Subject: OIL SPILLAGE CONTRACT

1. INTRODUCTION

The contract is for the appointment Spillage cleaning supplier to render services for the Eskom Rotek Industries, Transformer and Switchgear Services on an as and when required basis for the period of 60 months(5 years). Contract includes cleaning of oil and diesel spillages, remediation of the contaminated soil as well as the transportation of the waste material and disposing of the material.

2. SCOPE OF WORK/SPECIFICATION

T&SS is an essential and strategic link in the service provision of Eskom, who has the responsibility to operate and maintain an ever-increasing fleet of generation, transmission, and distribution assets. T&SS provides essential and strategic repair, maintenance, refurbishment, transformer oil circulation and related engineering services, both on site as well as at our workshop facility in Rosherville, while doing these activities arises the risk of oil spillages.

The scope of work as envisaged is to proactively cater for any oil spillage or any environmental threatening incident that might occur while executing business operations countrywide. This contract will mitigate and minimize the business exposure to environmental transgression and possible litigation.

Specifications of spillages to be cleaned:

- Oil Spillages
- Diesel Spillages
- Time Frame: The service will be required as and when there is spillage.

Tel: +27 11 629 4973
Fax:
Cell: +27 83 240 7211
E-mail: TsimanTS@eskom.co.za

Sites: The response will be required in all 9 provinces of South Africa

- Provision of Spillage kits in remote areas.

2.1 Functional and Performance Specification: The supplier should be able to:

- Clean up hazardous chemical spillages
- Conduct Bio-remediation and restoration of polluted and contaminated sites
- 24 hour response
- Registered to transport and dispose hazardous waste at registered landfill sites.
