in any manner which the CCT may deem fit and the Guarantor shall not have the right to claim his release from this Guarantee /Performance Security on account of any conduct alleged to be prejudicial to the Guarantor.
10. The Guarantor chooses the physical address as stated above for the service of all notices for all purposes in connection herewith.
11. This Guarantee/Performance Security is neither negotiable nor transferable and shall expire in terms of 2, where after no claims will be considered by the Guarantor. The original of this Guarantee / Performance Security shall be returned to the Guarantor after it has expired.
12. This Guarantee/Performance Security, with the required demand notices in terms of 4 or 5, shall be regarded as a liquid document for the purposes of obtaining a court order.
13. Where this Guarantee/Performance Security is issued in the Republic of South Africa the Guarantor hereby consents in terms of Section 45 of the Magistrate's Courts Act No 32 of 1944, as amended, to the jurisdiction of the Magistrate's Court of any district having jurisdiction in terms of Section 28 of the said Act, notwithstanding that the amount of the claim may exceed the jurisdiction of the Magistrate's Court.

Annexure F - Tender Returnable Documents

Schedule F.1: Contract Price Adjustment

COMPILER NOTE:

The SCM practitioner along with the BSC will determine whether tenderers will be asked to tender firm prices or prices subject to adjustment. The choice must be clearly indicated in the SCC at clause 17.

If firm prices apply: Insert "Not Applicable" here.

If prices subject to adjustment are called for:

The SCM practitioner along with the BSC must determine the most appropriate price adjustment (CPA) mechanism for this tender and also whether rate of exchange variation (ROE) should be provided for and select the applicable terms from the templates available for download at: [CMT Contract Management Templates - Default \(capetown.gov.za\)](https://www.capetown.gov.za/CMT-Contract-Management-Templates-Default) or contact Contract.Advice@capetown.gov.za

F.1.1 Where prices are subject to adjustment only the method prescribed in this tender document shall apply. If a tenderer proposes any alternative method of price adjustment, their tender offer will be considered to be non-responsive.

F.1.2 Contract Price Adjustment Mechanism: Applicable to ALL items except item number 3.1, 8.1 - 8.6 and 9.1

F.1.2.1 Year 1:

In the **first year, the Contract Price as per GCC shall remain Firm for the first 12 months** (from commencement date of tender) and no claims for contract price adjustment will be considered for the first 12 months subject to the provisions in the price schedule.

Subject to the above, Contract Price Adjustment will be applicable as from commencement of the 13 month of the contract period. Tenderers shall be entitled to claim contract price adjustment as follows:

90% of the tendered price will be subject to adjustment annually based on the average Consumer Price Index (CPI) as follows:

F.1.2.2 Year 2:

In the **second year, the Contract Price Adjustment will be applicable from the commencement of 13th month to the end of the 24th month** subject to contract price adjustment in accordance with the Consumer Price Index (P0141-Table B2). Base month for the price adjustment shall be two (2) calendar months prior to the date of commencement. The end of month shall be two (2) calendar months prior to 13th month.

F.1.2.3 Year 3:

In the **third year, the Contract Price Adjustment will be applicable from the commencement of 25th month to the end of the 36th month** subject to the contract price adjustment in accordance with the Consumer Price Index (P0141-Table B2). Base month for the price adjustment shall be two (2) calendar months prior 13th month. The end of month shall be two (2) calendar months prior to 24th month.

Tenderers shall be entitled to claim contract price adjustment for the first and second year as follows:

90% of the current rate will be subject to adjustment annually based on the average Consumer Price Index (CPI) in accordance with P0141-Table B2.

10% of the current rate shall remain fixed and Firm.

F.1.2.4 Subject to F.1.2.1 to F1.2.3 above, Contract Price Adjustments will be applied to the following items –

1.1	2.1	4.1	5.1	6.0	7.0
1.2		4.2	5.2		
1.3		4.3	5.3		
		4.4	5.4		

F.1.3 Price Adjustment Mechanism: Provisional Sums

Item 9.1 is a provisional sum item which shall be determined by the City at contractual stage (where applicable). No rates apply to this item and shall therefore not be adjusted.

F.1.4 Price Adjustment Mechanism: Disposal at Vissershok Waste Management Facility

Item 3.1 relates to the disposal of waste material at Vissershok Waste Management Facility. The tender prices are based on disposal rate at the disposal site: Vissershok Waste Management Facility, and is subject to adjustment once per year effective on 1st July of each year in direct proportion to any variation in this tariff. The cost of any chemical treatment of the sewage debris is deemed to have been included in the disposal rate tendered and there will be no additional payment, should the type or quantity of chemical treatment be altered during the contract period.

F.1.5 Price adjustment in respect of PSIRA Security Guards

Items 8.1 – 8.6 are based on the current PSIRA rates and shall be subject to adjustment once per annum. The tender prices are based on the current PSiRA rates and is subject to adjustment once per year effective from 1st March each year in direct proportion to any variation in this tariff, according to the annual published new rates as per the Private Security Industry Regulatory Authority (PSiRA) Guidelines.

Schedule F.2: Certificate of Authority for Partnerships/ Joint Ventures/ Consortia

This schedule is to be completed if the tender is submitted by a partnership/joint venture/ consortium.

1. We, the undersigned, are submitting this tender offer as a partnership/ joint venture/ consortium and hereby authorize Mr/Ms _____, of the authorised entity _____, acting in the capacity of Lead Partner, to sign all documents in connection with the tender offer and any contract resulting from it on the partnership/joint venture/ consortium's behalf.
2. By signing this schedule the partners to the partnership/joint venture/ consortium:
 - 2.1 warrant that the tender submitted is in accordance with the main business and objectives of the partnership/joint venture/ consortium;
 - 2.2 agree that the CCT shall make all payments in terms of this Contract into the following bank account of the Lead Partner:
 Account Holder: _____
 Financial Institution: _____
 Branch Code: _____
 Account No.: _____
 - 2.3 agree that in the event that there is a change in the partnership/ joint venture/ consortium and/or should a dispute arise between the partnership/joint venture/ consortium partners, that the CCT shall continue to make any/all payments due and payable in terms of the Contract into the aforesaid bank account until such time as the CCT is presented with a Court Order or an original agreement (signed by each and every partner of the partnership/joint venture/ consortium) notifying the CCT of the details of the new bank account into which it is required to make payment.
 - 2.4 agree that they shall be jointly and severally liable to the CCT for the due and proper fulfilment by the successful tenderer/supplier of its obligations in terms of the Contract as well as any damages suffered by the CCT as a result of breach by the successful tenderer/supplier. The partnership/joint venture/ consortium partners hereby renounce the benefits of excussion and division.

Note: A copy of the Joint Venture Agreement shall be appended to *List of Other Documents Attached by Tenderer Schedule*.

Schedule F.3: Declaration for Procurement above R10 million

If the value of the transaction is expected to exceed R10 million (VAT included) the tenderer shall complete the following questionnaire, attach the necessary documents and sign this schedule:

1. Are you by law required to prepare annual financial statements for auditing? **(Please mark with X)**

YES		NO	
-----	--	----	--

If YES, submit audited annual financial statements:

- (i) For the past three years, or
(ii) Since the date of establishment of the tenderer (if established during the past three years)

By attaching such audited financial statements to **List of Other Documents Attached by Tenderer Schedule**.

2. Do you have any outstanding undisputed commitments for municipal services towards the CCT or other municipality in respect of which payment is overdue for more than 30 (thirty) days? **(Please mark with X)**

YES		NO	
-----	--	----	--

- 2.1 If NO, this serves to certify that the tenderer has no undisputed commitments for municipal services towards any municipality for more than three (3) (three) months in respect of which payment is overdue for more than 30 (thirty) days.

- 2.2 If YES, provide particulars:

3. Has any contract been awarded to you by an organ of state during the past five (5) years? **(Please mark with X)**

YES		NO	
-----	--	----	--

If YES, insert particulars in the table below including particulars of any material non-compliance or dispute concerning the execution of such contract. Alternatively attach the particulars to **List of Other Documents Attached by Tenderer** schedule in the same format as the table below:

Organ of State	Contract Description	Contract Period	Non-compliance/dispute (if any)

4. Will any portion of the goods or services be sourced from outside the Republic, and if so, what portion and whether any portion of payment from the CCT is expected to be transferred out of the Republic? **(Please mark with X)**

YES		NO	
-----	--	----	--

If YES, furnish particulars below

The tenderer hereby certifies that the information set out in this schedule and/or attached hereto is true and correct, and acknowledges that failure to properly and truthfully complete this schedule may result in steps being taken against the tenderer, the tender being disqualified, and/or (in the event that the tenderer is successful) the cancellation of the contract, restriction of the tenderer or the exercise by the CCT of any other remedies available to it.

Schedule F.4: Preference Points Claim Form In Terms Of the Preferential Procurement Regulations 2022

1. GENERAL CONDITIONS

- 1.1 The following preference point systems are applicable to invitations to tender:
- the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included); and
 - the 90/10 system for requirements with a Rand value above R50 000 000 (all applicable taxes included).

1.2 To be completed by the organ of state

The applicable preference point system for this tender is the 90/10 preference point system.

- 1.3 Points for this tender (even in the case of a tender for income-generating contracts) shall be awarded for:
- (a) Price; and
 - (b) Specific Goals.

1.4 To be completed by the organ of state:

The maximum points for this tender are allocated as follows:

	POINTS
PRICE	90
SPECIFIC GOALS	10
Total points for Price and SPECIFIC GOALS	100

- 1.5 Failure on the part of a tenderer to submit proof or documentation required in terms of this tender to claim points for specific goals with the tender, will be interpreted to mean that preference points for specific goals are not claimed.
- 1.6 The organ of state reserves the right to require of a tenderer, either before a tender is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the organ of state.

2. DEFINITIONS

The following definitions shall apply to this schedule:

- (a) "tender" means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation;
- (b) "price" means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- (c) "rand value" means the total estimated value of a contract in Rand, calculated at the time of bid invitation, and includes all applicable taxes;
- (d) "tender for income-generating contracts" means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- (e) "The Act" means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).

3. FORMULAE FOR PROCUREMENT OF GOODS AND SERVICES**POINTS AWARDED FOR PRICE****THE 80/20 OR 90/10 PREFERENCE POINT SYSTEMS**

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20 or 90/10

Or

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmin = Price of lowest acceptable tender

4. FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT**POINTS AWARDED FOR PRICE**

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20 or 90/10

Or

Where:

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmax = Price of highest acceptable tender

5. POINTS AWARDED FOR SPECIFIC GOALS

5.1 In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1 below as may be supported by proof/documentation stated in the conditions of this tender:

5.2 In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—

- (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
- (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,

then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

Table 1: Specific goals for the tender and points claimed are indicated per the table below.

(Note to organs of state: Where either the 90/10 or 80/20 preference point system is applicable, corresponding points must also be indicated as such.

Note to tenderers: The tenderer must indicate how they claim points for each preference point system.)

The specific goals allocated points in terms of this tender	To be Completed by the Organ of State	To be Completed by the Tenderer
	Number of points Allocated (90/10 system)	Number of points claimed (90/10 system)
Gender	3

DECLARATION WITH REGARD TO COMPANY/FIRM

5.3 Name of company/firm.....

5.4 Company registration number:

5.5 TYPE OF COMPANY/ FIRM

- ☐ Partnership/Joint Venture / Consortium
☐ One-person business/sole propriety
☐ Close corporation
☐ Public Company
☐ Personal Liability Company
☐ (Pty) Limited
☐ Non-Profit Company
☐ State Owned Company

[Tick applicable box]

5.6 I, the undersigned, who is duly authorised to do so on behalf of the company/firm, certify that the points claimed, based on the specific goals as advised in the tender, qualifies the company/ firm for the preference(s) shown and I acknowledge that:

- i) The information furnished is true and correct;
- ii) The preference points claimed are in accordance with the General Conditions as indicated in paragraph 1 of this form;
- iii) In the event of a contract being awarded as a result of points claimed as shown in paragraphs 4.1 and 4.2, the Supplier may be required to furnish documentary proof to the satisfaction of the organ of state that the claims are correct;
- iv) If the specific goals have been claimed or obtained on a fraudulent basis or any of the conditions of contract have not been fulfilled, the organ of state may, in addition to any other remedy it may have –
 - (a) disqualify the person from the tendering process;
 - (b) recover costs, losses or damages it has incurred or suffered as a result of that person's conduct;
 - (c) cancel the contract and claim any damages which it has suffered as a result of having to make less favourable arrangements due to such cancellation;
 - (d) recommend that the tenderer or Supplier, its shareholders and directors, or only the shareholders and directors who acted on a fraudulent basis, be restricted from obtaining business from any organ of state for a period not exceeding 10 years, after the audi alteram partem (hear the other side) rule has been applied; and
 - (e) forward the matter for criminal prosecution, if deemed necessary.

Schedule F.5: Declaration of Interest – State Employees (MBD 4 amended)

1. No bid will be accepted from:
 - 1.1 persons in the service of the state¹, or
 - 1.2 if the person is not a natural person, of which any director, manager or principal shareholder or stakeholder is in the service of the state, or
 - 1.3 from persons, or entities of which any director, manager or principal shareholder or stakeholder, has been in the service of the City of Cape Town (CCT) during the previous twelve (12) months, or
 - 1.4 from an entity who has employed a former CCT employee who was at a level of T14 or higher at the time of leaving the CCT's employ and involved in any of the CCT's bid committees for the bid submitted, if:
 - 1.4.1 the CCT employee left the CCT's employment voluntarily, during the previous twelve (12) months;
 - 1.5 a person who was a CCT employee, or an entity that employs a CCT employee, if
 - 1.5.1 the CCT employee left the CCT's employment whilst under investigation for alleged misconduct, or
 - 1.5.2 was facing disciplinary action or potential disciplinary action by the CCT, or
 - 1.5.3 was involved in a dispute against the CCT during the previous thirty six (36) months.

2. Any person, having a kinship with persons in the service of the state, including a blood relationship, may make an offer or offers in terms of this invitation to bid. In view of possible allegations of favouritism, should the resulting bid, or part thereof, be awarded to persons connected with or related to persons in service of the state, it is required that the tenderer or their authorised representative declare their position in relation to the evaluating/adjudicating authority.

3. In order to give effect to the above, the following questionnaire must be completed and submitted with the bid.
 - 3.1 Full Name of tenderer or his or her representative: _____
 - 3.2 Identity Number: _____
 - 3.3 Position occupied in the Company (director, trustee, shareholder²): _____
 - 3.4 Company or Close Corporation Registration Number: _____
 - 3.5 Tax Reference Number: _____
 - 3.6 VAT Registration Number: _____
 - 3.7 The names of all directors / trustees / shareholders members, their individual identity numbers and state employee numbers must be indicated in paragraph 4 below.
 - 3.8 Are you presently in the service of the state? **YES / NO**
 - 3.8.1 If yes, furnish particulars: _____
 - 3.9 Have you been in the service of the state for the past twelve months? **YES / NO**
 - 3.9.1 If yes, furnish particulars: _____
 - 3.10 Do you have any relationship (family, friend, other) with persons in the service of the state and who may be involved with the evaluation and or adjudication of this bid? **YES / NO**
 - 3.10.1 If yes, furnish particulars: _____
 - 3.11 Are you, aware of any relationship (family, friend, other) between any other tenderer and any persons in the service of the state who may be involved with the evaluation and or adjudication of this bid? **YES / NO**
 - 3.11.1 If yes, furnish particulars: _____
 - 3.12 Are any of the company's directors, trustees, managers, principle shareholders or stakeholders in service of the state? **YES / NO**
 - 3.12.1 If yes, furnish particulars: _____

- 3.13 Are any spouse, child or parent of the company's directors, trustees, managers, principle shareholders or stakeholders in service of the state? **YES / NO**
 3.13.1 If yes, furnish particulars: _____
- 3.14 Do you or any of the directors, trustees, managers, principle shareholders, or stakeholders of this company have any interest in any other related companies or business whether or not they are bidding for this contract? **YES / NO**
 3.14.1 If yes, furnish particulars: _____
- 3.15 Have you, or any of the directors, trustees, managers, principle shareholders, or stakeholders of this company been in the service of the CCT in the past twelve months? **YES / NO**
 3.15.1 If yes, furnish particulars: _____
- 3.16 Do you have any employees who was in the service of the CCT at a level of T14 or higher at the time they left the employ of the CCT, and who was involved in any of the CCT's bid committees for this bid? **YES / NO**
 3.16.1 If yes, furnish particulars: _____

4. Full details of directors / trustees / members / shareholders

Full Name	Identity Number	State Employee Number

If the above table does not sufficient to provide the details of all directors / trustees / shareholders, please append full details to the tender submission.

The tenderer hereby certifies that the information set out in this schedule and/or attached hereto is true and correct, and acknowledges that failure to properly and truthfully complete this schedule may result in steps being taken against the tenderer, the tender being disqualified, and/or (in the event that the tenderer is successful) the cancellation of the contract, restriction of the tenderer or the exercise by the CCT of any other remedies available to it.

Schedule F.9: Certificate of Independent Tender Determination

I, the undersigned, in submitting this tender number **TENDER NO: 287S/2024/25** and tender description: **CLEANING OF SEWER PUMP STATION WET WELLS (CITY WIDE)** in response to the tender invitation made by THE CCT, do hereby make the following statements, which I certify to be true and complete in every respect:

I certify, on behalf of: _____ (Name of tenderer) that:

1. I have read and I understand the contents of this Certificate;
2. I understand that this tender will be disqualified if this Certificate is found not to be true and complete in every respect;
3. I am authorised by the tenderer to sign this Certificate, and to submit this tender, on behalf of the tenderer;
4. Each person whose signature appears on this tender has been authorised by the tenderer to determine the terms of, and to sign, the tender on behalf of the tenderer;
5. For the purposes of this Certificate and this tender, I understand that the word 'competitor' shall include any individual or organisation other than the tenderer, whether or not affiliated with the tenderer, who:
 - (a) has been requested to submit a tender in response to this tender invitation;
 - (b) could potentially submit a tender in response to this tender invitation, based on their qualifications, abilities or experience; and
 - (c) provides the same goods and services as the tenderer and/or is in the same line of business as the tenderer.
6. The tenderer has arrived at this tender independently from and without consultation, communication, agreement or arrangement with any competitor. However, communication between partners in a joint venture or consortium¹ will not be construed as collusive price quoting.
7. In particular, without limiting the generality of paragraphs 5 and 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices;
 - (b) geographical area where product or service will be rendered (market allocation);
 - (c) methods, factors or formulas used to calculate prices;
 - (d) the intention or decision to submit or not to submit a tender;
 - (e) the submission of a tender which does not meet the specifications and conditions of the tender; or
 - (f) tendering with the intention not to win the contract.
8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this tender invitation relates.
9. The terms of this tender have not been and will not be disclosed by the tenderer, directly or indirectly, to any competitor, prior to the date and time of the official tender opening or of the awarding of the contract.
10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to tenders and contracts, tenders that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act, Act 89 of 1998, and/o/r may be reported to the National Prosecuting Authority (NPA) for criminal investigation, and/or may be restricted from conducting business with the public sector for a period not exceeding 10 (ten) years in terms of the Prevention and Combating of Corrupt Activities Act, Act 12 of 2004, or any other applicable legislation.

Schedule F.10: Proposed Deviations And Qualifications By Tenderer

The Tenderer should record any **proposed** deviations or qualifications they may wish to make to the tender documents in this Returnable Schedule. Alternatively, a tenderer may state such proposed deviations and qualifications in a covering letter attached to his tender and reference such letter in this schedule. Any proposed deviations or qualifications contained in a covering letter which is not referenced in this schedule will not be considered.

The Tenderer's attention is drawn to clause 2.3.7.2 of the Standard Conditions of Tender referenced in the Tender Data regarding the CCT's handling of material deviations and qualifications.

If no deviations or qualifications are proposed, the schedule hereunder is to be marked NIL and signed by the Tenderer.

If further space is required the details can be completed on a separate sheet using the same format

Note:

1. The personnel listed under key staff above are expected to occupy their respective roles during the execution of works under the framework contract. Should any key staff member change during the framework contract period, then the new key staff are required to meet the experiential benchmarks as set out in the tender data. The City shall reserve the right to withhold or reduce payment or suspend the works for failure to comply with the above requirement.
2. It is a strict requirement that each key staff proposed fulfills **one position only**. Should personnel be proposed for more than one position only the first position will be considered as part of the evaluation.
3. Certified copies of permits must be attached as evidentiary proof otherwise, it will not be considered as part of the evaluation.
4. Ambiguous, vague, or unclear statements submitted in the schedules above will not be considered.
5. The onus is on the tenderer to ensure that the contact details provided for the relevant Employers are correct as failure to do so may prejudice the assessment of the tenderer's experience.

Schedule F.13C: Region Preference Schedule

Below are the **four Regions** which will be covered under this framework tender:

Region Number	Area	Work Areas
1	South	Refer to the map for the boundaries of each region (where ambiguity exists as to the exact location of the boundary, i.e. if the boundary is shown as being directly on a road, then the boundary shall always be either to the north or the east of the road in question).
2	East	
3	North	
4	West	

Tenderers are required to indicate their preferred regions in the table below. It will be endeavoured to award regions of preference as per the tenderer's submission, however the tenderer's preference cannot be guaranteed. The Tenderer shall complete this Region Preference Schedule to indicate preferred regions in order of precedence.

Preference	Region Number
First Region of Preference	
Second Region of Preference	
Third Region of Preference	
Fourth Region of Preference

Annexure H - Works Acceptance/Refusal Form

WORKS ACCEPTANCE/REFUSAL FORM

TENDER NO: 287S/2024/25: CLEANING OF SEWER PUMP STATION WET WELL

The Purchaser hereby requests (Supplier Name) to perform the cleaning works described below in (state area of works) which falls within Region No.

Summary of scope of works to be carried out under this order includes –

-
-
-
-

(To be listed by the Project Manager)

The contract duration shall be days/weeks from the contract commencement date.

The Supplier is required to confirm acceptance/refusal of the works by returning this signed form within **three (3) days** (for planned works) of receipt from the Purchaser. In the case of Emergency, The Supplier is required to confirm acceptance/refusal within **four (4) hours** from receiving the notification.

..... (Supplier Name) hereby accepts the works offer described above for the (planned/emergency) cleaning works in Region No..... as the (Winner/Alternative) Supplier.

List of Terminology and Definitions

Terminology	Explanation
Activity	Any action needed for the design, construction and completion of a development.
Alien species	<ul style="list-style-type: none"> species that is not an indigenous species; or an indigenous species translocated or intended to be translocated to a place outside its natural distribution range in nature, but not an indigenous species that has extended its natural distribution range by natural means of migration or dispersal without human intervention;
Best practicable environmental option	The option that provides the most benefit or causes the least damage to the environment as a whole, at a cost acceptable to society, in the long term as well as in the short term.
City of Cape Town	The Client / Employer
Communication register	A register aimed at tracking all communication activities within the development.
Competent Authority (as defined in the NEMA (Act 107 of 1998), as amended)	In respect of a listed activity or specified activity, means the organ of state charged by the Act with evaluating the environmental impact of that activity and, where appropriate, with granting or refusing an environmental authorisation in respect of that activity;
Contaminated water	Water contaminated by pollutants from on- or off-site activities; e.g. concrete-laden water and runoff from plant / personnel wash areas. Contaminated water must be treated to ensure that water released into the receiving environment meets minimum standards and guidelines. Treated water should be recycled where possible (e.g. used for dust suppression).
Construction	The building or erection of structures or infrastructure.
Department of Environmental Affairs & Development Planning	Provincial Authority responsible for approval of Impact Assessments and associated EMP's.
Department: Mineral Resources	The authority responsible for mineral and petroleum resource management.
Department of Water and Sanitation	The authority responsible for water management.
Design	Drawing or plan to show layout or plan of the development.
Development (as defined in the NEMA EIA Regulations, 2014, as amended)	The building, erection, construction or establishment of a facility, structure or infrastructure, including associated earthworks or borrow pits, that is necessary for the undertaking of a listed or specified activity, but excludes any modification, alteration or expansion of such a facility, structure or infrastructure, including associated earthworks or borrow pits, and excluding the redevelopment of the same facility in the same location, with the same capacity and footprint.
Emergency situation	A situation posing an immediate risk to health and safety; environment and property.
Environment	<p>The surroundings in which humans exist and which comprise:</p> <ul style="list-style-type: none"> the land, water and atmosphere of the earth;

	<ul style="list-style-type: none"> • micro-organisms, plant and animal life; • any part or combination and interrelationships; and • the physical, chemical, aesthetic, historical, cultural and economic properties and conditions of the foregoing that can influence human health and wellbeing.
Environmental aspect	A product's or production process's environmental impact or important issues in the environment that an organisation should take into consideration
Environmental audit	Systematic, documented, regular and objective evaluation to see how well an organisation or facility is operating in terms of the Environmental Management Programme and is complying with statutory requirements and the organisation's Environmental Policy.
Environmental Authorisation	The authorisation by a competent environmental authority for commencement of listed activities in terms of the National Environmental Management Act (Act 107 of 1998).
Environmental Compliance Review	Due diligence review of the environmental authorisation, EMPr and other applicable permits / licenses in relation to evolving engineering design, to determine continued applicability of assessed impacts / permits / licenses; and possible identification of new impacts / permits / licenses.
Environmental impact	Any change to the environment, whether adverse or beneficial, wholly or partially that results from an organisation's environmental aspects.
Environmental Impact Assessment	The process of collecting, organising, analysing, interpreting and communicating information in accordance with the environmental legal requirements set out in the Environmental Impact Assessment Regulations (as amended), promulgated in terms of Chapter 5 of the National Environmental Management Act (Act 107 of 1998), for the purposes of obtaining an Environmental Authorisation in accordance with Chapter 5 of the National Environmental Management Act.
Environmental Management Inspector	A person designated as an environmental management inspector in terms of Section 31B or 31C of the National Environmental Management Act (Act 107 of 1998).
Environmental Management Programme	A tool used to prescribe management mechanisms or methods for the prevention of undue or reasonably avoidable adverse environmental impacts and for the enhancement of the positive environmental benefits of a development.
Environmental objectives	The overall environmental goal arising from the Environmental Policy that an organisation sets itself to achieve, and is quantified where practicable.
Fauna	All living biological creatures, usually capable of motion, including insects and predominantly of protein-based consistency.
Fire danger index	A relative number denoting an evaluation of rate of spread or suppression difficulty for specific combinations of fuel, fuel moisture and wind speed.
Fire hazard	The relative combination of fuel, oxygen and heat that will lead to the start and spread of a potential fire.
Fire Protection Association	An association registered in terms of the National Veld and Forest Fire Act for the purposes of predicting, preventing, managing and extinguishing veld fires.
Flood line	The line or mark to which a flood could rise every 50 (1:50 year

	flood line) or 100 (1:100 year flood line) years.
Flora	All living plants, grasses, shrubs, trees, etc. that are typically incapable of easy natural motion and capable of photosynthesis.
Groundwater	Water that fills the natural openings in below-surface rock or unconsolidated sands.
Hazardous waste	Waste that, because of its chemical reactivity, toxic, explosive, corrosive, radioactive or other characteristics, causes danger or is likely to cause danger to health or the environment.
Heritage resources	Any place or object of cultural, archaeological or paleontological significance in terms of the National Heritage Resources Act, 1999 (Act 25 of 1999).
Induction training	The training provided to new / existing employees to (re)acquaint them with the company structure, their specific job requirements, practical or organisational issues and occupational health, safety and environmental considerations required on the development.
Integrated Environmental Management	<ul style="list-style-type: none"> the promotion of the integration of the principles of environmental management as set out in Section 2 of the National Environmental Management Act (Act 107 of 1998) in making decisions that may have a significant effect on the environment; the identification, prediction and evaluation of the actual and potential impact on the environment, socio-economic conditions and cultural heritage, the risks and consequences and alternatives and options for mitigation of activities, with a view to minimising negative impacts and maximising benefits; ensuring that the effects of activities on the environment receive adequate consideration before actions are taken in connection with them; ensuring an adequate and appropriate opportunity for public participation in decisions that may affect the environment; ensuring the consideration of environmental attributes in management and decision making, which may have a significant effect on the environment; and identifying and employing the modes of environmental management best suited to ensure that a particular activity is pursued in accordance with the principles of environmental management as set out in Section 2 of the National Environmental Management Act (Act 107 of 1998).
Interested and Affected Parties (I&AP) / Stakeholder	Any person or group of people concerned with or affected by an activity and its consequences. These include the authorities, local communities, investors, work force, customers and consumers, environmental interest groups, and the general public (after the Environmental Impact Assessment Regulations of September 1997 and Guideline Document: Environmental Impact Assessment Regulations of April 1998).
Key Performance Indicator	A quantifiable measure that demonstrates how effectively the Contractor is achieving prescribed outcomes.
Land Use	The arrangements, activities and inputs people undertake in a certain land cover type to produce, change or maintain it. This definition establishes a direct link between the land cover and the actions of people in their environment.

Materials	All kinds of items (other than Plant) intended to form or forming part of the permanent Works and temporary works, including the supply-only materials (if any) to be supplied by the Contractor under the Contract.
Mitigate	The implementation of practical measures to reduce any adverse impacts or to enhance the beneficial impacts of an action.
No-go area	An area where construction activities are prohibited.
Non-conformance	Failure to comply with the requirements of <i>inter alia</i> the EMPr and environmental authorisation.
Non-conformance report	A report outlining a deviation from process, procedure or compliance specifications.
Operation	The act of controlling a function / system.
Outcome	Specific result to be achieved within a prescribed timeframe and with available resources.
Planning	Defining the scope of the development.
Plant	The apparatus, machinery and vehicles used during the Permanent Works.
Pollution	Any change in the environment caused by substances or noise, malodours, dust or heat emitted from any activity, including the storage or treatment of waste or substances, construction and the provision of services, where that change has an adverse effect on human health or wellbeing or on the composition, resilience and productivity of natural or managed ecosystems, or on materials useful to people, or will have such an effect in the future.
Potentially hazardous substance	A substance that can have a deleterious effect on the environment. Hazardous chemical substances are defined in the Regulations for Hazardous Chemical Substances, published in terms of the Occupational Health and Safety Act, 1993 (Act 85 of 1993).
Precautionary principle	The basic principle that, when in doubt or when there is insufficient or unreliable information, actions must be undertaken that have minimum risk.
Pre-construction	Activities associated with the period preceding construction.
Programme	A deliverable from the Contractor to the Employers Representative as part of the documents required before commencement of the Works. An initial programme of carrying out the works in order to meet the Due Completion Date.
Quality management system	A set of interrelated or interacting elements that organisations use to direct and control how quality policies are implemented and quality objectives are achieved.
Rehabilitation	Re-establishment or restoration to a healthy sustainable capacity or state.
Resource recovery	Recycling of waste, water or the recovery of energy.
Sensitive receptors	Locations or areas that are likely to experience an impact more than other locations or areas; for example, schools and residential areas.
Site clearance	Clearing and grubbing activities.
Solid waste	All solid waste, including construction debris, chemical waste, excess cement / concrete, wrapping materials, timber, steel, drums, wire, nails, food and domestic waste (e.g. plastic bags and wrappers).
Target	The detailed performance requirement, applicable to the

	organisation or parts thereof, that arises from the environmental outcomes and that needs to be set and met in order to achieve those outcomes.
Waste minimisation	The reduction of the volume of waste during construction by means of different processes or clean technology.
Waste prevention	The prevention and avoidance of the production of a waste.
Wastewater	Water containing cement washings, oil, fuel or other contaminants.
Water resource	Includes a watercourse, surface water, estuary, or aquifer.
Wetland	Land which is transitional between terrestrial and aquatic systems where the water table is usually at or near the surface, or the land is periodically covered with shallow water, and which in normal circumstances supports, or would support, vegetation that is typically adapted to live in saturated soil (as defined in the National Water Act (Act 36 of 1998)).
Works	Means the Permanent Works and the Temporary Works, or either of them as appropriate.

List of Acronyms and Abbreviations

Acronym / Abbreviation	Explanation
CAR	Corrective Action Request
CLO	Community Liaison Officer
DEA&DP	Department of Environmental Affairs and Development Planning
DOL	Department of Labour

1. Structure and Purpose of the Report

1.1. Background

The City of Cape Town utilises a generic Environmental Management Programme (EMPr) to inform the management and mitigation of potential impacts. The City's last generic EMPr (Version 7:2012) has had to be updated due to changing legislation and approaches to environmental management and monitoring.

The National Environmental Management Act (NEMA) (Act No 107 of 1998) Environmental Impact Assessment (EIA) Regulations, 2014, as amended, prescribes *inter alia* that the EMPr be audited by an independent Environmental Auditor; and that the EMPr contain impact management outcomes.

Consequently, the requirement that an EMPr be developed and enforced for developments within the City of Cape Town is indicative of the City's support for adherence to regulatory requirements and best construction practice, which includes ensuring environmental damage during all phases of a development be minimised. Therefore, in order to best align with the regulatory requirements, the evolving industry, and address concerns raised by environmental practitioners within the local environmental fraternity, the City of Cape Town has revised and released this EMPr as its current version. Accordingly all developments within the City of Cape Town that require an environmental impact assessment (EIA) process; or within sensitive environments; or at the City's discretion, shall necessitate the environmental assessment practitioner (EAP) / Environmental Planner to make use of this EMPr to manage and mitigate potential impacts.

Due to the generic nature of the EMPr, additional information derived from *inter alia* the EIA process shall need to be incorporated within the body of text.

This shall be identified through: ➡ "Note to Compiler" prompts.

It is incumbent upon the Compiler to ensure the EMPr is made **site** and **development** specific, as the use of a generic EMPr for a development where an environmental authorisation was obtained may result in unnecessary audit findings, when audited by the independent Environmental Auditor. Should these findings be substantive, they may require a Part 2 amendment process which may negatively impact upon the Contractor's programme.

The City of Cape Town has adopted an outcomes based approach for this EMPr as it believes there are various ways in achieving good environmental outcomes. This approach allows the setting of outcomes based conditions, against which the development is to achieve compliance, without prescribing how that outcome is to be achieved. However, outcomes-based conditions do not mean that actions with unacceptable impacts will be approved. Outcomes required as conditions of approval shall be achievable and measurable to provide certainty for the City of Cape Town, the Competent Authority and the community.

Outcomes based conditions allow the Contractor to innovate; draw on company expertise; and consider site specific conditions when planning how task / activity specific methods shall be undertaken in order to achieve the outcome. Consequently greater emphasis shall be upon Employers Agent (with support from the ECO) to review and

approve Contractor's method statements; and ECO verification whether actions proposed provide suitable mitigation to achieve the desired outcome.

Developments not complying for the use of this EMPr shall utilise either the CIDB Environmental Management Specifications or site EMPr ([SEMP](#)). Please note that neither the CIDB nor SEMP EMPs meet all the EMPr content requirements as set out in Appendix 4 of the NEMA EIA Regulations, 2014, as amended.

The broad structure of the report is as set out below.

1.2. Structure and Purpose of the Report

This EMPr consists of eight Sections, each of which groups aspects related to addressing specific elements; namely: Structure of Report, Introduction, Project Description, Management, Monitoring, Assurance, and Performance Specifications. These Sections are supported by eighteen Annexes.

The body of text contains hyperlinks for ease of reference.

1.3. [Introduction](#)

This Section provides the background, scope and outcomes of the EMPr.

This Section also points out the continuous improvement approach that forms the basis of the environmental management approach. Such reiterative actions inform the adaptive management strategy and amendment processes.

1.4. [Project Description](#)

This Section provides a detailed project background and description, together with associated drawings.

Please note all developments within the City of Cape Town that require an environmental impact assessment (EIA) process; or within sensitive environments; or at the City's discretion, shall necessitate the EAP / Environmental Planner to include the relevant description and drawings.

1.5. [Management](#)

This Section describes activities associated with the management of the development. It informs the staffing roles and responsibilities; provides communication lines; mechanisms to prevent, control, manage, correct and mitigate development related activities; and training related thereto.

1.6. [Monitoring](#)

This Section describes the actions undertaken to monitor the efficacy of measures implemented to mitigate impacts / risks. It further provides for a quality control system with which the City of Cape Town can assure itself that the work is being, and has been adequately performed.

1.7. [Assurance](#)

The Section describes governance actions undertaken to inform stakeholders of the efficiency of the mechanisms implemented in compliance of its obligations.

1.8. [Performance Specifications: Environmental Management](#)

This Section identifies management activities that form part of the development, detailing key performance indicators and targets, which when implemented, confirm compliance to the outcomes of the EMPr. This Section is auditable by the Environmental Control Officer (ECO) and Environmental Auditor, aligns with the [Annexure 7 – Environmental Best Practicable Options](#); or can be used as stand-alone Performance Specifications with tender documents.

1.9. [Annexures](#)

The Section provides further detail on aspects contained within the main body of the EMPr.

[Annexure 1 - Details of Author\(s\) and related expertise](#)

[Annexure 2 - Legislation, Permits, Standards and Guidelines](#)

[Annexure 3 - City of Cape Town By-Laws](#)

[Annexure 4 - Potential Authorisations / Permits / Licences Required Prior to Construction Commencement](#)

[Annexure 5 - Environmental Authorisation / Water Use License](#)

[Annexure 6 - City of Cape Town Environmental Policy](#)

[Annexure 7 - Environmental Best Practicable Options](#)

[Annexure 8 - Site Plan](#)

[Annexure 9 - Method statement](#)

[Annexure 10 - Sensitivity Mapping](#)

[Annexure 11 - Environmental Monitoring of Water](#)

[Annexure 12 - Environmental Monitoring of Dust](#)

[Annexure 13 - Environmental Monitoring of Noise](#)

[Annexure 14 - General Conditions of Contract](#)

[Annexure 15 - Bill of Quantities](#)

[Annexure 16 - EMPr Alignment with NEMA Sec 24N](#)

[Annexure 17 - Typical Aspects and Impacts Table](#)

[Annexure 18 - Site Environmental Management Plan](#)

2. Introduction

2.1. Background and Scope of the EMPr

An EMPr is a proactive environmental management tool used to prescribe management methods to prevent or reasonably avoid adverse environmental impacts, and strengthen the positive environmental benefits of a development. It also places a Duty of Care on those who cause, have caused or may in future cause significant pollution or degradation of the environment. This requirement is according to Section 28 (1) of the National Environmental Management Act (Act No. 107 of 1998) (NEMA).

Furthermore, this EMPr is drafted in compliance with NEMA Section 24N (Environmental Management Programme) requirements and the scope is to set conditions for the implementation of the environmental management component for all personnel involved with the development. As such, the EMPr outlines how the development will be managed through its planning, design, pre-construction, construction, rehabilitation and decommissioning lifecycle and is designed to mitigate negative environmental impacts; whilst enhancing positive impacts.

This EMPr must form part of the tender documentation to the Contractor(s) and becomes legally binding on the Contractor(s) and anyone acting on behalf of the Contractor(s) or the City of Cape Town during the development life-cycle process activities.

2.2. Outcomes of the EMPr

This EMPr covers systems, strategies and procedures to ensure proposed developments within the City of Cape Town meet the environmental outcomes and targets as prescribed herein.

The below outcomes, targets and execution are to ensure the development is undertaken in an environmental responsible manner (please refer to Table 1).

Table 1: EMPr Outcomes

Outcomes	Targets	Execution
Compliance with legislative requirements	100% compliance with all requirements	Review of audit reports
Compliance with Competent Authority conditions	100% compliance with all requirements	Review of audit reports
Avoidance of environmental harm	Compliance with EMPr, environmental authorisation and best practicable environmental option	<ul style="list-style-type: none">• Implementation of development based environmental management system• Implementation of monitoring environmental controls• Environmental reporting, auditing and recording• Awareness training
Conformance with best practicable environmental option	<ul style="list-style-type: none">• Conduct environmental inductions (at development	<ul style="list-style-type: none">• Training of personnel in EMPr measures• Environmental monitoring

Outcomes	Targets	Execution
	<p>commencement and every six months thereafter) and provide for weekly environmental toolbox talks</p> <ul style="list-style-type: none"> • Achieve performance indicators and targets • Undertake environmental inspections • Undertake environmental audits as per prescribed audit schedule • Report and record all environmental incidents and non-conformances • Assign and complete corrective actions within the prescribed timeframes 	<p>and audits</p> <ul style="list-style-type: none"> • Review of non-conformance register • Review of environmental reports
Maintain commitments to stakeholders and community	<ul style="list-style-type: none"> • Minimal grievances • Respond to all grievances within the prescribed timeframes 	Review of Communications Register

2.3. Adaptive management and review of EMPr

As part of an adaptive management strategy, this EMPr is a “living” document that shall be reviewed prior to each development phase to ensure appropriateness and applicability. This approach shall allow for:

- *monitoring data gathered being used to evaluate impact management and mitigation;*
- *assumptions being tested and uncertainties reduced; and*
- *EMPr efficacy being determined and whether reviews are required.*

Such review can provide for:

- *revision of monitoring because of iterative learning;*
- *the determination of performance indicators and target success; and*
- *revision of performance targets and target actions.*

Therefore the EMPr may be revised due to:

- *policy change;*
- *management review;*
- *audit recommendations;*
- *grievances or non-conformance reports; and*
- *legislative changes.*

Please note the requirements associated with Regulations 29 and 31 of the EIA Regulations, 2014 (as amended), relating to the amendment processes.

Part 1 Amendment (Regulation 29) shall be undertaken when there is:

- *no change in scope of a valid environmental authorisation;*
- *no increase in level or nature or assessed impact; and*
- *a change of ownership, or transfer of rights and obligations.*

The amendment shall require no formal submission of the EMPr to the Competent Authority; and no public participation. The amended EMPr shall however be submitted to the Competent Authority for record keeping.

Part 2 Amendment (Regulation 31) shall be undertaken when there is:

- *a change to the scope of a valid environmental authorisation;*
- *an increase in level of or change in the nature of assessed impact; and*
- *inclusion of an activity not considered within the initial application for environmental authorisation or the environmental authorisation itself.*

Furthermore, a Part 2 Amendment shall be applicable when the length of the construction period exceeds the period specified in the environmental authorisation when no operational aspects are applicable (please refer to Regulation 26 (d) (ii) of the EIA Regulations, 2014, as amended).

The amendment shall require a formal submission of the EMPr to the Competent Authority; together with a public participation process.

A Part 2 Amendment process may negatively impact upon the Contractor's programme.

3. Project Description

Note to Compiler: Please insert detailed project description for the development.

Note to Compiler: Please provide detailed site layout and locality drawings.

4. Management

4.1. Leadership by Senior Management

Leadership by senior management is essential in developing a culture that values health, safety and environmental protection. Therefore, senior managers shall be required to demonstrate their commitment in their actions and decisions.

The City of Cape Town aims to create and sustain a culture within both the development; and all role players, to drive the commitment of zero harm to all people, to protect the environment and enhance the local communities.

To achieve this aim, personnel in leadership roles shall be suitably qualified and competent to provide leadership in health, safety and environmental management and will be required to:

- *know and understand the health, safety and environmental risks associated with their specific activities, how these risks are managed, and the corrective actions to mitigate them;*
- *visibly demonstrate health, safety and environmental management leadership through measurable actions (e.g. communicating the Health, Safety and Environmental Management Policy and Standards, undertaking health, safety and environmental worksite visits, engaging personnel and Contractors, and leading or participating in health, safety and environmental activities e.g. audits,*

investigations and campaigns;

- *motivate, coach and develop personnel in effective health, safety and environmental management by acting as a role model for compliance and reporting of issues and incidents, and encourage personnel to do the same; provide constructive health, safety and environmental feedback and celebrate success including health, safety and environmental management behaviours and performance in staffing decisions; and develop the team's health, safety and environmental management competencies;*
- *ensure that all relevant personnel have undertaken induction training prior to working on site;*
- *hold individuals accountable for their health, safety and environmental management behaviours and performance by insisting on compliance with applicable laws, regulations and development commitments; and*
- *apply consistent consequence management to those who breach Health, Safety and Environmental Standards and procedures whilst rewarding correct health, safety and environmental behaviours.*

4.2. Legislation, Permits, Standards and Guidelines

The development shall be implemented within the framework of the NEMA and other relevant environmentally related legislation, including national acts, provincial ordinances, municipal by-laws and/or guideline documents as referenced in Annexures 2, 3 and 4.

4.3. Staffing

4.3.1 Organisational chart of City of Cape Town, Employers Agent, Contractor Roles and responsibilities

Note to Compiler: Please insert organizational chart for the development.

4.3.2 Institutional and Functional Arrangements

The institutional and functional arrangements indicate the role players and institutional linkages involved in the development. The arrangement is dictated by the contract with the City of Cape Town.

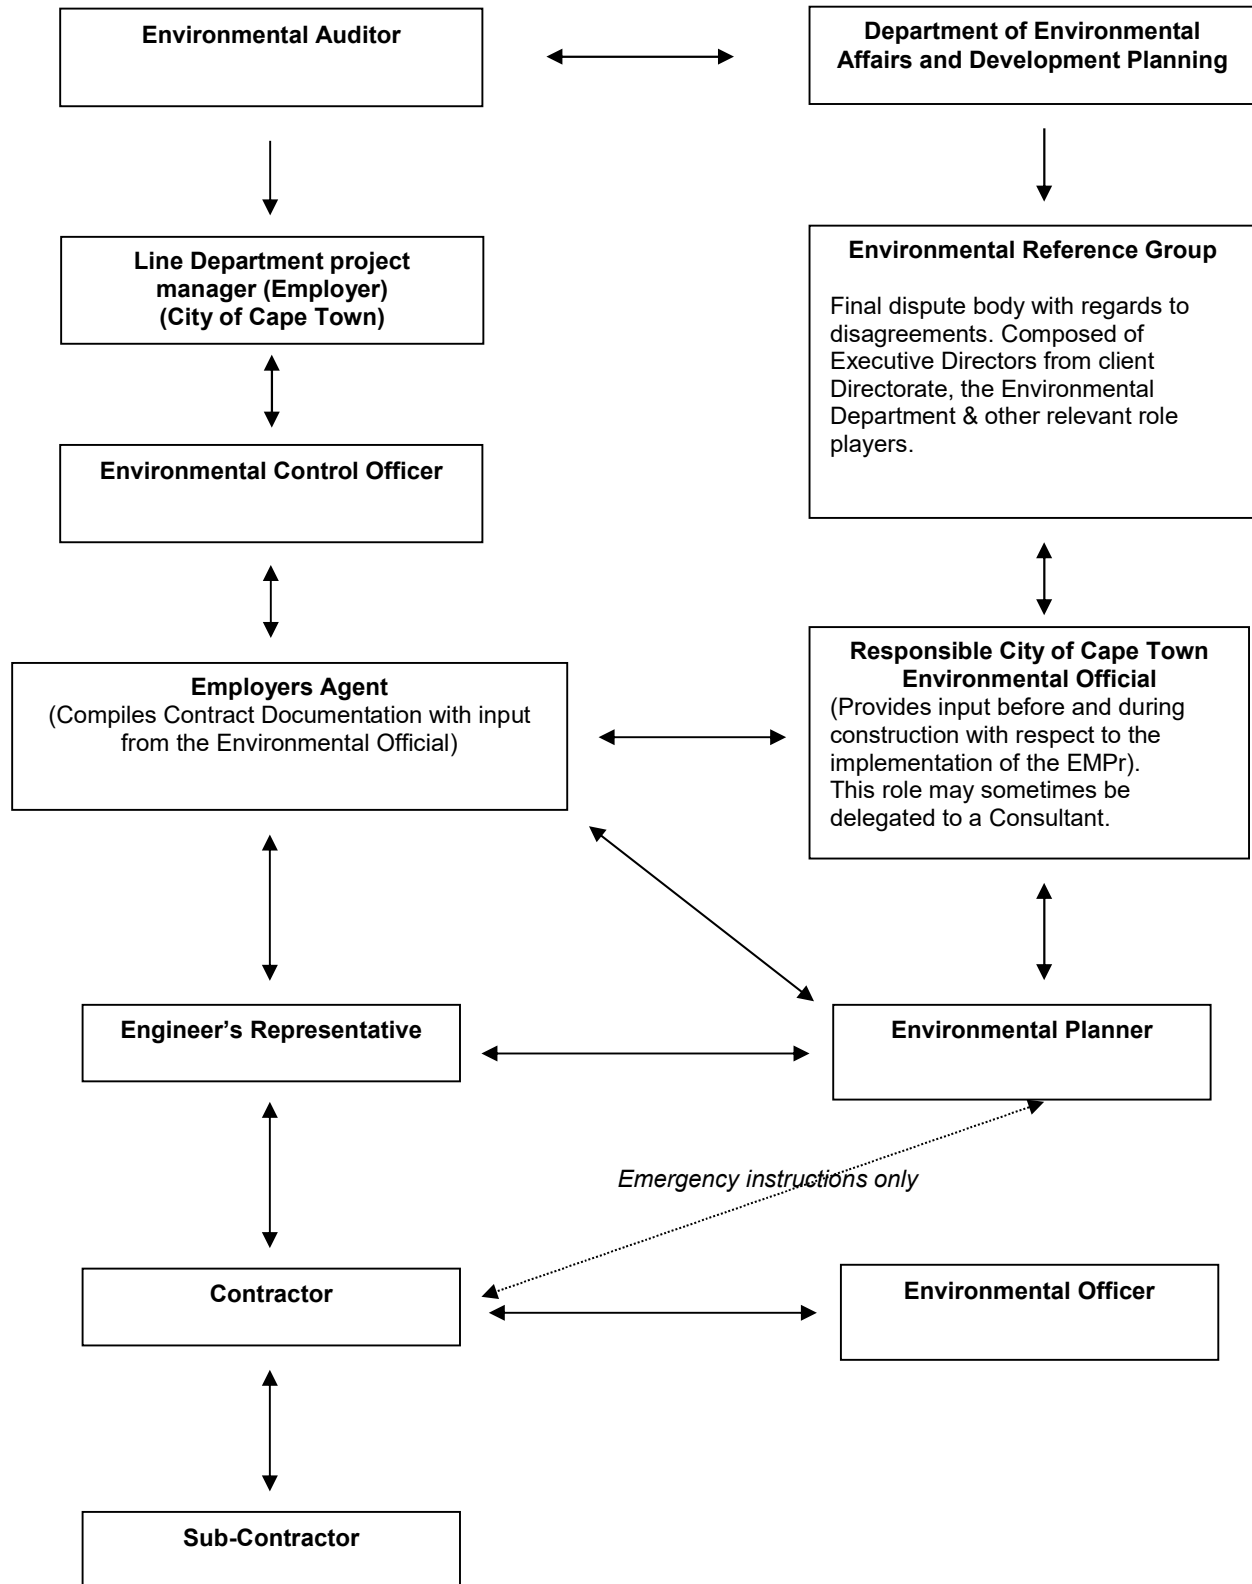

Figure 1: Typical Environmental Staffing Arrangement

4.3.3 Roles and Responsibilities

4.3.3.1 City of Cape Town

The City of Cape Town shall be responsible for overall environmental control during all development phases.

Consequently the City of Cape Town's responsibilities shall include:

- *internal consultation with EMD regarding changes in the development that results in significant environmental impacts;*
- *ensuring appropriate environmental resources are assigned to each development phase;*
- *being fully familiar with the EMPr;*
- *forwarding audit reports (prepared by the Environmental Auditor) to the Competent Authority;*
- *notifying the Competent Authority of changes in the development that results in significant environmental impacts;*
- *notifying the Competent Authority within 30 days of change of ownership or as the Environmental Authorization/Permit requirement;*
- *notifying the Competent Authority of any change of address of the owner;*
- *the overall implementation of the EMPr;*
- *implementing corrective and preventive actions, where required;*
- *preventing pollution and actions that will harm or may cause harm to the environment;*
- *notifying the Competent Authority within 30 days that construction activity will commence, or as the Environmental Authorization/Permit requirement;*
- *notifying the Competent Authority in writing within 24 hours if any condition in the EMPr cannot be or is not adhered to; and*
- *notifying the Competent Authority 14 days, or as the Environmental Authorization/Permit requirement prior to commencement of the operational phase.*

4.3.3.2 Employers Agent / Engineer

The Employers Agent reports to the City of Cape Town and is responsible for the day-to-day management of environmental performance on the development. The Employers Agent is ultimately accountable for the implementation of the requirements contained within this EMPr.

The Employers Agent is responsible for:

- *assisting in the preparation of the EMPr;*
- *instructing development personnel on how to comply with environmental policy and procedures;*
- *ensuring the Engineer's Representative is aware of and complies with the environmental obligations as detailed within this EMPr;*
- *ensuring that employees, Contractors and Sub-contractors are aware of, and comply with, the conditions of approval and requirements of the EMPr relevant to their respective activities;*
- *arranging periodic monitoring and inspection by suitably trained personnel;*
- *regular site inspections and the active pursuit of opportunities to enhance*

environmental outcomes;

- tracking and reporting environmental performance;*
- tracking and compliance against the conditions of approval for the scope of works being performed;*
- monthly evaluation of how effectively environmental controls are performing;*
- initiating remedial measures when environmental deficiencies are observed or in response to grievances;*
- restriction of construction activities affected by an environmental deficiency until remedial action has been taken;*
- maintaining environmental performance records;*
- engaging consultants where required to provide support in relation to implementing the EMPr; and*
- investigating any incidents or grievance and ensuring necessary corrective action is implemented (in consultation with City of Cape Town for significant incidents / grievances).*

4.3.3.3 Designer

The Designer is involved during the planning and design phase of the development and shall ensure that relevant environmental planning and design considerations are taken into account during these phases. In this respect, the Designer shall work in close conjunction with the Environmental Planner.

4.3.3.4 Engineer's Representative

The Engineer's Representative is responsible for construction site supervision and quality control during Construction.

In some instances the Engineer's Representative may also assume the responsibilities of the Employers Agent.

On very large developments, the Engineer's Representative may have one or more dedicated Site Supervisors, each responsible for a section of the works (e.g. reservoirs, pipelines, water treatment works etc.).

The Engineer's Representative shall report to the Employers Agent and be responsible for:-

- managing employees / Contractors and construction activities on a daily basis to ensure the appropriate environmental controls are implemented and maintained in accordance with the requirements of the EMPr;*
- ensuring all staff are inducted into the site and undertake daily tool box talks;*
- undertake daily site inspections of environmental controls and maintain records of environmental actions;*
- reporting any environmental management concerns or incidents immediately to the Employers Agent;*
- recommending improvements to the EMPr to the Employers Agent; and*
- implementing any corrective actions issued as a result of any site inspections, audits or meeting.*

4.3.3.5 Contractor

The Contractor is the successful tenderer, appointed by the City of Cape Town to undertake the Works as specified in the Contract. It is the responsibility of the Contractor to do whatever is necessary from his side to ensure that he or an appointed advisor is well

versed in environmental studies so that he may accurately and efficiently carry out the requirements of the Environmental Specification.

The Contractor shall be liable for any and all remedial work required in terms of the Environmental Specification, resulting from his environmental negligence, mismanagement and / or non-conformance.

The Contractor will:

- *be responsible for the construction related activities for the duration of the contract (so will Sub-Contractors and contract workers);*
- *be responsible for ensuring work conducted is done within the framework of the environmental authorisation, EMPr and applicable legislation;*
- *ensure that all Sub-Contractors have a copy of and are fully conversant with the contents of the EMPr;*
- *be required to provide Method Statements setting out, in detail, how management actions contained in the EMPr will be implemented;*
- *be required to monitor construction related impacts upon the surrounding environment; and*
- *appoint an Environmental Officer (EO) and Community Liaison Officer (CLO).*

4.3.3.6 Environmental Assessment Practitioner

The Environmental Assessment Practitioner (EAP) shall be appointed during the project planning phase of the development to determine likely effects which the development may have upon the environment and community.

The EAP shall work with the Environmental Planner in determining potential impacts; and shall be responsible for submitting applications in terms of the EIA process to the relevant Competent Authority.

4.3.3.7 Environmental Planner (Environmental Manager)

The Environmental Planner shall either be a City of Cape Town official or a member of the Employer Agents' professional team.

The Environmental Planner shall only be required at the City of Cape Town's discretion; on large scale infrastructure developments; or within sensitive environments, to analyse and minimise environmental impacts of the proposed development; consider best practicable environmental options; and make sure the development complies with prevailing regulatory requirements.

The Environmental Planner shall therefore work closely with the Designer to ensure detailed designs are aligned with EIA conclusions, regulatory requirements and best practicable environmental options. The Environmental Planner shall provide guidance, assistance and input as required during the life-cycle phases of the development; be called upon to resolve conflicts and disputes; and act as liaison between the environmental assessment practitioner and Employers Agent.

Furthermore, the Environmental Planner shall generate risk registers, master plans, management programmes; and tender documentation.

4.3.3.8 Environmental Auditor

An Environmental Auditor is an unaffiliated party who shall undertake environmental compliance audits at prescribed timeframes for the duration of construction related activities.

The Environmental Auditor shall present environmental audit reports in compliance with Regulation 34 of the EIA Regulations, 2014 (as amended).

Please note that not all developments require an Environmental Auditor as the inclusion of such an appointment shall only be required where an environmental authorisation has been issued.

4.3.3.9 Environmental Control Officer

An Environmental Control Officer (ECO) shall be appointed by the City of Cape Town for the duration of construction related activities.

The primary role of the Environmental Control Officer shall be to act as quality controller regarding all environmental concerns. In this respect, the Environmental Control Officer shall conduct periodic site inspections, attend regular site meetings, pre-empt problems and suggest mitigation and be available to advise on incidental issues that arise.

The Environmental Control Officer shall be required to conduct compliance audits and verify the monitoring reports submitted by the Environmental Officer.

The Environmental Control Officer shall provide feedback to the Employers Agent, who in turn reports back to the City of Cape Town and stakeholders, as required. Issues of non-conformance raised by the Environmental Control Officer shall be taken up by the Employers Agent, and resolved with the Contractor as per the conditions of his contract. Decisions regarding environmental procedures, specifications and requirements which have a cost implication (i.e. those that are deemed to be a variation, not allowed for in the Performance Specification) must be endorsed by the Employers Agent.

4.3.3.10 Environmental Officer

The Environmental Officer (EO) shall be responsible for managing the day-to-day on-site implementation of the Performance Specifications, and for the compilation of regular Monitoring Reports. In addition, the Environmental Officer shall act as liaison and advisor on all environmental and related issues, seek advice from the Environmental Control Officer or Environmental Planner when necessary and ensure that any complaints received from the public are duly processed and addressed and that conflicts are resolved in an acceptable manner.

The Environmental Officer shall:

- *be well versed in environmental studies;*
- *understand the relevant environmental legislation and processes;*
- *understand the hierarchy of Environmental Compliance Reporting, and the implications of non-conformance;*
- *know the background of the development and understand the implementation programme; and*
- *be able to resolve conflicts and make recommendations on site in terms of the requirements of the Performance Specifications.*

4.3.3.11 Community Liaison Officer

The Community Liaison Officer (CLO) shall be appointed by the Contractor and shall be responsible for representing the community in order to assist the Contractor with communication between the two parties.

The Community Liaison Officer shall:

- *assist with managing community communication in various forums;*
- *plan, design, develop and carry out assigned public outreach and awareness;*
- *participate in activities aligned with community outreach strategy;*
- *develop relationships with key networks within local communities;*
- *identify possible labour disputes, unrest, strikes, etc., in advance and assist in their resolution;*
- *inform local labour of their conditions of temporary employment, to ensure their timeous availability and to inform them timeously of when they will be relieved; and*
- *ensure that all labour involved in activities when tasks have been set, are fully informed of the principle of task based work.*

4.4. Communications & Liaison

4.4.1 Contractual

The communication protocol shall be determined by contractual requirements. Such protocol shall be agreed to at the inception meeting where a responsibility assignment matrix (RAM) will be developed detailing the main communications or actions and the authorized staff responsibilities for initiation, preparation, review, approval and issue.

4.4.2 Local Government & Public Liaison

The Contractor shall direct all communication via the City of Cape Town; or as directed by the Employers Agent.

4.5. Identification of development Aspects, Impacts and Risk Assessment

This EMP provides a system and set of procedures to ensure that the City of Cape Town establishes and maintains sound and effective controls to manage potential environmental impacts throughout the development, and wherever practicable, realise opportunities for enhanced environmental outcomes.

Therefore, for environmental management to be effective, it needs to be proactive rather than reactive. Environmental risk(s) associated with large scale developments shall be identified and assessed during the environmental impact assessment process; whereas the Contractor shall identify environmental risk(s) as part of its health and safety assessment; and method statement compilation.

The assessment shall identify the significance of environmental risks and potential impacts using the following four-step approach:

- identify each **element** with the potential to interact with the environment (e.g. characteristics and sensitivity of the environment);
- determine the potential **impacts** resulting from the activity including their duration, intensity and degree to which they can be **mitigated**;
- rank risks** based on the likelihood of adverse impacts and the severity of the consequence, using the 'worst case scenario', as defined by the 'likelihood and consequence probability' risk matrix ; and
- identify the level of mitigation required for each environmental aspect (e.g. the higher the potential severity of adverse environmental effects and the greater the consequence of those unmanaged effects the higher the degree of environmental management required).

Typical aspects include: aesthetics, dust, earthworks, erosion, flora and fauna, fire, hazardous substances, heritage, land owner liaison, noise, rehabilitation, social, soil, sustainability, traffic, training, waste and water.

Please refer to [Annexure 17 - Typical Aspects and Impacts Table](#) associated with the development.

4.6. Emergency Preparedness and Incident Management

'Incidents' are defined as unplanned events with undesirable consequences. The consequences of such incidents may result in human injury, environmental damage or asset loss. 'Near misses' are extraordinary events that could have reasonably resulted in an incident.

Using an Impact/Aspect Risk register, the Contractor shall identify the types of environmental incidents that are likely to occur on site and ensure measures are put in place to prevent or mitigate the effects of such incidents.

Consequently the Contractor shall submit an Emergency Preparedness and Incident Management Plan for approval to the Employers Agent prior to the commencement of construction related activities. This shall be reviewed and up dated annually.

The Emergency Preparedness and Incident Management Plan shall ensure that:

- *construction employees are adequately trained in terms of incidents and emergency situations;*
- *details of the organisation (manpower) and responsibilities, accountability and liability of personnel are recorded;*
- *a list of key personnel and contact numbers are provided;*
- *details of emergency services (e.g. the fire department, spill clean-up services) are listed;*
- *internal and external communication plans, including prescribed reporting procedures are provided for;*
- *actions to be taken in the event of different types of emergencies are described;*
- *incident recording, progress reporting and remediation measures to be implemented are prescribed;*
- *information on hazardous materials, including the potential impact associated with each, and measures to be taken in the event of accidental release are described; and;*
- *significant risks using the aspect & impact register are identified and addressed.*

All incidents that occur during construction related activities shall be recorded and managed in accordance with the Contractors Emergency Preparedness and Incident Management Plan. All environmental incidents and near misses shall be reported to the Employers Agent, particularly:

- *any loss of containment incidents or releases of liquids, solids, or gas;*
- *any dangerous goods or hazardous substance spills (any volume or weight);*
- *complaints by regulatory authorities;*
- *regulatory breaches – directives, fines, breaches of authorisation / licence conditions;*
- *stakeholder complaints;*
- *all incidents of third party property damage or loss; and*
- *any loss or damage to flora and fauna of significance that has not been previously approved.*

The Employers Agent shall then report these incidents to the City of Cape Town who in turn shall notify any relevant government authority, if required.

4.6.1 Incident Reporting

Once the incident has been stabilised and initial notifications have been issued to the relevant parties, a full incident investigation shall be required with detailed corrective and preventative measures. A formal report shall be submitted within seven days to the Employers Agent, including all remediation measures undertaken to repair any damage caused and to prevent the incident from re-occurring.

Information recorded for all incidents shall include:

- *nature of incident;*
- *damages, injuries or fatalities sustained and the parties involved;*
- *any risks such incident poses;*
- *toxicity of the substances involved;*
- *steps taken to avoid or minimise the effects of the incident and any future incidents / re-occurrence; and*
- *clean-up procedures, remedial actions and assessment of immediate and long term effects.*

4.6.2 Reportable Environmental Incidents

Reportable incidents are those:

- *that cause substantial damage to the environment, or*
- *that have significant potential impact on the environment.*

These can include:

- *any spill to a watercourse, including drains as defined under relevant legislation;*
- *loss of hydrocarbons or chemicals greater than 20L in volume to land;*
- *spills or releases, including soil movement, which has moved offsite and has a negative impact;*
- *death or injury of livestock, wildlife or fauna of any kind caused by the construction activities;*
- *interference with any previously undetected sites of cultural significance without obtaining the appropriate approval;*
- *transfer of known alien invasive vegetation and diseases as a result of construction related activities;*
- *fires;*
- *traffic incident;*
- *damage to property outside the development footprint;*
- *unresolved landowner issues whereby agreement cannot be reached;*
- *an incident that is likely to cause regional or widespread negative publicity;*
- *serious environmental damage or imminent risk of serious environmental damage;*
- *significant environmental degradation, pollution or non-conformance of this EMPr or any other legislative requirement.*
- *Exceedances of prescribed dust fall standards where dust fall monitoring is required.*

Key incident reporting numbers relevant to the project shall be provided as per Section 4.6.4 below.

4.6.3 Emergency Response Procedure

Appropriate risk management and the prevention of emergency situations is fundamental to all construction related activities and the implementation of the EMP is aimed at anticipating, preventing and mitigating foreseeable risks associated with the development. Part of the risk management strategy is to ensure that in the event of an emergency situation, plans have been developed so that pre-planned response, notification and recovery activities can be initiated.

The Contractor's Emergency Preparedness and Incident Management Plan shall establish the structures of emergency teams, the communication processes and the resources, which may be required for managing the emergency. The Emergency Preparedness and Incident Management Plan shall therefore comprise the following:

- *general responsibilities;*
- *incident management and notification structure;*
- *event classification and notification; and*
- *resources and training requirements.*

The objectives of the Emergency Preparedness and Incident Management Plan shall be to:

- *decrease the level of risk to life, property and the environment;*
- *describe how an emergency response is initiated and how the emergency teams are activated;*
- *specify command, control and communication arrangements between the City of Cape Town, Employers Agent, Contractor, external response and government authorities;*
- *identify the roles and responsibilities of all personnel likely to be at the location of the emergency or involved in the response;*
- *identify emergency response equipment required;*
- *identify training requirements for response personnel; and*
- *provide the basis for training of all people who could be involved in an emergency.*

4.6.4 Contact Information

The following key incident reporting numbers relevant to construction related activities shall be included within the Emergency Preparedness and Incident Management Plan:

- *City of Cape Town Representative;*
- *Employers Agent;*
- *Engineers Representative;*
- *Construction Contractor;*
- *Construction Manager;*
- *Environment Control Officer;*
- *Health and Safety Manager;*
- *Environmental Officer;*
- *Community Liaison Officer;*
- *24 hour Grievance Contact;*
- *Fire Department;*
- *Hospitals / clinics;*
- *South African Police Services;*
- *Air Quality Officer;*
- *Disaster Management;*
- *Director: Development Management (Region 1): Department of Environmental*

- *Affairs and Development Planning;*
- *Department of Water and Sanitation;*
- *City of Cape Town*
 - *Environmental Health Department;*
 - *Water Demand Management;*
 - *Environmental and Heritage Management*

4.7. Method Statements

It is a statutory requirement to ensure the wellbeing of employees and of the environment. Therefore, the Contractor shall submit method statements to the Employers Agent for approval prior to the commencement of construction related activities.

The Contractor shall be required to undertake various tasks / activities in order to fulfil the conditions as stipulated in the contract. Therefore, in order for the Employers Agent to be satisfied that the Contractor has a comprehensive understanding of the requirements of the task / activity, the Contractor shall submit method statements to the Employers Agent for approval prior to the commencement of the activity. The method statement is a dynamic document integrating all facets of the activity, thereby ensuring the reader a comprehensive understanding of the actions associated with implementing the activity.

The method statement shall be submitted to the Employers Agent for approval at the agreed timeframe prior to the commencement of the activity. During this period, the Employers Agent shall consult with other members of the project management team to ascertain the Contractors knowledge and understanding of the requirements. Should the Employers Agent ascertain that the detail of the method statement is not sufficient, the method statement shall be returned to the Contractor for review and re-submission.

Upon acceptance of the method statement, both the Employers Agent and the Contractor shall sign the method statement denoting mutual agreement that the contents thereof meet the minimum requirements to successfully complete the activity. By signing the method statement, the Contractor commits to working in accordance with the agreed method.

Due to the method statement being a dynamic document, regular amendments may be required to ensure the implementation thereof corresponds with how the task / activity is actually being implemented; and in accordance to potentially changing requirements.

The following method statements are considered typical for every development and shall thus be submitted to the Employers Agent prior to commencement of construction related activities:

- *Concrete management*
- *Dust management*
- *Environmental awareness training*
- *Site camp layout*
- *Traffic management*
- *Waste management*
- *Water management*

Please refer to [Annexure 8 – Method Statement](#) for a complete list of potential method statements.

Method Statements may also be reviewed by the City of Cape Town Environmental Management Department: Environment and Heritage Management Branch.

4.8. Planning & Design

4.8.1 Planning

Planning is typically undertaken by the City of Cape Town at development outset and sets out prescriptive measures to achieve desired results. These measures are typically conceptual at this stage and become more refined with time.

The City of Cape Town typically calls for detailed (engineering) designs and appoints an environmental assessment practitioner (EAP) to undertake the EIA process. This process may contribute to the determination of feasibility, but does not do so exclusively.

4.8.2 Design

As the design shall lay the groundwork for the future operation of the development, the environmental authorisation conditions and EIA specialist recommendations shall inform the design. Furthermore, due to the evolving nature of the development, it is incumbent upon the City of Cape Town / Employers Agent that an Environmental Planner be appointed as part of the City of Cape Town / Employer Agents' team to *inter alia* determine regulatory process requirements that inform the evolving designs.

4.9. Implementation of Controls & Mitigation Measures

The City of Cape Town has adopted an outcomes based approach for this EMPr as it believes there are various ways to achieve good environmental outcomes. This approach allows the setting of outcomes based conditions, against which the development is to achieve compliance, without prescribing how that outcome is to be achieved.

4.9.1 Why outcomes based conditions?

According to the 'Outcomes-based conditions policy—Draft, Commonwealth of Australia July 2015', it provides "Flexibility" *"in the methods used to deliver those outcomes is both necessary and desirable to:*

- *focus the developments resources on achieving outcomes rather than complying with prescriptive requirements;*
- *encourage innovation in environmental management strategies;*
- *enhance transparency of outcomes being sought;*
- *focus regulatory effort on verifying that the development is achieving environmental compliance;*
- *build public trust and confidence in environmental regulation;*
- *acknowledge good environmental and regulatory compliance records to foster behaviour changes;*
- *streamline assessment and approval processes; and*
- *improves knowledge and data about matters of environmental significance".*

Outcomes-based conditions do not mean that actions with unacceptable impacts will be approved. Outcomes required as conditions of approval shall be achievable and measurable to provide certainty for the City of Cape Town, the Competent Authority and the community.

Outcomes based conditions allow the Contractor to innovate; draw on company expertise; and consider site specific conditions when planning how task / activity specific methods shall be undertaken in order to achieve the outcome. Consequently greater emphasis shall be upon Employers Agent (with support from the ECO) to review and

approve Contractor's method statements; and ECO verification whether actions proposed provide suitable mitigation to achieve desired outcome.

4.9.2 Outcomes

The outcomes contained within [Section 7 Performance Specification Environmental Management](#) tables prescribe the "what" that shall be achieved; and shall therefore drive the auditing process.

These outcomes shall be auditable.

4.9.3 Performance Indicators & Targets

The Performance Indicators contained within [Section 7 Performance Specification Environmental Management](#) tables, prescribe specific targets which the Contractor shall attain. The Contractor shall be cognisant of both the outcomes and targets when compiling method statements. Complying with the Environmental Specification Targets shall ensure compliance to the EMPr Outcomes.

These targets shall be auditable.

4.9.4 Mitigation measures

The Risks / Impacts contained within [Annexure 7 – Environmental Best Practicable Options](#) may be managed by the proposed mitigation measures proffered, and are thus not auditable. These mitigation measures shall merely guide the Contractor towards achieving the prescribed outcomes as contained within Section 7 Performance Specifications Environmental Management.

The Contractor's attention however shall be drawn to their responsibility to provide appropriate management measures to adequately mitigate any potential risk / impact.

These mitigation measures **shall not** be auditable.

4.9.5 Failure to Comply

Should the Contractor fail to comply with achieving the prescribed targets, the Employers Agent shall instruct the Contractor to do so. Failure to comply or adequately rectify the non-conformance shall result in the Employers Agent retaining five percent (5%) of the payment certificate amount until such rectification has been achieved, where after payment shall be effected. Non-compliance by the Contractor is the sole responsibility of the Contractor and the City of Cape Town shall not be jointly & severally liable.

4.10. Corrective & Preventive Measures (follow-up on monitoring and audits)

The Contractor shall initiate a process to correct and prevent future occurrences occurring.

Table 2: Correction Action

Corrective action(s)	Action	Timeframes	Responsibilities
	Initiate corrective and preventative measures	Immediate	City of Cape Town, Employers Agent /

	Control source and or reduce impact upon the environment / community.	Within 1 day of occurrence being identified	Engineer and Contractor
	Manage incident / accident / grievance in accordance to approved procedure.	Within 3 days of occurrence being identified	
	Monitor to verify no further occurrence takes place.	Within 5 days of occurrence being identified	
	Re-train all staff to prevent future re-occurrence.	Within 7 days of occurrence being identified	

4.11. Training

Environmental responsibility requirements for all role players are contained within the respective [Position Descriptions](#). Consequently all recruitment shall be undertaken with the aim of engaging personnel with the appropriate levels of competency and experience. Furthermore, all personnel shall receive environmental training of the type and level appropriate to their role and responsibility.

The Contractor's environmental awareness training programmes shall be targeted at the two levels of employment: management and labour.

The Contractor shall manage and implement all the requirements associated with presenting the training programme before the Commencement Date.

The Contractor shall be required to initiate Environmental Awareness Training within 7 days of construction commencing. Staff shall be trained prior to commencement of working.

Proof of training shall be submitted to the Employers Agent.

The Contractor may be requested to provide additional training (in the trainee's first language) on-site regarding environmental aspects that are unclear to the construction personnel. A translator may be required and requested to assist in this additional training. The cost for the translator will be borne by the Contractor. The Contractor shall implement the training programme at own cost.

All staff shall:

- *be inducted prior to commencing work;*
- *receive task based / skills training;*
- *receive weekly environmental toolbox talks;*
- *undergo six monthly refresher (environmental) training; and*
- *be retrained as per corrective action outcome(s).*

The Contractor shall keep records of personnel experience, qualifications and training undertaken, including inductions, in a training register. The training register shall include the following details:

- *who was trained;*
- *when the training took place;*
- *name of the trainer;*
- *a general description of the content of the training; and*
- *effectiveness of training programmes.*

4.12. Grievance procedure (Social)

A grievance procedure is a management tool used to prescribe management mechanisms or methods to address grievances arising from affected stakeholders on a development.

The Contractor shall adhere to the grievance management procedures as agreed with the Employers Agent.

4.13. Resource Allocations

Financial implications for items and activities prescribed in the EMPr shall be recognised by the Contractor (for the construction phase) and provision for these costs shall be made. Such costs can include (but may not be limited to) mitigation actions, environmental awareness training, monitoring and auditing requirements and measures for rectification and rehabilitation, management of archaeological / heritage findings unearthed during construction, including any equipment or specialists required for these items.

5. Monitoring

5.1. Monitoring Approach

Monitoring shall be carried out by the respective environmental representative from the City of Cape Town, Employers Agent and Contractor.

5.2. Inspections

Site inspections shall be carried out on a daily basis by the Contractor's Environmental Officer to ensure measures implemented are effective in mitigating impacts.

The ECO shall undertake, as a minimum, fortnightly (or as prescribed in the conditions of authorisation) in order to provide an account of environmental compliance with the EMPr during construction.

The Contractors Environmental Officer / Community Liaison Officer shall undertake receptor monitoring to verify that construction related activities are not negatively impacting upon the environment; health of employees and members of the surrounding community; nor local economy (e.g. farming).

5.3. Compliance monitoring

The Contractors Environmental Officer or professional service provider shall undertake compliance monitoring to verify construction related activities are not exceeding prescribed thresholds.

The Contractor shall submit environmental compliance monitoring data to the Employers Agent on a monthly basis.

5.4. Auditing (internal and external)

The ECO shall undertake monthly internal audits to verify the measures implemented by the Contractor to suitably mitigate identified risks / impacts.

The Environmental Auditor shall undertake external audits at the frequency prescribed by the relevant Competent Authority.

5.5. Time Programme

All monitoring shall be undertaken as per the monitoring programmes, where prescribed either by law or by the Employers Agent.

5.6. Quality control system (for monitoring)

Quality Assurance and Quality Control (QA/QC) addresses both the management of construction related activities and the "development" being constructed. QA includes the documented processes required to ensure that the development satisfies the needs for which it was undertaken; and will meet the development specifications and data quality outcomes. It also includes all activities of the overall management function that are required in meeting the outcomes of the development including planning, QC elements and any scope changes. The overall QA/QC program of the development shall be the foundation upon which the City of Cape Town can assure itself that the work is being, and has been adequately performed.

The Contractor shall develop and maintain an integrated management system (IMS) made up of both a quality management system (QMS) based on ISO 9001; and an environmental management system based on ISO 14001.

All environmental / social monitoring shall follow accepted monitoring protocols / norms and standards; and shall be informed by the outcomes of any baseline studies.

All analysis of samples shall be done at a SANAS 17025 accredited laboratory; unless specified in the Contractors method statement and approved by the Employers Agent.

Furthermore, the Contractor shall submit detailed terms of reference for the appointment of a professional service provider (PSP) to undertake the environmental monitoring programme for water and sediment quality, dust and noise monitoring. The PSP shall meet minimum professional requirements for:

- *qualifications;*
- *professional registration;*
- *experience and track record;*
- *demonstrated proficiency in use of relevant monitoring and sampling equipment;*
- *equipment requirements and tolerances for detection limits;*
- *reporting and analysis; and*
- *confirmation of laboratory accreditation, capacity, delivery and performance within reasonable timeframes.*

6. Assurance

6.1. Reporting

Reporting is the process of measuring actual performance or how well the mitigation measures have been implemented, including the format, timing and responsibility for reporting.

6.1.1. General Reporting

Reporting by the various role players shall be undertaken in accordance to the table below.

Table 3: Periodic Reporting

Report	Timing	Prepared by	Reviewed by
Weekly	On the first day of the following week	Environmental Officer	Employers Agent with support of the ECO
Monthly	Within 7 days of completion of reporting period	Environmental Officer	Employers Agent with support of the ECO
Change Management	Whenever required	ECO / Environmental Auditor	Employers Agent / Competent Authority
Close-out Report	Within 30 days of completion of construction related activities	Environmental Officer	Employers Agent in support of the ECO
Audit Report - Internal	Within 7 days of completion of reporting period	ECO	Employers Agent
Audit Report - External	Within 7 days of completion of reporting period	Environmental Auditor	Competent Authority
Grievance	Within 7 days of grievance	Environmental Officer / Community Liaison Officer	Employers Agent with support of the ECO
Management Review	Within 7 days of management review	Contractors Senior Management	Employers Agent

6.1.2. Incident Reporting

The Contractor shall undertake incident reporting in accordance to the below table. Please note that NEMA Section 30 and 30A have prescriptive timeframes in which a Competent Authority is to be notified.

Table 4: Incident Reporting

Reporting	Action	Responsibility	Timeframe
	Report incident to Employers Agent / Engineer	City of Cape Town, Employers Agent / Engineer and Contractor	Immediate notification
	Incident report submitted to the Employers Agent / Engineer		Within 7 days of incident
	Contractor to select appropriate remedy to rectify non-conformance and provide revised method statement to the Employers Agent for approval.		Within 10 days of incident

6.2. Implementation (Contractor)

6.2.1. Weekly environmental and social monitoring reports¹;

The Contractor shall undertake daily site inspections, the outcomes of which shall be submitted in a weekly report to the Employers Agent. Such reports shall include:

- *a summary of the results of the daily and weekly inspections;*
- *any non-conformances and corrective actions taken;*
- *work status and tasks to be completed;*
- *environmental activities undertaken;*
- *environmental incidents or grievances;*
- *environmental monitoring;*
- *consultation undertaken;*
- *progress of reinstatement; and*
- *results of any audits undertaken.*

6.2.2. Monthly environmental and social audit reports;

The Contractor shall submit a consolidated and detailed monthly report to the Employers Agent.

6.3. Supervision (Engineer)

6.3.1. Corrective Action Requests

A Corrective Action Request (CAR) shall be issued to the Contractor instructing the initiation of corrective action. The Contractor shall initiate an investigative process to determine root cause, thereby preventing future recurrence, within the timeframe prescribed by the Employers Agent.

Follow up actions shall be assessed by the ECO to verify implementation of approved corrective actions, recommendations and their effectiveness in preventing re occurrence.

6.3.2. Non-Conformance Report

Preceding the issuing of the Non-Conformance Report (NCR), the Contractor shall be presented with an opportunity to rectify the outstanding issue (via a CAR). Should this issue not be corrected or completed to the satisfaction of the Employers Agent, the issue shall be escalated to an NCR.

An NCR shall be issued to the Contractor as a final step towards rectifying a failure in complying with a requirement of the EMP. The Employers Agent shall issue the NCR to the Contractor in writing.

Should the ECO assess an incident / issue and find it to be significant (e.g. non-repairable damage upon the environment), it shall be reported to the authorities and immediately escalated to the level of an NCR. This shall be done in consultation with the Employers Agent.

The following information should be recorded in the NCR:

¹ Please note that small developments may substitute the weekly report in lieu of a monthly report. The Employers Agent shall determine reporting frequency.

- *details of non-conformance;*
- *any plant or equipment involved;*
- *any chemicals or hazardous substances involved;*
- *work procedures not followed;*
- *any other physical aspects; and*
- *nature of the risk.*

Actions agreed by all parties following consultation shall adequately address the identified non-conformance. This shall take the form of specific control measures and take the hierarchy of controls into account. This shall accompany the NCR for filing purposes.

The agreed timeframe by which the Contractor shall have implemented the actions shall be documented in the NCR.

All NCR's shall be tracked and managed according to the development's quality control protocols.

The Employers Agent shall verify that the agreed actions have taken place on or soon after the agreed completion date. Where the actions are complete, the Employers Agent and Contractor shall sign the Close-Out portion of the Non-Conformance Form and file it with the contract documentation.

6.4. Audits (ECO and Environmental Auditor)

In addition to the prescribed monitoring undertaken by the Contractor, comprehensive audits shall be undertaken to determine the efficacy of the management measures implemented to manage and mitigate impacts.

6.4.1. Internal Audits

Detailed audit reports shall be drafted by the ECO indicating system deficiencies, non-conformances and adverse or potentially adverse environmental conditions arising from construction related activities.

The audit reports shall provide verifiable findings on the level of performance compliance; the ability to sufficiently provide for the avoidance, management and mitigation of environmental impacts; and levels of compliance with the EMPr and any other regulatory requirement. The audit reports shall be made available to the external Environmental Auditor.

All ECO audit reports shall be submitted to the Employers Agent.

Audit reports for developments, where an EIA process has been undertaken, shall be submitted to the Employers Agent (City of Cape Town) for review prior to their submission to the relevant Competent Authority.

6.4.2. External Audits

External audits shall be undertaken by an independent Environmental Auditor, at the timeframes as prescribed by the Competent Authority. These environmental audit reports shall comply with the requirements as prescribed in Regulation 34 of the EIA Regulations, 2014, as amended.

All environmental audit reports shall be submitted to the City of Cape Town for review prior to their submission to the relevant Competent Authority.

6.5. Evaluation of Performance

6.5.1. Identify Trends

The Contractor shall analyse data obtained from monitoring programmes / audits to determine underlying patterns of performance in relation to time. Such outcomes shall aid the Contractor in implementing corrective actions, thereby pre-empting future possible environmental degradation or pollution.

6.5.2. Measure Progress

The Contractor shall monitor efficacy of mitigation measures implemented; and continually strive to improve the manner in which it protects the environment.

6.6. Review by Senior Management

The Contractor shall undertake periodic reviews by its senior management to evaluate efficacy of on-site environmental management systems in delivering the desired environmental, health, safety and social protection.

These reviews shall be undertaken at intervals dictated by the current life-cycle stage; efficacy of EMP implementation; level of compliance to internal and external audits and level of risk posed by upcoming activities.

A report containing management review recommendations shall be submitted to the Project Management. The Employers Agent shall track the implementation of the recommendations.

The Employers Agent shall reserve the right to issue a Corrective Action Request should the Contractor fail to adequately address issue at hand.

7. Performance Specifications: Environmental Management

The Performance Specifications: Environmental Management Tables prescribe specific targets which the Contractor shall attain. The Contractor shall be cognisant of both the outcomes and targets when compiling method statements. These Performance Specifications may be used as stand-alone environmental specifications in tender documents, where required.

The mitigation measures proposed within [Annexure 7 – Environmental Best Practicable Options](#) may be used by the Contractor towards attaining targets prescribed within the Performance Specifications: Environmental Management Tables. However, compliance to the mitigation measures does not constitute compliance with the Performance Specifications: Environmental Management Tables.

Please note the Performance Specifications: Environmental Management Table numbering aligns with the [Bill of Quantities](#).

These tables shall be audited by the ECO / Environmental Auditor.

Planning

Not applicable to Contractor appointment

PSEM4 Planning	
Outcomes	Identify and proposing suitable development options resulting from strategic needs assessment, from where single option is selected.
Responsibilities	Employer Agents' professional team / City of Cape Town
Timeframes	On-going during planning
Performance Indicator	Target
1) Specialist input	a) Include all possible / associated triggered activities within EIA process.
2) Identifying and assessing al impacts	a) Include Engineer and construction experienced Environmental Planner to inform EIA process.
3) Scope definition	a) Consider potential associated activities which may trigger an EIA process and include these in the authorisations process. b) Consider potential Contractor requirements within EIA process. e.g. site camp locality and possible lay down areas.
4) Sustainability	a) Planning shall emphasise sustainable development, local procurement and jobs.

Design

Not applicable to Contractor appointment

PSEM5 Design	
Outcomes	Integrating environmental and sustainable requirements within the design to an extent that environmental protection and sustainable development are assured.
Responsibilities	Employer Agents' professional team / City of Cape Town
Timeframes	On-going during design
Performance Indicator	Target
1) Compliance Review	a) Undertake an environmental compliance review if the EIA process was undertaken by an external third party.
2) Inform Design	a) Ensure EIA outcomes, EMPr, environmental authorisation and any other approval requirement are obtained and inform the design
3) Reviews of designs	a) The Environmental Planner, where applicable, shall review the final designs.
4) Aesthetics	a) Design shall restrict sky glow, light spill and glare.
5) Air quality	a) Design shall enable compliance with National Ambient Air Quality Standards, City of Cape Town Air Quality Management By-law and National Dust Control Regulation requirements, as amended.
6) Noise control	a) Design shall enable compliance with Western Cape Noise Control Regulation requirements, as amended.
7) Water quality and quantity	a) Design shall enable compliance with all applicable water quality and quantity regulatory requirements, as amended.
8) Water efficiency	b) All designs to comply with Construction Regulations 10400XB. c) Installation of solar water heaters.
9) Energy efficiency	a) All designs to comply with Construction Regulations 10400XA.

PSEM5 Design	
	b) Installation of photo-voltaic panels.
10) Waste management	a) Design shall reduce waste generation whilst promoting re-use and recycling.
11) Transit-oriented development	a) Design shall address densification, location and access to public transport.

Pre-construction

Mitigation measures proffered within [Annexure 7.3 Pre-Construction: Environmental Best Practicable Options](#) merely guide the Contractor towards achieving the below prescribed outcomes.

PSEM6 Pre-Construction	
Outcomes	Finalisation of relevant appointments / activities to an extent that development commencement is assured.
Responsibilities	Contractor to draft Method Statement(s) and implement; Employers Agent to approve and supervise; and Independent ECO to audit. City of Cape Town District Environmental & Heritage management department to be requested which Method Statements they wish to review and given the opportunity to do so.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Search and Rescue	a) The Contractor shall undertake all activities associated with the search and rescue operation and have these completed prior to the commencement of construction related activities.
2) Alignment to engineering requirements	a) All EIA outcomes, EMPr, Environmental Authorisation and any other regulatory requirement shall be aligned with engineering requirements.

3) Budget	a) The Contractor shall make provision for adequate budget for construction site environmental management requirements.
4) Tender review	a) The Employers Agent shall ensure an environmental review of all tender submissions is undertaken.
5) Approvals	a) The Employers Agent shall ensure all approvals have been obtained.
6) Environmental Compliance Monitoring	a) The City of Cape Town shall appoint a competent and knowledgeable ECO; and where required, an Environmental Auditor.
7) Contractors Environmental Officer	a) The Contractor shall appoint a competent and knowledgeable Contractors Environmental Officer.

Construction

Mitigation measures proffered within [Annexure 7.4 Construction: Environmental Best Practicable Options](#) merely guide the Contractor towards achieving the below prescribed outcomes.

PSEM7 Aesthetics Management	
Outcomes	Preserve aesthetics of the surrounding environment to assure the development does not become a nuisance to local communities; or negatively impacts upon the environment.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Dust levels	a) Dust generation shall not exceed the regulated dust thresholds.

2) Rehabilitation of impacted works areas.	b) All areas impacted upon through construction related activities shall be rehabilitated.
3) Stockpile management	a) Stockpiles are not to be higher than 2m. b) Stockpiles shall be stabilised with no evidence of erosion.
4) Visual impact of works areas on surrounding environment	a) No grievances from stakeholders. b) Maintain good housekeeping practices.
5) Light pollution	a) No light shining into surrounding properties. b) No grievances from stakeholders.
6) Litter	a) Record of daily litter clean up. b) No litter to be found on site. c) No grievances from stakeholders.

PSEM8 Dust Management	
Outcomes	Preserve air quality levels to an extent that public health; safety and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Monitoring	a) Identify all dust sources. b) Assess effectiveness of dust control measures. c) Provide suitable data to demonstrate compliance with regulatory requirements. d) Ensure all monitoring equipment is calibrated as per manufacturer's specifications. e) Ensure all monitoring is undertaken by suitably qualified and competent individuals.

	f) Dust fall out monitoring shall be undertaken along the perimeter fence and aligned with prevailing wind directions.
2) PM10 inhalable particulates only monitored upon City of Cape Town instruction.	a) PM10 monitoring shall be in accordance with GNR 1210, National Ambient Air Quality Standards, of 24 December 2009, as amended. b) PM10 shall be monitored at sensitive (rural) receptors when construction related activities occur within 250 m of the receptors. c) PM10 shall also be measured at active construction related areas and at additional sites indicated by the Employers Agent. d) Monitoring shall be conducted/undertaken as per the regulated frequencies. g) PM10 levels shall not exceed the prescribed levels. h) PM10 monitoring shall be undertaken within work areas aligned with prevailing wind directions.
3) Dust nuisance levels.	a) Suspended (actual) dust levels shall not exceed 600 mg/m ² /day. b) The Contractor shall respond to all grievances relating to dust and air quality.
4) Dust fallout.	a) Indicative dust fallout (i.e. suspended dust concentrations that will result in fallout) shall be monitored in terms of the GNR 827, National Dust Control Regulations of 1 November 2013, as amended. b) Actual dust fallout shall be verified through sampling at sites as prescribed by the Employers Agent.

PSEM9 Earthworks Management	
Outcomes	Maintain earth works practices in a manner that public health; safety and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Topsoil and subsoil handling and management.	a) Soil horizons stockpile separately. b) Stockpiles no higher than 2 m and kept weed free.
2) Water resource management	a) Water resources shall not be negatively impacted upon through sedimentation / contamination.

3) Prevention of contamination.	a) Stockpiles shall be kept free of contamination by oils/fuels and other harmful substances.
4) Reinstatement of previous land use practices.	a) No complaints from stakeholder's. b) No erosion.
5) Placement of stockpiles within specifically demarcated areas.	a) No stockpiles within the 1:20 flood line of a watercourse or within 50m of delineated wetland. b) No stockpile outside of areas indicated in the construction drawings.
6) Spoil disposal.	a) No spoil disposed of anywhere other than designated spoil areas or at a registered landfill site as identified by the Employers Agent. b) Contractor shall attain prescribed waste targets.

PSEM10 Erosion Management	
Outcomes	Preserve soil and vegetation cover to an extent that minimal loss of soil through erosion can be assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Erosion prevention.	a) All gradients > than 1:2 (vertical: horizontal) stabilised within one week of their exposure. b) Formalised storm water structures must be designed and implemented along roads susceptible to erosion. c) Slopes > 1:1 must have additional anti-erosion mechanisms (berms, silt fences or geo-textiles). d) No evidence of erosion or damage to erosion control devices. e) No collapse/subsidence of banks at water crossings or steep slopes. f) No significant changes to ground level, drainage patterns or vegetative cover as a result of erosion or sedimentation.

2) Control alien invasive species.	a) Records of monthly alien invasive species clearing. b) The Contractor shall keep the development footprint free of alien invasive species.
3) Existing land use protection.	a) No evidence of disturbance outside of development footprint area.
4) Rehabilitation of impacted areas.	a) The Contractor shall attain rehabilitation targets.
5) Water quality as indicator of levels of soil erosion.	a) The Contractor shall attain prescribed water quality targets.
6) Storm water	a) Monitor and maintain storm water infrastructure and review storm water management initiatives, where applicable.

PSEM11 Fauna and Flora Management	
Outcomes	Preserve the environment to an extent that fauna and flora are protected; and prevention of alien invasive species infestation can be assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Reduction of extent of impacts.	a) No evidence of disturbance outside of the approved development footprint.
2) Identification and protection of ecologically sensitive areas.	a) All sensitive environments shall be identified and afforded appropriate protection. b) No go areas are clearly demarcated and adhered to.
3) Identification and	a) Proof of training of staff for identification and rescue and relocation of known conservation worthy species.

protection of species.	b) No unauthorised collection of or disturbance to fauna and flora. c) Search and rescue operations shall include consultation with the City of Cape Town's Biodiversity Management Branch.
4) Landowner requirements	a) No grievances from landowners. b) Each indigenous tree, shrub or bulb removed through search and rescue operations shall be replanted in the area from where it came or in an area as advised by the City of Cape Town Biodiversity Management Branch.
5) Wildlife and livestock management.	a) Access to individual land portions shall be controlled through the appropriate use of gates. b) All livestock injuries or fatalities shall be investigated, recorded and reported to the Employers Agent and the respective landowner. c) The Contractor shall restrict vehicle speeds within the development footprint to prevent faunal fatalities.
6) Management of alien invasive species.	a) Proof of scheduled removal of alien invasive vegetation. b) Chemical control of invasive species to be undertaken under the auspices of a Department of Agriculture, Forestry and Fisheries (DAFF) authorised Pest Control Officer (PCO). c) No alien invasive vegetation growth within development footprint.

PSEM12 Fire Management	
Outcomes	Prevent and control fires to an extent that public health; safety; property and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Number of fires.	a) Zero (0) fires.
2) Emergency preparedness.	a) Proof of annual update and approval of the fire management response plan. b) Proof of management review of fire preparedness and response before onset of fire season. c) Proof of six-monthly fire and emergency drills every six months and effectiveness thereof audited. d) Emergency response plan implemented. e) Safety management plan implemented.

3) Adequate fire protection measures.	<ul style="list-style-type: none"> a) Proof of Municipal Fire Chief being informed. b) Compliance with SANS 10131. c) Fire-fighting equipment shall be available at all high risk or points of storage of flammable products. d) STP Dry Powder Fire Extinguishers shall be used and at least one shall be provided per 50m² of industrial floor surface area. e) Proof of examination of fire extinguishers on a continual basis. f) All activities undertaken shall be managed to mitigate risk of fire.
4) Compliance with regulatory and procedural requirements.	<ul style="list-style-type: none"> a) Storage of hazardous/flammable materials and substances to comply with national, provincial and local regulatory requirements. b) Proof of reporting of fire incidences to authorities. c) No uncontrolled fires within the development footprint. d) No build-up of flammable material on or adjacent to the development footprint.
5) Adequate fire protection measures in place in rural areas.	<ul style="list-style-type: none"> a) Fire breaks in place, in consultation with respective landowners, the width of which to be determined by the Fire Protection Association (FPA). b) Proof of membership/registration with the local FPA. c) Presentation of the Fire Danger Index (FDI) for the area.

PSEM13 Hazardous Substance Management	
Outcomes	Preserve the receiving environment, well-being of staff and local communities through appropriate hazardous substance storage, handling, disposal and pollution prevention.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Adequate measures implemented for the containment	<ul style="list-style-type: none"> a) All hazardous substance storage areas shall be equipped with appropriate spill kits and fire-fighting equipment. b) All hazardous substances shall be stored in well ventilated secondary (impermeable) containers / bunds capable of 110% of the volume of the container. A tap-off system shall be installed through which leakages and spills can be removed.

of hazardous substances.	<ul style="list-style-type: none"> c) All staff required to handle and use such hazardous substances shall receive adequate training. d) All necessary approvals with respect to hazardous substances shall be obtained from the appropriate authorities and shall comply with standard fire safety regulations. e) All chemicals shall be stored in specifically designed, lockable storage areas where reactive substances are classed and segregated. Storage shall comply with the manufacturers Material Safety Data Sheet (MSDS) and local and national legislative requirements. f) Hazardous waste and waste fuels and oils shall be stored in appropriate containers that will not corrode or leak. These containers shall be properly marked to indicate contents.
2) Hazardous substance management.	<ul style="list-style-type: none"> a) All hazardous substances stored on site shall be recorded within a checklist. b) All hazardous substances shall be labelled according to the chemical hazard rating and adequate signage be displayed indicating the appropriate management measures to be implemented in the event of a spill/fire. c) Only specifically trained personnel shall be permitted to use and handle the hazardous substances. Certificates of training shall be provided to the Employers Agent for final approval. d) Substances used shall be the least environmentally harmful chemical available for the undertaking of specific duties/requirements.
3) Incident management	<ul style="list-style-type: none"> a) Ensure that the necessary materials and equipment for dealing with oil, fuel and hazardous substance spills, leaks and fires are available on site and up to date at all times. b) The following symbolic safety signs shall <i>inter alia</i> be depicted: "No Smoking", "No Naked Lights" and "Danger". c) These signs shall conform to the requirements of SANS 1186-1 and are to be prominently displayed in and around the storage area. d) The volume and contents of the tanks shall be displayed using the emergency information system detailed in SANS 10232-1. e) Signage containing clearly displayed emergency contact numbers shall be provided.
4) Fire fighting	<ul style="list-style-type: none"> a) Suitable fire-fighting equipment shall be stored in close proximity and all personnel be made aware of the dangers of burning chemicals/smoke inhalation.
5) Personnel protection	<ul style="list-style-type: none"> a) No smoking shall be permitted in the vicinity of the store/s and adequate fire-fighting equipment shall be provided at hazardous substance storage and dispensing areas. b) All staff working with hazardous substances shall wear PPE.
6) Sewage management	<ul style="list-style-type: none"> a) No environmental contamination due to sewage management.
7) Cement /	<ul style="list-style-type: none"> a) Cement / concrete shall only to be mixed within Employers Agent approved localities.

Concrete management	b) Waste cement / concrete shall only be disposed of at Employers Agent approved localities. c) Facilities used to wash plant / equipment used in the mixing / transporting / placement of concrete shall be Employer Agent approved.
---------------------	--

PSEM14 Heritage Management	
Outcomes	Preserve heritage resources to an extent that no loss, defacement or damage thereof can be assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Protection of heritage resources.	a) No removal, damaging or alteration to heritage resources, unless proof of consultation with a heritage specialist and approval from H:WC is in place. b) All buildings and or structures older than 60 years shall require a permit should they be changed or demolished.
2) Management of chance finds.	a) Records of chance findings shall be kept. b) Where chance finds are unearthed, proof of work being stopped and proof of consultation with heritage specialist and H:WC shall be kept on site. c) The unearthing of graves must immediately be reported to the Employers Agent, the South African Police Service and H:WC. An archaeologist shall be notified and the area shall be cordoned off from all works until the archaeologist has completed an investigation and proposed recommendations, in consultation with H:WC.

PSEM15 Land Owner Liaison	
Outcomes	Preserve the rights of affected landowners to an extent that no significant grievances are raised.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.

Performance Indicator	Target
1) Communication with landowners.	a) Communications register (for grievances) shall be kept at the site office. b) No reports of complaints not being dealt with promptly. c) Minutes of meetings held with local community members and other stakeholders. d) Notify landowners in advance in the event of construction related activities likely to cause disruptions to current land use practices.
2) Safety of the work environment.	a) PPE is available and worn by staff and visitors. b) The site, together with all excavations shall be safe guarded. In addition, barriers and warning signs shall be placed around all excavations. c) Site boundary fence shall display relevant signage. d) Demarcate "no-go" areas and restrict access.
3) Gates.	a) Maintain status of gates (keep "closed" gates closed; and "open" gates open).
4) Landowner database.	b) Maintain a database of landowners contact details. c) New landowners shall be briefed on the construction programme.
5) Provision of skills training.	a) Provide suitable training to all employees to ensure no grievances lodged.
6) Site camp.	a) The site camp shall obtain all relevant approvals prior to establishment.
7) Working hours	b) No work before 7 am and after 6 pm Monday to Saturday, nor on Sundays/Public Holidays,

PSEM16 Noise Management	
Outcomes	Preserve noise levels to an extent that public health; safety and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target

1) Notification of sensitive receptors.	a) Sensitive receptors shall be notified of the timing and duration of the construction related activities and the potential noise nuisance it may cause. b) Respond to all noise related grievances received and implement mitigation measures.
2) Noise levels.	a) Noise levels shall be monitored to comply with SANS 10103:2008 and Occupational Health and Safety Act requirements.
3) Deviations from normal construction related activity conditions.	a) All construction related works shall be undertaken during normal prescribed / agreed daylight hours. b) All works that deviate from normal construction related conditions shall be reported and actions initiated to mitigate against recurrence of the incident.
4) Vibration	a) Vibration monitoring shall be in compliance with regulatory requirements (BS 7385-2 (ISO 4866) Evaluation and measurement for vibration in buildings – Part 2: guide to damage levels from ground-borne vibration).

PSEM17 Rehabilitation Plan	
Outcomes	Reinstate impacted areas to an extent that agricultural; commercial, and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Restoration of soil profile at disturbed areas.	a) Where restoration of indigenous vegetation is to take place, topsoil and surface management needs shall be in accordance with a restoration plan as agreed with the City of Cape Town's Biodiversity Management Branch
2) Rehabilitation of steep slopes.	a) Stabilisation of steep slopes shall be a priority, with engineered solutions being investigated to ensure slope stabilisation.
3) Removal of alien invasive vegetation	a) Proof of scheduled removal of alien invasive species re-establishing on cleared areas, stockpiles and throughout rehabilitation shall be undertaken

species.	
4) Site specific rehabilitation requirements.	a) Proof of discussions with landowners about specific rehabilitation requirements. All vegetative matter removed during the search and rescue operation shall be replanted in the area that they were rescued from or in an area determined in consultation with the City of Cape Town Biodiversity Management Branch.
5) Reinstatement of watercourse soils.	a) The final placement of layers of soil on the watercourse bed shall match the pre-disturbance profile. b) Replaced soil shall be compacted and at the same level as adjacent soil. c) Water resistant layers must be determined before disturbance shall be reinstated.
6) Appropriate re vegetation with correct seed mix.	a) The seed mix for use in rehabilitation shall be an approved mix of indigenous species common to the area. The Tender Data shall indicate the approved seed mix guideline. The seed mix shall contain pioneer, sub-climax and climax species. Contractor shall inform the Employers Agent to deviations from this seed mix prior to the purchase of seed. The City of Cape Town Biodiversity Management Branch shall be consulted with regard to seed mixes and restoration methodologies where indigenous vegetation is to be re-established.
7) Timing of rehabilitation actions.	a) Seeding operations shall coincide with rainfall events or as part of a managed watering programme.
8) Vegetated cover of rehabilitated areas shall correlate with the cover of the surrounding natural vegetation.	The below targets only applicable where grass cover is prescribed: a) A 50% grass cover shall be achieved within 1 month of the onset of the next growing season following hydro seeding and 80% cover within 2 months thereafter. Minimum of 60% mature vegetation cover being achieved during the first growth season. Minimum of 80% mature vegetation cover achieved at the end of the maintenance period. Canopy cover shall be used to determine ground cover percentage. b) Grass shall set seed over a minimum of two seasons.

PSEM18 Social Aspect	
Outcomes	Preserve good relations with neighbouring communities to an extent that maximum social benefits, and minimum negative impacts are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO

	to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Communication with local community and stakeholders.	a) Communications register shall be kept on site. b) No reports of grievances not being dealt with promptly. c) Minutes of meetings held with local community members and other stakeholders.
2) Representative workforce/equitable procurement.	a) Employ a "local first" employment policy. b) Procurement policy targets provided by the Employers Agent shall be met.
3) Safety of the work environment.	a) Personal Protective Equipment (PPE) is available and worn by staff and visitors.
4) Exit Strategy.	a) Proof of training for skills required in the greater area that can be used after construction related activities have ended. b) Report detailing intentions for materials (for example wood and other building material) or structures no longer required that can be donated to the local community, with the approval of the Employers Agent.

PSEM19 Soil Management	
Outcomes	Preserve soil to an extent that erosion and contamination prevention is achieved; and topsoil volumes for rehabilitation can be assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Topsoil and subsoil handling and	a) Soil horizons (stockpile separately) b) Stockpiles shall be no higher than 2 m and kept weed free.

management.	c) Prevent erosion of soil.
2) Prevention of contamination.	a) Stockpiles free of contamination by oils/fuels and other harmful substances.
3) Reinstatement of land use practices.	a) Reinstatement of land use to former land use practice.
4) Placement of stockpiles within specifically demarcated areas.	a) No stockpiles within the 1:20 flood line or within 50 meters of delineated wetlands. b) No stockpile outside of areas indicated in the construction diagrams.
5) Spoil disposal.	a) No spoil disposed of anywhere other than designated spoil areas or at a registered landfill.
6) Construction programme	a) In the event construction occurs during the rainfall season, measures shall be implemented to minimise disruption of the soil profiles. These shall be removed and impacted areas re-vegetated.

PSEM 20 Sustainable Management	
Outcomes	Preserve critical resources to an extent that the optimisation of energy-use; protection and conservation of water can be assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Energy efficient construction site office building design	a) The Contractor shall ensure site offices and associated buildings comply with Construction Regulations 10400XA.

2) Electricity conservation	
3) Water conservation	a) The Contractor shall ensure all facilities comply with Construction Regulations 10400XB.
4) Dust suppression	a) The Contractor shall implement dust suppression measures using non potable water.

PSEM21 Traffic Management	
Outcomes	Preserve road traffic levels to an extent that public health; safety and environmental protection are assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Traffic management.	a) No accidents or incidents. b) No complaints from the public.
2) Landowners have access to properties.	a) The City of Cape Town to supply all landowners with access to their properties via agreed temporary servitudes, where applicable.
3) Road traffic safety.	a) Road condition shall be retained in an acceptable condition on all routes. b) Appropriate signage provided, where applicable.
4) Prevention of environmental degradation.	a) No new roads constructed outside of the development footprint. b) No new roads constructed without the approval of the Employers Agent within the development footprint. c) No evidence of disturbance by vehicles outside of the development footprint. d) No environmental degradation due to storm-water run-off from access and temporary roads. e) Dust entrainment shall comply with prescribed dust regulations. f) The width of the access and temporary servitude roads shall be kept to a minimum.

PSEM22 Training Programme	
Outcomes	Foster skills transfer, environmental awareness, health and safety awareness and materials and equipment skills.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Provision of effective training.	a) All employees shall receive general construction related work skills training required to enable them to work safely and effectively, including: <ul style="list-style-type: none"> • Basic Environmental Awareness Training. • Spill and emergency management. • Health and safety. • Emergency drills. • Fire-fighting. • Disaster management. • Heritage resource and grave identification.
2) Training.	a) All staff shall: <ul style="list-style-type: none"> • be inducted prior to commencing work; • receive regular task based / skills training; • receive weekly environmental toolbox talks; • undergo six monthly refresher (environmental) training; and • be retrained as per corrective action outcome(s). b) Records to be retained indicating attendance and content c) Regular refresher course to be presented to all staff d) Demonstrate effectiveness of training presented e) All incidents to be reported

PSEM23 Waste Management	
Outcomes	Embrace waste hierarchy principles to an extent that waste generation is reduced; reuse and recycling is promoted; all

	waste streams receive responsible treatment; and safe disposal is assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Proper waste disposal.	a) Proof of waste generated, reused, recycled and disposed of, including disposal certificates, shall be kept on site. b) No contamination of soil, air and water due to inappropriate waste management. c) Disposal of hazardous waste shall be conducted by a licensed contractor / professional service provider. d) Store and handle all hazardous materials and waste in accordance to their respective material safety data sheets. e) Waste to be disposed of at registered landfill site. f) No build-up / accumulation of waste permitted. g) The waste manifest shall be kept on record for auditing purposes.
2) Waste reduction.	a) Reduce disposal of recyclable or reusable materials to landfill sites by 50%. Such recyclable and reusable material shall include: <ul style="list-style-type: none"> • steel; • aluminium; • paper; • plastic; and • oil. b) An approved recycling company shall be appointed to manage the respective collection and recycling and or re use of waste materials.
3) Environmental contamination.	a) All waste streams stored in appropriately marked containers. b) Containers of hazardous waste and waste oils shall be stored in a bunded, weatherproof area. c) No evidence of contamination by waste. d) All spills to be reported and included within reports to be submitted to the Employers Agent.
4) Good housekeeping.	a) Weather and scavenger proof bins provided at all points where waste is to be generated. b) No evidence of litter. c) Chemical ablution facilities at a ratio of 1:15 shall be placed within 50 m of all work areas. d) Chemical ablution facilities not within 32 m of a watercourse.

	<p>e) Chemical ablution facilities kept in clean user friendly state.</p> <p>f) Chemical ablution facilities shall be secured.</p>
--	--

PSEM224 Water Management	
Outcomes	Preserve water quality levels and quantity used / discharged to an extent that the integrity of affected water resources is assured.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.
Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
<p>1) Watercourse water quality.</p> <p>2) Variables and frequencies to be monitored as per regulated prescribed minimum requirements.</p>	<p>a) Less than 10% change between values measured 300 m upstream and within 50m downstream of where construction related activities are to occur.</p> <p>b) Water quality monitoring during period when contaminated water is being released into a watercourse / environment.</p>
<p>3) Contaminated water monitoring.</p> <p>4) Variables and frequencies to be monitored as per regulated prescribed minimum</p>	<p>a) Values for variables measured shall fall below the specific limits indicated in regulated prescribed minimum requirements, before release into the receiving environment.</p>

requirements.	
5) Water management.	<ul style="list-style-type: none"> a) No storm water flowing through site (unless in a dedicated storm water channel). b) No storm water flowing onto areas of low / poor stabilisation. c) Control erosion on all construction areas. d) Prevent contamination of water resources. e) Obtain necessary regulatory approvals prior to commencement of works. f) Introduction of formalised anti erosion and storm water management works within areas susceptible to erosion. These works shall be properly maintained. g) Construction related activities within, across, under or immediately adjacent to watercourses, wetlands; and areas subject to flooding, are to be programmed to occur during the dry months. h) No handling of hazardous substances without necessary personal protective and spill containment equipment and procedures in place. i) Volumes of both water abstraction and use shall be recorded and reported upon. j) Clean water and dirty water systems shall be managed independently and kept separate. k) No water shall be discharged into the municipal storm water system without prior authorisation and compliance with regulated prescribed minimum requirements. l) Non potable water shall be used for all construction related activities, unless approved by the Employers Agent.

Decommissioning

Mitigation measures proffered within [Annexure 7.5 Decommissioning: Environmental Best Practicable Options](#) merely guide the Contractor towards achieving the below prescribed outcomes.

PSEM25 Decommissioning	
Outcomes	Perform decommissioning activities in a manner which is legally compliant; does not impact the health and well-being of the environmental and local community.
Responsibilities	Contractor to draft Method Statement and implement; Employers Agent to approve and supervise; and Independent ECO to audit.

Timeframes	Method statement compiled and approved prior to commencement of activity. Implementation and compliance to be undertaken continuously.
Performance Indicator	Target
1) Environment	<ul style="list-style-type: none"> a) The Contractor shall prevent adverse environmental and community impacts from decommissioning activities. b) The Contractor shall prevent loss of soil and creation of dust. c) The Contractor shall minimise any degradation of the quality of water leaving the site. d) The Contractor shall minimise the generation of excessive construction waste, including litter. e) Minimise contamination of the environment from dust.
2) Contamination	<ul style="list-style-type: none"> a) The Contractor shall minimise the risks to the environment and human health as a result of decommissioning activities. b) The Contractor shall ensure construction workers engaged in earthworks or demolition activities or off-site disposal of waste are aware of potential contamination issues through site inductions, environmental training and at daily toolbox meetings, and undertake these activities in accordance with applicable regulatory requirements. c) The Contractor shall ensure that all earthworks, construction and demolition activities which could intercept or expose contaminants of potential concern are managed to prevent storm water or dust discharge.
3) Noise	<ul style="list-style-type: none"> a) The Contractor shall use of lowest practicable noise emitting equipment and plant; noise levels will be considered in the selection of all plant and equipment, including the use of bored piles rather than driven piles where appropriate. b) The Contractor shall inspect all equipment to ensure that any noise mitigation (e.g. mufflers) is suitable.
4) Traffic	<ul style="list-style-type: none"> a) The Contractor shall prevent vehicle accidents and protect life and property. b) The Contractor shall avoid or minimise environmental damage and visual and noise disturbance due to vehicular traffic.
5) Construction Timing and Impacts	<ul style="list-style-type: none"> a) The Contractor shall provide appropriate mechanisms for the collection, treatment, recycling, reuse and disposal of construction waste and litter. b) The Contractor shall prevent environmental degradation caused by the inappropriate disposal of construction waste and litter. c) The Contractor shall provide for the environmentally responsible disposal of all construction wastes and litter. d) The Contractor shall conserve resources and maximise the recovery of reusable materials. e) The Contractor shall formulate and implement a waste minimisation strategy.
6) Budget	<ul style="list-style-type: none"> a) The Contractor shall make provision for adequate budget for site environmental management requirements.
7) ECO	<ul style="list-style-type: none"> a) The City of Cape Town shall appoint a competent and knowledgeable ECO; and where required, an Environmental Auditor.

8) Contractors Environmental Officer	a) The Contractor shall appoint a competent and knowledgeable Contractors Environmental Officer
--------------------------------------	---

Annexures

Guidelines

The Contractor is advised to include these Annexures within their on-site Environmental File. They are to be used to inform “how” the EMPr is to be implemented during construction related activities.

Annexure 1: Provision of details of the author(s) and related expertise

Provision of details of the author(s) and related expertise, as per requirements contained within Annexure 16 EMPr Alignment with NEMA Sec 24N

Annexure 2 - Legislation, Permits, Standards and Guidelines

Provides Legislation, Permits, Standards and Guidelines against which the Contractor is to adhere during the development.

Annexure 3 - City of Cape Town By-Laws

Provides City of Cape Town by-laws

Annexure 4 - Potential Authorisations / Permits / Licences Required Prior to Construction Commencement

Due to the evolving nature of developments; regulatory changes; and Contractor requirements, additional authorisations / permits / licenses may be required to augment those already obtained. This Annexure provides a summary to potential further regulatory requirements.

Annexure 5 – Environmental Authorisation / Water Use License

The Contractor is advised that developments which trigger an EIA / WUL may place further Conditions on the Contractor against which compliance is required. The Contractor is advised to be cognisant of these additional requirements and price accordingly.

Annexure 6 - City of Cape Town Environmental Policy

Provides the City of Cape Town's Environmental Policy

Annexure 7 - Environmental Best Practicable Options

Provides for Environmental Best Practicable Options which the Contractor may use to achieve compliance to the Outcomes contained within the Performance Specifications: Environmental Management. The Contractor should note that not all proffered mitigation measures will be suitable for all circumstances. The mitigation measures merely provide possible mechanisms to resolving risks / impacts. These mitigation measures do not absolve the Contractors from identifying appropriate mitigation measures for risks / impacts.

These are not auditable.

Annexure 8 – Site Plan

Provides further details relating to the Site Plan.

Annexure 9 - Method statement

This Annexure provides the Contractor with the minimum requirements to be included within the method statement.

It is incumbent upon the Contractor to provide a task or activity focussed method statement, providing the Employers Agent a holistic overview of all aspects associated with undertaking of the task / activity.

A method statement template has specifically not been provided to ensure that the method statement submitted by the Contractor aligns with Contractor QMS requirements.

Annexure 10 - Sensitivity Mapping

Provides for sensitivity mapping of "no-go" areas where the Contractor's activities are to be restricted.

Annexure 11 – Environmental Monitoring of Water

Provides for the monitoring of waste water generated due to construction related activities; and its discharge into a water resource, as per regulatory requirements.

Annexure 12 – Environmental Monitoring of Dust

Provides for the monitoring of dust generated due to construction related activities, as per regulatory requirements.

Annexure 13 – Environmental Monitoring of Noise

Provides for the monitoring of noise generated due to construction related activities, as per regulatory requirements.

Annexure 14 - General Conditions of Contract

Provides for references relate to the SAICE General Conditions of Contract 2015 (GCC).

Annexure 15 - Bill of Quantities

Provides for a mechanism in assisting the Contractor to accurately price for works to be undertaken.

Annexure 16 – EMPr Alignment with NEMA Sec 24N

Provides for a cross link to ensure EMPr contents complies with NEMA Section 24 N, together with Appendix 4 of GNR 982 the EIA Regulations, 2014, as amended.

Annexure 17 - Typical Aspects and Impacts Table

Provides for typical aspects and impacts generally associated with the various life cycle phases of a development. In the absence of an EIA Aspects and Impact Table, this table shall prompt the Contractor in the anticipation of possible risks. The Contractor is to use the Tables as a guideline in assessing risks / impacts when compiling method statements.

Annexure 18 – Site Environmental Management Plan

Small construction related activities not triggering an EIA process and not taking place in a sensitive environment (e.g. biodiversity areas, watercourses or wetlands and the coastal zone) may be governed by the SEMP.

Annexure 1 - Details of Author(s) and related expertise

Declaration

I, as the appointed specialist hereby declare/affirm the correctness of the information provided or to be provided as part of the application, and that I:

- in terms of the general requirement to be independent:
 - other than fair remuneration for work performed/to be performed in terms of this application, have no business, financial, personal or other interest in the activity or application and that there are no circumstances that may compromise my objectivity; or
 - am not independent, but another specialist that meets the general requirements set out in Regulation 13 have been appointed to review my work (Note: a declaration by the review specialist must be submitted);
- in terms of the remainder of the general requirements for a specialist, am fully aware of and meet all of the requirements and that failure to comply with any the requirements may result in disqualification;
- am aware that a false declaration is an offence in terms of regulation 48 of the NEMA EIA Regulations, 2014, as amended.

Note: The terms of reference of the review specialist must be attached.

Signature of the specialist:

Name of company:

Date:

Expertise	

Annexure 2 - Legislation, Permits, Standards and Guidelines

Table 5: List of Applicable Legislation and Guidelines

Legislation	Sections	Relates to
The Constitution Act (No 108 of 1996)	Chapter 2	Bill of Rights
	Section 24	Environmental rights
	Section 25	Rights in property
	Section 32	Administrative justice
	Section 33	Access to information
National Environmental Management Act (No 107 of 1998) as amended	Section 2	Defines the strategic environmental management goals, principles and objectives of the government. Applies through-out the Republic to the actions of all organs of state that may significantly affect the environment
	Section 24	Provides for the prohibition, restriction and control of activities which are likely to have a detrimental effect on the environment.
	Section 28	Duty of care and remediation of environmental damage. The scheme owner has a general duty to care for the environment and to institute such measures as may be needed to demonstrate such care. The duty of care has been amended to include significant pollution or degradation that occurred before the commencement of NEMA that arises or is likely to arise at a different time from the actual activity that caused the contamination or that arises through an act or activity of a person that results in a change to pre-existing contamination. A criminal sanction may be imposed on the responsible person for failure to comply with the reporting requirements and obligations to address the Duty of Care.
	Section 30	Control of emergency incidents. Responsible person's duties relating to reporting and remediation actions regarding emergency incidents. A criminal sanction may be imposed on the responsible person for failure to comply with the reporting requirements and obligations to address any emergency incidents.
Environment Conservation Act (No 73 of 1989) and regulations	The Act has been substantially repealed by NEMA. However, there are certain regulations under the Act which are still in operation such as the National Noise Control Regulations.	
National Environmental Management:	Section 16	General duty in respect of waste management
	Section 17	Reduction, re-use, recycling and recovery of waste

Legislation	Sections	Relates to
Waste Act (No 59 of 2008) (NEMWA)	Section 26	Prohibition of unauthorised disposal of waste.
	Section 27	Littering
National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004) (NEMBA)	Sections 65-69	These sections deal with restricted activities involving alien species; restricted activities involving certain alien species totally prohibited; and duty of care relating to alien species
	Sections 71 and 73	These sections deal with restricted activities involving listed invasive species and duty of care relating to listed invasive species.
National Environmental Management: Air Quality Act (No 39 of 2004) and Regulations	Section 22A	Section 22A Consequences of unlawful conduct of Listed Activity
	Section 23	Controlled Emitters
	Section 32	Control of dust National Dust Control Regulations National Ambient Air Quality Standards
	Section 34	Control of noise
	Section 35	Control of offensive odours
	Schedule 2	Ambient air quality standards
	Section 21(1)b	GN 893. Listed Activities and Minimum Emission Standards
National Environmental Management: Integrated Coastal Management Act (No 24 of 2008) (NEMICMA)	Section 58	Duty to avoid causing adverse effects on coastal environment
	Section 60	Repair or removal of structures within coastal zone
	Section 63	Environmental authorisations for coastal activities
	Section 69	Discharge of effluent into coastal waters
	Section 70	Prohibition of incineration or dumping at sea
	Section 71	Dumping permits
Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act (No 36 of 1947) and regulations	Sections 3 to 10	Control of the use of registered pesticides, herbicides (weed killers) and fertilisers. Special precautions must be taken to prevent workers from being exposed to chemical substances in this regard. Workers handling these remedies must also be registered in terms of the Act.
Conservation of Agricultural Resources Act (No 43 of 1983) and regulations	Section 5, 6	Implementation of control measures for alien and invasive plant species.

Legislation	Sections	Relates to
National Heritage Resources Act (No 25 of 1999)	Section 34	No person may alter or demolish any structure or part of a structure which is older than 60 years without a permit issued by the relevant provincial heritage resources authority.
	Section 35	No person may, without a permit issued by the responsible heritage resources authority destroy, damage, excavate, alter, deface or otherwise disturb any archaeological or paleontological site.
	Section 36	No person may, without a permit issued by the South African Heritage Resource Agency (SAHRA), or a provincial heritage resources authority destroy, damage, alter, exhume, remove from its original position or otherwise disturb any grave or burial ground older than 60 years which is situated outside a formal cemetery administered by a local authority. "Grave" is widely defined in the Act to include the contents, headstone or other marker of such a place, and any other structure on or associated with such place.
	Section 38	This section provides for Heritage Impact Assessments (HIAs), which are not covered under the NEMA. The HIA will be approved by the authorising body of the provincial directorate of environmental affairs, which is required to take the provincial heritage resources authorities' comments into account prior to making a decision on the HIA.
Occupational Health and Safety Act (No 85 of 1993) and regulations	General Administration Regulations GN R1449 (Section 7)	Material Safety Data Sheets must be made available at the request of any interested or affected person.
	Section 8	General duties of employers to their employees.
	Section 9	General duties of employers and self-employed persons to persons other than their employees.
		Asbestos Regulations
National Water Act (No 36 of 1998) and regulations	Section 19	Prevention and remedying the effects of pollution of a water body.

Annexure 3 - City of Cape Town By-Laws

The City of Cape Town by-laws that may be applicable to the proposed development are listed below.

Table 6: Applicable By-laws

CoCT By-Laws	Section	Relates To
CoCT Air Quality Management By-law 2016 as amended	Section 4	<p><u>Duty of Care</u></p> <p>This section calls upon everybody to exercise duty of care to prevent air pollution from occurring. Pollution must be mitigated to remedy air pollution. Failure to do this may empower the Council to take serious actions against that person.</p>
	Section 8	<p><u>Declaration of Air Pollution Control Zone</u></p> <p>The whole area within the jurisdiction of the Council is declared an air pollution control zone. The Council has power within the control zone to issue notices in the provincial gazette to prohibit and restrict activities that may pollute air.</p>
	Chapter 5	<p><u>Smoke emissions from premises other than dwellings</u></p> <p>Dark smoke may not be emitted for an aggregate period exceeding three minutes during a continuous period of 30 minutes. Installation, alteration, extension or replacing of fuel burning equipment must be authorised by the Council. Operation of fuel burning equipment without the Council's authorisation is an offence. The owner or occupier of premises may be required to install at own costs, the obscuration measuring equipment. Records and monitoring results must be kept and maintained.</p>
	Chapter 7	<p><u>Emissions caused by open burning</u></p> <p>Open burning of any material without a written authorisation from the Council is an offence.</p>
	Chapter 8	<p><u>Emissions from compressed ignition powered vehicles</u></p> <p>Vehicles using compressed ignition power and emitting dark smoke may not be used.</p>
	Chapter 9	<p><u>Emissions that cause a nuisance</u></p> <p>Emissions that cause a nuisance are an offence. A compliance notice may be served on any person</p>

CoCT By-Laws	Section	Relates To
		who is or is likely to cause air pollution to abate the nuisance, prevent it and comply with conditions set in the notice.
CoCT Water By-law, 18 February 2011	Section 8	<u>Duties of the public</u> All members of the public, upon becoming aware of any emergency or situation that may give rise to wastage of water or water pollution must, immediately inform the Director: Water.
	Section 12	<u>Unauthorised use of water</u> No person may use water from the water supply system without an agreement with the municipality and only through a communication pipe and metered water supply point installed by the municipality.
	Section 36	<u>Water restrictions</u> Whenever there is scarcity of water available to it for distribution and supply to consumers, or for any other good cause prohibit or restrict the consumption of water in the whole or part of the City; in general or for specified purposes; and in a specified manner.
	Section 37	<u>Wastage of water</u> No person may cause or permit the wastage of water such as permitting leaking pipes or insufficient use of water.
	Section 38	<u>Water conservation and demand management</u> All consumers of water must comply with good water conservation and demand management practices.
	Section 54	<u>Prevention of pollution of water</u> An occupier of premises must prevent the entry of any substance which may be a danger to health or adversely affect the potability of water into the water supply system or any part of the water installation on his/her property.
	Section 58	<u>Wells, wellpoints, boreholes and excavations</u> An owner of premises on which there is a well, wellpoint, borehole or any other excavation must ensure that it does not create a health nuisance or is filled in a way or with material which may cause an adjacent well, borehole or underground source

CoCT By-Laws	Section	Relates To
		of water to become polluted.
	Section 59	<u>Supply of non-potable water by the municipality</u> Non-potable water supplied by the municipality may not be used for domestic purposes or any other purpose which may give rise to a health hazard.
	Section 61	<u>Warning notices</u> Sources of non-potable water must be clearly marked with a weatherproof notice.
Community Fire Safety By-Laws, as amended	Section 26	Combustible waste and refuse
	Section 34	Combustible material fire hazards
	Section 37	Storage and use of flammables
	Section 48	Reporting of accidents
CoCT Environmental Health By-Laws, LA13333, 30 June 2003		<ul style="list-style-type: none"> Land open to the public may not be used for the purpose of storing and stacking or for keeping any material likely to cause a health nuisance. No premises may be allowed to be overgrown with bush, weeds or grass to such an extent that it may be used as a shelter by vagrants, wild animals or vermin which may threaten public health or safety. The sanitation system on any premises may not be of such nature or condition that it may cause a health nuisance. No person may commit any act which may cause a public health nuisance. No person shall occupy any premises for habitable purposes so as to be a health nuisance. No factory or trade premises may cause or give rise to smells that will cause a health nuisance. The occupier of premises must take all possible measures to prevent the occurrence of mosquitoes, flies, fleas, bugs, cockroaches or other vermin or pests. Filth, rubbish, refuse, manure or any material likely to be a health nuisance may not be kept or deposited on any premises. Any person who fails to comply with or contravenes any provision of Section 1 of these by-laws will be guilty of an offence and may be liable to a fine. Medical waste must be handled and stored in a safe manner that poses no threat to human health or the environment. Any person convicted of an offence under

CoCT By-Laws	Section	Relates To
		these by-laws shall be liable to a penalty.
CoCT Stormwater Management By-Laws , LA 31420, 23 September 2005	Section 3	<u>Prohibited discharges</u> No person may discharge anything but stormwater into the storm water system without written consent from the Council.
	Section 4	<u>Protection of storm water system</u> No person may commit any act which may damage, endanger or destroy the stormwater system or interfere with the operation thereof or contaminate or pollute the water therein without written consent from the Council.
	Section 5	<u>Prevention of flood risk</u> No person may undertake any activity which may cause an increase in flood levels or create a potential flood risk without written consent from the Council.
	<u>Section 6</u>	<u>Studies and assessments</u> The City may impose terms: for the establishment of flood lines; impact assessment; and environmental impact studies.
	Section 7	<u>Water pollution incidents</u> Should a stormwater pollution incident occur, the owner of the property on which the incident took place or the person responsible for the incident must inform the Council of the incident immediately and take all reasonable measures to minimise the effects of the pollution.
	Section 8	<u>Storm water systems on private land</u> No owner of property on which a private stormwater system is located may carry out an activity which may cause the system not to function properly. The owner must also keep such stormwater system functioning properly.
	Section 11	<u>Offences and penalties</u> Any person who contravenes or fails to comply with any provision of these by-laws will be guilty of an offence and may be liable, upon conviction, to a penalty.
CoCT Public Places and Nuisances By-	Section 2	<u>Prohibited behaviour</u> No person may intentionally block or interfere with the safe and free passage of a pedestrian or

CoCT By-Laws	Section	Relates To
Laws		vehicle.
	Section 6	<p><u>Trees causing an interference or obstruction</u></p> <p>The City may give notice to the owner or occupier of any property on which a tree or other growth which interferes with overhead wires or is a source of danger or nuisance to persons using a public road to prune or remove the tree or growth.</p>
	Section 8	<p><u>Goods, building materials, motor vehicle wrecks and dangerous objects</u></p> <p>No person may cause any broken glass or other potentially dangerous objects to be placed in a public place.</p>
	Section 23	<p><u>Offences and penalties</u></p> <p>Any person who contravenes or fails to comply with any provision of these by-laws will be guilty of an offence and may be liable, upon conviction, to a fine.</p>
CoCT Wastewater and Industrial Effluent By-Laws GN 6378, 1 September 2006	Section 2	<p><u>Duties of owners of properties</u></p> <p>Owners of premises must construct their own private sewer installations on their premises.</p>
	Section 3	<p><u>Protection of municipal sewers</u></p> <p>No person may interfere with the municipal sewer system in any way or discharge into the system any substance other than sewage without the approval of the council.</p>
CoCT Integrated Waste Management By-Law, 2009	Section 4	<p><u>Obligations of Waste Generators</u></p> <p>A waste generator must:</p> <ul style="list-style-type: none"> • “avoid the generation of waste or where it cannot be avoided minimise the toxicity and amounts of waste generated”; • “re-use, recycle or recover waste where possible”; • “manage waste so that it does not endanger health or the environment or create a nuisance”; • “maintain suitable cleanliness and hygiene standards on their premises as required by the City’s Environmental Health By-law”; • “conclude a contract with the City, its service provider or an accredited service provider, as the case may be, for the storage and collection of waste”. <p>A waste generator generating industrial waste shall submit an integrated waste management</p>

CoCT By-Laws	Section	Relates To
		<p>plan to the City and comply with the terms and conditions set out by the City for the generation, minimisation, storage, recycling, collection and disposal of such waste.</p> <p>Any person who directly or indirectly generates building waste or the owner of the property on which such building waste is generated shall not store such waste in containers provided by the City for residential waste and shall remove and dispose of it at a licensed crushing plant or landfill site or any other licensed building waste disposal facility.</p> <p>The waste generator or the owner of the property on which waste is generated who deposits or stores waste on property of the City may be fined for failure to have or produce a permit for such deposit or storage.</p>
	Section 7	<p><u>Priority Waste</u></p> <p>Where special measures are required for management of waste because it poses a significant threat to health or the environment, it is not biodegradable, contains or could foster pathogens or communicable diseases or has been declared a priority waste in terms of other applicable legislation it can be prioritised according to this By-law.</p>
	Section 12	<p><u>Storage and Transportation of Waste</u></p> <p>Any person who stores or transports waste must ensure that:</p> <ul style="list-style-type: none"> • "suitable measures are in place to prevent accidental spillage or leakage"; • "the waste cannot be blown away"; • "nuisances such as odour, visual impacts do not arise"; and • "pollution of the environment and harm to health are prevented".
		<p><u>Prohibition of Unauthorised Disposal of Waste</u></p> <p>No person may:</p> <ul style="list-style-type: none"> • Dispose of waste in a manner likely to cause pollution or have a negative impact on the environment or to be harmful to health; • Dispose of waste other than in accordance with this By-law or National and Provincial legislation; • Burn waste, especially hazardous waste except in approved incinerators; • Deal with waste in a manner that causes dust, spillage or litter.

Annexure 4 - Potential Authorisations / Permits / Licences Required Prior to Construction Commencement

The below provides information on additional activities which may require authorisations / permits / licences from relevant government departments. The Contractor is to ensure that prior to the commencement of works, these authorisations / permits / licences have been obtained.

Table 7: Activities that could require an authorisation / permit / licence

Activity	Type of authorisation / permit/ license required	Requiring institution
Obstacle Application Form	Permit	Civil Aviation Authority
Obstacle Application Form	Permit	Air Traffic and Navigation Services Company
Use of treated wastewater (dust suppression)	Approval	Department of Health
Application for a licence regarding activities in state forest	Licence	Department of Agriculture, Forestry and Fisheries
Search and Rescue	Permit	CapeNature
Veld and Forest Fire	Requirement for a fire management plan	Department of Agriculture, Forestry and Fisheries
Archaeological and paleontological sites and meteorites	Permit	Heritage Western Cape
To destroy, damage, deface, alter, remove from its original position, subdivide or change the planning status of a National Heritage Site	Permit	Heritage Western Cape
Burial grounds and graves	Permit	Heritage Western Cape
Way leave applications for accesses to the provincial roads	Approval	Department of Transport and Public Works
Health permits for hostels and sanitation	Permit	Department of Health
Commencement of Construction Activities	Notify one week before commencement	Department of Environmental Affairs and Development Planning
Radio Equipment Licence	Site radio submission	ICASA
Outdoor advertising of Activities	South African	Department of

Activity	Type of authorisation / permit/ license required	Requiring institution
	Manual for Outdoor Advertising Control	Environmental Affairs and Development Planning
Site Establishment Sewage Disposal	Approval	City of Cape Town
Site Establishment storm water & pollution control	Separate report	City of Cape Town
Fuel storage	Permit	Department of Environmental Affairs and Development Planning / City of Cape Town
Hazardous material route	Approval	Department of Environmental Affairs and Development Planning /DOT
Other Hazardous substances	Permit	Department of Environmental Affairs and Development Planning
Project construction commencement	Notify	DOL
Land use outside current zoning	Special consent approval (LUPA)	City of Cape Town
Detail design (water, wastewater, roads design)	Approval	City of Cape Town
Way leave applications – design	Approval	SANRAL
Installation of fuel burning equipment	Approval	City of Cape Town
Authorisation of spray booths	Approval	City of Cape Town
Open burning application	Approval	City of Cape Town
Noise impact assessments	Approval	City of Cape Town
Installation of fuel burning equipment	Approval	City of Cape Town
Temporary work within a National Park	Approval	SANParks

Annexure 5 – Environmental Authorisation / Water Use License

Note to Compiler: Please insert Environmental Authorisation / Water Use License

Annexure 6 - City of Cape Town Environmental Policy

Note to Compiler: Please insert Clients Environmental Policy

Annexure 7 - Environmental Best Practicable Options

Planning

Pre-construction

	DESCRIPTION		
Possible source of potential impact	<ul style="list-style-type: none"> • Clearing of vegetation • Poor housekeeping 	<ul style="list-style-type: none"> • Dust • Noise 	<ul style="list-style-type: none"> • Fires • Alien vegetation
Risks/impact	Risk / impact:	Mitigation measures	
	1) Search and Rescue	i. The Contractor shall undertake all activities associated with the search and rescue operation and have completed these prior to the commencement of construction related activities.	
	2) Alignment to engineering requirements	i. All EIA outcomes, EMPr, Environmental Authorisation and any other regulatory requirement shall be aligned with engineering requirements.	
	3) Budget	i. The Contractor shall make provision for adequate budget for construction site environmental management requirements.	
	4) Tender review	i. The Environmental Planner shall undertake an environmental review of all tender submissions.	
	5) Approvals	i. The Environmental Planner shall ensure all approvals been obtained.	
	6) Environmental Compliance	i. The City of Cape Town shall appoint a competent and knowledgeable ECO; and where required, an Environmental Auditor.	
	7) Contractors Environmental Officer	i. The Contractor shall appoint a competent and knowledgeable Contractors Environmental Officer	

Construction

DESCRIPTION	Aesthetics Management			
Possible source of potential impact	<ul style="list-style-type: none"> Clearing of vegetation Poor housekeeping Dust 	<ul style="list-style-type: none"> Stockpile Waste Vehicles 	<ul style="list-style-type: none"> Security lighting Odour Fires 	<ul style="list-style-type: none"> Poor rehabilitation Alien vegetation Noise
Risks/impact	Risk / impact:	Mitigation measures		
	1) Unsightly camps or construction areas.	i. Equipment and material to be neatly stored. ii. All site offices are to be matt toned single storey buildings that emit no glare. iii. No natural features may be defaced. iv. Shade-cloth shall be placed on perimeter fencing to reduce visual impact of the camp site. v. Waste should be removed regularly to registered landfill		
	2) Dust generation.	i. Dust suppression (wetting with non-potable water or other best practicable environmental option e.g. mulching, chemical dust suppression etc) shall be used in and around the construction area, along haul roads, at stockpiles and any additional area indicated by the Employers Agent. ii. Dust generating materials to be transported must be covered when transported. iii. All vehicles shall travel at speeds that will not generate dust.		
	3) Scarring of landscape.	i. Vegetation shall only be cleared where and when necessary, with the required approvals (e.g. in heritage protection overlay zones and for protected vegetation) ii. Rehabilitation / reinstatement to occur as soon as construction related activities are complete.		
	4) Insufficient soil stabilisation and rehabilitation resulting in erosion and subsidence.	i. Work straw bales into the topsoil at an application rate of one per 25 m ² .		
	5) Infestation of alien invasive species because of disturbances.	i. Contractor shall ensure all imported material is free of alien invasive seeds / propagules. ii. All alien invasive vegetation shall be cleared from within all areas impacted through construction related activities.		

DESCRIPTION	Aesthetics Management	
	6) Spread of litter	i. Conduct daily litter patrols at all areas impacted through construction related activities. ii. Provide for waste collection and containment facilities within the Contractors camp.
	7) Light pollution	i. Lighting must face down, not into surrounding environment, to provide adequate lighting for Health and Safety requirements. ii. Lights should not be mounted higher than 3m off ground level.
	8) Stockpile management	i. Stockpiles must be regularly and neatly maintained. ii. Stockpile heights to be kept to a minimum.
	The Contractor shall develop and implement an aesthetics management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Do not use hay bales for soil stabilisation, as hay contains seed which may result in the spread of agricultural weeds. Ensure mobile toilets are enclosed within a shade cloth enclosure. This will not only reduce visual impact, but also the temperature within the toilets – thus limiting odours. 	

DESCRIPTION	Dust Management			
Possible source of potential impact	<ul style="list-style-type: none"> Vehicular movement on unpaved roads 	<ul style="list-style-type: none"> Material handling, storage and transportation of materials 	<ul style="list-style-type: none"> Wind erosion from stockpiles 	<ul style="list-style-type: none"> Excessive vegetation clearance
Risks/Impacts	Risk/Impact:	Mitigation measure		
	1) Potential loss of agricultural value due to dust settlement on plants.	i. Clearance of indigenous vegetation shall be kept to an absolute minimum. Immediate rehabilitation of disturbed areas.		
	2) Impacts on biological functioning and	i. Monitoring of dust fall out shall be conducted as prescribed in the National Dust Control Regulations.		

DESCRIPTION	Dust Management	
	productivity of vegetation.	
	3) Potential health and nuisance impacts. 4) Safety risks due to reduced visibility. 5) Delays in construction related activities due to unsafe visual conditions.	i. Stockpile heights shall be reduced where dust entrainment has been noted to be high. ii. Dust suppression (wetting or other best practicable environmental option) shall be used in and around the construction area, along haul roads, at stockpiles, and any additional area indicated by the Employers Agent. iii. Dust generating materials to be transported shall be covered when transported. iv. All vehicles shall travel at speeds that will not generate dust. v. Strict dust control to limit impacts on sensitive receptors vi. Monitoring of dust shall be conducted as per the regulated frequencies at areas where dust is being generated. Dust mitigation is required to prevent dust levels exceeding 600 mg/m ² /day. vii. Monitoring of particulate matter and dust fall as prescribed in the National Dust Control Regulations shall be conducted
	The Contractor shall develop and implement a dust management method statement. Where required, a dust management plan shall be developed in terms of the National Dust Control Regulations.	
Top Tip(s)	<ul style="list-style-type: none"> Dust monitoring method (e.g. dust nuisance vs dust fall-out) to be undertaken using correct monitoring protocols – e.g. do not use dust nuisance monitoring techniques to determine dust fallout levels. Monitoring stations to be placed within path of dust emission. Perimeter dust fall monitoring is recommended where off-site impacts need to be assessed. Alternatives to wetting include chemical dust suppressants, mulching, planting vegetation in windows etc. Chipped material from vegetation clearing operations can be used to bind the soil, thereby reducing dust levels during rehabilitation / reinstatement works. Alien vegetation should not be used as mulch if it is in seed. 	

DESCRIPTION	Earthworks Management		
Possible source of potential impact	<ul style="list-style-type: none"> Dust Clearing of vegetation Wind erosion from stockpiles Vehicular movement on unpaved roads 		
Risks / Impacts	Risk/Impact	Mitigation measures	
	1) Loss of soil through contamination, wind and water erosion and inadequate stockpile handling.	i. Topsoil shall be stockpiled separately from subsoil with all soils being reinstated in the reverse order to that in which they have been removed in order to initiate rehabilitation. All stockpiles shall be stabilised, not be higher than 2m, and blend in with the surrounding topography. ii. Stockpiles shall be kept weed-free for the duration of construction related activities. iii. Should additional material or backfill be required, only material from an approved source free of alien invasive fauna and flora shall be used. iv. Topsoil only to be handled during removal and reinstatement activities.	
	2) Impacts on water resources.	i. All works shall take cognisance of potential impacts upon water resources. ii. Use non-potable water sources for dust suppression.	
	3) Disruption of natural areas and land use practices.	i. Topsoil removed from all areas impacted upon shall be stockpiled for rehabilitation. ii. Soil horizons (e.g. topsoil, subsoil, bedrock and other layers such as clays etc) to be kept separate during removal, stockpiling and reinstatement. iii. Topsoil removed from agricultural lands shall be collected and stockpiled. All stones and rocks greater than 150 mm diameter shall be removed from the reinstated topsoil in agricultural areas. iv. All stockpiles shall be located within designated areas outside the 1:20 year flood line of rivers and streams and not within 50m of delineated wetlands.	
	4) Prevention of soil contamination.	i. Refuelling and other activities with the potential to cause pollution shall not be allowed on or adjacent to a stockpile.	
	5) Excess material requiring spoiling.	i. Undertake Inventory of topsoil requirements and reserve extra 10% of topsoil for rehabilitation requirements. ii. Spoil shall be used as backfill to rehabilitate areas impacted upon by earthwork activities.	

DESCRIPTION	Earthworks Management	
		<p>iii. Excess spoil material shall be disposed of at the nearest registered landfill site as identified by the Employers Agent.</p> <p>iv. In the event that the volume of spoil generated for disposal outside of a registered landfill site is greater than the thresholds stipulated within GNR 921, (National Environmental Management: Waste Act (Act 59 of 2008) List of Waste Management Activities that have, or are likely to have a detrimental effect on the environment, of 29 November 2013), the City of Cape Town shall be notified that a Waste License will need to be applied for.</p>
	The Contractor shall develop and implement an earthworks management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> • Ensure suitable locality for topsoil storage is in place prior to the commencement of earthworks. • Cover stockpiles with permeable / breathable fabrics instead of plastic sheets. 	

DESCRIPTION	Erosion Management	
Possible source of potential impact	<ul style="list-style-type: none"> • Site preparation • Civil works • Dewatering • Vegetation clearance 	
Risks/Impacts.	Risk/Impact:	Mitigation measure
	<ol style="list-style-type: none"> 1) Contamination of water resources through increased sediment load. 2) Reduction in soil productivity due to loss of topsoil. 3) Increased soil deposition to adjacent areas. 4) Dust generation. 	<ol style="list-style-type: none"> i. Changes in natural gradients due to construction activities shall be avoided where possible or mitigated by levelling the slope to the original gradient. ii. Access and servitude roads shall be designed to drain efficiently through formalised storm water crossings comprising inter alia an earth berm and causeway. The placement of these shall be assessed per road portion. Storm water shall be directed to areas of high stability with the ability to reduce storm water velocity. iii. Where the above is not possible, exposed slopes steeper than 1:2 (vertical: horizontal) shall be stabilised and drainage directed to engineered structures. iv. Exposed areas shall be stabilised within one week of their exposure. v. Where slopes created are steeper than 1:1, additional anti-erosion mechanisms shall be implemented (such as knocking in stakes, installing gabions, geo textiles or similar). vi. Monthly clearance of alien vegetation re-growth at disturbed areas shall be conducted as per the

DESCRIPTION	Erosion Management	
		<p>requirements of the Conservation of Agricultural Resources Act (Act 43 of 1983) and National Environmental Management: Biodiversity Act's (Act 10 of 2004) Alien Invasive Species Regulations, as amended until rehabilitation in the area is initiated.</p> <p>vii. No disturbance of soil shall occur outside the construction footprint boundaries.</p> <p>viii. Suspended solids within water leaving the footprint area shall not contain significantly higher levels of suspended solids (>10%) than water within locally occurring water resources.</p>
	The Contractor shall develop and implement an erosion management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Only clear vegetation where required. Ensure storm water planning is finalised prior to commencement of earthworks. 	

DESCRIPTION	Fauna and Flora Management		
Possible source of potential impact	<ul style="list-style-type: none"> Site preparation 	<ul style="list-style-type: none"> Civil works 	<ul style="list-style-type: none"> Dewatering Vegetation clearance
Risks/Impacts	Risks/Impacts	Mitigation Measures	
	<p>1) Disturbance, degradation and pollution of the environment.</p> <p>2) Removal of vegetation and thus loss of habitat and biodiversity.</p> <p>3) Disturbance to or removal of agricultural capacity.</p>	<p>i. Reduce construction related activities and vegetation clearance within the development where logistically possible.</p> <p>ii. No construction related activities to impact upon areas outside of the development footprint.</p> <p>iii. A search and rescue operation to collect species for rehabilitation shall be conducted, where feasible, prior to the commencement of construction related activities and these shall be kept alive in a nursery for rehabilitation purposes.</p> <p>iv. Each indigenous tree or shrub removed through search and rescue operations shall be replanted in the area it came from or in an area as advised by the City of Cape Town Biodiversity Management Branch.</p>	
	4) Negative impacts on sensitive environments and rare/threatened/endangered	<p>i. All areas where rare and/or endangered species could occur are to be identified and avoided where possible.</p> <p>ii. No unauthorised clearing of vegetation.</p>	

DESCRIPTION	Fauna and Flora Management	
	species.	<ul style="list-style-type: none"> iii. No introduction of alien invasive vegetation species as a result of construction related activities. iv. Progressive rehabilitation of all disturbed areas to a state similar to the surrounding landscape. v. Rescued specimens are to be stored and cared for in a temporary nursery, and replanted once construction related activities have been completed. vi. All disturbed areas shall be rehabilitated with special attention paid to identified sensitive areas. vii. Rescued fauna relocated to approved locality.
	5) Damage and/or death of rescued specimens due to ineffective search and rescue operations.	<ul style="list-style-type: none"> i. The Contractor shall maintain the nursery to ensure survival of collected species. Individuals that die in the nursery shall be replaced from a commercial source by the Contractor. If the species that die were intended to be placed in biodiversity areas in the City – the Biodiversity Management Branch shall be consulted with regard to the acceptability of utilising commercially obtained replacement plants prior to purchase.
	6) Unauthorised collection of fauna and flora for food, firewood, “muthi” or other uses.	<ul style="list-style-type: none"> i. No unauthorised collection of fauna and flora.
	7) Incorrect operation of gates thereby allowing free movement of livestock and game.	<ul style="list-style-type: none"> i. The Contractor shall manage gates in accordance to the requirements of the Fencing Act (Act 31 of 1963), whereby open gates shall be left open and closed gates be kept closed. ii. The Contractor shall inform all landowners in the event of livestock movement into agricultural lands due to incorrect gate usage.
	8) Animals becoming trapped in construction areas and/or falling into excavations due to ineffective exclusion mechanisms (fencing, cattle grids etc.).	<ul style="list-style-type: none"> i. Open excavations shall be adequately fenced to prevent access by wildlife or livestock. ii. Corridors across any servitude for the passage of animals shall be provided at appropriate sites determined by the Contractor and approved by the Employers Agent.

DESCRIPTION	Fauna and Flora Management	
	9) Spread of alien invasive species.	i. Monthly removal of alien invasive vegetation from all impacted areas. ii. Herbicide use for the control of invasive species shall be at supplier recommended application rates, and in accordance to the regulatory requirements (Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act (Act 36 of 1947)). Herbicides used shall be biodegradable where possible.
	10) Fauna management	i. No harming/killing/trapping/hunting of animals is allowed. ii. No domestic animals are allowed on site. iii. Qualified person(s) to be contacted to remove wildlife and snakes which do not want to move on their own. iv. Areas of vegetation must not be avoided but rather cordoned off and marked as no-go areas. v. City of Cape Biodiversity Branch should be contacted on 021 514 4189 for assistance, where required.
	The Contractor shall develop and implement a fauna and flora method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Undertaking a search and rescue operation where rescued flora is propagated in a nursery may provide a cheaper alternative than procuring commercial nursery bought flora. Furthermore, this approach allows containment of unique endemic genetic variations. 	

DESCRIPTION	Fire Management		
Possible source of potential impact	<ul style="list-style-type: none"> Site preparation Civil works Fires Vegetation clearance 		
Risks/Impacts	Risk/Impact	Mitigation measures	

DESCRIPTION	Fire Management	
	<ul style="list-style-type: none"> 1) Loss of fauna and flora and destruction of natural habitat. 2) Loss of grazing lands and crops. 3) Damage or destruction to infrastructure. 4) Injury and/or death of humans and animals. 	<ul style="list-style-type: none"> i. Join the local Fire Protection Association (FPA). ii. Perimeter boundaries shall have fire breaks in place. iii. The daily Fire Danger Index (FDI), calculated in terms of the National FDI (www.weathersa.co.za), shall be displayed prominently at all times. iv. Fire extinguishers shall be available at all points of storage of flammable products. v. STP Dry Powder Fire Extinguishers shall be used and at least one shall be provided per 50 m² floor surface area. vi. The fire extinguishers shall be checked on a monthly basis to ensure they have not been used/exceeded their yearly service intervals. vii. Basic fire-fighting equipment shall be kept and maintained at all construction fronts at all times. Basic fire-fighting equipment shall not be restricted to fire extinguishers, but shall take cognisance of site specific conditions. viii. All staff are to undergo basic fire-fighting training. ix. Basic fire-fighting equipment shall be checked prior to the commencement of the winter fire season. x. The Contractor shall assign the position of Fire Officer to one of its senior staff members who shall be competent and adequately trained to fulfil the position of Fire Officer. xi. The Fire Officer shall be responsible for ensuring immediate and appropriate actions in the event of a fire and shall ensure that employees are aware of the procedures to be followed. The Fire Officer shall be responsible for contacting emergency services for assistance. xii. Any fires that occur shall be reported to the Employers Agent immediately and reported in turn to the relevant authority (district / local municipality, the local FPA and the Department of Agriculture, Fisheries and Forestry). xiii. Provision of formal training to all members of staff, who shall be able to attend to fire fighting in the event of a fire, until emergency services arrive. xiv. All other staff shall receive training on fire prevention and fire-fighting and safety in the event of a fire, as a part of the site induction training by Contractor before commencing work. Annual refresher courses shall be presented to all staff. xv. Ensure that the necessary materials and equipment for dealing with oil, fuel and hazardous substance spills and leaks are available on site and up to date at all times.

DESCRIPTION	Fire Management	
		<p>xvi. No open fires shall be permitted on or off-site, except for activities authorised by the Employers Agent and the FPA. All authorised fires shall occur at designated fire places, which shall be suitably resourced to contain and suppress any potential run away fire.</p> <p>xvii. No on-site burning of any waste materials, vegetation, litter or refuse shall be permitted.</p> <p>xviii. The disposal of cigarette butts into the surrounding environment shall not be permitted.</p> <p>xix. Grass and other vegetation in the vicinity of infrastructure shall be cut at regular intervals to reduce fuel load and fire hazards</p> <p>xx. Annual updating and approval of the fire management response plan before onset of fire season.</p> <p>xxi. Conduct management review of fire preparedness and response before onset of fire season.</p> <p>xxii. Conduct fire and emergency drills every six months with one coinciding with the onset of the fire season.</p>
	The Contractor shall develop and implement a fire management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Consider using haul roads as fire breaks. These shall be agreed upon with neighbouring landowners, the FPA and recorded within agreements and management plans; and updated annually. 	

DESCRIPTION	Hazardous Substance Management	
Possible source of potential impact	<ul style="list-style-type: none"> Fuel dispensing Reactive chemical storage Chemical cleaning Plant maintenance 	
Risks/Impacts	Risks/Impacts	Mitigation measures
	1) Contamination of the receiving environment	<p>i. All hazardous substances shall be kept under lock and key in a bunded impermeable weather and fire proof facility.</p> <p>ii. All staff to be trained in the safe handling and spill management of all substances used on site.</p> <p>iii. Drip trays to be provided and used for all mobile plant, maintenance and refuelling activities.</p> <p>iv. Sufficient number and type of spills kits to be provided at all work fronts.</p> <p>v. The Contractor shall prevent the discharge of any pollutants, such as bentonite, cements,</p>

DESCRIPTION	Hazardous Substance Management	
		concrete, lime, chemicals and fuels into any water resource.
	2) Spills	<ul style="list-style-type: none"> i. Spills to be contained and removed by suitably trained staff. ii. Contaminated material to be disposed of registered hazardous waste landfill facility.
	3) Incorrect use of herbicide and pesticides.	<ul style="list-style-type: none"> i. All herbicides and pesticides to be used under the supervision of a Pest Control Officer (PCO), in terms of the Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act (No 36 of 1947) and its regulations.
	4) Threat of fires	<ul style="list-style-type: none"> i. All reactive hazardous substances to be labelled and stored separately. ii. Suitable fire-fighting equipment shall be stored in close proximity and all personnel be made aware of the dangers of burning chemicals/smoke inhalation.
	5) Temporary storage	<ul style="list-style-type: none"> i. No temporary storage of hazardous substances, storing 80m³ or more or 30m³ within 200m from the high-water mark of the sea or within 100m from the edge of a watercourse
	6) Personal injury	<ul style="list-style-type: none"> ii. All staff shall be trained in the management of hazardous substances. iii. All staff shall be provided with appropriate Personal Protective Equipment (PPE).
	7) Asbestos management	<ul style="list-style-type: none"> i. Should any asbestos waste material be discovered on site, rehabilitation of the site should be conducted in consultation with the National Department of Labour and in accordance with the Asbestos Regulations, as amended.
	8) Cement / concrete management	<ul style="list-style-type: none"> i. Cement shall be stored within weatherproof facilities / covered to prevent environmental contamination. ii. The Contractor shall ensure that concrete is mixed in appropriate structures to prevent the contamination of the surrounding environment. All visible remains are to be removed and disposed of as waste and all surplus material is to be removed. Plastic sheets and the bare ground shall not to be used for mixing purposes. iii. All visible remains of excess concrete shall be physically removed and disposed of on completion of construction. iv. Concrete spoil from foundation pours, shall not be discarded into the surrounding environment. Excess concrete and wash water from the concrete truck's drum shall be disposed of at Employer

DESCRIPTION	Hazardous Substance Management	
		Agent approved locality.
	The Contractor shall develop and implement a hazardous substance management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Hot water geyser drip trays are not suitable for use in the containment of hazardous substances. These drip trays are not UV, nor chemically stabilized and easily bend when warm (in the sun) thereby increasing risk of spillage. Of greater concern is that should the spilt contents ignite, the plastic will increase the fire severity. Such trays therefore not only pose an environmental threat, but a health and safety threat too. Please note the above is also applicable to the use of plastic sheets (damp course) as bunding. Bund walls should preferably be of reinforced concrete as brick walls tend to crack; joints are not adequately sealed; and do not interface well with the concrete base. Concrete is not impermeable and should thus be sealed with a chemical sealant (or similar) prior to the storage of hazardous substances. 	

DESCRIPTION	Heritage Management	
Possible source of potential impact	<ul style="list-style-type: none"> Asbestos waste Chance human remains Demolished buildings Dust 	
Risks/Impacts	Risks/Impacts	Mitigation measures
	1) Damage to known heritage resources.	i. All heritage resources encountered shall be avoided and protected unless otherwise instructed by the Employers Agent (in consultation with a heritage specialist). Approval from Heritage: Western Cape (H:WC) must be attained prior to the removal, damaging or alteration of any heritage resource.
	2) Damage or destruction of chance finds.	i. Personnel shall be informed of what chance finds may be and what they may look like and instructed to be on the lookout for these items during excavation operations. ii. In the event of a chance find, work at the find shall be stopped. iii. A heritage specialist shall be called in to investigate the find. The heritage specialist shall provide management measures for the protection or removal of the find in consultation with H:WC. iv. Work shall only recommence in area of the find once written permission from the H:WC, heritage specialist and the Employers Agent has been obtained.
	3) Heritage watching brief	i. A heritage specialist shall be appointed to undertake a "watching brief" in the event of finds.
	4) Heritage Authority details.	i. The Contractor shall ensure the below Competent Authority contact details are kept on file on site. SAHRA: 021 462 4502 HWC: 021 483 9598 CCT: 021 487 2038
	The Contractor shall develop and implement a heritage management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Ensure an archaeologists contact details are kept on file in the event of a chance find. This may expedite timeframes associated with work cessation at point of chance find. Undertake site walk through prior to construction related activities commencing to ground truth no graves were omitted during planning and design phases. 	

DESCRIPTION	Land Owner Liaison	
Possible source of potential impact	<ul style="list-style-type: none"> Dust Water contamination Noise Waste 	
Risks / Impacts	Risks / Impacts	Mitigation measures
	1) Animosity of community members affected by construction related activities.	Landowners shall be actively engaged and be kept informed of new developments. Effective communication channels shall be established and maintained.
	2) Incident reporting structures	i. Initiate incident reporting structures. ii. Contractor shall adhere to the following timeframes for dealing with Landowner concerns, unless otherwise approved by the Employer: <ul style="list-style-type: none"> Record concern within the Communications Register and verbally notify the Employer – immediate. Respond to the concern – within 1 day of concern being raised – this includes consulting with the Landowner. Rectify/mitigate concern – within 3 days of concern being raised. Respond in writing to landowner on “close out” of concern – within 5 days of concern being raised. Submit to the Employer a detailed report – within 7 days of concern being raised.
	3) Construction programmes.	i. Where practical, construction related activities shall be programmed to lessen impacts upon existing land use practices.
	4) Site creep	i. All development foot prints shall be surveyed and pegged prior to the commencement of construction related activities.
	5) Land access protocols	i. Basic Environmental Awareness Training to all employees with annual refresher courses. ii. Access to the site by people other than staff or those with construction related business shall be

DESCRIPTION	Land Owner Liaison	
		limited.
	6) Site Camp	i. The Contractor shall require a site office / yard for the duration of the contract period. The Contractor's site office shall be located within the development footprint, or on a site appropriately zoned and/or authorised for such use by the Competent Authority and approved by the Employers Agent (in consultation with the ECO). The Contractor shall select a location that has easy access and which has already been cleared or disturbed by previous human activity (e.g. previous construction camps or stockpile areas). All construction activities, materials, equipment and personnel shall be restricted to within the area specified. The Contractor shall inform the Employers Agent of the site camp localities prior to the commencement of construction related work.
	The Contractor shall develop and implement a land use management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Engage with land owners prior to undertaking construction related activities and ensure all concerns / requirements are agreed upon. This will prevent possible future claims, grievances and animosity towards the development. 	

DESCRIPTION	Noise Management		
Possible source of potential impact	<ul style="list-style-type: none"> Blasting Machinery and equipment 	<ul style="list-style-type: none"> Demolition Heavy duty vehicles 	<ul style="list-style-type: none"> Maintenance Hours of operation
Risks/Impacts	Risk/Impact	Mitigation measure	
	1) Hearing loss through exposure to extended and or high noise levels. 2) Disruption of sense of place due to noise nuisance. 3) Noise nuisance to sensitive receptors.	i. Construction site yards, workshops, concrete batching plants and other noisy fixed facilities may not be located in close proximity to sensitive receptors, unless with the approval of the Employers Agent. In such cases, the Contractor shall notify affected parties prior to the commencement of the noisy activity. ii. Employees shall be provided with adequate PPE. iii. All construction related vehicles, plant and equipment shall be properly maintained to avoid creation of unnecessary additional noise. iv. Where possible, sensitive receptors shall be forewarned before noisy operations commence. v. Maintenance activities are to be contained to reasonable hours during the day.	

DESCRIPTION	Noise Management	
		vi. Where possible, noisy operations shall be combined so that they occur concurrently. vii. Strict control of blasting operations, if required, with regard to the size and timing of explosions in order to minimise noise. The number of blasts per day shall be limited, blasting shall be undertaken at the same times each day and no blasting shall be allowed at night. Affected parties shall be notified of blasting events.
	4) Vibration	i. All buildings within Employer Agent approved radius shall be inspected pre and post blasting to determine structural integrity. ii. Records (containing photographs) of inspections shall be submitted to the Employers Agent. iii. All blasts shall be monitored to determine blast related vibration. iv. Compliance with regulatory requirements (BS 7385-2 (ISO 4866) Evaluation and measurement for vibration in buildings – Part 2: guide to damage levels from ground-borne vibration).
	The Contractor shall develop and implement a noise management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Engage with affected stakeholders well in advance should excessively noisy operations be anticipated. Provide continued feedback and address associated grievances as timeously as possible. An informed stakeholder is less likely to raise a grievance. Apply for noise exemptions in terms of the Western Cape Noise Control Regulations where required e.g for night time work. 	

DESCRIPTION	Rehabilitation Plan		
Possible source of potential impact	<ul style="list-style-type: none"> Dust Erosion 	<ul style="list-style-type: none"> Excess spoil 	<ul style="list-style-type: none"> Alien invasive plants Demolished temporary works
Risks/Impacts	Risks/Impacts	Mitigation Measures	
	1) Reduction in species diversity after works.	i. Prior to site clearance activities a search and rescue operation for naturally occurring plant species shall be conducted, if feasible for the vegetation type. ii. Individuals removed during search and rescue operations shall be relocated to a nursery and kept alive and replanted in the area from which they were removed or in an area as advised by the City of Cape Town Biodiversity Management Branch.	

DESCRIPTION	Rehabilitation Plan	
		<ul style="list-style-type: none"> iii. The Contractor shall obtain the necessary permits for the collection, transportation and possession of the collected species. These shall be obtained from the provincial conservation department. i. Disturbed areas shall be reseeded using the approved seed mix. The Biodiversity Management Branch must be consulted with regard to any rehabilitation in biodiversity areas.
	<ul style="list-style-type: none"> 2) Incorrect placement of topsoil and reseeded with the incorrect species resulting in poor vegetation establishment and regeneration of vegetation and visual scarring of the landscape. Dust generation and erosion due to exposed surfaces. 3) Loss of agricultural productivity due to poor vegetation establishment 	<ul style="list-style-type: none"> ii. After construction related activities have ceased, the site shall be cleared of equipment and any other materials emanating from the works. iii. Top and sub soil shall be replaced in the order they were removed. iv. Disturbed areas shall be ripped and / or scarified to a depth of 450 mm. v. Topsoil shall be reinstated at the minimum depths of 150 mm. vi. Topsoil shall be placed such that the disturbed area is at a slightly higher level than the surrounding undisturbed soil to account for soil settlement. vii. All disturbed areas shall be re-vegetated using an approved seed mix. viii. Landowners should be consulted to determine specific rehabilitation requirements.
	<ul style="list-style-type: none"> 4) Reduction in soil productivity due to the mixing of soil horizons during soil stripping, which causes dilution of fertility in topsoil's. 	<ul style="list-style-type: none"> i. Topsoil stored for longer than 6 months, shall be vegetated with an approved seed mix. ii. In cases like this, the biological viability of topsoil stockpiles shall be tested before placement during rehabilitation; and where necessary amelioration such as microbial supplementation may be required.
	<ul style="list-style-type: none"> 5) Infestation by alien 	<ul style="list-style-type: none"> i. Monthly removal of alien invasive species re-establishing on cleared areas, stockpiles and throughout

DESCRIPTION	Rehabilitation Plan	
	invasive plant species.	rehabilitation shall be undertaken.
	6) Drainage	i. All drainage lines shall be reinstated. ii. All disturbed areas shall be re-profiled to original contours. iii. Soils within drainage lines shall be stabilised to ensure no loss of capacity. iv. Permanent erosion and sediment control measures shall be reinstated.
	7) Loss of watercourse integrity and functioning	i. Anti-erosion measures shall be implemented to stabilise beds and banks of watercourses where these are disturbed. These measures should preferably be temporary in nature so they can be removed at a point where rehabilitation has been deemed to be successful. Permanent structures shall be approved by the Employers Agent before construction. ii. The soil profile (type and thickness of soil) of rivers and wetlands shall be recorded prior to excavations in these areas. iii. Topsoil and soils removed from watercourses shall be stockpiled separately. iv. Replacement of soil types shall be done so as to match the baseline soil profile as closely as possible. v. Re vegetation: Indigenous species that were originally present in the watercourse shall preferably be replanted in the watercourse vi. Careful attention to this detail is required in order to restore the water resistant layers that help <i>inter alia</i> wetlands retain water, as well as to restore other wetland functions.
	8) Erosion and wash-outs from disturbances on undulating terrain.	i. Minimal clearance of vegetation shall be permitted and plants shall be re-established as soon as possible. ii. Anti-erosion measures to be implemented as a priority on all areas which feature undulating terrain. iii. Formalised storm-water crossings shall be placed on all roads on undulating terrain. iv. Storm-water shall be directed to an area capable of dissipating the energy of the water.
	The Contractor shall develop and implement a rehabilitation management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> All vegetation cleared through site clearance activities should be chipped to provide mulch for soil stabilisation requirements. Such mulch shall be left to compost for six months. Alien invasive plant parts which are in seed, shall not be composted. 	

DESCRIPTION	Rehabilitation Plan
	<ul style="list-style-type: none"> • Work mulch into the top layer of soil, where after hydro-seeding can take place.

DESCRIPTION	Social Aspect		
Possible source of potential impact	<ul style="list-style-type: none"> • Noise 	<ul style="list-style-type: none"> • Dust 	<ul style="list-style-type: none"> • Soil on public roads at site access • Waste
Risks/Impacts	Risks/Impacts:	Mitigation measures	
	1) Animosity of community members affected by the project.	i. Stakeholders shall be actively engaged and be kept informed regarding construction related progress, requirements and meetings. ii. Ensure effective social and environmental monitoring. iii. The Contractor shall adhere to the following timeframes for dealing with landowner and stakeholder concerns, unless otherwise approved by the Employers Agent: <ul style="list-style-type: none"> • Record the concern within the Communications Register and verbally notify the Employers Agent and CLO immediately. • Respond to the concern – within 1 day of the concern being raised – this includes consulting with the stakeholder. • Rectify/mitigate the concern – within 3 days of the concern being raised. • Respond in writing to the stakeholder on “close out” of the concern – within 5 days of the concern being raised. • Submit to the Employers Agent a detailed report – within 7 days of the concern being raised. 	
	2) Cultural conflicts as a result of an influx of diverse population groups.	i. No accommodation at camp sites shall be allowed. ii. During work hours the Contractor shall be vigilant of potentially negative interactions between staff and the surrounding communities. iii. Trespassing on land adjacent to the project area is not allowed. iv. Access by people not involved in the project shall be controlled.	
	3) Marginalisation of historically	i. Procurement policies specified in the tender documents must be adhered to, including (but not	

DESCRIPTION	Social Aspect	
	disadvantaged individuals (HDI's) due to inequitable employment. Economic impact of project closure.	limited to): <ul style="list-style-type: none"> • Employment of HDIs. • Use of local labour. • Use of local services.
	4) Potential increase in environmental degradation as a result of the influx of employees and potential work seekers.	i. Basic Environmental Awareness Training to all employees with six monthly refresher courses. ii. Access to the site by people other than staff or those with project related business shall be limited.
	5) Neglect for worker health and safety, employment conditions. Poor skills development and training.	i. Safety training shall be provided to all staff and visitors. ii. Personal protective equipment (PPE) shall be provided to all staff and visitors. The Contractor shall ensure that the PPE is worn on site at all times. iii. The Contractor shall ensure a safe clean working environment, including (but not limited to): <ul style="list-style-type: none"> • Sufficient and clean toilet and ablution facilities. • Comfortable eating areas. • Safe transport. iv. Liaise with local emergency and health services on emergency response and preparedness procedures. v. Up-to-date contact list of all emergency services. vi. Co-ordinate emergency evacuation procedures with the local emergency services, and conduct regular emergency drills (as per the requirements of the health and safety plan). vii. Ensure compliance with the Occupational Health and Safety Act and Regulations.
	The Contractor shall develop and implement a social management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> • The Contractor shall not enter into agreements with stakeholders or undertake work on private property in lieu of favours, payment or any other means where either party may benefit from the activities / permissions of the other party. 	

DESCRIPTION	Soil Management	
Possible source of potential impact	<ul style="list-style-type: none"> • Stockpiles • Dust • Water contamination • Excess spoil 	
Risks/Impacts	Risk/Impact	Mitigation measures
	1) Loss of soil through contamination, wind and water erosion and inadequate stockpile handling.	i. All stockpiles shall be stabilised, not be higher than two meters and blend in with the surrounding topography. ii. Stockpiles shall be kept weed free for the duration of the construction related activities.
	2) Loss of biological viability of stockpiled topsoil due to poor handling.	i. Topsoil shall only to be handled during removal and reinstatement. ii. Soil horizons (e.g. topsoil, subsoil, bedrock etc) to be kept separate during removal, stockpiling and reinstatement. iii. All soils shall be reinstated in the reverse order to that in which they have been removed.
	3) Disruption of natural areas and land use practices.	i. Topsoil removed from riparian, wetland and grassland areas shall be removed and kept in separate stockpiles for rehabilitation. ii. Soil horizons (e.g. topsoil, subsoil, bedrock and other layers such as clays etc.) to be kept separate during removal, stockpiling and reinstatement. iii. Topsoil removed from agricultural lands shall be collected and stockpiled. All stones and rocks greater than 150 mm diameter shall be removed from the reinstated topsoil in agricultural areas. iv. All stockpiles shall be located within designated areas outside the 1:20 year flood line of rivers and streams and not within 50 meters of delineated wetlands. v. Topsoil shall be windrowed along servitudes.
	4) Prevention of contamination.	i. Refuelling and other activities with the potential to cause pollution shall not be allowed on or adjacent to a stockpile.
	5) Excess material requiring	i. Inventory of topsoil requirements with extra 10% topsoil kept in reserve.

DESCRIPTION	Soil Management	
	spoiling.	ii. Spoil shall be used as backfill to rehabilitate areas impacted upon by construction activities. iii. Excess spoil material shall be disposed of at locations as identified by the Employers Agent.
	The Contractor shall develop and implement a soil management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Consider the use of excess spoil for the creation of earth berms. This will reduce costs associated with transport and disposal. The berms can be vegetated and will provide a noise and visual barrier. Trees planted may assist in off-setting the developments carbon footprint. Do not provide landowners with excess spoil where this may be used for the construction of dams, shooting ranges etc. Excess spoil may however be given, with the Employer Agents approval, where this will be used for erosion control or rehabilitation of disused quarries / borrow pits, and in accordance with respective EMPr. 	

DESCRIPTION	Sustainable Management		
Possible source of potential impact	<ul style="list-style-type: none"> Electricity generation Generator exhaust emissions 	<ul style="list-style-type: none"> Dust 	<ul style="list-style-type: none"> Water contamination Excess spoil
Risks/Impacts	Risk/Impact	Mitigation measures	
	1) Increased costs associated with providing; and availability of electricity to site offices	i. The Contractor shall use appropriate materials and design for construction of buildings that assist in reducing heating/cooling demands. ii. The Contractor's site offices shall take solar altitudes into account and appropriate awnings be fitted above the windows to prevent excessive amounts of sun entering the buildings. iii. The design of buildings shall take the insulating properties of the materials used in their construction into account. Energy efficient building materials shall be used. iv. Trees located in the site camp shall not be removed without the approval of the Employers Agent. v. The Contractor shall implement measures to conserve energy, which may include solar panels, "energy-saving" bulbs automatic timers on light switches, solar geysers and point of source geysers. vi. The Contractor shall implement energy saving measures to result in a 20% saving in electricity	

DESCRIPTION	Sustainable Management	
		consumption.
	2) Increased costs associated with providing; and availability of water to site offices	i. The Contractor shall ensure all facilities are provided with low water flow systems and that the toilets are fitted with a dual flush toilet and waterless urinal systems. ii. The Contractor shall install "grey-water" systems to allow for the re-use of water. iii. Rain water tanks shall be installed to collect all the runoff from the roofed buildings on site. This water shall be reused for <i>inter alia</i> irrigation purposes. iv. The Contractor shall ensure all water pipes remain leak free for the duration of construction related works.
	3) Increase in dust due to non-availability of potable water	i. The Contractor shall implement dust suppression measures using non potable water or other best environmental practicable option.
	The Contractor shall develop and implement a sustainability management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> • Use water from excavation dewatering operations for dust suppression • Use chipped material from site clearance activities as ground cover (for dust suppression). Alien vegetation that is in seed should not be used for any purpose. 	

DESCRIPTION	Traffic Management			
Possible source of potential impact	• Noise	• Vehicle emissions	• Maintenance	• Refuelling
Risks/Impacts	Risks/Impacts	Mitigation measures		
	1) Degradation of existing road conditions due to the use by construction vehicles.	i. Roads shall be maintained in an acceptable condition for the safe travel of the public and project personnel. ii. Access shall only be for activities essential for the continued safe construction activities. Access for the general public shall not be permitted.		

DESCRIPTION	Traffic Management	
	2) Degradation of the surrounding environment.	i. No new roads constructed outside of the development footprint. ii. All vehicles shall remain on designated routes. iii. No soil compaction, erosion and sedimentation to land and water. iv. Minimise disturbances to water resources flora and fauna. v. Manage hydrocarbon spills from vehicles
	3) Dust generation as a result of vehicle entrainment.	i. The Contractor shall ensure dust entrainment does not exceed prescribed dust regulations ii. Manage vehicle speeds on site.
	4) Increase in safety risks due to presence of additional vehicles and equipment on the local road network. 5) Inconvenience and delays caused during road and or lane closures and traffic flow diversions.	i. The travelling public shall have the right of way on public roads. ii. No heavy vehicles shall be allowed on public roads between the hours of 06H00 to 08H00 and 16H00 to 18H00. iii. Full closure of existing roads shall not be allowed. iv. Where access to properties needs to be closed, alternative access for the duration of the closure shall be provided. The Contractor shall notify affected parties 48 hours before closure. v. Flagmen shall be provided at partial road closures and other traffic disruptions to ensure the safety of the public vi. Any accidents or incidents shall be recorded and the Employers Agent notified immediately. Investigation into the causes must be done.
	The Contractor shall develop and implement a traffic management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Undertake a photographic survey of all roads to be impacted upon by construction related activities prior to the commencement of construction. Where private roads are to be used, engage road owner on specific requirements / conditions. This will negate costly disputes over road repair or maintenance. 	

DESCRIPTION	Training Programme			
Possible source of potential impact	<ul style="list-style-type: none"> Litter due to poor training 	<ul style="list-style-type: none"> Dust due to poor training 	<ul style="list-style-type: none"> Noise due to poor training 	<ul style="list-style-type: none"> Water contamination due to poor training

DESCRIPTION	Training Programme	
Risks/Impacts	Risks/Impacts	Mitigation Measures
	1) Risks to quality of workmanship. Private property and the health and safety of workers and the surrounding communities due to lack of skills and training. 2) Risk of environmental degradation due to workers being uninformed about the potential impacts of the development.	i. All employees shall receive general construction related work skills training required to enable them to work safely and effectively, including: <ul style="list-style-type: none"> • Basic Environmental Awareness Training. • Spill and emergency management. • Health and safety. • Emergency drills. • Fire-fighting. • Disaster management. • Heritage resource and grave identification. ii. Specific task-related skills training shall be SAQA accredited. iii. A system of evaluation of the effectiveness of training shall be developed by the Contractor.
	The Contractor shall develop and implement a training management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> • Use familiar examples within training programmes. • Speak to the level of the audience. 	

DESCRIPTION	Waste Management			
Possible source of potential impact	<ul style="list-style-type: none"> • Blasting • Clearing 	<ul style="list-style-type: none"> • Excavations • Civil works 	<ul style="list-style-type: none"> • Maintenance • Temporary facilities 	<ul style="list-style-type: none"> • Canteen • First aid
Risks/Impacts	Risk/Impact	Mitigation measure		
	1) Reduced capacity at local landfill sites that needs to accept waste generated by the development.	i. Wherever possible, materials shall be reused or recycled to reduce amounts of waste that need to be disposed of at a landfill.		

	2) Spoil material volumes exceeding regulated threshold limits	<p>i. In the event that the volume of spoil generated for disposal outside of a registered landfill site is greater than the thresholds stipulated within GNR 921, (National Environmental Management: Waste Act (Act 59 of 2008) List of Waste Management Activities that have, or are likely to have a detrimental effect on the environment, of 29 November 2013), as amended, the Employers Agent shall be notified that a Waste License will need to be applied for.</p> <p>ii. No spoiling shall occur until the waste license has been obtained.</p>
	3) Soil and water resource contamination due to incorrect storage of waste and illegal dumping.	<p>i. General waste shall be stored separately from hazardous waste. General waste shall be stored in weather and vermin proof bins or skips or similar containers only.</p> <p>ii. Hazardous waste shall be stored in a bunded weatherproof area. Water from the bund shall be collected and disposed of at an appropriate landfill.</p> <p>iii. General waste that is not reused or recycled can only be disposed of at a registered landfill. Hazardous waste shall be disposed of at a hazardous waste landfill.</p> <p>iv. Overburden/spoil shall be disposed of at a registered landfill or at spoil areas authorised by the Competent Authority and approved by the Employers Agent.</p> <p>v. Record shall be kept of all waste generated and what proportions are being reused or recycled. Records of waste disposed at landfills or spoil areas shall also be recorded. Disposal certificates / receipts shall be obtained from landfill sites to document waste delivered to the landfill.</p> <p>vi. No septic tanks (French drains) shall be used. All sewage shall be removed to the municipal waste water treatment works; and proof of each disposal shall be retained and submitted to the Employers Agent.</p>
	4) Nuisances (litter, odours and aesthetics).due to poor housekeeping.	<p>i. The development foot print shall be kept clean and waste removed to the waste storage facility daily.</p> <p>ii. Daily litter patrols shall be conducted at the site camp and within the construction footprint.</p> <p>iii. Vermin and weather proof bins shall be provided.</p>
	The Contractor shall develop and implement a waste management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> Cut up a long spill sock into 20 – 30 cm lengths and place these into each drip tray. This will absorb spilt hydro carbons and prevent over-topping in the event of inclement weather. Many spill socks are designed to absorb anything between 7 – 25 times their weight. Furthermore, many can be wrung out and re-used. The use thereof does however not absolve the Contractor in preventing spills and subsequent environmental 	

	<p>contamination.</p> <ul style="list-style-type: none"> Assign a dedicated (and approved) area where empty cement bags can be soaked and allowed to dry. This alters the chemical nature of the cement with the resultant inert cement bags being suitable for disposal at registered (general waste) landfill site(s).
--	---

DESCRIPTION	Water Management			
Possible source of potential impact	<ul style="list-style-type: none"> Site office Civil works 	<ul style="list-style-type: none"> Stockpiles Excavations and dewatering 	<ul style="list-style-type: none"> Hydro carbon spills Access and haul roads 	<ul style="list-style-type: none"> Waste water Water use
Risks/Impacts	Risks/Impacts	Mitigation measures		
	1) Destabilisation of watercourse channel and loss of habitat due to alteration of the bed or banks of the watercourse. These actions could result in changes to watercourse functioning.	<ul style="list-style-type: none"> i. Watercourse crossings shall be formalised in order to protect the beds and banks of watercourses. ii. Evaluation of watercourse soils shall be done before construction related activities commence to verify wetness zones and soil profiles in order to reinstate original conditions during rehabilitation. iii. Stabilisation mechanisms and anti-erosion measures required as and where required. iv. Protection of fauna and flora. v. Rehabilitation as per prescribed measures. vi. During construction, all topsoil and subsoil stockpiles shall be stored outside of wetland and riparian zones. A minimum distance of 100 m shall separate the stockpiles with the start of the wetland and riparian zone. vii. Construction related activities may require regulatory approvals to be obtained prior to the commencement of works within water courses. 		
	2) Pollution or loss of water due to construction related activities interfacing with ground water (ingress of ground water into trenches,	<ul style="list-style-type: none"> i. Water impacted upon by construction related activities shall not be released directly into the environment. ii. Water shall only be released into the surrounding environment with the approval of the Employers Agent and once it meets the regulated prescribed minimum requirements. iii. A storm water management plan shall be developed to prevent erosion and the contamination of water; and deal with storm water release into the environment. 		

DESCRIPTION	Water Management	
	thereby requiring dewatering) and unmanaged runoff of surface water through unstabilised areas.	iv. Storm water shall be directed towards stabilised areas which can dissipate the energy of the water flow. No ponding shall be permitted. v. Prevention of water contaminated through storm water attenuation works discharging into any storm water drain or watercourse. vi. No handling of hazardous substances within close proximity to water resources and storm water drains.
	3) Decreased watercourse / wetland water quality and increased water quantity used.	i. Water quality upstream and downstream of where construction related activities are to occur, shall be monitored in terms of the variables and frequencies prescribed in the regulated minimum requirements, before, during and after construction related works. ii. Waste water shall be reused wherever possible. Water to be reused shall be tested for water quality (in terms of the variables and limits in regulated prescribed minimum requirements) and treated where necessary before reuse. iii. All construction related activities shall be excluded from watercourses, wetlands, riparian ecosystems and all sensitive areas, unless authorised so and approved by the Employers Agent. iv. During all works, no activity such as ablution, disturbance of natural habitat, storing of equipment or waste disposal may be permitted within any wetland, riparian zone. v. Implementation of anti-erosion and storm water works in areas susceptible to erosion.
	4) Non-conformance with regulatory requirements	i. Water use license may be required for watercourse crossings by service roads. Water use licenses shall be required for the discharge of the effluent if it is discharged to a water resource.
	The Contractor shall develop and implement a water management method statement.	
Top Tip(s)	<ul style="list-style-type: none"> • Straw bales (and not hay bales) may be used for bank stabilisation and sediment settlement. • Geotextile material should be placed parallel to the watercourse bank. The first row should be placed adjacent to the bank, with subsequent rows overlapping. Vertical placement results in erosion runnels. 	

Decommissioning

DESCRIPTION	Decommissioning			
Possible source of potential impact	<ul style="list-style-type: none"> • Dust • Noise • Asbestos 	<ul style="list-style-type: none"> • Rubble stockpiles • Excavations and dewatering 	<ul style="list-style-type: none"> • Hydro carbon spills • Access and haul roads • Rupturing underground tanks 	<ul style="list-style-type: none"> • Waste water • Water use
Performance indicators / Targets.	Performance Indicator	Target		
	1) Environment	a) The Contractor shall prevent adverse environmental and community impacts from construction. b) The Contractor shall prevent loss of soil and creation of dust. c) The Contractor shall minimise any degradation of the quality of water leaving the site. d) The Contractor shall minimise the generation of excessive construction waste, including litter. e) Minimise contamination of the environment from dust.		
	2) Contamination	a) The Contractor shall minimise the risks to the environment and human health as a result of decommissioning activities. b) The Contractor shall ensure construction workers engaged in earthworks or demolition activities or off-site disposal of waste are aware of potential contamination issues through site inductions, environmental training and at daily toolbox meetings, and undertake these activities in accordance with applicable regulatory requirements. c) The Contractor shall ensure that all earthworks, construction and demolition activities which could intercept or expose contaminants of potential concern are managed to prevent storm water or dust discharge.		
	3) Noise	a) The Contractor shall use of lowest practicable noise emitting equipment and plant; noise levels will be considered in the selection of all plant and equipment, including the use of bored piles rather than driven piles where appropriate. b) The Contractor shall inspection all equipment to ensure that any noise mitigation (e.g. mufflers) is suitable.		
	4) Traffic	a) The Contractor shall prevent vehicle accidents and protect life and property. b) The Contractor shall avoid or minimise environmental damage and visual and noise disturbance due to vehicular traffic.		
	5) Construction Timing and Impacts	f) The Contractor shall provide appropriate mechanisms for the collection, treatment, recycling, reuse and disposal of construction waste and litter.		

DESCRIPTION	Decommissioning	
		g) The Contractor shall prevent environmental degradation caused by the inappropriate disposal of construction waste and litter. h) The Contractor shall provide for the environmentally responsible disposal of all construction wastes and litter. i) The Contractor shall conserve resources and maximise the recovery of reusable materials. j) The Contractor shall formulate and implement a waste minimisation strategy.
	1) Budget	a) The Contractor shall make provision for adequate budget for site environmental management requirements.
	2) ECO	a) The City of Cape Town shall appoint a competent and knowledgeable ECO; and where required, an Environmental Auditor.
	3) Contractors Environmental Officer	a) The Contractor shall appoint a competent and knowledgeable Contractors Environmental Officer

Annexure 8 – Site Plan

Annexure 9 - Method statement

Purpose

The purpose of the method statement is to:

- *Outline the safe manner in which the task / activity is to be undertaken*
- *Provide induction material for all undertaking the task / activity to understand*
- *Meet legal requirements – hazard identification and control*
- *Provide a programme against work, material, time, staff and anticipated problems are to be managed*
- *Act as a tool in quality assurance*

Scope

A method statement describes the scope of the intended task / activity in an easy to understand step – by – step manner. This is particularly important to reduce potential confusion and ambiguity of the contents by those personnel required to implement it.

The method statement should clearly indicate:

- *What – a brief concise description of the task / activity to be undertaken;*
- *Who – a brief concise description of the personnel involved with undertaking the task / activity;*
- *When - a brief concise description of the sequence of actions with due commencement and completion dates of the task / activity to be undertaken;*
- *Where - a brief concise description and map / drawing of the locality of the task / activity to be undertaken;*
- *Why - a brief concise description of the importance and requirement of the task / activity to be undertaken; and*
- *How - a brief concise description of the methods to be implemented, materials and equipment to be used for the task / activity.*

Language use

The method statements shall be written in plain English so that they are understood by all. Therefore a well thought through and well written method statement providing clear and concise specific work plans, can save much time and money and potentially prevent the occurrence of incidents and accidents.

The implementation of the method statements shall be audited by the ECO. Consequently the method statements shall contain sufficient information and detail to satisfy the Employers Agent and ECO that the works will be implemented correctly and that potential incidents / accidents shall mitigated and managed.

Please remember to:

- *Consider the reader;*
- *Communicate a clear message;*

- *Use clear and concise language; and*
- *Consider how the information is portrayed.*

Site Specific Requirements

The method statement shall be site and development specific. Method statements copying information contained within the EMPr, specifications or other documents shall not be considered as they do not indicate to the person responsible for approving the document, that the Contractor has a clear understanding of what is required.

Minimum Requirements

The method statement should as a minimum address the following:

- **Description**
 - *Provide a brief and concise description of the work to be undertaken;*
 - *Personnel Qualifications and Experience;*
 - *List all the details of qualifications and experience required for the completion of the task; and*
 - *Experience may cover previous work done in the area that may not require certificates or licences.*
- **Personnel, Duties and Responsibilities**
 - *Give details of the duties and specific responsibilities of supervisors and other personnel. For example, describe such things as daily toolbox talks and guidance provided by the Environmental Officer;*
 - *Training required to complete work; and*
 - *Make sure that all workers and their Supervisors are trained in the procedures needed to complete the job safely and in an environmentally responsible way, especially when undertaking tasks for the first time or where new or changed work methods are utilised.*
- **Programme**
 - *Provide a clear and concise programme indicating all phases and time frames associated with the task.*
- **Construction sequence and method**
 - *Indicate all steps associated with task at hand. This shall be done in a manner which is easily understandable and leaves no uncertainties to staff that are required to implement the task in the field.*
- **Possible Hazards**
 - *Include all possible hazards such as:*
 - *Hazardous substances, explosives, dust, etc ;*
 - *Hazards to others in area ; and*
 - *Rubbish, electrical, fills.*
- **Resources/Plant/Equipment**
 - *List resources, plant and equipment that you will use on the job, e.g. ladders, scaffold etc.*
- **Environmental**
 - *Indicate environmental management responsibilities ;*

- Provide aspects and impacts associated with the activity;
- Provide environmental guidelines; and
- Specify employee training and involvement.

Indicate the following:

- Material consumption;
- Energy consumption;
- Water consumption;
- Waste management and reduction;
- Buildings, machinery, soil;
- Residual materials and waste;
- Atmospheric emissions, noise and odour pollution;
- Wastewater;
- Accidents and accident prevention; and
- Transport

- **Health and Safety**

- List all safety controls such as MSDS;
- Warning Signs;
- Personal protective equipment;
- Storage of materials and equipment;
- Fellow workers/public safety provisions; and
- Housekeeping

- **Monitoring Systems**

The Contractor shall develop a strategy and programme to monitor and verify its proposed mitigation measures are functioning.

This shall set out:

- o performance outcomes in respect of the potential negative environmental and social effects;
- o mitigation measures to assist in achieving performance outcomes;
- o a programme for monitoring negative environmental and social effects to ensure that mitigation measures are meeting performance outcomes; and
- o a contingency plan to be implemented should monitoring reveal that mitigation measures have failed.

All work undertaken by the Contractor shall align to best practicable environmental options; complies with relevant regulatory requirements and satisfies the provisions prescribed within the EMPr.

Methodology

The outcome of all monitoring is to provide information to inform whether the prescribed outcomes are being met. Consequently the inclusion of monitoring within the method statements is to:

- o inform the detection of potential unwanted environmental and social situations from developing, in order to provide timeous implementing of appropriate control measures;
- o define the roles of all parties associated with the monitoring process and provide them with clear responsibilities; thus allowing for improved and clear lines of

- communication;
- *identify monitoring parameters and define the mechanisms for monitoring;*
- *provide mechanisms for the evaluation of monitoring efficiency and efficacy in relation to the management and mitigation measures prescribed in the EMP;*
- *provide for measures to improve management actions associated with the mitigation of potential impacts;*
- *prescribe monitoring frequency; and*
- *allow for iterative learning.*

Environmental Monitoring

Environmental monitoring techniques shall include:

- *Emission monitoring:*
Emission monitoring shall entail the gathering of samples of all construction generated emissions for the purposes of characterising and quantifying contaminants; providing mechanisms to control emission release at point of discharge; and demonstrating compliance with prevailing regulatory requirements, accepted norms and standards.

This could include dust fall out monitoring in terms of the National Dust Control Regulations and emissions in terms of the City of Cape Town Air Quality Management By-law, as amended.
- *Environmental surveillance:*
The collection and analysis of dust, noise, soil and water samples within the development footprint to determine compliance with prevailing regulatory requirements; and accepted norms and standards.
- *Meteorological monitoring:*
The collection of meteorological data to inform how prevailing conditions impact upon environmental surveillance activities.
- *Photographic Record*
The Contractor shall compile a photographic record of all activities on site prior to construction related activities commencing, during the construction process and on completion of construction related works.

Social Monitoring

Social Monitoring shall:

- *determine relevant stakeholder groups;*
 - *monitor mechanisms to pro-actively manage influx of work-seekers, including health aspects;*
 - *determine efficacy of addressing and provide mitigation for social issues experienced due to construction related activities;*
 - *monitor delivery of services to a level associated with pre-construction conditions; and*
 - *determine efficacy of economic inclusion of local community.*
- **Emergency/disaster incident and reaction procedures**

- Procedures must be included indicating how incidents/accidents will be dealt with and what steps are in place to prevent such an incident/accident from occurring.
- **General**
 - Explanation of important technical/environmental terms

The Contractor shall be accountable for all actions taken in non-conformance of the accepted Method Statements. The Contractor shall keep all the method statements and subsequent revisions on file, copies of which must be distributed to all relevant personnel for implementation.

The Contractor shall be required to submit, the method statements listed in the table below as identified in the contract, for approval by the Employers Agent prior to the start of construction related activities.

Table 8: Method Statements could include the following Aspects.

Method Statement	Key information required	Target
Site Establishment and Layout	<ul style="list-style-type: none"> - Site establishment methodology - Site layout drawing - Gates and fencing - Aesthetics and housekeeping - Laydown areas - Workshops - Wash bays 	No damage to existing gates and fences. All gates equipped with locks to prevent unauthorised access. No complaints about open gates. No complaints from landowners No damage to private property No unplanned disturbance due to construction related activities.
Cement Mixing / Concrete Batching / Bentonite Mixing / Soilcrete mixing	<ul style="list-style-type: none"> - Mixing and batching methodology - Plant drawings - Monitoring of stockpiles, materials, water etc. 	All cementitious mixing to occur within demarcated localities. No indiscriminate spoiling of cementitious products in non-designated areas. No impacts upon receiving water resources.
Water Management	<ul style="list-style-type: none"> - Grey water management - Sewerage water management - Industrial waste water management - Stormwater/runoff management - Water monitoring 	All waste water to be monitored and comply with regulatory requirements. Stormwater to be managed to ensure no environmental degradation occurs.
Dust Management	<ul style="list-style-type: none"> - Dust generating activities - Weather influences - Dust management strategies - Dust monitoring 	No complaints from stakeholders. Dust emissions to be monitored and comply with regulatory requirements.
Environmental Monitoring	<ul style="list-style-type: none"> - Monitoring of dust, noise, water etc. 	Compliance with regulatory requirements: <ul style="list-style-type: none"> • Dust: NEM AQA Air Quality Regulations;

Method Statement	Key information required	Target
		<ul style="list-style-type: none"> Noise: Western Cape Noise Control Regulations; and Water: NWA Water Quality Guidelines. <p>Ensure no incidents or accidents occur which negatively impact upon the surrounding environment.</p>
Erosion control	<ul style="list-style-type: none"> Erosion controls to be implemented across the site Corrective actions for occurrence of erosion 	<p>Slopes > 1:1 must have additional anti-erosion mechanisms.</p> <p>No evidence of erosion.</p> <p>No evidence of disturbance outside of project area.</p>
Fire	<ul style="list-style-type: none"> Fire breaks Fire extinguishers Hot works Policy on open fires 	Zero (0) fires.
Fuel storage and Refuelling	<ul style="list-style-type: none"> Bulk fuel storage Bulk fuel storage schematics Bowsers (refuelling and storage) Jerry Can (refuelling and storage) 	<p>All refuelling to occur within designated areas.</p> <p>All hydrocarbons to be contained within approved bunded facilities.</p> <p>Identified staff to undergo suitable spill clean-up training.</p>
Heritage	<ul style="list-style-type: none"> Archaeological finds Heritage resources 	<p>No damage to heritage structures, unless proof of consultation with a heritage specialist and approval from the H:WC is in place.</p> <p>Records of chance finds must be kept.</p> <p>Where chance finds are unearthed, proof of work being stopped immediately and proof of consultation with a heritage specialist and the H:WC must be kept on site.</p>
Noise	<ul style="list-style-type: none"> Limits to be adhered to Monitoring information 	<p>Noise levels shall be monitored to ensure they comply with regulatory requirements. Noise generating activities shall not exceed the criteria prescribed in the Western Cape Noise Control Regulations.</p> <p>No complaints relating to noise from the stakeholders.</p>

Method Statement	Key information required	Target
Rehabilitation	<ul style="list-style-type: none"> Areas identified for rehabilitation 	<p>Reinstatement of areas affected through construction related activities.</p> <p>The final placement of layers of soil on disturbed areas must match the pre-construction profile or as prescribed on construction drawings.</p>
Solid and Liquid Waste Management	<ul style="list-style-type: none"> Implement measures to reduce, monitor and manage waste generation, whilst maximising recycling efficiency. The method statement shall reflect the principles of integrated waste management as contained within the NEM: WA. Hazardous and general waste management measures Recyclable waste management 	<p>Ensure all waste products are disposed of at a registered waste landfill site designed to cater for said waste product.</p> <p>Proof of waste generated, reused, recycled and disposed of, including disposal certificates, must be kept on site.</p> <p>Contain all waste within approved designated areas and stored in marked containers.</p> <p>Containers of hazardous waste and waste oils shall be stored in a bunded, covered area.</p> <p>No evidence of contamination by waste.</p> <p>Bins provided at regular intervals.</p> <p>No evidence of litter.</p>
Earthworks	<ul style="list-style-type: none"> Manage the removal and stockpiling of subsoil during the contract for use during rehabilitation. 	<p>Soil horizons (stockpile separately). Stockpiles shall not be higher than 2 m.</p> <p>Stockpiles shall be kept free of alien invasive species.</p> <p>No stockpiles shall be located outside of areas indicated in the construction diagrams.</p>
Traffic	<ul style="list-style-type: none"> Minimise the impacts and extent of construction related traffic on the surrounding road network and environment, whilst maximising road user safety. 	<p>No accidents or incidents.</p> <p>No complaints from the public.</p> <p>Proof of notification of landowner for closure of access roads.</p> <p>Alternative access roads always provided at partial road closures and other traffic disruptions.</p> <p>Compliance with regulatory requirements.</p>

Method Statement	Key information required	Target
Training	<ul style="list-style-type: none"> - Foster construction related skills transfer, environmental awareness, health and safety awareness, and materials and equipment skills. 	<p>Proof of training provided, including training materials that meet the requirements of the Employers Agent.</p> <p>Proof of attendance of staff at training.</p> <p>Records of training evaluation results. Results must reflect that training has been effective.</p>
Wash Areas	<ul style="list-style-type: none"> - To ensure plant and equipment used on site are kept clean whilst containing and preventing the release of potential contaminants into the receiving environment. 	<p>No contamination of the receiving environment through the washing and cleaning of equipment and plant.</p> <p>Compliance with regulatory requirements.</p>
Hazardous Materials Management	<ul style="list-style-type: none"> - Storage of Hazmat - Transportation of Hazmat - Use of Hazmat - MSDS 	<p>No contamination of the environment through use of hazardous materials.</p>
Flora and Fauna	<ul style="list-style-type: none"> - Procedure when encountering protected flora - Procedure for removal of all flora during clearing activities - Fauna protection measures 	<p>No damage to protected species.</p> <p>Safe translocation of encountered flora / fauna</p>
Site Closure	<ul style="list-style-type: none"> - Temporary (during holidays) and permanent closure procedures - Removal of site infrastructure - Removal of plant and equipment 	<p>Temporary site closure without incidents. Permanent site closure where all infrastructure, plant and equipment is removed without incident.</p>

Annexure 10 - Sensitivity Mapping

➡ Note to Compiler: Please insert Sensitivity Mapping associated with development footprint

Annexure 11 – Environmental Monitoring of Water

In terms of Government Notice R 665 (Government Gazette 36820 of 2013, as amended), the wastewater limit value (General) indicated below refers to “the mass expressed in terms of the concentration and/or level of a substance, which may not be exceeded at any time. Wastewater limit values shall apply at the last point where the discharge of wastewater enters into a water resource, dilution being disregarded when determining compliance with the wastewater limit values. Where discharge of wastewater does not directly enter a water resource, the wastewater limit values shall apply at the last point where the wastewater leaves the premises of collection and treatment”.

Table 9: Wastewater limit values applicable to discharge of wastewater into a water resource

Parameters and Variable	DWS “General Limits”
COD (mg/l)	75
Dissolved Arsenic (mg/l)	0.02
Nitrate and nitrite (mg/l)	15
Ammonia as N	6
Orthophosphates (mg/l)	10
Suspended Solids (TSS) (mg/l)	25
Soaps, oil and grease (mg/l)	2.5
Free & Saline ammonia (mg/l)	6
Faecal Coliform bacteria (CFU per 100ml)	1000
Boron (mg/l)	1
Total Cadmium (mg/l)	0,005 or at detection limit of laboratory
Dissolved Copper (mg/l)	0,01 or at detection limit of laboratory
Hexavalent chromium (mg/l)	0,05
Dissolved Lead (mg/l)	0,01 or at detection limit of laboratory
Dissolved Manganese (mg/l)	0,1
Total Residual Cl ₂ (mg/l)	0.25
Total Selenium (mg/l)	0,02
Dissolved Zinc (mg/l)	0,1
Fluoride (mg/l)	1
Dissolved Iron (mg/l)	0.3

Mercury (mg/l)	0.005
Colour, odour and taste	No change
Conductivity (mS/m)	50 to 150
pH	5,5 – 9,5
Turbidity (NTU)	10
Dissolved oxygen (%) (saturation)	Min 75%
Temperature	25° C max
Total hardness as CaCO ₃	650

Annexure 12 – Environmental Monitoring of Dust

PM10 monitoring shall be in accordance with GNR 1210, National Ambient Air Quality Standards, of 24 December 2009, as amended.

Table 10: PM10 Monitoring Levels

Substance	Notation	Averaging Period	Concentration ($\mu\text{m}/\text{m}^3$)	Frequency of Exceedance per annum	Compliance Date
Particulate Matter	PM10	24 hours	75	4	1 Jan 2015
		1 year	40	0	1 Jan 2015

Indicative dust fallout (i.e. suspended dust concentrations that will result in fallout) shall be monitored in terms of the GNR 827, National Dust Control Regulations of 1 November 2013, as amended.

Actual dust fallout shall be verified through sampling at sites where such dust is generated and shall not exceed the below limits.

Table 11: Indicative Dust Fallout Levels

Restriction Areas	Dustfall rate (D) ($\text{mg}/\text{m}^2/\text{day}$, 30-days average)	Permitted frequency of exceeding dust fall rate
Residential area	$D < 600$	Two within a year, not sequential months.
Non-residential area	$600 < D < 1200$	Two within a year, not sequential months.

Annexure 13 – Environmental Monitoring of Noise

The Noise Control Regulations P.N. 200/2013 Dated 20 June 2013 made under Section 25 of the Environmental Conservation Act (Act 73 of 1989) prescribes:

Table 12: Definitions of Disturbing Noise and a Noise Nuisance

DEFINITIONS OF DISTURBING NOISE AND A NOISE NUISANCE	
Disturbing Noise	Noise Nuisance
"disturbing noise" means a noise level that exceeds the ambient sound level measured continuously at the same measuring point by 7 dBA or more;	Means any sound, which disturbs or impairs or may disturb or impair the convenience or peace of any person.
Ambient sound level means the reading on an integrating impulse sound level meter taken in the absence of any alleged disturbing noise.	PN200/2013: "ambient noise"- means the all-encompassing sound in a given situation, measured as a reading on an integrated impulse sound level meter for a total period of at least 10 minutes.
Noise level means the reading taken at a measuring point in the presence of any alleged disturbing noise at the end of a total period of at least ten minutes after such meter was put into operation, and, if the alleged disturbing noise has a discernable pitch, for example, a whistle, buzz, drone or music, to which 5 dBA is added.	PN200/2013: "residual noise"- means the all-encompassing sound in a given situation at a given time, measured as a reading on an integrated impulse sound level meter for a total period of at least 10 minutes, excluding noise alleged to be causing a noise nuisance or disturbing noise.

Annexure 14 - General Conditions of Contract

Listed below are issues pertaining to the environment that form part of the Contract Document. The clause references relate to the SAICE General Conditions of Contract 2015 (GCC). They are listed here to emphasise that they form part of the environmental considerations and requirements for this project.

Any additional conditions are presented in the Additional Conditions of Tender in Tender Data section of the Contract.

Engineer's authority to delegate

In terms of Subclause 3.3.4 the Employers Agent has the authority to appoint a representative to act as the Environmental Planner for the Contract. The Planner shall be responsible for monitoring compliance with the EMP, and may be the Employers Agent's Representative or any other person responsible to the Employers Agent.

Compliance with the Employers Agent's Instructions

Subclause 4(2) requires that the Contractor comply with the Employers Agent's instructions on any matter relating to the Works. Moreover, Subclause 4.2.2 ensures that the Contractor only takes instructions from the Employers Agent, the Employers Agent's Representative or other person authorised by the Employers Agent in terms of Subclause 3.3.4.

Access to the Works

Subclause 7.3 makes provision for the Employers Agent to authorise access to the Works by the Environmental Planner.

Copy of Documents on Site

Clause 13 requires the Contractor to keep a copy of all documents constituting the Contract (including the performance specifications) available on Site.

Method Statements and Programme

Subclause's 12(2) and 12(3) make provision for the Employers Agent to request documents concerning the Contractors arrangements and methods of carrying out the Works. In the case of the performance specifications, these would be submitted as Method Statements.

Subclause 5.6 also makes provision for the Employers Agent to request the programme for carrying out the Works.

Compliance with other legislation

Subclause 4.3.1 requires that the Contractor comply with all applicable laws in the performance of the Contract.

Health and Safety

Subclauses 4.3.2 of GCC remind the Contractor of his obligations in terms of the Occupational Health and Safety Act, No. 85 of 1993.

Subclause 5.7 of SANS 1200A reinforces these requirements through the observation of proper and adequate safety arrangements.

Monitoring

Subclause 2(1) – 2(3) makes provision for the Employers Agent to undertake such duties and functions as are required in terms of the Contract, including the monitoring of any environmental variables.

Public Nuisance, and Pollution

Subclauses 8.1.2 of GCC requires that all operations necessary for the execution of the Works be carried out so as not to cause unnecessary noise or pollution, or to interfere unnecessarily or improperly with public services, or the access to, use and occupation of public or private roads and footpaths or properties.

Subclause 5.6 of SANS 1200A further requires the Contractor to minimise dust nuisance and pollution of streams and inconvenience to or interference with the public.

Dust

Subclause 17(1) requires that all operations necessary for the execution of the Works be carried out so as not to cause unnecessary air pollution.

Subclause 5.6 of SANS 1200A requires that the Contractor take all reasonable measures to minimise any dust nuisance.

Noise

Subclause 8.1.2 of GCC requires that all operations necessary for the execution of the Works be carried out so as not to cause unnecessary noise pollution.

Subclause 4.1 of SANS 1200A requires that when working in built-up areas, the Contractor shall provide and use suitable and effective silencing devices for pneumatic tools and other plant that would otherwise cause a noise level exceeding 85dB.

Protection of Archaeological/ Palaeontological remains

Clause 15(1) requires the Contractor to take reasonable precautions to prevent any person from removing or damaging any archaeological or palaeontological artefact, or other articles of value and requires that he inform the Employers Agent and follow any instructions issued in this regard.

Hours of Operation

Subclause 38.1.1 – 38.1.4 restricts the Contractors hours of operation to between sunrise and sunset from Monday to Saturday unless otherwise approved by the Employers Agent.

Subclause 40(2) further requires that in the event that permission is granted for night working then such work will be carried out without unreasonable noise and disturbance.

Housing, Food and Transport

Subclause 20(1) requires the Contractor to provide adequate payment, housing, feeding and transport for his employees on Site.

Subclause 4.2 of SANS 1200A further requires that facilities provided comply with local authority regulations and are maintained in a clean and sanitary condition.

Protection of Existing Environment

Subclause 17(2) requires that the Contractor uses every reasonable means to prevent damage to roads and bridges communicating with or in the vicinity of the Site.

Removal from Site

Clause 4.11.2 makes provision for the Employers Agent to instruct the removal of any persons who in his opinion is guilty of misconduct; or is incompetent, negligent, or constitutes an undesirable presence on site.

Subclause 23(2) requires that all Plant be in good working order. Accordingly, the Employers Agent may order that any Plant not complying with the performance specifications be removed from Site.

Competence

Subclause 4.11 requires that all persons employed on site are careful, competent, and efficient. These attributes embrace knowledge of the environmental matters and issues dealt with in the EMPr.

Reinstatement

Clauses 33 makes provision for the Contractor to make good any damage, due to negligence on the part of himself or his employees, to the satisfaction of the Employers Agent, and bear any costs associated with such reinstatement.

Suspension of Works

Subclause 5.11 enables the Employers Agent to suspend the progress of the Works or any part thereof as a result of some default or breach of the Contract on the part of the Contractor.

Site Clean Up

Subclause 5.15.1 requires that as part of the completion of the Works or any portion thereof, the Contractor shall clear away and remove from the Site all Construction Plant, surplus materials, rubbish and Temporary Works of every kind and leave the whole Site and Permanent Works clean and tidy. If the Contractor fails to comply, the Employer may have the site cleared and recover the cost from the Contractor.

Annexure 15 - Bill of Quantities

Tenderers shall price this strictly in accordance with the Specifications and SANS 1200, where a conflict arises between these two documents the Specifications shall take precedence. Where a conflict arises between this and the Specifications, the Specifications shall take precedence. Tenderers shall price to provide the complete Works

Where reference is not made to a standardized or a particular SANS 1200 clause, the descriptions included in the bill of quantities shall be read in conjunction with the relevant drawings and specifications and the item shall be priced accordingly. The tendered rate shall also, for each item, include the supply of materials, installation and construction, testing and commissioning, all as required to render the works complete and fully functional in every aspect upon final handover.

All works shall be performed to the specified standards or consistent with recognized, good industry norms and practices, to provide the works in a complete, fully functional, operable and compliant manner.

PSEM1 Environmental Monitoring

A Provisional Sum shall provide for the cost of monitoring and sampling air quality, noise and water quality by an independent professional service provider(s) to be selected and appointed by the Contractor. The Contractor shall submit detailed Terms of Reference for these professional service providers within six weeks of appointment, for approval by the Employers Agent. The Terms of Reference shall specify at least the following:

- *qualifications;*
- *professional registration;*
- *experience and track record;*
- *demonstrated proficiency in use of relevant monitoring and sampling equipment;*
- *equipment requirements and tolerances for detection limits;*
- *reporting and analysis; and*
- *confirmation of laboratory accreditation, capacity, delivery and performance within reasonable timeframes.*

The rate tendered shall include full compensation for all the Contractor's costs in complying with the requirements of PSEM8, PESEM16 and PSEM24 including the measurement, monitoring, management and provision of sampling equipment and quality control.

PSEM2 Environmental Officer

The tendered rate shall include full compensation for the supply of an Environmental Officer for the duration of the contract. The Environmental Officer shall be appointed within two weeks of acceptance of Appointment Letter and shall remain employed until after the rehabilitation has been completed. The rate shall cover the services of a full time suitably experienced and qualified person.

PSEM3 Community Liaison Officer

The tendered rate shall include full compensation for the supply of a Community Liaison Officer for the duration of the contract. The Community Liaison Officer shall be appointed within two weeks of acceptance of Appointment Letter and shall remain employed until after the rehabilitation has been completed. The rate shall cover the services of a full time suitably experienced and qualified person.

PSEM4 Planning

Not applicable to Construction related activities

PSEM5 Design

Not applicable to Construction related activities

PSEM6 Pre-construction

The rate tendered shall include full compensation for all the Contractor's costs in complying with all requirements including the measurement, monitoring, management and provision of sampling equipment and quality control.

PSEM7 Aesthetics Management

The Contractor to price for the aesthetics management activities as a time related P&G item.

PSEM8 Dust Management

The Contractor to price for the dust management activities as a time related P&G item.

PSEM9 Earthworks Management

Please refer to the Technical Specification and Scope of Work

PSEM10 Erosion Management

The Contractor to price for the erosion management activities as a time related P&G item.

PSEM11 Fauna and Flora Management

The Contractor to price for the fauna and flora management activities as a time related P&G item

PSEM12 Fire Management

The Contractor to price for Fire Management activities as a time related P&G item.

PSEM13 Hazardous Substance Management

The Contractor to price for the hazardous substance management activities as a time related P&G item.

PSEM14 Heritage Management

The Contractor to price for the heritage management activities as a time related P&G item.

PSEM15 Landowner Liaison

The Contractor to price for the land use management activities as a time related P&G item.

PSEM16 Noise Management

The Contractor to price for his Noise Management activities as a time related P&G item.

PSEM17 Rehabilitation Plan

The Contractor to price for rehabilitation activities on a per m² basis.

PSEM18 Social Aspect

The Contractor to price for the social management activities as a time related P&G item.

PSEM19 Soil Management

The Contractor to price for the soil management activities as a time related P&G item.

PSEM20 Sustainability Management

The Contractor to price for the sustainability management activities as a time related P&G item.

PSEM21 Traffic Management

The Contractor to price for the traffic management activities as a time related P&G item.

PSEM22 Training Programmes

The Contractor to price for the training programmes as a time related P&G item.

PSEM23 Waste Management

The Contractor to price for the waste management activities as a time related P&G item.

PSEM24 Water Management

The Contractor to price for water management activities as a time related P&G item.

PSEM25 Decommissioning

The Contractor to price for decommissioning activities as a time related P&G item.

Annexure 16 – EMPr Alignment with NEMA Sec 24N

In order to ensure legal compliance, this EMPr is to comply with the requirements of the NEMA Section 24 N, together with Appendix 4 of GNR 982 the EIA Regulations, 2014, as amended.

GNR 982 Appendix 4: Content of Environmental Management Programme, as amended.	Cross linking with the EMPr
1. (1) An EMPr must comply with section 24N of the Act and include-	
(a) details of	
(i) the EAP who prepared the EMPr; and	Annexure 1 - Details of Author(s) and related expertise
(ii) the expertise of that EAP to prepare an EMPr, including a curriculum vitae;	Annexure 1 - Details of Author(s) and related expertise
(b) a detailed description of the aspects of the activity that are covered by the EMPr as identified by the project description;	Section 7. Performance Specifications: Environmental Management Annexure 17: Typical Aspects and Impacts Table
(c) a map at an appropriate scale which superimposes the proposed activity, its associated structures, and infrastructure on the environmental sensitivities of the preferred site, indicating any areas that any areas that should be avoided, including buffers;	Annexure 8 – Site Plan
(d) a description of the impact management objectives, including management statements, identifying the impacts and risks that need to be avoided, managed and mitigated as identified through the environmental impact assessment process for all phases of the development including-	Section 2.2 Outcomes of the EMPr
(i) planning and design;	Section 7. Performance Specifications: Environmental Management Annexure 7.1 Planning Annexure 7.2 Design
(ii) pre-construction activities;	Section 7. Performance Specifications: Environmental Management

	Annexure 7.3 Pre-construction
(iii) construction activities;	Section 7. Performance Specifications: Environmental Management Annexure 7.4 Construction
(iv) rehabilitation of the environment after construction and where applicable post closure; and	Section 7. Performance Specifications: Environmental Management
(v) where relevant, operation activities;	n/a
(e) a description and identification of impact management outcomes required for the aspects contemplated in paragraph (d);	Section 7. Performance Specifications: Environmental Management
(f) a description of proposed impact management actions, identifying the manner in which the impact management objectives and outcomes contemplated in paragraphs (d) and	Section 7. Performance Specifications: Environmental Management Annexure 7 - Environmental Best Practicable Options
(e) will be achieved, and must, where applicable, include actions to:	
avoid, modify, remedy, control or stop any action, activity or process which causes pollution or environmental degradation;	Section 7. Performance Specifications: Environmental Management Annexure 7 - Environmental Best Practicable Options
comply with any prescribed environmental management standards or practices;	Section 7. Performance Specifications: Environmental Management Annexure 7 - Environmental Best Practicable Options
comply with any applicable provisions of the Act regarding closure, where applicable; and	Section 7. Performance Specifications: Environmental Management Annexure 7 - Environmental Best Practicable Options
comply with any provisions of the Act regarding financial provisions for rehabilitation, where applicable;	Section 7. Performance Specifications: Environmental Management Annexure 7 - Environmental Best Practicable Options
(g) the method of monitoring the implementation of the impact management actions contemplated in paragraph (f);	Section 5 Monitoring
(h) the frequency of monitoring the	Section 5.5 Time Programme

implementation of the impact management actions contemplated in paragraph (f);	
(i) an indication of the persons who will be responsible for the implementation of the impact management actions;	Section 7 Performance Specifications: Environmental Management
(j) the time periods within which the impact management actions contemplated in paragraph (f) must be implemented;	Section 7 Performance Specifications: Environmental Management
(k) the mechanism for monitoring compliance with the impact management actions contemplated in paragraph (f);	Section 5 Monitoring
(l) a program for reporting on compliance, taking into account the requirements as prescribed by the Regulations;	Section 6 Assurance
(m) an environmental awareness plan describing the manner in which-	Section 4.11 Training
the applicant intends to inform his or her employees of any environmental risk which may result from their work; and	Annexure 17: Typical Aspects and Impacts Table
risks must be dealt with in order to avoid pollution or the degradation of the environment; and	Annexure 7 - Environmental Best Practicable Options
(n) any specific information that may be required by the Competent Authority.	➡ Note to compiler: Please include additional information as may be required.

Annexure 17 - Typical Aspects and Impacts Table

The below risk assessment identifies typical risks and uses qualitative measures to estimate the consequences or impact of the event, together with the estimate of its likelihood.

Each potential risk is to be investigated to determine the consequence and likelihood of the hazard occurring. A simple assessment of L (Low), M (Medium) and H (High) is used for the assessment consequence. The occurrence potential of each hazard is also assessed using the simple assessment of L (Low), M (Medium) and H (High).

Table 13: Predicted Level of Risk

Likelihood	Consequence				
	Insignificant	Minor	Moderate	Major	Catastrophic
A (almost likely)	L	M	H	H	H
B (likely)	L	M	H	H	H
C (moderate)	L	M	H	H	H
D (unlikely)	L	L	L	M	H
E (rare)	L	L	L	M	M

Planning

Table 14: Typical Aspects and Impacts associated with the Planning Phase

System Element	Aspect	Impacts	Risk
Conceptual Design	Development scope	Significant possible changes required due to limited information.	High

Design

Table 15: Typical Aspects and Impacts associated with the Design Phase

System Element	Aspect	Impacts	Risk
Design	Development scope	All impacts and risks not adequately identified and assessed due to evolving design	High
	Environmental considerations	Not holistically included within the Engineering Design	High

Pre-Construction

Table 16: Typical Aspects and Impacts associated with the Pre-construction Phase

System Element	Aspect	Impacts	Risk
Tender	Environmental Specifications	Not aligned with EMP and EIA outcomes.	High
	Bill of Quantities	Environmental considerations not adequately costed for.	High
	Tender valuation and moderation	Inaccurate Contractor submission scoring	High
Approvals	Permits / licenses / authorisations	Not all approvals are timeously obtained	High

Construction

Table 17: Typical Aspects and Impacts associated with the Construction Phase

System Element	Aspect	Impacts	Risk
Aesthetics	Nuisance factor through construction related activities	Dust generation Noise generation Visual impact	High
Dust	Unprotected surfaces	Dust generation	Low
Earthworks	Contaminated spoil	Ecological off-site impacts of contamination	Low
Erosion	Construction related works that require excavations	Unstable embankments along work phase and groundwater seepage	High
Fauna and flora	Alien invasive plant control and removal	Spread of alien invasive plants.	Low
	Loss of biodiversity	Loss of indigenous vegetation	Low
Fire	Restricting activities with a high fire risk	Loss of infrastructure, property or life.	Low
Hazardous substances	Containment of hazardous waste and spills	Soil, groundwater and aquatic contamination	High
	Accidental hydro carbon spillage		
	Uncontrolled use of hydrocarbons	Uncontrolled fires	High
Heritage	Excavation of soils / dredging	Impact on artefact materials	Low
		Damage to chance finds	
Land use	Damage to utility services	Disruption to service	Medium
	Topsoil destabilisation and loss	Incorrect storage and rehabilitation	Low
	Open trenches	Safety of personnel and affected property owners	Medium

System Element	Aspect	Impacts	Risk
	Civil works	Works resulting in excess dust, noise and erosion.	Medium
	Contractors Camp	Unauthorised placement of / activities undertaken at camp	
	Flora and fauna	Disturbance	
Noise	Impact on aesthetics	Increase in noise levels than 7dB above ambient noise levels	Low
	Prohibition of nuisance noise	No person shall generate noise which may cause a noise nuisance.	
Rehabilitation	Not completing rehabilitation works after soil disturbance activities	Loss of species diversity	Low
		Dust generation Erosion	
Soil	Incorrect removal and storage of soil profiles	Poor vegetation regrowth	Low
	Soil loss	Wind and water erosion	
Traffic	Temporary road works	Delays, detours and restricted access	Low
	Dust entrainment	Impacts relating to health and safety	
	Noise	Impacts relating to health and safety	
	Poor or incorrectly maintained plant	Hydro carbon spill	Medium
	Vehicle emissions	Release of noxious gases	Medium
Training	Lack of and / or incorrect training	Potential injuries and / or loss of life and / or property	Low
Waste	Incorrect use, handling, storage and disposal of hydro carbons	Release of hydro carbons in the receiving environment	Medium
	Waste management	Incorrect disposal of waste	Low
		Inefficient resource utilisation	
Water	Collection of waste across construction footprint	Pollution of the environment through <i>inter alia</i> incorrect disposal	Low
	Stabilisation of soil stockpiles	Increased erosion and sedimentation of water resources	
	Incorrect re-internment of backfill	Water erosion	Medium
	Ecological functioning of aquatic environment	Potential of hydro carbon leakages and increased sedimentation levels	
	Development within the sea, 100m of the high-water mark of the sea or coastal public property	Seabed alteration / increase in turbidity	Low
		Loss or damage to littoral zone or dune system.	Medium

Decommissioning

Table 18: Typical Aspects and Impacts associated with the Decommissioning Phase

System Element	Aspect	Impacts	Risk
Aesthetics	Nuisance factor through decommissioning related activities	Dust generation Noise generation Visual impact	High
Dust	Unprotected surfaces	Dust generation	High
Earthworks	Contaminated spoil	Ecological off-site impacts of contamination	Low
Erosion	Decommissioning related works that require excavations	Unstable embankments along work phase and groundwater seepage	High
Fauna and flora	Alien invasive plant control and removal	Spread of alien invasive plants.	Low
Fire	Restricting activities with a high fire risk	Loss of infrastructure, property or life.	Low
Hazardous substances	Containment of hazardous waste and spills	Soil, groundwater and aquatic contamination	High
	Accidental hydro carbon spillage		
	Uncontrolled use of hydrocarbons	Uncontrolled fires	High
Noise	Impact on aesthetics	Increase in noise levels than 7dB above ambient noise levels	Low
	Prohibition of nuisance noise	No person shall generate noise which may cause a noise nuisance.	
Rehabilitation	Not completing rehabilitation works after soil disturbance activities	Loss of species diversity	Low
		Dust generation Erosion	
Soil	Soil loss	Wind and water erosion	Low
Traffic	Temporary road works	Delays, detours and restricted access	Low
	Dust entrainment	Impacts relating to health and safety	
	Noise	Impacts relating to health and safety	
	Poor or incorrectly maintained plant	Hydro carbon spill	Medium
	Vehicle emissions	Release of noxious gases	Medium
Training	Lack of and / or incorrect training	Potential injuries and / or loss of life and / or property	Low
Waste	Incorrect use, handling, storage and	Release of hydro carbons in the receiving environment	High

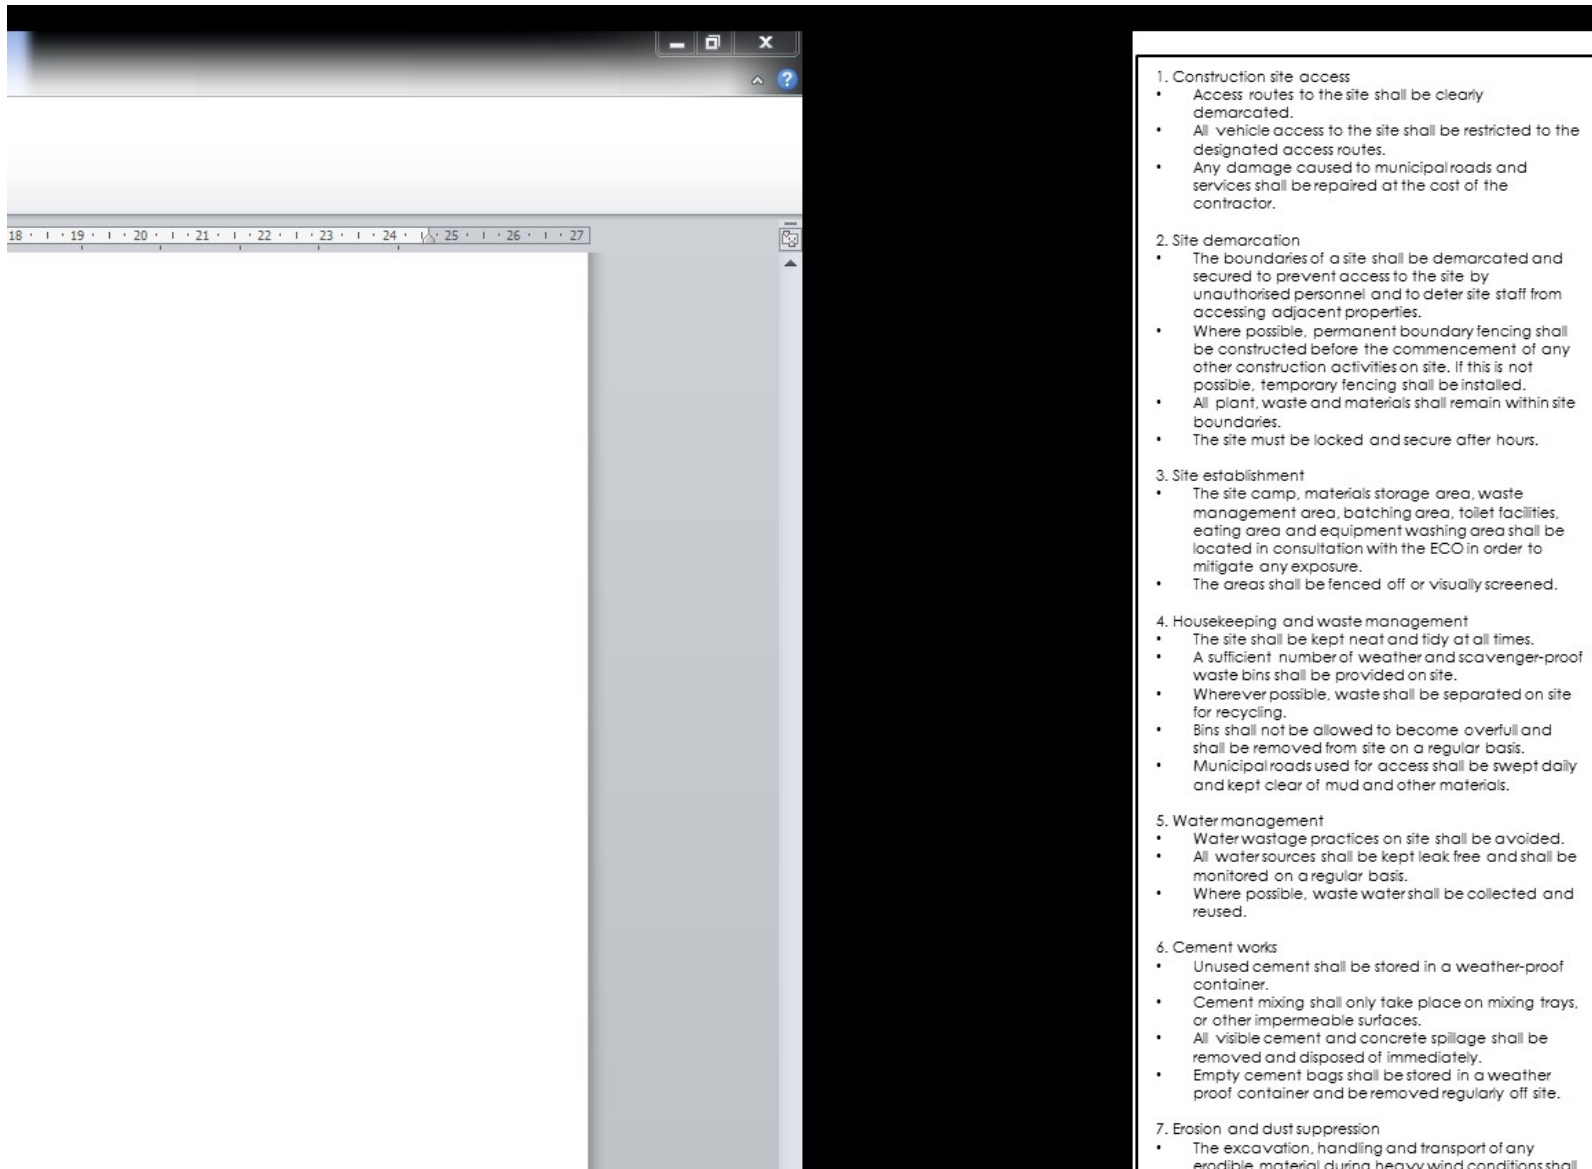

System Element	Aspect	Impacts	Risk
	disposal of hydrocarbons		
	Waste management	Incorrect disposal of waste	Low
		Inefficient resource utilisation	
	Collection of waste across construction footprint	Pollution of the environment through <i>inter alia</i> incorrect disposal	
Water	Stabilisation of soil stockpiles	Increased erosion and sedimentation of water resources	Low
	Incorrect re-internment of backfill	Water erosion	
	Ecological functioning of aquatic environment	Potential of hydro carbon leakages and increased sedimentation levels	Medium

Annexure 18 – Site Environmental Management Plan

Given below is an example of a generic Site Environmental Management Plan.

Site EMPs should only be used where the site and associated project is small and not located in or immediately adjacent to a sensitive environment (such as dunes, wetlands, watercourses, biodiversity areas (including nature reserves) and the coast).

The SEMP does not meet the NEMA requirements for an EMPr.

The image is a screenshot of a presentation slide. On the left side, there is a vertical timeline with a header bar containing navigation icons (back, forward, search, etc.). The timeline itself is a horizontal bar with numbers 18 through 27, each followed by a small icon. The right side of the slide contains a list of seven numbered items, each with a title and a bulleted list of requirements.

- 1. Construction site access**
 - Access routes to the site shall be clearly demarcated.
 - All vehicle access to the site shall be restricted to the designated access routes.
 - Any damage caused to municipal roads and services shall be repaired at the cost of the contractor.
- 2. Site demarcation**
 - The boundaries of a site shall be demarcated and secured to prevent access to the site by unauthorised personnel and to deter site staff from accessing adjacent properties.
 - Where possible, permanent boundary fencing shall be constructed before the commencement of any other construction activities on site. If this is not possible, temporary fencing shall be installed.
 - All plant, waste and materials shall remain within site boundaries.
 - The site must be locked and secure after hours.
- 3. Site establishment**
 - The site camp, materials storage area, waste management area, batching area, toilet facilities, eating area and equipment washing area shall be located in consultation with the ECO in order to mitigate any exposure.
 - The areas shall be fenced off or visually screened.
- 4. Housekeeping and waste management**
 - The site shall be kept neat and tidy at all times.
 - A sufficient number of weather and scavenger-proof waste bins shall be provided on site.
 - Wherever possible, waste shall be separated on site for recycling.
 - Bins shall not be allowed to become overfull and shall be removed from site on a regular basis.
 - Municipal roads used for access shall be swept daily and kept clear of mud and other materials.
- 5. Water management**
 - Water wastage practices on site shall be avoided.
 - All water sources shall be kept leak free and shall be monitored on a regular basis.
 - Where possible, waste water shall be collected and reused.
- 6. Cement works**
 - Unused cement shall be stored in a weather-proof container.
 - Cement mixing shall only take place on mixing trays, or other impermeable surfaces.
 - All visible cement and concrete spillage shall be removed and disposed of immediately.
 - Empty cement bags shall be stored in a weather proof container and be removed regularly off site.
- 7. Erosion and dust suppression**
 - The excavation, handling and transport of any erodible material during heavy wind conditions shall

EMERGENCY/ UNPLANNED CONTRACTOR APPOINTMENT PROCESS			 CITY OF CAPE TOWN ISIXEKO SASEKAPA STAD KAAPSTAD
WS/RET/DOC/022	4/10/2018	WATER AND SANITATION DIRECTORATE DISTRIBUTION SERVICES, RETICULATION	Version: 03
COMPILED BY: SPO- PDP			APPROVED BY: BRANCH MANAGER
All CONTROLLED documents are located in the SAP DMS			PRINT DATE: 2023/04/19
Printed documents are NOT CONTROLLED except if signed and dated			Page 1 of 9

1. PURPOSE

This document defines the Appointment Process for an Emergency Contractor on the Reticulation Repair and Maintenance repair and maintenance tenders in detail and the relationship between this process and other processes within the Reticulation Branch.

2. PROCESS DEFINITION

This process defines all required inputs and expected outputs during the Emergency contractor appointment process. It includes all activities performed by each group or persons assigned at different levels of the business and whose main responsibility is to ensure that the appointment process requests are attended to.

3. PROCESS OBJECTIVES AND METRICS

- 3.1. To standardize the procedure in all regions for the appointment of contractors to undertake emergency/ unplanned rehabilitation on the Sewer and Water infrastructure system.
- 3.2. To reduce the control weaknesses in the process and the fraud risks associated with it, in response to a fraud risk review conducted on this process.
- 3.3. To ensure compliance with the Customer Service Charter
- 3.4. To ensure adherence to service standards (%)
- 3.5. To ensure all payments are processed within 28 Days of the created requisition

4. PROCESS OWNERS AND RESPONSIBLE PARTIES

Process Owners	Responsibilities
Regional Operational Manager	Release Requisition
Senior Professional Officer/Principal Technician/ Senior Technician/Technician	Authorize and sign Contractors Claim
Administrative Officer 1/2/3/ Senior Clerk	Create Purchase Requisition File final project file and upload onto SharePoint
Standby: Team Leaders (Foremen, Artisans, Senior Operational Supervisor Dirver (SOSD), Operational Supervisor Driver (OSD), etc.)	Create Purchase Requisition after hours, weekends, public holidays, etc.
Superintendent/Senior Superintendent	Contact contractor, Approve and sign claim and invoice from contractor; in some cases define scope of works; approve invoice of contractor in consultation with Performing Authority

EMERGENCY/ UNPLANNED CONTRACTOR APPOINTMENT PROCESS

CITY OF CAPE TOWN

All CONTROLLED documents are located in the SAP DMS			PRINT DATE: 2023/04/19
Printed documents are NOT CONTROLLED except if signed and dated			Page 2 of 9

Process Owners	Responsibilities
Foreman/Senior Foreman	Check internal plumbing team resources, define scope of works, issue work permit, complete work commencement form, complete activity and measurement sheets on a daily basis, verify and approve claim from contractor, compile all documentation in a works file, approve invoice of contractor.
Contractor	Confirm acceptance of works, Execute works, submit claim and invoice for payment.
SCM	Generate PO within three days of requisition creation
Accounts payable	Execute payment to contractor

5. TYPICAL PROCESS INPUTS

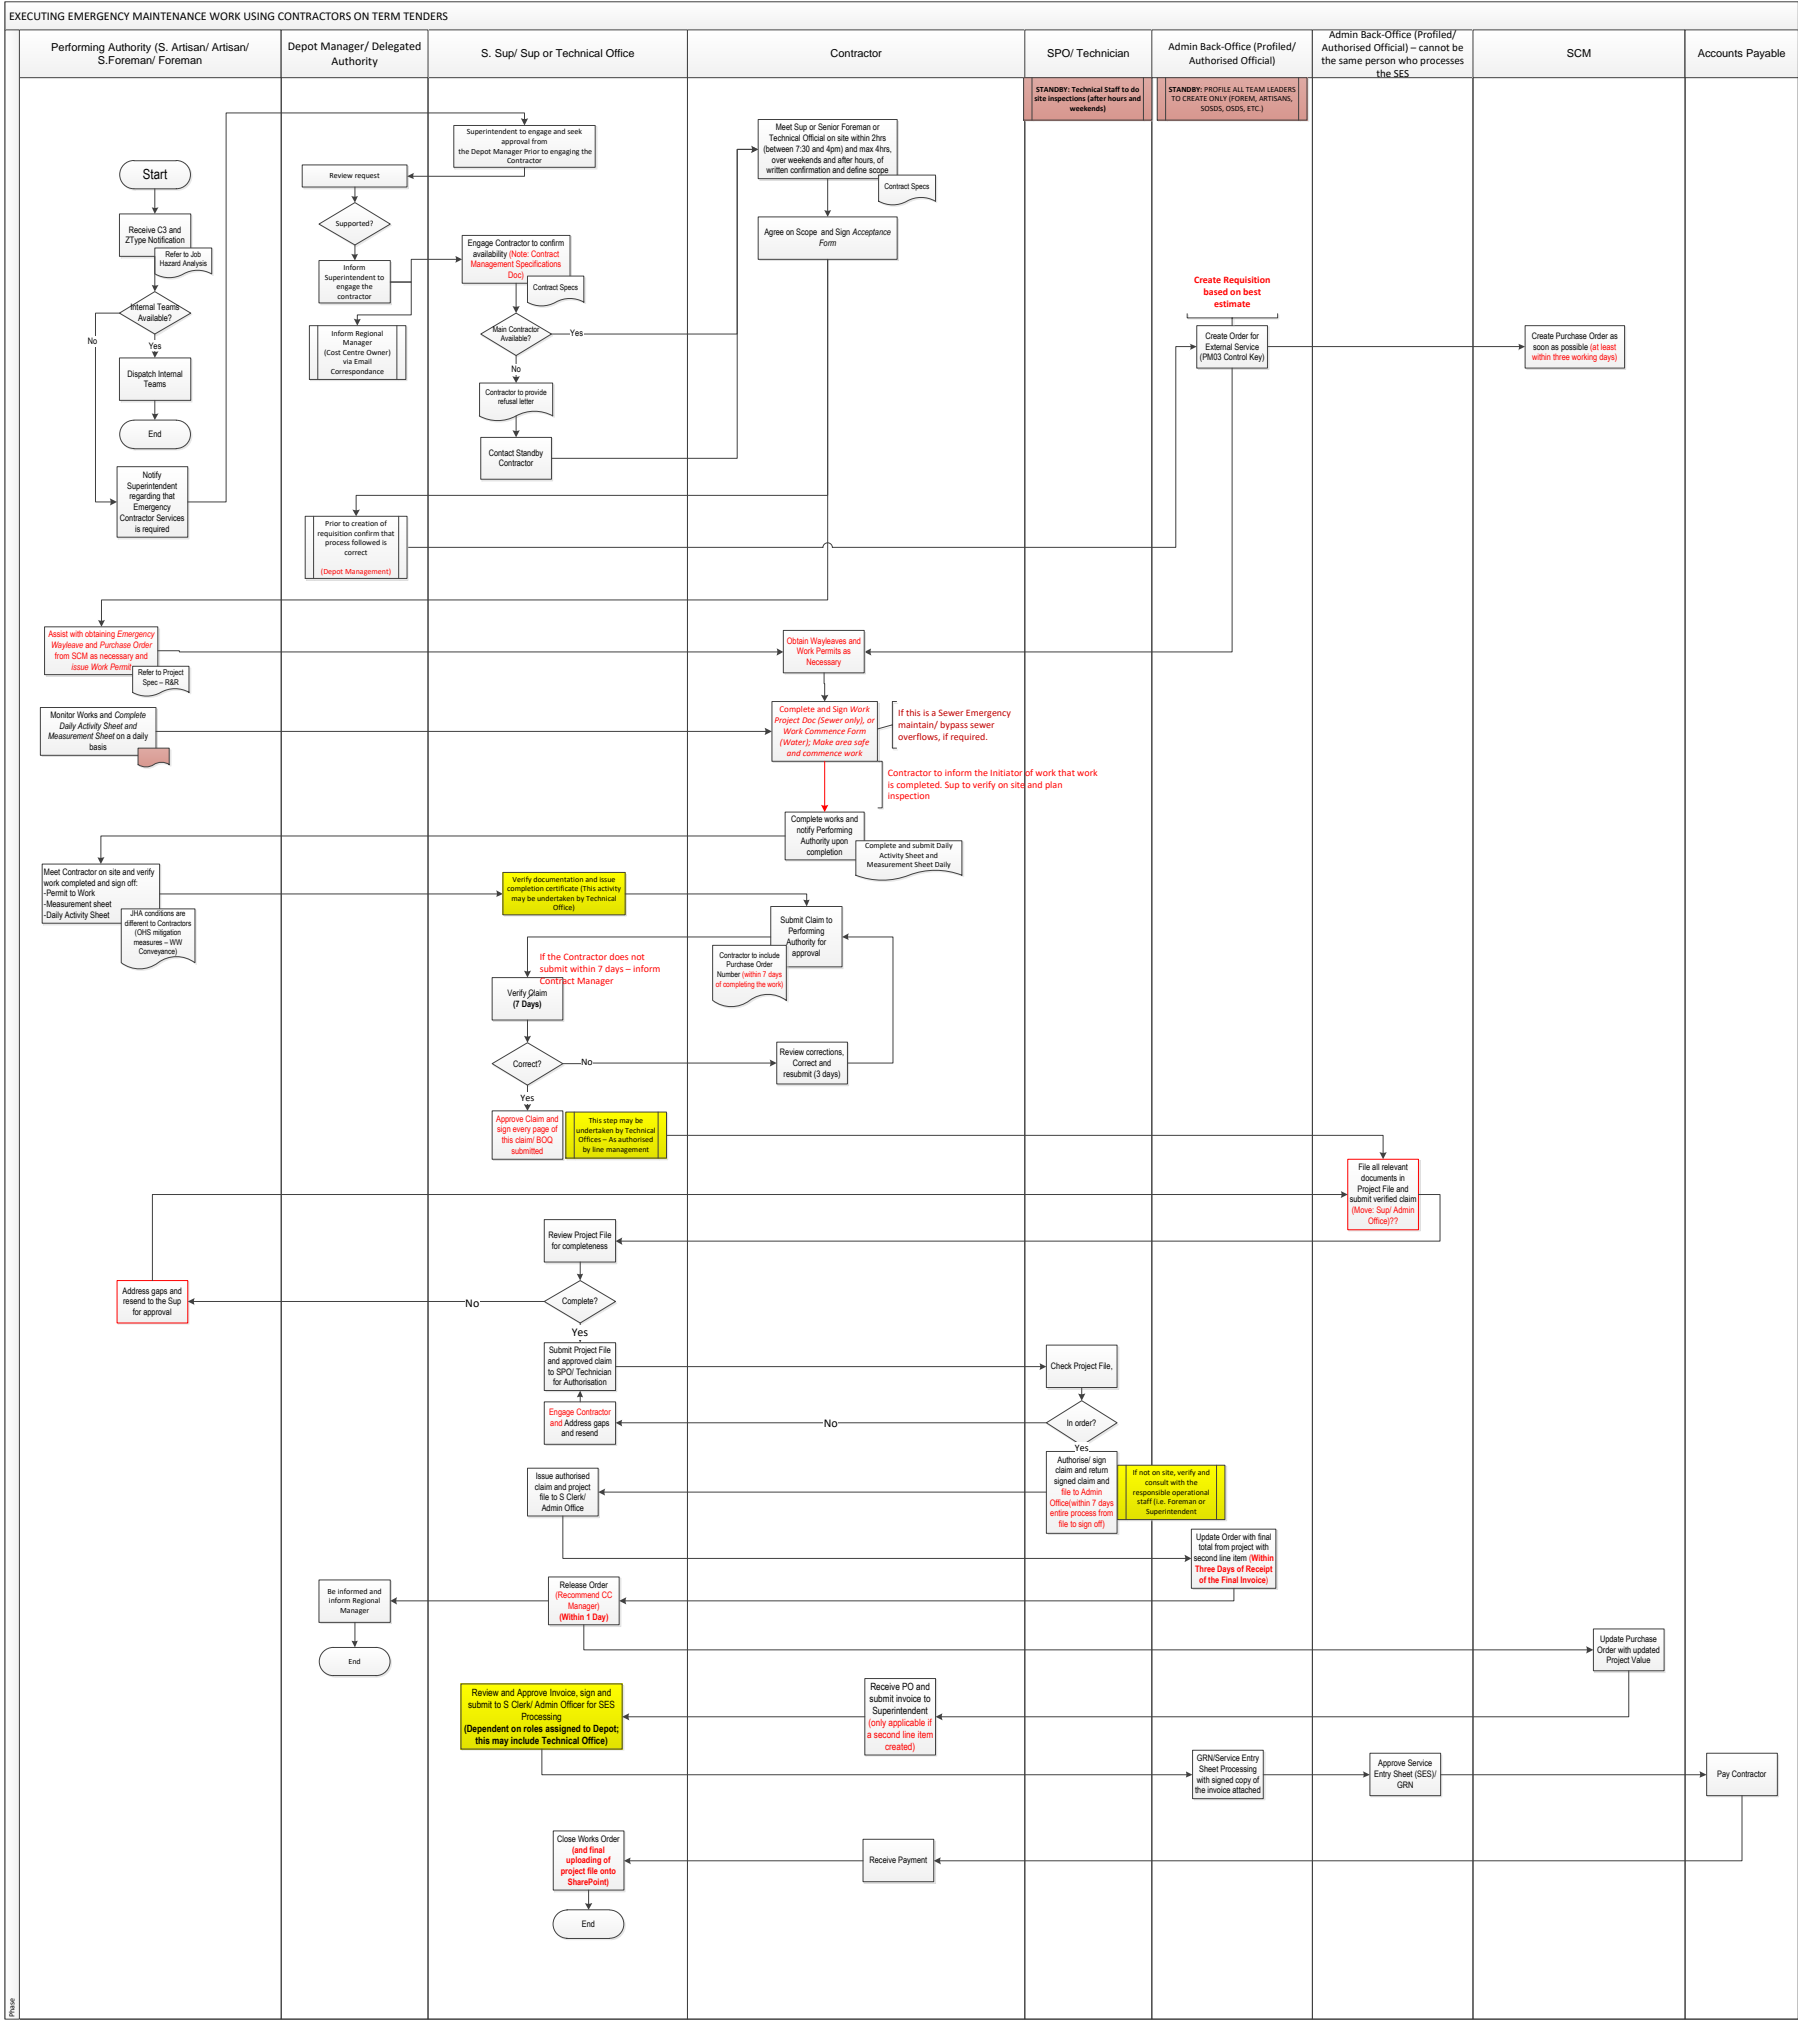

The typical required inputs for this process are:

Technical Information	Resources	Personnel	Special Training/Skills
C3 notification transacting or updating	SAP	Admin Clerk	SAP training
Investigation for scope of works	Report/ Email/ MS Office	Senior Foreman/Foreman	Root Cause Analysis
Record interim measurement of completed works	Report/ Email/ MS Office	Senior Foreman/Foreman/ Technical Office	Quantity Surveying/Excel
Complete Daily activity sheets and measurement sheets	MS Office	Senior Foreman/Foreman/ Technical Office	Word/ Excel
Create Order Purchase Requisition creation	SAP	Senior Clerk/ Administration Officer	SAP training
Good receipt Note	SAP	Senior Clerk/ Administration Officer	SAP training
Approval of works complete	Report/ Email/ MS Office	Senior Professional Officer/ technician	Quantity Surveying/Excel

Printed documents are NOT CONTROLLED except if signed and dated			Page 4 of 9

7. TYPICAL PROCESS OUTPUTS

The typical results (outputs) of the process are as follows:

Products	Documents/Technical Information	Records	Services
		Completed project file with measurement sheets, claims and invoices	Reinstatement of Failed pipeline occurrence.
		Follow-up email confirming discussion via phone call to contractor	Engage Contractor to perform repairs
		In the event of refusal, contractor to provide a refusal letter, then contact standby	Engage Contractor to perform repairs
	Work Commencement Form/ Acceptance Form	Work Commencement Form/ Acceptance Form	Water Infrastructure repairs
	Acceptance Form and Works Project Document	Acceptance Form and Works Project Document	Sewer Infrastructure repairs
		C3 Notification Order No. Requisition No. Purchase Order No.	Water and sewer infrastructure reinstatement after reported as failed
	Wayleaves Work Permits		Water and sewer infrastructure reinstatement after reported as failed
Items as listed in the tender	Completion Certificate	Signed Daily Measurement Sheet Signed Daily Activity Sheet	
		Job Hazard Analysis

8. RELATED RISKS AND OPPORTUNITIES

No.	Risk Description	Impact	*Likelihood	Rating	Control/ Opportunities
1	Quantities in the Contractors claim can be inflated	High	Medium	HM	Senior Foreman and Superintendents to receive relevant training Review by Technical Office
2	Works orders released by admin staff holding the process susceptible to fraudulent activities	High	Medium	HM	Appointment of contractors only to be done through Purchase Requisitions
3	Additional items included in the claim from the contractor	High	Medium	HM	Senior Foreman/Foreman to conduct daily inspections and complete the daily activity and measurement sheets.
4	Inability to appoint a contractor prior to creation of PO resulting in delays in attending to emergency (Impact: Liability Claims; Loss of water; Environmental impacts; public safety)	High	Medium	HM	SCM Policy Change Requisition required PO will be created within three days for emergencies by SCM Profile all team leads to create requisitions on standby
5	Creation of Requisition values of R2000 without timeous updating may result in the actual cost exceeding target limit of tender (unable to create footnotes)	High	High	HH	Create requisition with a realistic estimate of costs associated with repair work, alternatively, ensure the requisition of R2000 is updated within 24hrs of creation with quotation
6	Delays in receipt of final invoice impacting on the ability to finalise payment	High	High	HH	Enforce Tender Specifications: Final claim to be submitted within 7 days of completed work Admin Office to follow up with contractor on Day 7 for the invoice Invoices to be approved by the delegated authority and GRN completed within 28 days of receipt of the claim.
