MBD 9: CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid.

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

2. Overview

Sea View is a suburb situated next to Rossburgh at the junction of the M4, M7 and R102 - Durban's main arterial routes, making it the auxiliary industrial area to Congela and Mobeni. The subject property comprises of 4 erfs are located on 166, 170, 176 & 182 Umhlatuzana Road. The majority of the properties within this road including the subject properties are zoned for light industry.

State of the Market – Durban Industrial properties

Durban's industrial market has proven resilient following the hardships faced by the region in recent years. Warehousing and logistics facilities remain in demand due to their relative proximity to South Africa's busiest port and ease of distribution along the N3 national road to Johannesburg – the country's largest freight corridor.

Premises immediately surrounding the port comprise older warehousing and factories that do not meet modern users' needs. Alternative precincts both North and West of the CBD have consequently been developed. To the North there is ongoing development within the Avoca

node. The Brickworks is currently being developed here and will offer 450,000 sq.m. prime logistics stock on completion. New developments in this region command prime rentals, and land availability is good. Elevated construction costs still minimise speculative development activity, resulting in no immediate stock availability. Gross rentals average R105/sq.m. for units smaller than 5,000 sq.m.

Outer West is another growing industrial area, and most notably Cato Ridge and Hammersdale. A greater availability of land suitable for development (previously zoned agricultural), and its frontage onto the N3 national road, make this area ideally suited to the logistics sector. Surrounding road infrastructure is undergoing substantial upgrades. New builds average around R103/sq.m., as do properties smaller than 5,000 sq.m.

Aside from the Clairwood park development, there is limited modern warehousing existing in the region immediately surrounding the port. Some older stock is suitable for conversion, however issues such as congestion limits the viability and appeal, as these areas are better suited to large users (rather than SMMEs seeking urban or flexible warehousing solutions).

Outlook

Durban exhibits continuous demand for logistics facilities, and despite infrastructure and congestion related challenges, the appeal of the region is not expected to change dramatically. Indeed, it is anticipated that the construction of the multi-modal rail terminal within the port will further bolster greater demand for and investment into the area.
