

NEC3 Term Service Contract (TSC3)

Between ESKOM HOLDINGS SOC Ltd
(Reg No. 2002/015527/30)

and [Insert at award stage]
(Reg No. _____)

for The Provision of Maintenance services for Belt Repairs
and Splicing on an as and when required basis for the
period of 3 years at Kriel Power Station

Contents:

- Part C1** Agreements & Contract Data
- Part C2** Pricing Data
- Part C3** Scope of Work

CONTRACT No.

PART C1: AGREEMENTS & CONTRACT DATA

Contents:

C1.1 Form of Offer and Acceptance

C1.2a Contract Data provided by the *Employer*

C1.2b Contract Data provided by the *Contractor*

C1.1 Form of Offer & Acceptance

Offer

The *Employer*, identified in the Acceptance signature block, has solicited offers to enter into a contract for the procurement of:

The Provision of Maintenance services for Belt Repairs and Splicing on an as and when required basis for the period of 3 years at Kriel Power Station

The tenderer, identified in the Offer signature block, has examined the documents listed in the Tender Data and addenda thereto and by submitting this Offer has accepted the Conditions of Tender.

By the representative of the tenderer, deemed to be duly authorised, signing this part of this Form of Offer and Acceptance the tenderer offers to perform all of the obligations and liabilities of the *Contractor* under the contract including compliance with all its terms and conditions according to their true intent and meaning for an amount to be determined in accordance with the *conditions of contract* identified in the Contract Data.

Note: total price from the price list to be reflected in the block below. If not reflected, the tender will be found to be non-responsive

Options A	The offered total of the Prices exclusive of VAT is	R
	Value Added Tax @ 15% is	R
	The offered total of the amount due inclusive of VAT is ¹	R
	(in words)	

This Offer may be accepted by the *Employer* by signing the Acceptance part of this Form of Offer and Acceptance and returning one copy of this document including the Schedule of Deviations (if any) to the tenderer before the end of the period of validity stated in the Tender Data, or other period as agreed, whereupon the tenderer becomes the party named as the *Contractor* in the *conditions of contract* identified in the Contract Data.

Note: full signature to appear at the bottom, if not signed, the tender will be found to be non-responsive

 (Insert name and address of organisation)

Name & signature of witness

Date

Tenderer's CIDB registration number:

¹ This total is required by the *Employer* for budgeting purposes only. Actual amounts due will be assessed in terms of the *conditions of contract*.

Acceptance

By signing this part of this Form of Offer and Acceptance, the *Employer* identified below accepts the tenderer's Offer. In consideration thereof, the *Employer* shall pay the *Contractor* the amount due in accordance with the *conditions of contract* identified in the Contract Data. Acceptance of the tenderer's Offer shall form an agreement between the *Employer* and the tenderer upon the terms and conditions contained in this agreement and in the contract that is the subject of this agreement.

The terms of the contract, are contained in:

- Part C1 Agreements and Contract Data, (which includes this Form of Offer and Acceptance)
- Part C2 Pricing Data
- Part C3 Scope of Work: Service Information

and drawings and documents (or parts thereof), which may be incorporated by reference into the above listed Parts.

Deviations from and amendments to the documents listed in the Tender Data and any addenda thereto listed in the Returnable Schedules as well as any changes to the terms of the Offer agreed by the tenderer and the *Employer* during this process of offer and acceptance, are contained in the Schedule of Deviations attached to and forming part of this Form of Offer and Acceptance. No amendments to or deviations from said documents are valid unless contained in this Schedule.

The tenderer shall within two weeks of receiving a completed copy of this agreement, including the Schedule of Deviations (if any), contact the *Employer's* agent (whose details are given in the Contract Data) to arrange the delivery of any securities, bonds, guarantees, proof of insurance and any other documentation to be provided in terms of the *conditions of contract* identified in the Contract Data at, or just after, the date this agreement comes into effect. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation of this agreement.

Notwithstanding anything contained herein, this agreement comes into effect on the date when the tenderer receives one fully completed and signed original copy of this document, including the Schedule of Deviations (if any).

Note: If a tenderer wishes to submit alternative tenders, use another copy of this Form of Offer and Acceptance.

Schedule of Deviations to be completed by the *Employer* prior to contract award

Note:

1. This part of the Offer & Acceptance would not be required if the contract has been developed by negotiation between the Parties and is not the result of a process of competitive tendering.
2. The extent of deviations from the tender documents issued by the *Employer* prior to the tender closing date is limited to those permitted in terms of the Conditions of Tender.
3. A tenderer's covering letter must not be included in the final contract document. Should any matter in such letter, which constitutes a deviation as aforesaid be the subject of agreement reached during the process of Offer and Acceptance, the outcome of such agreement shall be recorded here and the final draft of the contract documents shall be revised to incorporate the effect of it.

X20.2	A report of performance against each Key Performance Indicator is provided at intervals of	4 months
Z	The <i>additional conditions of contract</i> are	Z1 to Z13 always apply.

Z1 Cession delegation and assignment

- Z1.1 The *Contractor* does not cede, delegate or assign any of its rights or obligations to any person without the written consent of the *Employer*.
- Z1.2 Notwithstanding the above, the *Employer* may on written notice to the *Contractor* cede and delegate its rights and obligations under this contract to any of its subsidiaries or any of its present divisions or operations which may be converted into separate legal entities as a result of the restructuring of the Electricity Supply Industry.

Z2 Joint ventures

- Z2.1 If the *Contractor* constitutes a joint venture, consortium or other unincorporated grouping of two or more persons or organisations then these persons or organisations are deemed to be jointly and severally liable to the *Employer* for the performance of this contract.
- Z2.2 Unless already notified to the *Employer*, the persons or organisations notify the *Service Manager* within two weeks of the Contract Date of the key person who has the authority to bind the *Contractor* on their behalf.
- Z2.3 The *Contractor* does not alter the composition of the joint venture, consortium or other unincorporated grouping of two or more persons without the consent of the *Employer* having been given to the *Contractor* in writing.

Z3 Change of Broad Based Black Economic Empowerment (B-BBEE) status

- Z3.1 Where a change in the *Contractor's* legal status, ownership or any other change to his business composition or business dealings results in a change to the *Contractor's* B-BBEE status, the *Contractor* notifies the *Employer* within seven days of the change.
- Z3.2 The *Contractor* is required to submit an updated verification certificate and necessary supporting documentation confirming the change in his B-BBEE status to the *Service Manager* within thirty days of the notification or as otherwise instructed by the *Service Manager*.
- Z3.3 Where, as a result, the *Contractor's* B-BBEE status has decreased since the Contract Date the *Employer* may either re-negotiate this contract or alternatively, terminate the *Contractor's* obligation to Provide the Service.
- Z3.4 Failure by the *Contractor* to notify the *Employer* of a change in its B-BBEE status may constitute a reason for termination. If the *Employer* terminates in terms of this clause, the procedures on termination are P1, P2 and P4 as stated in clause 92, and the amount due is A1 and A3 as stated in clause 93.

Z4 Confidentiality

- Z4.1 The *Contractor* does not disclose or make any information arising from or in connection with this contract available to Others. This undertaking does not, however, apply to information which at the time of disclosure or thereafter, without default on the part of the *Contractor*, enters the public domain or to information which was already in the possession of the *Contractor* at the time of disclosure (evidenced by written records in existence at that time). Should the *Contractor* disclose information to Others in terms of clause 25.1, the *Contractor* ensures that the provisions of this clause are complied with by the recipient.
- Z4.2 If the *Contractor* is uncertain about whether any such information is confidential, it is to be regarded as such until notified otherwise by the *Service Manager*.
- Z4.3 In the event that the *Contractor* is, at any time, required by law to disclose any such information which is required to be kept confidential, the *Contractor*, to the extent permitted by law prior to disclosure, notifies the *Employer* so that an appropriate protection order and/or any other action can be taken if possible, prior to any disclosure. In the event that such protective order is not, or cannot, be obtained, then the *Contractor* may disclose that portion of the information which it is required to be disclosed by law and uses reasonable efforts to obtain assurances that confidential treatment will be afforded to the information so disclosed.
- Z4.4 The taking of images (whether photographs, video footage or otherwise) of the Affected Property or any portion thereof, in the course of Providing the Service and after the end of the *service period*, requires the prior written consent of the *Service Manager*. All rights in and to all such images vests exclusively in the *Employer*.
- Z4.5 The *Contractor* ensures that all his subcontractors abide by the undertakings in this clause.

Z5 Waiver and estoppel: Add to core clause 12.3:

- Z5.1 Any extension, concession, waiver or relaxation of any action stated in this contract by the Parties, the *Service Manager* or the *Adjudicator* does not constitute a waiver of rights, and does not give rise to an estoppel unless the Parties agree otherwise and confirm such agreement in writing.

Z6 Health, safety and the environment: Add to core clause 27.4

- Z6.1 The *Contractor* undertakes to take all reasonable precautions to maintain the health and safety of persons in and about the execution of the *service*. Without limitation the *Contractor*:
- accepts that the *Employer* may appoint him as the “Principal Contractor” (as defined and provided for under the Construction Regulations 2014 (promulgated under the Occupational Health & Safety Act 85 of 1993) (“the Construction Regulations”) for the Affected Property;
 - warrants that the total of the Prices as at the Contract Date includes a sufficient amount for proper compliance with the Construction Regulations, all applicable health & safety laws and regulations and the health and safety rules, guidelines and procedures provided for in this contract and generally for the proper maintenance of health & safety in and about the execution of the *service*; and
 - undertakes, in and about the execution of the *service*, to comply with the Construction Regulations and with all applicable health & safety laws and regulations and rules, guidelines and procedures otherwise provided for under this contract and ensures that his Subcontractors, employees and others under the *Contractor’s* direction and control, likewise observe and comply with the foregoing.
- Z6.2 The *Contractor*, in and about the execution of the *service*, complies with all applicable environmental laws and regulations and rules, guidelines and procedures otherwise provided for under this contract and ensures that his Subcontractors, employees and others under the *Contractor’s* direction and control, likewise observe and comply with the foregoing.

Z7 Provision of a Tax Invoice and interest. Add to core clause 51

- Z7.1 Within one week of receiving a payment certificate from the *Service Manager* in terms of core clause 51.1, the *Contractor* provides the *Employer* with a tax invoice in accordance with the *Employer’s* procedures stated in the Service Information, showing the amount due for payment equal to that stated in the payment certificate.
- Z7.2 If the *Contractor* does not provide a tax invoice in the form and by the time required by this contract, the time by when the *Employer* is to make a payment is extended by a period equal in time to the delayed submission of the correct tax invoice. Interest due by the *Employer* in terms of core clause 51.2 is then calculated from the delayed date by when payment is to be made.
- Z7.3 The *Contractor* (if registered in South Africa in terms of the companies Act) is required to comply with the requirements of the Value Added Tax Act, no 89 of 1991 (as amended) and to include the *Employer’s* VAT number 4740101508 on each invoice he submits for payment.

Z8 Notifying compensation events

- Z8.1 Delete the last paragraph of core clause 61.3 and replace with:

If the *Contractor* does not notify a compensation event within eight weeks of becoming aware of the event, he is not entitled to a change in the Prices.

Z9 Employer’s limitation of liability

- Z9.1 The *Employer's* liability to the *Contractor* for the *Contractor's* indirect or consequential loss is limited to R0.00 (zero Rand)
- Z9.2 The *Contractor's* entitlement under the indemnity in 82.1 is provided for in 60.1(12) and the *Employer's* liability under the indemnity is limited to compensation as provided for in core clause 63 and X19.11 if Option X19 Task Order applies to this contract.

Z10 Termination: Add to core clause 91.1, at the second main bullet point, fourth sub-bullet point, after the words "against it":

- Z10.1 or had a business rescue order granted against it.

Z11 Ethics

For the purposes of this Z-clause, the following definitions apply:

- Affected Party** means, as the context requires, any party, irrespective of whether it is the *Contractor* or a third party, such party's employees, agents, or Subcontractors or Subcontractor's employees, or any one or more of all of these parties' relatives or friends,
- Coercive Action** means to harm or threaten to harm, directly or indirectly, an Affected Party or the property of an Affected Party, or to otherwise influence or attempt to influence an Affected Party to act unlawfully or illegally,
- Collusive Action** means where two or more parties co-operate to achieve an unlawful or illegal purpose, including to influence an Affected Party to act unlawfully or illegally,
- Committing Party** means, as the context requires, the *Contractor*, or any member thereof in the case of a joint venture, or its employees, agents, or Subcontractors or the Subcontractor's employees,
- Corrupt Action** means the offering, giving, taking, or soliciting, directly or indirectly, of a good or service to unlawfully or illegally influence the actions of an Affected Party,
- Fraudulent Action** means any unlawfully or illegally intentional act or omission that misleads, or attempts to mislead, an Affected Party, in order to obtain a financial or other benefit or to avoid an obligation or incurring an obligation,
- Obstructive Action** means a Committing Party unlawfully or illegally destroying, falsifying, altering or concealing information or making false statements to materially impede an investigation into allegations of Prohibited Action, and
- Prohibited Action** means any one or more of a Coercive Action, Collusive Action Corrupt Action, Fraudulent Action or Obstructive Action.

- Z11.1 A Committing Party may not take any Prohibited Action during the course of the procurement of this contract or in execution thereof.
- Z11.2 The *Employer* may terminate the *Contractor's* obligation to Provide the Services if a Committing Party has taken such Prohibited Action and the *Contractor* did not take timely and appropriate action to prevent or remedy the situation, without limiting any other rights or remedies the *Employer* has. It is not required that the Committing Party had to have been found guilty, in court or in any other similar process, of such Prohibited Action before the *Employer* can terminate the *Contractor's* obligation to Provide the Services for this reason.
- Z11.3 If the *Employer* terminates the *Contractor's* obligation to Provide the Services for this reason, the amounts due on termination are those intended in core clauses 92.1 and 92.2.
- Z11.4 A Committing Party co-operates fully with any investigation pursuant to alleged Prohibited Action. Where the *Employer* does not have a contractual bond with the Committing Party, the *Contractor* ensures that the Committing Party co-operates fully with an investigation.

Z12 Insurance

Z 12 .1 Replace core clause 83 with the following:

Insurance cover 83

- 83.1 When requested by a Party, the other Party provides certificates from his insurer or broker stating that the insurances required by this contract are in force.

- 83.2 The *Contractor* provides the insurances stated in the Insurance Table A from the *starting date* until the earlier of Completion and the date of the termination certificate.

INSURANCE TABLE A

Insurance against	Minimum amount of cover or minimum limit of indemnity
Loss of or damage caused by the <i>Contractor</i> to the <i>Employer's</i> property	The replacement cost where not covered by the <i>Employer's</i> insurance. The <i>Employer's</i> policy deductible as at Contract Date, where covered by the <i>Employer's</i> insurance.
Loss of or damage to Plant and Materials	The replacement cost where not covered by the <i>Employer's</i> insurance. The <i>Employer's</i> policy deductible as at Contract Date, where covered by the <i>Employer's</i> insurance.
Loss of or damage to Equipment	The replacement cost where not covered by the <i>Employer's</i> insurance. The <i>Employer's</i> policy deductible as at Contract Date, where covered by the <i>Employer's</i> insurance.
The <i>Contractor's</i> liability for loss of or damage to property (except the <i>Employer's</i> property, Plant and Materials and Equipment) and liability for bodily injury to or death of a person (not an employee of the <i>Contractor</i>) arising from or in connection with the <i>Contractor's</i> Providing the Service	<u>Loss of or damage to property</u> The replacement cost <u>Bodily injury to or death of a person</u> The amount required by the applicable law.
Liability for death of or bodily injury to employees of the <i>Contractor</i> arising out of and in the course of their employment in connection with this contract	The amount required by the applicable law

Z 12.2 Replace core clause 86 with the following:

Insurance by the Employer 86

86.1 The *Employer* provides the insurances stated in the Insurance Table B

INSURANCE TABLE B

Insurance against or name of policy	Minimum amount of cover or minimum limit of indemnity
Assets All Risk	Per the insurance policy document
Contract Works insurance	Per the insurance policy document
Environmental Liability	Per the insurance policy document
General and Public Liability	Per the insurance policy document
Transportation (Marine)	Per the insurance policy document
Motor Fleet and Mobile Plant	Per the insurance policy document
Terrorism	Per the insurance policy document
Cyber Liability	Per the insurance policy document
Nuclear Material Damage and Business Interruption	Per the insurance policy document
Nuclear Material Damage Terrorism	Per the insurance policy document

Z13 Nuclear Liability

- Z13.1 The *Employer* is the operator of the Koeberg Nuclear Power Station (KNPS), a nuclear installation, as designated by the National Nuclear Regulator of the Republic of South Africa, and is the holder of a nuclear licence in respect of the KNPS.
- Z13.2 The *Employer* is solely responsible for and indemnifies the *Contractor* or any other person against any and all liabilities which the *Contractor* or any person may incur arising out of or resulting from nuclear damage, as defined in Act 47 of 1999, save to the extent that any liabilities are incurred due to the unlawful intent of the *Contractor* or any other person or the presence of the *Contractor* or that person or any property of the *Contractor* or such person at or in the KNPS or on the KNPS site, without the permission of the *Employer* or of a person acting on behalf of the *Employer*.
- Z13.3 Subject to clause Z13.4 below, the *Employer* waives all rights of recourse, arising from the aforesaid, save to the extent that any claims arise or liability is incurred due or attributable to the unlawful intent of the *Contractor* or any other person, or the presence of the *Contractor* or that person or any property of the *Contractor* or such person at or in the KNPS or on the KNPS site, without the permission of the *Employer* or of a person acting on behalf of the *Employer*.
- Z13.4 The *Employer* does not waive its rights provided for in section 30 (7) of Act 47 of 1999, or any replacement section dealing with the same subject matter.
- Z13.5 The protection afforded by the provisions hereof shall be in effect until the KNPS is decommissioned.

Z14 Asbestos

For the purposes of this Z-clause, the following definitions apply:

AAIA	means approved asbestos inspection authority.
ACM	means asbestos containing materials.
AL	means action level, i.e. a level of 50% of the OEL, i.e. 0.1 regulated asbestos fibres per ml of air measured over a 4 hour period. The value at which proactive actions is required in order to control asbestos exposure to prevent exceeding the OEL.
Ambient Air	means breathable air in area of work with specific reference to breathing zone, which is defined to be a virtual area within a radius of approximately 30cm from the nose inlet.
Compliance Monitoring	means compliance sampling used to assess whether or not the personal exposure of workers to regulated asbestos fibres is in compliance with the Standard's requirements for safe processing, handling, storing, disposal and phase-out of asbestos and asbestos containing material, equipment and articles.
OEL	means occupational exposure limit.
Parallel Measurements	means measurements performed in parallel, yet separately, to existing measurements to verify validity of results.
Safe Levels	means airborne asbestos exposure levels conforming to the Standard's requirements for safe processing, handling, storing, disposal and phase-out of asbestos and asbestos containing material, equipment and articles.
Standard	means the <i>Employer's</i> Asbestos Standard 32-303: Requirements for Safe Processing, Handling, Storing, Disposal and Phase-out of Asbestos and Asbestos Containing Material, Equipment and Articles.
SANAS	means the South African National Accreditation System.
TWA	means the average exposure, within a given workplace, to airborne asbestos fibres, normalised to the baseline of a 4 hour continuous period, also applicable to short term exposures, i.e. 10-minute TWA.

Z14.1 The *Employer* ensures that the Ambient Air in the area where the *Contractor* will Provide the Services conforms to the acceptable prescribed South African standard for asbestos, as per the regulations published in GNR 155 of 10 February 2002, under the Occupational Health and Safety Act, 1993 (Act 85 of 1993) ("Asbestos Regulations"). The OEL for asbestos is 0.2 regulated asbestos fibres per millilitre of air as a 4-hour TWA, averaged over any continuous period of four hours, and the short term exposure limit of 0.6 regulated asbestos fibres per millilitre of air as a 10-minute TWA, averaged over any 10 minutes, measured in accordance with HSG248 and monitored according to HSG173 and OESSM.

Z14.2 Upon written request by the *Contractor*, the *Employer* certifies that these conditions prevail. All measurements and reporting are effected by an independent, competent, and certified occupational hygiene inspection body, i.e. a SANAS accredited and Department of Employment and Labour approved AAIA. The *Contractor* may perform Parallel Measurements and related control measures at the *Contractor's* expense. For the purposes of compliance the results generated from Parallel Measurements are evaluated only against South African statutory limits as detailed in clause Z14.1. Control measures conform to the requirements stipulated in the AAIA-approved asbestos work plan.

Z14.3 The *Employer* manages asbestos and ACM according to the Standard.

- Z14.4 In the event that any asbestos is identified while Providing the Services, a risk assessment is conducted and if so required, with reference to possible exposure to an airborne concentration of above the AL for asbestos, immediate control measures are implemented and relevant air monitoring conducted in order to declare the area safe.
- Z14.5 The *Contractor's* personnel are entitled to stop working and leave the contaminated area forthwith until such time that the area of concern is declared safe by either Compliance Monitoring or an AAIA approved control measure intervention, for example, per the emergency asbestos work plan, if applicable.
- Z14.6 The *Contractor* continues to Provide the Services, without additional control measures presented, on presentation of Safe Levels. The contractually agreed dates to Provide the Services, including the Completion Date, are adjusted accordingly. The contractually agreed dates are extended by the notification periods required by regulations 3 and 21 of the Asbestos Regulations, 2001.
- Z14.7 Any removal and disposal of asbestos, asbestos containing materials and waste, is done by a registered asbestos contractor, instructed by the *Employer* at the *Employer's* expense, and conducted in line with South African legislation.

C1.2 Contract Data

Part two - Data provided by the Contractor

Notes to a tendering contractor:

1. Please read both the both the NEC3 Term Service Contract April 2013 and the relevant parts of its Guidance Notes (TSC3-GN)³ in order to understand the implications of this Data which the tenderer is required to complete.
2. The number of the clause which requires the data is shown in the left hand column for each statement however other clauses may also use the same data.
3. Where a form field like this [] appears, data is required to be inserted relevant to the option selected. Click on the form field **once** and type in the data. Otherwise complete by hand and in ink.

Completion of the data in full, according to Options chosen, is essential to create a complete contract.

Note: to be completed in full. Mandatory tender returnable. If not completed, the tender will be regarded as non-responsive

Clause	Statement	Data
10.1	The <i>Contractor</i> is (Name): Address Tel No. Fax No.	
11.2(8)	The <i>direct fee percentage</i> is	% Note: to be completed in full.

PART 2: PRICING DATA

TSC3 Option A

Document reference	Title
C2.1	Pricing assumptions: Option A
C2.2	The <i>price list</i>

C2.1 Pricing assumptions: Option A

How work is priced and assessed for payment

Clause 11 in NEC3 Term Service Contract (TSC3) core clauses and Option A states:

Identified and defined terms	11	
	11.2	(12) The Price List is the <i>price list</i> unless later changed in accordance with this contract.
		(17) The Price for Services Provided to Date is the total of
		<ul style="list-style-type: none">the Price for each lump sum item in the Price List which the <i>Contractor</i> has completed andwhere a quantity is stated for an item in the Price List, an amount calculated by multiplying the quantity which the <i>Contractor</i> has completed by the rate.
		(19) The Prices are the amounts stated in the Price column of the Price List. Where a quantity is stated for an item in the Price List, the Price is calculated by multiplying the quantity by the rate.

This confirms that Option A is a priced contract where the Prices are derived from a list of items of service which can be priced as lump sums or as expected quantities of service multiplied by a rate or a mix of both.

Function of the Price List

Clause 54.1 in Option A states: "Information in the Price List is not Service Information". This confirms that instructions to do work or how it is to be done are not included in the Price List but in the Service Information. This is further confirmed by Clause 20.1 which states, "The *Contractor* Provides the Service in accordance with the Service Information". Hence the *Contractor* does **not** Provide the Service in accordance with the Price List. The Price List is only a pricing document.

Link to the *Contractor's* plan

Clause 21.4 states "The *Contractor* provides information which shows how each item description on the Price List relates to the operations on each plan which he submits for acceptance". Hence when compiling the *price list*, the tendering *contractor* needs to develop his first clause 21.2 plan in such a way that operations shown on it can be priced in the *price list* and result in a satisfactory cash flow in terms of clause 11.2(17).

Preparing the *price list*

Before preparing the *price list*, both the *Employer* and tendering *contractors* should read the TSC3 Guidance Notes pages 14 and 15. In an Option A contract, either Party may have entered items into the *price list* either as a process of offer and acceptance (tendering) or by negotiation depending on the nature of the *service* to be provided. Alternatively the *Employer*, in his Instructions to Tenderers or in a Tender Schedule, may have listed some items that he requires the *Contractor* to include in the *price list* to be prepared and priced by him.

It is assumed that in preparing or finalising the *price list* the *Contractor*:

- Has taken account of the guidance given in the TSC3 Guidance Notes relevant to Option A;

- Understands the function of the Price List and how work is priced and paid for;
- Is aware of the need to link operations shown in his plan to items shown in the Price List;
- Has listed and priced items in the *price list* which are inclusive of everything necessary and incidental to Providing the Service in accordance with the Service Information, as it was at the time of tender, as well as correct any Defects not caused by an *Employer's* risk;
- Has priced work the *Contractor's* decides not to show as a separate item within the Prices or rates of other listed items in order to fulfil the obligation to complete the *service* for the tendered total of the Prices.
- Understands there is no adjustment to items priced as lump sums if the amount, or quantity, of work within that item later turns out to be different to that which the *Contractor* estimated at time of tender. The only basis for a change to the (lump sum) Prices is as a result of a compensation event.

Format of the *price list*

(From the example given in an Appendix within the TSC3 Guidance Notes)

Entries in the first four columns in the *price list* in section C2.2 are made either by the *Employer* or the tendering *contractor*.

If the *Contractor* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tendering *contractor* enters the amount in the Price column only, the Unit, Expected Quantity and Rate columns being left blank.

If the *Contractor* is to be paid an amount for an item of work which is the rate for the work multiplied by the quantity completed, the tendering *contractor* enters the rate which is then multiplied by the Expected Quantity to produce the Price, which is also entered.

If the *Contractor* is to be paid a Price for an item proportional to the length of time for which a service is provided, a unit of time is stated in the Unit column and the expected length of time (as a quantity of the stated units of time) is stated in the Expected Quantity column.

C2.2 the *price list*

Provision of Splicing Resources at Kriel Power Station for the period of five years

Item No	Description	Unit	Qty	Rate	Amount
100	PRELIMINARY & GENERALS				
101	Site establishment	Sum	1

1. Description of the service

1.1 Executive overview

The works include construction of hot splice, cold splice, clip joints and splice repairs. Pulling in of conveyor belts during replacement.

Kriel power station has 16 conveyor belts from bottom staithes up to the mill bunker area. These are used to transport coal from staithes to mill bunkers. These entire belts are 3 ply belt and 900mm width, 4 ply belt and 900mm width. 14 of these are class 630, 2 off these belts are Steel Cords 1050 width of class ST1000. Belt scrapers are situated inside the troubling Shute on the return side of the conveyor belt. The function of scraper is to remove and clean fine carry back materials which are sticking on the return side of conveyor belt. This is to prevent materials from being carried back on return side as this will cause spillage and create a fire risk. And also to prevent belt slip on incline conveyors as by design loading/ carrying side of the belt makes contact with drive pulley surface.

Contractor supplies all tools, consumables, labour and transport through contract term in order to execute the works (Unless otherwise instructed by the Employer's Representative). The Contractor supplies sufficient equipment and personnel at all times to perform the works on planned or emergency breakdown situation.

1.2 Employer's requirements for the service

Work to be performed on conveyor belts splicing as listed below at Kriel Power Station:

The Contractor supplies all materials, consumables, equipment, tools, labour and transport required when executing the work. (Unless otherwise instructed by the Employer's Representative)

The Contractor supplies sufficient equipment and personnel at all times to perform the work on planned or emergency breakdown situation.

Understaithes 1 belts: 5A – 5D (4 off Staithe 1)

Understaithes 2 belts: 5E – 5G (3 off Staithe 2)

Incline Belts : 6A – 6D (4 off Staithe 1)

Incline belts: : 6E – 6G (3 off Staithe 2)

Overland Conveyors : 18A – 18B (2 off Ash conveyors)

Pulleys include Drive, head, tail, snub, bend, take-up, and tripper car pulleys on all above mentioned belts.

Work breakdown:

- New Splicing and splice repair
- Installation of clip joints
- Installation of belt inserts
- Belt repairs
- On site investigations and fault finding surveys to be performed when required.
- Safety aspects
- Response time
- Quality requirements

Splicing

- a) Splicing is performed on all horizontal, Overland and inclines belts. This includes the pulling in of the belt and the installation of belt clamps when required. The conveyor belting will be supplied by Eskom Holdings at no cost to the contractor.
- b) Inclined conveyors (6A-6G) only hot splicing and Overland conveyors (18A-18B, Understaithe 5A-5G) both hot or cold splice can be used with at a decision from Eskom Supervisor.
- c) Horizontal belts hot and cold splice can be done.
- d) Splice construction should meet minimum requirements of Eskom Procedure unique identifier: 240-120532564 for cold, hot splicing and repairs. The Contractor is expected to submit a quality control plan to be reviewed and agreed upon by the Employer's Representative before starting any work and must be approved by the System Engineer.
- e) Splicing includes clamping the belt, pulling in of the belt and aligning the two overlapping ends which are to be spliced.
- f) On completion, the belt has to be test run in the presence of the Employer's Representative and the Contractor to ensure that coaling can continue and the Quality Control Plan to be signed off by both contractor and Eskom Holdings Limited representative on every task.

- g) The Contractor must ensure that after completion of the work, the area must be cleaned and all the loose material is being removed to ensure good housekeeping.

Installation of Clip Joints

- a) Installation of clip joints is performed on both horizontal and inclines belts. This will include the pulling of the belt, installation of belt clamps when required. Materials for clip joints are to be supplied by the Contractor. Clip joints will be supplied by Eskom. Eskom to supply the machine unless otherwise specified.
- b) Installation of clip joints must be done according to Eskom Procedure unique identifier: 240-120532564. The Contractor is expected to submit a quality control plan to be reviewed and agreed upon by Employer.
- c) The installation starts by clamping the belt, pulling in the belt, aligning the belt and by means of the clip joint device, join the belt ends.
- d) On completion, the belt has to be test run in the presence of the Eskom Holdings Limited Quality Controller to ensure that the coaling can continue and the QCP to be signed off by both contractor and ESKOM HOLDINGS LIMETED quality controller.

Installation of Belt Inserts

- a) Installation of belt inserts is done according to Eskom Procedure unique identifier: 240-120532564. The Contractor is expected to submit a quality control plan to be reviewed and agreed upon by Eskom.
- b) When an insert is required, either splicing or installing a clip joint or both methods can be used, depending on Eskom Holdings Limited requirement. In all cases the Eskom Procedure must be used and the above mentioned QCP's to be signed off by both contractor and ESKOM HOLDINGS LIMITED Quality Controller.
- c) On completion, the belt has to be test run in the presence of the Eskom Holdings Limited Quality Controller to ensure that coaling can continue and the QCP's to be signed off by both contractor and ESKOM HOLDINGS LIMITED Quality Controller.
- d) Installation of insert must allow the counterweight to be 500 mm away from the ground floor when loaded.

- e) All cuts off belt insert and the entire replaced belt to be rolled by the Contractor and put in designated areas.

Belt Repairs

- a) Belt repairs are done on existing joints that can still be repaired and on damaged areas on the belt surface.
- b) Only cold repairs to be done on all belts.
- c) All belt repair activities are done according to Eskom procedure unique identifier: 240-120532564. The repairs start by clamping the belt, open the joint completely, remove all the old glue and re-glue the joint.
- c) On completion, the belt to be test run to ensure the coaling can continue.

On Site Investigations and Fault Finding Surveys

On site investigations and fault finding surveys to be performed when required by and handed to the Employer’s Representative containing the results of the survey and recommendations which address the findings of the survey and prolong plant health.

Plant inspection

Weekly plant inspection will be required on all belts. This will be done once a week as visual inspection and a formal report must be issued to the supervisor stating the condition of belts, splices. Picture will be allowed as part of the report and application to use camera on-site will be granted following Eskom procedure.

1.3 Interpretation and terminology

The following abbreviations are used in this Service Information:

Abbreviation	Meaning given to the abbreviation
OBL	Outside battery limits

1.4 *Employer's requirements for the service*

- All services to be done according to the *Employer's* procedures and plant safety regulations.
- All spares removed and returned to the *Employer's* premises must be declared at the main entrance where the removal permit for the spares must be shown to the protective services personnel.
- Supervisor must be authorized in terms of the plant safety (PSR) within the first six months of the contract.
- PSR training will be financial covered by the *Employer* for the first training session only, thereafter it will be on *Contractor's* cost should *Contractor's* employees fail.
- Plant Safety Regulations have to be followed and work will only be done with a permit to work. Any contraventions will be strictly dealt with.
- The *Contractor* must clean and remove all debris after completion of the work.
- The *Contractor* must complete all required inspection cards and corrective work orders.
- The *Contractor* is to be at the specific working area location as defined in the Task Order or by the Contract Supervisor.
- If the need arise to move away from the working area for any reason other than safety it must be under the instruction of the Contract Supervisor.
- Site access shall be granted by Eskom Holdings Kriel Power Station protective services as request by the *Service Manager*.
- No employees will be transported on an open vehicle. The vehicles must comply with Eskom minimum requirements.
- Daily time sheets will be handed-in weekly to the Contract Supervisor and approved by both the Supervisor and the *Contractor*
- Working hours is Eskom working hours and overtime might be required depending on the workload.
- A request for the absence from the work place must be negotiated with *Employer*
- In periods of absence a negotiated substitute (with the same skill and qualification) must maintain the plant.
- Eskom Life Saving Rules to be adhered to.
- *Contractor* to transport its own employees on site for the work purpose.
- *Contractor* to provide its own radios.
- All PPE to be provided by *Contractor* at own costs, should be for all weather types and must be SABS approved and should meet Eskom standards.
- All necessary and relevant PPE must be used at all time when entering or working in the plant.
- At ash disposal the *Contractor* should test stand in workshop and test dozer attachment for stacker shift

General

- The response time during a call-out will be four hours from the time the call is logged at Kriel Power Station
- Minimum call out charge time will be three hours.
- 1. Yearly induction for all personnel.
- Minimum tools and equipment is that applicable for splicing and must be easily identifiable.
- All work undertaken must be done in accordance with workflow *service* and other things provided by the *Employer*.
- The *Contractor* will familiarize themselves with the plant and the dangers / hazards or obstacles in the vicinity of lifting beams and all power-driven machinery that requires load testing, as Eskom will not be liable for any occurrence that can lead to a compensation event.
- All work done under a permit must be done in accordance with Eskom's low voltage regulations as stipulated in the hand book on plant safety regulations .This includes the of barricading to cordon-off areas where the *Contractor* is working and safety signs indicating that men working overhead when doing maintenance and repairs to load / spreading beams.
- The *Contractor* to provide in the method statement of how the equipment, working procedures and certificates will be done.

Special Tools and Equipment

All Applicable splicing tools

1.5 Interpretation and terminology

The following abbreviations are used in this Service Information:

Abbreviation	Meaning given to the abbreviation
AP	Accounts Payable
B-BBEE	Broad Based Black Economic Empowerment
COC	Certificate of Compliance
CPA	Cost Price Adjustment
CV	Curriculum Vitae
HV	High Voltage
ISO	International Organization for Standardization
LAR	Local Access Register
LV	Low Voltage
NCR	Non Conformance Report
NDT	Non-destructive Testing
OHSACT	Occupational Health and Safety Act 85 of 1993
PIR	Performance Improvement Report
PPE	Personal Protection Equipment
PPPFA	Preferential Procurement Policy Framework Act
PSR	Plant Safety Regulations
QC	Quality Control
QCP	Quality Control Plan
QMS	Quality Management Systems
RP	Responsible Person
SACPCMP	South African Council for the Project and Construction Management Professions
SAMTRAC	Safety Management Training Course
SAP	System Application Products
SOW	Scope of Work
TBA	To be announced
TBC	To be confirmed
TETA	Transport Education Training Authority
VAC	Voltage Alternating Current

2 Management strategy and start up.

2.1 The Contractor's plan for the service

- To be discussed before each task order can be carried out between the *Contractor* and the *Employer*.
- Programme to be supplied on request on a signed hard copy as well as a soft copy, see Scope of Work.

2.2 Management meetings

Regular meetings of a general nature may be convened and chaired by the *Service Manager* as follows:

Title and purpose	Approximate time & interval	Location	Site
Risk register and compensation events	TBC	TBA	TBC
Work Schedule Meetings	Daily	TBA	TBC
Daily Outage Meeting and Feedback	Daily	TBA	TBC

The Contractor will comply with the requirements as set by the *Employer*. *The Contractor* will provide a detailed feedback.

Meetings of a specialist nature may be convened as specified elsewhere in this Service Information or if not so specified by persons and at times and locations to suit the Parties, the nature and the progress of the *service*. Records of these meetings shall be submitted to the *Service Manager* by the person convening the meeting within five days of the meeting.

All meetings shall be recorded using minutes or a register prepared and circulated by the person who convened the meeting. Such minutes or register shall not be used for the purpose of confirming actions or instructions under the contract as these shall be done separately by the person identified in the *conditions of contract* to carry out such actions or instructions.

- Attendance of meetings as required by *Service Manager* such as:
 - The *Employer's Contractors* Safety Meeting (monthly)
 - Departmental Safety Meetings (monthly)
 - Section daily meetings
 - All outage meetings
 - All Assessment meetings
 - Any meeting requested by the *Employer* or *Contractor*

2.3 Contractor's management, supervision and key people

- Supervisor
- Belt Splicer
- Semiskilled x6
- Safety Officer

2.4 Provision of bonds and guarantees

- N/A

2.5 Documentation control

- Each instruction, certificates, submissions, proposal, records, acceptance, notification, reply and other communication which this contract requires is communicated in the form of which can be read, copied and recorded.
- Writing is in the language of this contract.
- All communication must be printed and filed in the *Service Managers* file
- Monthly and weekly reports to be discussed, compiled and handed in to the Eskom Supervisor and *Service Manager* (to be announced by *Employer*)

2.6 Invoicing and payment

The *Contractor* shall include on each invoice the following information:

- Name and address of the Contractor and the Service Manager;
- The contract number and title;
- Contractor's VAT registration number;
- The *Employer's* VAT registration number 4740101508;
- Description of service provided for each item invoiced based on the Price List;
- Total amount invoiced excluding VAT, the VAT and the invoiced amount including VAT;
- Purchase Order number;
- Total amount invoiced excluding VAT, the VAT and the invoiced amount including VAT; CPA calculation sheet and the Invoice for CPA (with the GL Account Number and the CC on the Invoice) to be send to the financial department as per Eskom Invoicing procedure / instruction.
- Eskom Invoicing and payment procedure to be followed.

2.7 Contract change management

- Where *Contractor* does Name Changes, Mergers, Acquisitions and Cessions the *Employer's* procedures must be followed. (Eskom Procurement and Supply Management)
- In a case where one *Contractor* takes over from another *Contractor*, the Site *Service Manager* must be notified in writing immediately.
- The *Contractor* does not cede, delegate or assign any of its rights or obligations to any person without the written consent of the *Employer*.
- Changing the Service Information
- Access
- Provision by the *Employer*
- Stopping work
- Work of the *Employer* or others
- Reply to communication
- Changing a decision
- Withholding acceptance
- Delayed tests or inspections
- Change of Affected property
- Materials, facilities, etc. for tests
- *Employer's* risks
- Assumption about Compensation Events
- *Employer's* breach of contract

2.8 Records of Defined Cost to be kept by the Contractor

- Available on request by the *Employer*

2.9 Insurance provided by the Employer

- Refer to Contract Data section 8

2.10 Training workshops and technology transfer

- The *Employer* will provide Plant Safety Regulations (PSR) training necessary for the *Contractor* in order to carry out the works.
- The *Contractor* allocates staff to be trained and authorised as Responsible Persons and Authorised Supervisor according to *Employer's* Plant Safety Regulations
- The *Contractor* shall be obliged to carry out the *service* for which the training was provided.
- All training required by the *Employer* will be on the *Employer's* account.

2.11 Design and supply of Equipment

- *Contractor* to provide all tools and equipment necessary to perform the required service
- In case of a modification, the Modification process must be followed
- The *Contractor* must supply his own rigging equipment of up to 5Ton.

2.12 Things provided at the end of the *service period* for the *Employer's* use

2.12.1 Equipment

- N/A

2.12.2 Information and other things

- All reports / documents to be compiled, filed, discussed and handed over to the *Employer* on a weekly basis (the day in the week to be announced by *Employer*) and at the end of the *service*.
- On Completion of contract the *Contractor's* safety file will be hand over to the *Service Manager* and will be saved for 40 Years after completion / termination of the contract
- All PM's to be signed off and handed back to the *Service Manager* on a daily basis

2.13 Management of work done by Task Order

- A Task Orders / Purchase Orders are the instruction to commence work.
- No work shall commence until Task Order / Purchase Order is issued and has been finalised, accepted and signed by both the *Employer* and *Contractor*.
- All work will be issued on a Task Order system.
- The Work Order, Purchase Requisition, Task Order and Purchase Order will be created via the SAP PM system.
- Completion certificate to be issued after tasks is completed on the Task Order. Completion certificate must be submitted together with the Assessment.

3 Health and safety, the environment and quality assurance

3.1 Health and safety risk management

The *Contractor* shall comply with the health and safety requirements contained in Annexure SHEQ Specifications 14RISK SRM-084 to this service Information.

Eskom SHEQ Policy

Eskom has made a commitment to conduct business with respect and care for people, the environment and assets and that no operating condition or urgency of *service* justifies exposing anyone to negative risks arising from Eskom's business.

Compliance with the Eskom SHEQ Policy and applicable regulations is the responsibility of every employee and *Contractor*.

Contractor SHEQ Policy

All *Contractors* shall have an OHS policy signed by the CEO of the *Contractor* and prominently displayed where employees normally report for duty.

Signed copy of the OHS policy shall form part of the SHE file.

SHE Plan Requirements

- Principal *Contractors* shall develop a suitable and sufficiently documented site specific SHE plans, based on the scope of work and client SHEQ specification.
- The SHE plan must be pre-approved by the client for implementation. The principal *Contractor/Contractor* has a responsibility to send the SHE plan to the client for approval prior to commencement of work.
- The SHE plan must be applied from the commencement of and for the duration the construction work, which must be updated / reviewed as the work progresses/changes.

When a principal *Contractor* intends appointing *Contractor*, the principal *Contractor* shall ensure that the *Contractor* provides and demonstrate a suitable, sufficiently documented and coherent site specific health and safety plan, based on the client's SHEQ specifications and scope of work

- The *Contractor* must ensure that all personnel attend the *Employers* health and safety Induction Course prior to starting with the works.
- All Eskom health and safety requirements to be adhered to
- *Contractors* Health and Safety file to be handed in for approval, and kept up to date by the *Contractor*

Health and Safety Arrangements

The *Contractor* ensures that all his personnel attend a Health and Safety Induction Course prior to contract starting date and annual re- induction. The Induction Course is presented by the *Employer's* Safety Risk Department at Kriel Power Station. Arrangements are made with Safety Risk Management, by the *Contractor*.

The *Employer's* Safety Risk Manager visits and inspects the *Contractor's* workplace or site yard and the working areas to ensure that tools; machinery and Equipment comply with the minimum safety requirements.

The *Service Manager* may instruct the *Contractor* to stop work, where the *Contractor's* personnel fail to conform to safety standards or contravene health and safety regulations. Such stop-work order is not a compensation event. The *Service Manager* may instruct the *Contractor* to discipline his employees and to submit a disciplinary action report to the *Service Manager*. The *Contractor* implements additional health and safety precautions where necessary.

The *Contractor* complies with the Occupational Health and Safety Act 85 of 1993, as well as Eskom procedure as stipulated below:

- SHEQ Policy 32-727
- Eskom Procurement and Supply Chain Management Procedure 32-1034
- SHE Requirements for the Eskom Commercial Process 32-726
- *Contractor* Health and Safety Requirements 32-136
- Integrated SHE Organization; Roles and Responsibilities and Statutory Appointments 32- 296
- Live-saving Rules 240-62196227
- Working at Heights 32-418
- Eskom Vehicle Safety Specifications 32-345
- Kriel *Contractor* SHEQ Specifications 14RISK SRM - 084

The *Contractor* acknowledges that it is fully aware of the requirements of all the above and undertakes to employ only people who have been duly authorised in terms thereof and who have received sufficient safety training to ensure that they can comply therewith.

The *Contractor* undertakes not to do, or not to allow anything to be done which will contravene any of the provisions of the Act, Regulations or Safety and Operating Procedures.

The *Contractor* shall appoint a person who will liaise with the Eskom Safety Officer responsible for the premises relevant to this contract.

Do safety audits at the *Contractor's* premises, its work-places and on its employees;

Refuse any employee, sub-*Contractor* or agent of the *Contractor* access to its premises if such person has been found to commit any unlawful act or any unsafe working practice or is found to be not authorised or qualifies in terms of the OHSACT;

Issue the *Contractor* with a work stop order or a compliance order should Eskom become aware of any unsafe working procedures or conditions or any non-compliance with the Act, Regulations and Procedures by the *Contractor* or any of its employees, sub-*Contractors* or agents.

The *Contractors* Health and safety file is to be submitted for approval to Kriel's Safety Officer before contract commencement.

All work stoppages called by the *Employer* to be adhered to

First aid and fire fighting

Adequate first aid and firefighting equipment to be provided by the *Employer*

All *Contractor* personnel must have First aid and firefighting training

- ***Contractor* to provide own Fire Extinguishers**

Fire Precautions

Any tampering with the *Employer's* fire equipment is strictly forbidden.

All exit doors, fire escape routes, walkways, stairways, stair landings and access to electrical distribution boards is kept free of obstruction, and are not used for work or storage at any time. Firefighting equipment must remain accessible at all times.

The *Contractor* takes the necessary action to safe guard the area to prevent injury and the spreading of the fire.

Security, fire protection and safety

The *Contractor* shall be responsible for ensuring the security of the works, and of his plant, equipment and materials. To that end he shall make adequate provision for access control, lighting and watchman to the works where required.

Fire protection

The provision of Eskom's standard NWS 1494 "Fire Prevention and Protection of *Contractor's* premises at New Works Sites" shall be applicable.

Safety and incident prevention

The *Contractor* shall implement and maintain an active Site Safety and Accident Prevention Programme in accordance with the Kriel SHEQ Specifications. The overriding regulations will however be the Occupational Health and Safety Act.

Reporting of accidents

The *Employer* follows an accident prevention policy that includes the investigation of all accidents involving personnel and property. This is done with the intention of introducing control measures to prevent a recurrence of the same incidents. The *Contractor* is expected to fully co-operate to achieve this objective. The *Service Manager* must be informed immediately of any incidents. A written report to be submitted to the *Employer* within 24 Hours of incidents and any damage to property or equipment

NOTE! This report does not relieve the *Contractor* of his legal obligations to report certain incidents to the Department of Labour, or to keep records in terms of the Occupational Health and Safety Act, and Compensation for Occupational Injuries and Diseases Act.

Occupational Health and Safety Act 85 Of 1993 – SECTION 37

In accordance with Section 37 (2) of the Act, the *Contractor* is appointed by the *Employer* as mandatory to assume Health and Safety duties and responsibilities. The *Contractor* ensures compliance with all requirements of the Act and any instruction or notification that enhances those requirements.

The *Contractor* acknowledges that he is fully aware of all the requirements of the Occupational Health and Safety Act and undertakes to employ only staff who have been duly authorised in terms thereof and who receive sufficient safety training to ensure that they can comply therewith.

The *Contractor* undertakes not to do, and not to allow anything to be done which will contravene any of the provisions of the Act, Regulations or Safety and Operating Procedures.

The *Contractor* appoints a person who liaises with the *Employer's* Safety Officer, responsible for the premises relevant to the Contract. The person appointed shall on request:

- Supply the *Employer's* Safety Officer with copies of minutes of all Health and Safety Committee meetings, whenever required.
- Supply the *Employer's* Safety Officer with copies of all appointments in respect of employees employed on this contract, in terms of the Act and Regulations and shall notify The *Employer's* Safety Officer of any changes thereto.

The *Employer* may, at any stage during the duration of this contract:

- perform safety audits at the *Contractor's* premises, its work place and its employees;
- refuse any employee, *Sub-Contractor* or agent of the *Contractor* access to its premises if such person is found to commit any unsafe act or any unsafe working practice or is found not to be duly authorised nor qualified in terms of the Act;
- Issue the *Contractor* with an instruction to stop work should the *Employer* aware of any unsafe working procedure or condition or any non - compliance with The Act, Regulations and Procedures referred to in the Occupational Health and Safety Act - 85 of 1993 and all Regulations made hereunder as well as all the *Employer's* Safety and Operating Procedures. Any such instruction is not a compensation event. Furthermore, no Amendments to the act or the Regulations or reasonable amendment to the *Employer's* and Operating Procedures will entitle the *Contractor* to claim any additional costs or Time incurred in complying therewith, from the *Employer*

Safety Regulations of the *Employer*

The *Contractor* conforms to the Eskom Plant Safety Regulations
The *Employer* makes available to the *Contractor*, on request, a copy of the latest revision of the Plant Safety Regulations.

3.2 Environmental constraints and management

The *Contractor* shall comply with the environmental criteria and constraints stated in the following:-

All waste from the project must be disposed in a sound environmental manner in accordance with Kriel Power Station Waste Management Procedure 14 Risk ENV-013. Oil spillages must be contained and cleaned as per Oil Spill Management procedure 15 ENPRENV-001. The project must conform to Eskom Environmental Legal and other Requirements procedure 14 Risk ENV-012 and the project must conform to Kriel Power Station ISO14001 Standard with reference to Kriel Power Station's Environmental Management System Manual 14 Risk ENV-010. All environmental incidents must be dealt with as per the Station's Incident Management, Corrective and Preventative Procedure 14 Risk PC-001 and all environmental incidents must be reported to the Environmental Department on site with Telephone Number 017-7495536/9200.

3.3 Quality assurance requirements

- The Contractor will comply with the Employer's Quality Requirements as specified in Eskom Holdings Limited QM58.
- The Contractor shall carry out work in accordance with the specifications as stated in this contract.
- The Contractor shall use only materials, consumables, equipment and tools that comply with the standards as stated in this contract. Complete specifications of the intended materials are to be submitted with the tender.
- The Contractor may not deviate from the Employer's current maintenance procedures, good practice and safety regulations, or modify or change the plant without prior written permission from the Employer.
- Shore hardness mapping: The Contractor and Employer's representative will conduct shore hardness mapping on the carry and non-carry side of the splice. The hardness of the rubber is measured in Shore A.
- The mapping shall consist of:
 - a) Measurements taken over the width and length of the splice in a matrix format and recorded in the relative positions.
 - b) The measurements are taken directly after the splice is performed, and repeated after 12 hours.
 - c) The difference between measurements shall not exceed 2 Shore across the splice.
 - d) Directly after the splice is performed, the hardness shall not be less than 55 Shore A at 60 degrees belt surface temperature.
 - e) After 12 hours, the hardness shall not be less than 60 Shore A on any section of the splice.
- The Employer has the edge bar sample tested by an independent testing facility to determine the bonding strength of the splice. A full pull out test will be performed on edge bar sample. The pull out test strength shall be at least 85% of the belt strength if non-OEM splice kit used and 100% if OEM splice kits are used.
- The Contractor provides adequately trained and qualified personnel to perform the work. The Employer's Representative may request additional proof of qualifications or training and to test the level of ability of any Contractor's employees. The Employer may also

request that any person, who in the opinion of the Employer is inadequately capable of performing the work as expected, to be trained or replaced.

- For the duration of this contract, The Contractor only utilizes people who have been accepted by the Project Manager.
- The Employer's Representative may conduct audits on the Contractor to determine compliance regarding conditions of this contract.
- The splice or repair will only be accepted after final quality control inspection and all above information (as applicable) has been submitted to the satisfaction of the Employer.
- The Contractor shall be required to attend all meetings as requested by the Employer's Representative.

4 Procurement

Reverse e-Auctioning will be applicable to this tender.

4.1 People

4.1.1 Minimum requirements of people employed

- *Employers* Contract Supervisor will be delegated by the *Service Manager*
- *Contractor* will also have its own Supervisor
- All relevant personnel names and titles must be specified to the *Service Manager*
- Only Trained and Skilled people that are qualified to perform work and are allowed
- All new staff to be appointed in writing.
- All new staff to do induction training
- All replacements of staff will be in the same discipline (e.g. Artisan for an Artisan with proof of qualifications and CV)
- Experience / knowledge must have qualification / certificate / reference of where and when this was gained.
- In the case where one or more employees of the *Contractor* are requested to leave site for other reasons than Sick leave or Annual leave. The personnel must be replaced immediately with the same skill level, qualifications and experience's
- All new staff to be approved by *Service Manager* before entering the site or commencing work
- All new staff must hand in all qualifications and relevant documentation to the *Service Manager*
- When changing personnel a new access to work form to be completed by the *Contractor*
- Only required specified approved amount of personnel to be allowed on site, pre-arrange with *Service Manager*

4.1.2 BBBEE and preferencing scheme

- As per clause Z3 within Contract Data.

4.1.3 Procurement requirements

PPPFA STRATEGY

Price	80%
BBBEE Status	20%

4.1.3 Supplier Development Localisation and Industrialisation

Training of 2 splice man – qualification: N3/Matric requirement

4.2 Subcontracting

4.2.1 Preferred SubContractors

- N/A

4.2.2 Subcontract documentation, and assessment of subcontract tenders

- N/A

4.2.3 Limitations on subcontracting

- Only 25 % of the contract or as per SDL&I requirement.

4.2.4 Attendance on SubContractors

- N/A

4.3 Plant and Materials

4.3.1 Specifications

- Hold and witness points must be attended and witness all intervention points as per approved QCP as per activity.
- The *Contractor* is responsible for the transportation of equipment and other material.
- The *Contractor* is not allowed to use any equipment, materials or spares for private usage or on other Eskom sites.
- Work and QC to be carried out according to all regulations and procedures of the *Employer*
- Check sheets to be updated, signed and handed in to the *Employer's* Supervisor

4.3.2 Correction of defects

- All work to be done must be done under a permit to work. Some plants are trip risks and can only be worked on during outages or units shut downs.
- All defected spares to be replaced with the permission of the *Service Manager / Employer's* Supervisor.
- All rework to be attended to within 24 hours and will be against the *Contractors* costs
- All repairs must have a compulsory defect period of minimum of 6 months per splice. This entails that any defect arising within 6 months after repairs are regarded as rework and should be at service provider's costs.
- As per inspection check list provided by the *Employer* (GGP 1045 page 33-35; GGP 1046 page 33-35)

4.3.3 Contractor's procurement of Plant and Materials

- Purchasing of spares, equipment or materials will go through the *Employer's* procurement process.
- The *Contractor* will supply his own consumables.

4.3.4 Tests and inspections before delivery

- All spares removed and returned to the *Employer's* premises must be declared at the main entrance where the removal permit for the spares must be shown to the Protective Services personnel.

5 Working on the Affected Property

5.1 Employer's site entry and security control, permits, and site regulations

- Lifesaving rules must be adhered at all times.
- Access is limited and controlled by Plant Safety Regulations requirements.
- No employee will be allowed to access the plant or to work without access permit issued.

- All personnel to work on the plant must be registered on the Worker's Register by the Responsible Person.
- All personnel must attend induction before working on site and they must obtain gate permits via the *Service Manager*.
- Unauthorised access to site is prohibited. The personnel are expected to be at their working site area at all times.
- No recruitment on site or at the main access gates.
- All activities to comply with the OHSACT regulations.

5.2 People restrictions, hours of work, conduct and records

- Normal working hours is Eskom working hours
Monday to Thursday 07:00 - 16:15
Fridays 07:00 - 12:00
- Outage time is 06:00 – 18:00 as per negotiation
- Other hours will be determine as per critical path activities during outages / breakdowns
- Overtime / Shift work on a as and when required basis, but must be approved by the *Service Manager*
- Daily time sheet must be kept up to date of normal time and overtime worked at all times. *Employer's Contractors* time sheets to be used
- Standby / Call-out might be required or on an as and when required basis depending on the plant status (Breakdowns)
- The *Contractor* must be available for any plant break downs during after hours, week-ends and Public holidays. The *Contractor* must be on site after 1 hour after a phone call is made.
- All overtime worked must comply with Eskom rest period requirements
- All work to be performed will be on an as and when required basis as per *Service Manager* request and as per plant performance

5.3 Health and safety facilities on the Affected Property

- Proto-team on each shift
- Medical Station and relevant staff on Site.
- Each workshop has a first aid box available.
- Yearly induction for all personnel.
- In an emergency the contract supervisor and *Service Manager* must notified immediately

First aid centre

The *Contractor* provides a first aid service to his employees and *Sub-Contractors*. In the case where these prove to be inadequate, like in the event of a serious injury, the *Employer's* medical centre and facilities are available.

Outside the *Employer's* office hours, the *Employer's* first aid services are only available for serious injuries and life threatening situations.

The *Employer* is entitled, however, to recover the costs from the *Contractor* for the use of the above *Employer's* facilities

5.4 Environmental controls, fauna & flora

Environmental management

- Proper care of the natural environment is important to prevent nuisance and environmental degradation.
- All *Contractors* shall comply with Eskom environmental management procedures and Environmental legislation
- Environmental incidents shall be reported to the Eskom Environmental Department as per

incident management requirements.

Waste Management

- Waste segregation is important to facilitate recycling of waste. Ensure that waste material is disposed in the correct bin.
- Eskom periodically collects waste from the bins for disposal in the correct manner.
- No waste should be burned or buried on site.
- Where Eskom and the *Contractor* have agreed that the *Contractor* is responsible for the Disposal of its waste, the *Contractor* shall safely dispose of such waste and keep disposal certificates filed.

Types and colours of bins used on site:

- Yellow bin for domestic waste
- Orange bin for hazardous waste
- Maroon bin for scrap
- Green box for cartridges
- Blue box for recyclable paper

Radiation protection

The *Contractor* conforms to the *Employer's* procedure OMOP 2049 and OMOP 2051 when performing any industrial radiography.

Hazardous Substances

It is required in terms of the General Administrative Regulation (Regulation 7) of the Act that any manufacturer, importer, seller or supplier of hazardous chemical substances shall supply the receiver, free of charge with sufficient information for the user, to enable the user to introduce the necessary measures as regards the protection of the health and safety of persons. It is therefore the responsibility of the supplier (dealing directly with the *Employer*) to supply the information. If information is not available for whatever reason, the supplier must indicate and give reasons to the *Employer*.

Handling of waste produced by the *Contractor*

All waste introduced to and/or produced on the *Employer's* premises, by the *Contractor*, for this contract, must be handled in accordance with the minimum requirements for the Handling and Disposal of Hazardous Waste in terms of Government Legislation as proclaimed by the Department of Water Affairs and Forestry Act 1994 Ref.: BN0621-16296-5.

The *Contractor* is responsible to appoint a waste coordinator to ensure that all waste produced is handled according to the applicable legislation.

The *Contractor* is required to ensure that all goods, services or work supplied in terms of the contract conform to all applicable environmental legislation. Where work is done on the *Employer's* site, the goods, services or work supplied also conforms to the *Employer's* environmental specifications.

Waste from the cleaning and maintenance of equipment

The *Contractor* is responsible to contain all waste due to cleaning and maintenance of equipment and disposes of as described below.

Stockpiling of waste

Waste is removed promptly to the designated deposit areas. No stockpiling is permitted.

Hazardous waste

Waste declared as hazardous substances in terms of the Hazardous Substances Act no 15 of 1973 is the responsibility of the *Contractor* to ensure safe removal from the property to a registered Class 1 site

Pest Control

Only approved herbicides with a low environmental risk shall be used for pest control.

Only registered pest controllers may apply herbicides on a commercial basis.

Application of herbicides shall be in accordance with the Fertilisers, Farm Feeds, Agricultural Remedies and Stock Remedies Act 36 of 194.

Water Conservation

Incidents related to water pollution must be reported to the Eskom environmental department within 24 hours.

Report / fix leaking taps and pipes to save water.

Use water sparingly.

Chemical substances shall not be disposed of in waste water or storm water drains.

Air Pollution

Dust suppression measures must be in place to reduce airborne dust.

Noxious and offensive odours arising from work activities shall be adequately controlled.

Ground Pollution

Measures to prevent or control ground contamination shall be put in place e.g. drip trays, bund walls.

Spill containment, clean-up and ground rehabilitation shall be done as per Kriel procedures

5.5 Cooperating with and obtaining acceptance of others

Interface with Others

It is likely that other *Contractors* will be working in the same area. Others might however from time to time require limited access to the same area in order to execute maintenance activities and the *Contractor* is to be accommodating in such instances.

Planning

Programmes are submitted in hard and electronic copy. The software package is MS Projects, Open Plan or equivalent, accepted by the *Service Manager*.

Progress report

A Report will be submitted to the *Service Manager* as and when requested.

Completion

Contractor to submit a completion certificate after each task is complete.

Final completion certificate of contract must be submitted at the end of Contract period.

Requirements for Completion.

Completion is when the *Contractor* has done all the work, which the Works Information states he is to do by the Completion Date and has corrected notified Defects, which would have prevented the *Employer* from using the works.

The Site is handed back to the *Employer* in a condition acceptable to the *Service Manager*.

5.6 Records of *Contractor's* Equipment

- All equipment and tools needs to be marked and a list off all tools with the identification number to be provided to the *Service Manager* when entering site.
- All lost equipment and tools to be declared to the *Service Manager* and full details of incident.
- *Contractor's* equipment (Cellphones with Camera's, Computers, Camera's etc) to be declared and signed in at security.
- All test equipment must be calibrated and tested regularly and certificates must be handed in to the *Service Manager* for record keeping

All equipment and appliances

All equipment or appliances used by the *Contractor* conforms to the applicable South African Safety Standards and is maintained in safe and proper working condition. The *Service Manager* has the right to stop the *Contractor's* use of any equipment or appliance that in the *Service Manager's* opinion does not conform to the foregoing. The *Contractor* only employs skilled persons, certified in terms of the relevant acts.

5.7 Equipment provided by the *Employer*

- All rigging equipment over five tons to be provided by the *Employer* and to be used under Eskom supervision.

5.8 Site services and facilities

5.8.1 Provided by the *Employer*

- The *Employer* supplies 220 & 380 V AC power supply at existing points for the purpose of the works only
- The *Employer* supplies portable water for the purpose of the works, at existing points and in reasonable quantities. Uninterrupted supply is not guaranteed and is not grounds for compensation events.
- *Employer* will provide facilities (such as toilets).
- Scaffolding where needed and must be planned 2 days upfront for non-emergent work
- Working space / area
- Gas test and environmental certificate
- All *Employers* required training will be provided by the *Employer*.

5.8.2 Provided by the *Contractor*

- The *Contractor* must supply own certified rigging equipment's up to 5Tons (Chain blocks, Pull lifts, Nylon slings and wire slings and other rigging equipment as required to perform the scope of work)
- *Contractor* to provide and ensure safe transportation services for all his *Contractors* employees and it must comply with 32-93 and 33-345 procedures.
- *Contractor* to provide its own water bags on an as and when required, when performing load testing.
- Access permits [Refer to procedure: Access Control at Eskom premises (32-1134)]
- *Contractor* to provide own (coffee, sugar, milk, tea, etc.)
- All computers and printers accessories needed to be provided by the *Contractor*.
- All PPE to be provided by *Contractor* at own costs for all weather types and must be SABS approved and meet Eskom standards.
- Gloves and dusk masks will supplied by the *Contractor*.
- Provide SABS approved Safety harnesses as per Eskom Safety requirements and must be inspected daily and logged.
- *Contractor* will provide a Method Statement to explain how the SOW will be executed and this must form part of the Tender returnable.

- Provide a full detailed Technical Method Statement with regard to how repair/refurbishment of ash pumps will be done.
- The *Contractor* makes his own arrangements for accommodation and meals.
- The *Contractor* provides his own cell phone and the cost thereof.
- The *Contractor* will be responsible for all none Eskom telephone calls, faxes and internet usages.
- *Contractor* to provide 2 x (380VAC 63 Amp) 50m extensions. Extensions must be COC certified.
- *Contractor* to provide barricading for no-entry in works areas.
- In areas where normal weights cannot be used water bags must be supplied by the *Contractor*
- The *Contractor* to provide dye penetrant at own cost for crack testing

5.9 Control of noise, dust, water and waste

- All necessary and relevant PPE must be used at all time when entering or working on plant.
- Work Permit Risk Assessment forms must be completed before commencing with any task.
- All relevant procedures to be used at all times.

5.10 Hook ups to existing works

5.10.1 Constraints on how the *Contractor* provides the service

- The *Employer* reserves the right to have any of the *Contractor's* personnel removed off site without cancelling the contract if, in the *Employer's* opinion, it is warranted.
- The *Employer* reserves the right to terminate the contract, once 3 non-conformances / Performance Improvement Report (PIR / NCR) are raised against the *Contractor*.
- The *Employer* reserves the right to request disciplinary / corrective action if, and when, required.
- The *Contractor* must submit Curriculum Vitae's of its entire staff prior to work commencing on site.
- The *Contractor* must submit valid, certified copies of qualifications and or certificates of its entire staff prior to work commencing on site.
- The *Contractor* will be responsible for the full payment of the legislative training costs for every employee at the *Contractor's* cost, in the event that the employee have to redo the training due to failing at the first attempt as well as the subsequent attempts that follows until the employee is authorised.
- Eskom carries no responsibility for unforeseen delays unless such a delay is negotiated within 24 hours of the occurrence and written agreement is submitted by Eskom.
- All known *services* will be brought to the attention of the *Contractor* by the *Service Manager*. Should the *Contractor* encounter any other *services* in the work area, he will immediately bring it to the attention of the *Service Manager* who will issue instructions as to what actions are to be taken.
- The contract will strictly be in accordance with the NEC TSC3. Early warnings, compensation events etc. are to be notified to the delegated personnel such as Service Manager.

5.10.2 Qualifications (Note – the below mentioned will change from time to time based on the skills required per contract)

Minimum qualifications requirements of people employed by the *Contractor* are as follows:

- Qualified Belt Splicers
- Qualified Supervisor
- Semi-skilled must be able to read and write

5.11 Tests and inspections

5.11.1 Description of tests and inspections

- Quality Control check sheets to be done between *Contractor* and *Employer*

5.11.2 Materials facilities and samples for tests and inspections

- QC check sheets
- Material used for splicing
- Equipment used for splicing

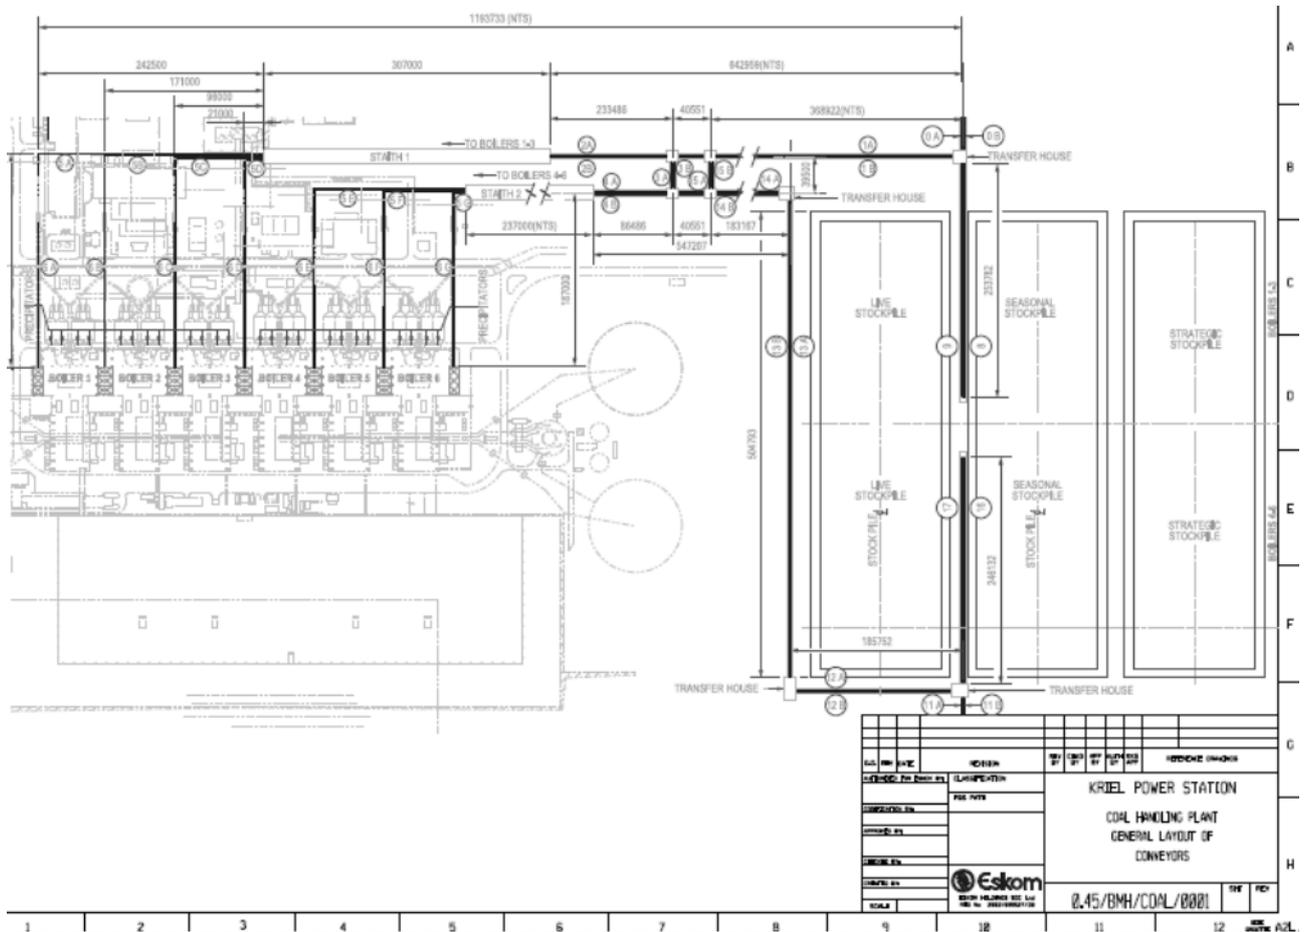

5.11.3 Warranty on Load tests

N/A

6 List of drawings

6.1 Drawings issued by the Employer

- All relevant drawings can be obtained from the *Service Manager* or Eskom Supervisor.

7.1 Low Service Table

X17 Low Service Table				
ITEM	DESCRIPTION OF TASK	QUALITY OF PERFORMANCE	REASON FOR DAMAGES	DAMAGES TO BE IMPLEMENTED
Damaged components	Any Damaged equipment during splicing	Repair all damages incurred by contractor	Environmental, Production	The <i>Contractor</i> will replace the damaged component at its own Cost
