

SECTION A: JBCC PRINCIPAL BUILDING AGREEMENT

DEFINITIONS

1 A1.0 DEFINITIONS AND INTERPRETATION

Clause 1.0

Clause 1.1 Definition of "**Commencement Date**" is added:

"COMMENCEMENT DATE" means the date that is 5 working days after site hand over.

Clause 1.1 Definition of "**Construction Guarantee**" is amended by replacing it with the following:

"CONSTRUCTION GUARANTEE" means a guarantee at call obtained by the **contractor** from an institution approved by the **employer** in terms of the **employer's** construction guarantee form as selected in the **schedule**

Clause 1.1 Definition of "**Construction Period**" is amended by replacing it with the following:

"CONSTRUCTION PERIOD" means the period commencing on the **commencement date** and ending on the date of **practical completion**

Clause 1.1 Definition of "**Corrupt Practice**" is added:

"CORRUPT PRACTICE" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution

Clause 1.1 Definition of "**Fraudulent Practice**" is added:

Carried to Collection

Section No. 1

Bill No. 1

PRELIMINARIES AND GENERAL

**QANQISO JUNIOR SECONDARY SCHOOL
PROVISIONAL BILLS OF QUANTITIES**

R

"FRAUDULENT PRACTICE" means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of any tenderer and includes collusive practice among tenderers (prior to or after the tender submission) designed to establish tender prices at artificial non-competitive levels and to deprive the tenderer of the benefits of free and open competition

Clause 1.1 Definition of **"Interest"** is amended by replacing it with the following:

"INTEREST" means the interest rates applicable on this contract, whether specifically indicated in the relevant clauses or not, will be in terms of the legislation of the Republic of South Africa, and in particular:

(a) in respect of interest owed by the employer, the interest rate as determined by the Minister of Justice and Constitutional Development from time to time, in terms of section 1(2) of the Prescribed Rate of Interest Act, 1975 (Act No. 55 of 1975), will apply;

and

(b) in respect of interest owed to the employer, the interest rate as determined by the Minister of Finance, from time to time, in terms of section 80(1)(b) of the Public Finance Management Act, 1999 (Act No. 1 of 1999), will apply

Clause 1.1 Definition of **"Principal Agent"** is amended by replacing it with the following:

"PRINCIPAL AGENT" means the person or entity appointed by the **employer** and named in the **schedule**. In the event of a **principal agent** not being appointed, then all the duties and obligations of a **principal agent** as detailed in the **agreement** shall be fulfilled by a representative of the **employer** as named in the **schedule**

Clause 1.1 Definition of **"Security"** is amended by replacing it with the following:

Carried to Collection

R

The contractor shall take such precautions and security measures and other steps for the protection and security of the works as the contractor may deem necessary (b) The contractor shall at all times proceed immediately to remove or dispose of any debris arising from damage to or destruction of the works and to rebuild, restore, replace and/or repair the works (c) The employer shall carry the risk of damage to or destruction of the works and materials paid for by the employer that is the result of the excepted risks as set out in 10.6 (d) Where the employer bears the risk in terms of this contract, the contractor shall, if requested to do so, reinstate any damage or destroyed portions of the works and the costs of such reinstatement shall be measured and valued in terms of 32.0 hereof		
	Carried to Collection Section No. 1 Bill No. 1 PRELIMINARIES AND GENERAL QANQISO JUNIOR SECONDARY SCHOOL PROVISIONAL BILLS OF QUANTITIES		R

10.6 Injury to Persons or loss of or damage to Properties

- (a) The **contractor** shall be liable for and hereby indemnifies the **employer** against any liability, loss, claim or proceeding whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever arising out of or in the course of or caused by the execution of the **works** unless due to any act or negligence of any person for whose actions the **employer** is legally liable
- (b) The **contractor** shall be liable for and hereby indemnifies the **employer** against any liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the **site**, whether belonging to or under the control of the **employer** or any other body or person, arising out of or in the course of or by reason of the execution of the **works** unless due to any act or negligence of any person for whose actions the **employer** is legally liable
- (c) The **contractor** shall, upon receiving a **contract instruction** from the **principal agent**, cause the same to be made good in a perfect and workmanlike manner at his own cost and in default thereof the **employer** shall be entitled to cause it to be made good and to recover the cost thereof from the **contractor** or to deduct the same from amounts due to the **contractor**
- (d) The **contractor** shall be responsible for the protection and safety of such portions of the premises placed under his control by the **employer** for the purpose of executing the **works** until the issue of the **certificate of practical completion**

Carried to Collection

R

Section No. 1

Bill No. 1

PRELIMINARIES AND GENERAL

**QANQISO JUNIOR SECONDARY SCHOOL
PROVISIONAL BILLS OF QUANTITIES**

- (e) Where the execution of the **works** involves the risk of removal of or interference with support to adjoining properties including land or structures or any structures to be altered or added to, the **contractor** shall obtain adequate insurance and will remain adequately insured or insured to the specific limit stated in the contract against the death of or injury to persons or damage to such property consequent on such removal or interference with the support until such portion of the **works** has been completed
- (f) The **contractor** shall at all times proceed immediately at his own cost to remove or dispose of any debris and to rebuild, restore, replace and/or repair such property and to execute the **works**

10.7 High risk insurance

In the event of the project being executed in a geological area classified as a "High Risk Area", that is an area which is subject to highly unstable subsurface conditions that might result in catastrophic ground movement evident by sinkhole or doline formation the following will apply:

10.7.1 Damage to the works

The **contractor** shall, from the **commencement date** of the **works** until the date of the **certificate of practical completion** bear the full risk of and hereby indemnifies and holds harmless the **employer** against any damage to and/or destruction of the **works** consequent upon a catastrophic ground movement as mentioned above. The **contractor** shall take such precautions and security measures and other steps for the protection of the **works** as he may deem necessary

When so instructed to do so by the **principal agent**, the **contractor** shall proceed immediately to remove and/or dispose of any debris arising from damage to or destruction of the **works** and to rebuild, restore, replace and/or repair the **works**, at the **contractor's** own costs

10.7.2 Injury to persons or loss of or damage to property

The **contractor** shall be liable for and hereby indemnifies and holds harmless the **employer** against any liability, loss, claim or proceeding arising at any time during the period of the contract whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of, or caused by a catastrophic ground movement as mentioned above

The **contractor** shall be liable for and hereby indemnifies the **employer** against any and all liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the **site**, whether belonging to or under the control of the **employer** or any other body or person whomsoever arising out of or caused by a catastrophic ground movement, as mentioned above, which occurred during the period of the contract

10.7.3 It is the responsibility of the **contractor** to ensure that he has adequate insurance to cover his risk and liability as mentioned in 10.7.1 and 10.7.2. Without limiting the **contractor's** obligations in terms of the contract, the **contractor** shall, within twenty-one (21) **calendar days** of the **commencement date** but before commencement of the **works**, submit to the **employer** proof of such insurance policy, if requested to do so

10.7.4 The **employer** shall be entitled to recover any and all losses and/or damages of whatever nature suffered or incurred consequent upon the **contractor's** default of his obligations as set out in 10.7.1; 10.7.2 and 10.7.3. Such losses or damages may be recovered from the **contractor** or by deducting the same from any amounts still due under this contract or under any other contract presently or hereafter existing between the **employer** and the **contractor** and for this purpose all these contracts shall be considered one indivisible whole

SECTION C: SPECIFIC PRELIMINARIES

Section C contains specific preliminary items which apply to this contract except where N/A (Not Applicable) appears against an item

1 C1.0 CONTRACT DRAWINGS

The drawings issued with the tender documents do not comprise the complete set but serve as a guide only for tendering purposes and for indicating the scope of the work to enable the tenderer to acquaint himself with the nature and extent of the **works** and the manner in which they are to be executed

Should any part of the drawings not be clearly understood by the tenderer he shall, before submitting his tender, obtain clarification in writing from the **principal agent**

Fixed: _____ Value related: _____
Time related: _____

Item

2 C2.0 GENERAL PREAMBLES

The document "Specification of Materials and Methods to be used - PW371 - A Edition 2.1 - Construction Works: Specifications, General Specification" as published by the Department of Public Works (Edition 2.1 July 2014)." is obtainable on the Department's website (<http://www.publicworks.gov.za/> under "Consultants Guidelines"), and shall be read in conjunction with the **bills of quantities / lump sum document** and be referred to for the full descriptions of work to be done and materials to be used

Item

2 **C4.0 HIV/AIDS AWARENESS**

It is required of the **contractor** to thoroughly study the HIV/AIDS Specification (PW 1544) of the Department that must be read together with and is deemed to be incorporated under this Section of the **bills of quantities / lump sum document**. Provision for pricing of HIV/AIDS awareness is made under items C10.1 to C10.5 hereafter and it is explicitly pointed out that all requirements of the aforementioned specification are deemed to be priced hereunder, as the said items represent the only method of measurement and no additional items or extras to the contract in this regard shall be entertained

The **contractor** must take note that compliance with the HIV/AIDS Specification is compulsory. In the event of partial or total non-compliance, the **principal agent**, notwithstanding the provisions of clause A 31.0 of Section A or any other clause to the contrary, reserves the right to delay issuing any progress **payment certificate** until the **contractor** provides satisfactory proof of compliance. The **contractor** shall not be entitled to any compensation of whatsoever nature, including interest, due to such delay of payment

SHOP DETAILS

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

- 1 The Contractor is to allow hereunder for any costs incurred for the preparation and/or approval of shop drawings for the "Block C - 4 Classroom block "prefabricated building for the contract.

Item

Prefabricated Units

Note: The contractor it to take note of all the items above when pricing the prefabricated structure.

The contractor will be liable for the completion of any item that is not supplied by the prefabrication sub contractor.

- 2 Supply, transport and erect of 3 Classroom block size 25800 x 8510mm consisting of the following :

1. Classroom 1 (59.5m²)
2. Classroom 2 (59.5m²)
3. Classroom 3 (59.5m²)

Roof structure to be a minimum of 11 degree pitch with a overhang of 300mm on one side and 1500mm the other side over verandah.

The roof is to consist of all necessary lattice ridge beams fixed to gable walls with 4 x 10 x 60mm galvanised bolts, washers and nuts on each side. See attached drawing : (505 - Roof panels to lattice beam detail.)

The roof is to consist of all required beams, supports, etc fixed to columns (elsewhere) for the overhang sections at the entrances and verandah areas of the building

The roof covering composite panel to consist of 0.6mm galvanised pre painted IBR chromadek external surface, 50mm expanded polystyrene core and 0.5mm chromadek plain white sheet soffit.

External and internal 1.2mm galvanised ridge plates to be placed on the surfaces where the roof panels join including fixing to the panel with 4.8 x 18mm sealed rivets fixed at 400mm centres on both sides and fixed to ridge beam with 4 x 8 x 125mm posidrive screws per a panel.

Roof covering to include all ridge flashing, 1.2mm apex splines, closure flashing, powder coated eave cappings, drip flashing and narrow and broad flute closures with polybuttons to be formed from 0.58mm Chromadek including rivets, bolts and drywall screws, etc. (See attached drawing 500- corner detail- horizontal section & 501 Roof/ Wall Assembly Vertical Section)

10 x 75 x 225mm Upvc Bargeboard drilled and fixed to composite panel at verges with 75mm hex posidriver screws at 600mm centres including galvanised steel H-profile jointing strips, etc.

85 x 125mm Powder coated seamless aluminium gutter fixed to proprietary fascia at maximum 600mm centres with and including proprietary fixings.

Four x 75 x 100mm x 2700mm long Powder coated seamless aluminium downpipes fixed to composite panels with and including proprietary holder bat and accessories.

All units to be wired to connect to 220volt single phase (connection and supply elsewhere). The electrical installation to be in accordance with SABS 0142-1993 and each unit fitted with a wiring kit consisting of a distribution board, earth leakage , lights , switches, socket outlets and air conditioner isolators. All lights, plugs, geysers, interior and exterior electrical fittings to be insulated in accordance with SABS 0142-1993. Electrical compliance certificate to be issued with each unit.

One double tube fluorescent light per 7m2 floor area.

SHOP DETAILS

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

- 1 The Contractor is to allow hereunder for any costs incurred for the preparation and/or approval of shop drawings for the "5 Classroom block "prefabricated building for the contract.

	<u>BILL No. 5</u>			
	<u>GRADE R CLASSROOM BLOCK</u>			
	<u>Note:</u> For Preambles see "PW 371 - A Edition 2.1 - Construction Works: Specifications, General Specification" as published by the Department of Public Works (Edition 2.1 July 2014). <u>Construction Notes:</u> All construction materials are to be SABS or AGREEMENT South Africa Certified'. Prefabricated systems are to be presented to the Principal Agent for approval before construction commences. Concrete strip footings and slab to be constructed by the main contractor. Chassis construction must run the full length and full width of the unit and consist of structurally welded steel chassis with minimum of 2 x 200 x 75 x 20 x 3mm lip channel longitudinal main members running the length of the building at 1640mm centres, 75 x 50 x 20 x 2.5mm lipped channel cross members set at maximum of 600mm centres. Steps to be supplied where applicable. All structural steel is to be coated with one coat red oxide primer and two coats latex paint. The chassis is to be fixed to the slab with 6mm x 50mm long masonry anchors at 500mm centers and including non-shrink grout.			
	Carried to Collection		R

External walls to be constructed of 42mm Chromadeck composite laminated polyurethane core panel interlocking system with tongue and groove interlocking joints sealed with an approved silicon sealant including fixing panels mechanically to base rail as per manufactures specifications.

External walls to be finished both sides with 0.5mm pre-painted "Frost white" hot dipped galvanised steel rigidised Chromadek sheeting.

Top of external walls to be fixed to the underside of the roof panel with natural anodised extruded aluminium side wallplate fixed to external wall including pop rivets at 150mm centres and 90mm long roof screws at 450mm centers through both panels. (See attached drawing 501- Roof/Wall Assembly Vertical Sections) .

All corner, edge and ridge capping, etc to be formed from 0.58mm Chromadek including rivets, sealant, etc.

All windows to be powder coated aluminium including necessary ironmongery and burglar proofing to opening sections as per schedule.

Windows to be glazed with 6,38mm Thick normal strength clear laminated safety glass including gaskets.

Ablution windows to be fitted with obscure or frosted glazing.

The perimeter of the frame to the adjacent surface to be sealed with an approved polysulphide sealant.

SHOP DETAILS

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

- 1 The Contractor is to allow hereunder for any costs incurred for the preparation and/or approval of shop drawings for the "Grade R classroom block "prefabricated building" for the contract.

Item

Prefabricated Units

Note: The contractor it to take note of all the items above when pricing the prefabricated structure.

The contractor will be liable for the completion of any item that is not supplied by the prefabrication sub contractor.

- 2 Supply, transport and erect of Grade R Classroom block size 10040 x 9550mm consisting of the following :
- 1.Classroom 1 (50.77m2)
 - 2.Teachers Area 01a (10.57m2)

SHOP DETAILS

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

- 1 The Contractor is to allow hereunder for any costs incurred for the preparation and/or approval of shop drawings for the "Science, Media and Computer Classroom "prefabricated building for the contract.

Item

Prefabricated Units

Note: The contractor it to take note of all the items above when pricing the prefabricated structure.

The contractor will be liable for the completion of any item that is not supplied by the prefabrication sub contractor.

- 2 Supply, transport and erect of Multi-Media and Science Block size 23030 x 8545mm consisting of the following :

- 1.Computer room 02 (41.55m2)
- 2.Server Room 02a (8.78m2)
- 3.Work Room 02b (11.72m2)
- 4.Work Room 03a (11.66m2)
- 5.Store Room 03b (8.77m2)
- 6.Science lab 03c (34.55m2)

R

Roof structure to be a minimum of 11 degree pitch with a overhang of 300mm on side and 1500mm the other side over verandah.

The roof is to consist of all necessary lattice ridge beams fixed to gable walls with 4 x 10 x 60mm galvanised bolts, washers and nuts on each side. See attached drawing : (505 - Roof panels to lattice beam detail.)

The roof is to consist of all required beams, supports, etc fixed to columns (elsewhere) for the overhang sections at the entrances and verandah areas of the building

The roof covering composite panel to consist of 0.6mm galvanised pre painted IBR chromadek external surface, 50mm expanded polystyrene core and 0.5mm chromadek plain white sheet soffit.

External and internal 1.2mm galvanised ridge plates to be placed on the surfaces where the roof panels join including fixing to the panel with 4.8 x 18mm sealed rivets fixed at 400mm centres on both sides and fixed to ridge beam with 4 x 8 x 125mm posidrive screws per a panel.

Roof covering to include all ridge flashing, 1.2mm apex splines, closure flashing, powder coated eave cappings, drip flashing and narrow and broad flute closures with polybuttons to be formed from 0.58mm Chromadek including rivets, bolts and drywall screws, etc.

10 x 75 x 225mm Upvc Bargeboard drilled and fixed to composite panel at verges with 75mm hex posidriver screws at 600mm centres including galvanised steel H-profile jointing strips, etc.

85 x 125mm Powder coated seamless aluminium gutter fixed to proprietary fascia at maximum 600mm centres with and including proprietary fixings.

Four x 75 x 100mm x 2700mm long Powder coated seamless aluminium downpipes fixed to composite panels with and including proprietary holderbat and accessories.

R

Internal walls to be constructed of 42mm Chromadeck composite laminated polyurethane core panel interlocking system with tongue and groove interlocking joints sealed with an approved silicon sealant including fixing panels mechanically to base rail as per manufactures specifications.

Internal walls to be finished both sides with 0.5mm pre-painted "Frost white" hot dipped galvanised steel rigidised Chromadek sheeting.

Bottom of internal walls to be fitted with a aluminium base channel with 4 x 9mm rivets at 300mm centres on both sides and fixed to the floor slab with 6 x 50mm masonry anchors at 500mm centres including non-shrink grout.(See attached drawing 502- Internal Wall Base Detail)

Top of internal walls to be fixed to the underside of the roof panel with natural anodised extruded aluminium side wallplate fixed to internal wall including pop rivets at 450mm centres and 5.2 x 90mm long roof screws at 1000mm centers through both panels.

All corner, edge and ridge capping, etc to be formed from 0.58mm Chromadek including rivets,sealant, etc.

Internal door frames to be natural anodized aluminium fitted with neoprene gaskets.

Single external doors to be 40mm Solid core flush door, size 936 x 2032mm high, with commercial grade veneer both sides and concealed edge strips, each door to be fitted with the following ironmongery :

1. Three 100 x 44mm sinkless aluminium butt hinges
 - 2." 2209 - 78SS" Euro profile upright cylinder lock case
 - 3." 2 x 18 SC" Satin chrome double cylinder lock mechanism
 4. Heavy duty satin chrome lever handle on 165 x 50 x 8mm cast backplate with cylinder lockset cutout
 5. Perspex signs with painted numerals or letters, countersunk tap screwed to doors
 6. Black rubber door stop plugged to wall or floor.
- All lock sets are to be master keyed.

All doors to be finished with apply, one coat pre treatment one coat pink wood primer, one undercoat and two coats water based eggshell enamel.

Floor finishes to following areas :

1.Multipurpose Classroom (83.03m2): 300 x 300 x 2,5mm Semi-flexible reinforced vinyl quartz floor tiles (screed elsewhere) with 23 x 73mm varnished meranti half round skirting plugged to perimeter of wall with 4.8mm counter sunk pop rivets at 400mm centres including sealing top and bottom of skirting with an approved anti-fungicidal silicone sealant.

2.Equipment Store (10.50m2): 300 x 300 x 2,5mm Semi-flexible reinforced vinyl quartz floor tiles (screed elsewhere) with 23 x 73mm varnished meranti half round skirting plugged to perimeter of wall with 4.8mm counter sunk pop rivets at 400mm centres including sealing top and bottom of skirting with an approved anti-fungicidal silicone sealant.

3.Store (10.50m2): 300 x 300 x 2,5mm Semi-flexible reinforced vinyl quartz floor tiles (screed elsewhere) with 23 x 73mm varnished meranti half round skirting plugged to perimeter of wall with 4.8mm counter sunk pop rivets at 400mm centres including sealing top and bottom of skirting with an approved anti-fungicidal silicone sealant.

Internal plumbing fittings :

1. Multipurpose Classroom : Laboratory sink installation

Rectangular laboratory sink without overflow, size 435 x 335mm, with centre end waste outlet and acid resistant waste, mounted to joinery fitting (elsewhere) on and including two proprietary adjustable brackets including :

40mm Chromium plated brass basin bottle trap.

"Cobra Capstan CS - 215/044 CP" or other equal approved chromium plated one hole sink pillar tap with aerated swanneck swivel outlet.

Internal soil drainage reticulation to be uPVC pipes and fittings with solvent welded straight joints taken to outer wall of building.

Internal water reticulation to be Class 2 copper piping including all capillary fittings with soldered joints and completion fittings taken to the other wall of the building.

All exposed hot water piping and fittings to be fitted with Preformed polyethylene foam lagging or similar approved insulation wrapped lagging.

All units to be wired to connect to 220volt single phase (connection and supply elsewhere). The electrical installation to be in accordance with SABS 0142-1993 and each unit fitted with a wiring kit consisting of a distribution board, earth leakage , lights , switches, socket outlets and air conditioner isolators. All lights, plugs, geysers, interior and exterior electrical fittings to be insulated in accordance with SABS 0142-1993. Electrical compliance certificate to be issued with each unit.

One double tube fluorescent light per 7m2 floor area.

SHOP DETAILS

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

- 1 The Contractor is to allow hereunder for any costs incurred for the preparation and/or approval of shop drawings for the "Multi-Purpose Classroom "prefabricated building for the contract.

Item

Prefabricated Units

Note: The contractor it to take note of all the items above when pricing the prefabricated structure.

The contractor will be liable for the completion of any item that is not supplied by the prefabrication sub contractor.

- 2 Supply, transport and erect of Multi-Purpose Classroom Block size 15030 x 8510mm consisting of the following :
- 1. Multipurpose Classroom (83.03m²)
 - 2. Equipment Store (10.50m²)
 - 3. Store (10.50m²)

1	<u>Tests</u> Allow for Mod AASHTO density tests on filling. <u>PREFABRICATED BUILDINGS</u> <u>Construction Notes:</u> Platforms to be prepared by the main contractor All construction materials are to be SABS or AGREEMENT South Africa Certified'. Prefabricated systems are to be presented to the Principal Agent for approval before construction commences. Prefabricated structures to be places on adjustable jacks and concrete pads as per the manufactures specifications. Chassis construction must run the full length and full width of the unit and consist of structurally welded steel chassis with minimum of 2 x 200 x 75 x 20 x 3mm lip channel longitudinal main members running the length of the building at 1640mm centres, 75 x 50 x 20 x 2.5mm lipped channel cross members set at maximum of 600mm centres. Steps and ramps to be supplied where applicable. All structural steel is to be coated with one coat red oxide primer and two coats latex paint. The chassis is to fixed to the adjustable jack trusses Floor construction to be constructed from 18mm 7-Ply rotary cut pine bonded under heat and hydraulic pressure with exterior grade adhesive. All floors to have 6mm groove feather join screwed to chassis cross members with 12 x 45mm galvanized wing tex screws. Floor finishers to classroom units to be covered with 2.5mm vinyl floor sheeting.	No	5.00	
	Carried to Collection Section No. 5 Bill No. 1 TEMPORARY STRUCTURES QANQISO JUNIOR SECONDARY SCHOOL PROVISIONAL BILLS OF QUANTITIES		R	

External walls to be constructed of 42mm Chromadeck composite laminated polyurethane core panel interlocking system with tongue and groove interlocking joints sealed with an approved silicon sealant including fixing panels mechanically to base rail as per manufactures specifications.

External walls to be finished both sides with 0.5mm pre-painted "Frost white" hot dipped galvanised steel rigidised Chromadek sheeting.

Top of external walls to be fixed to the underside of the roof panel with natural anodised extruded aluminium side wallplate fixed to external wall including pop rivets at 150mm centres and 90mm long roof screws at 450mm centers through both panels. (See attached drawing 501- Roof/Wall Assembly Vertical Sections)

All corner, edge and ridge capping, etc to be formed from 0.58mm Chromadek including rivets, sealant, etc.

All windows to be powder coated aluminium including necessary ironmongery and burglar proofing to opening sections as per schedule.

Windows to be glazed with 6,38mm thick normal strength clear laminated safety glass including gaskets.

Ablution windows to be fitted with with obscure or frosted glazing.

The perimeter of the frame to the adjacent surface to be sealed with an approved polysulphide sealant.

All windows to be the office windows to be fitted with blinds

R

External door frames to be powder coated aluminium fitted with neoprene gaskets.

Single external doors to be 0.5mm 44mm Thick framed, ledged, braced and battened stable door, size 813 x 2032mm high, the top leaf comprising 44 x 108mm stiles, top and bottom rails, the bottom leaf comprising 44 x 108mm stiles and top rail and 22 x 215mm bottom rail, both leaves fitted with 22 x 75mm diagonal braces and 44 x 70mm splayed and rebated weatherboards countersunk brass screwed on at maximum 200mm centres and filled with 22mm thick tongued, grooved and V-jointed both sides vertical boarding in narrow matched widths,
each door to be fitted with the following :

1. Three 100 x 44mm sinkless aluminium butt hinges
2. 2209 - 78SS" Euro profile upright cylinder lock case
3. 2 x 18 SC satin chrome double cylinder lock mechanism
4. Heavy duty satin chrome lever handle on 165 x 50 x 8mm cast backplate with cylinder lockset cutout.
5. Splayed and rebated weatherboard fixed to the bottom of the door
6. Stainless steel buffered door stop.

All doors to be finished with apply, one coat pre treatment one coat pink wood primer, one undercoat and two coats water based eggshell enamel.

All lock sets are to be master keyed.

Double pitched roof trusses with a minimum pitch of 15 degrees and a overhang of 200mm both sides. Roof covering to be 0.6mm Galvanized pre-painted corrugated chromadek sheeting with PVC half round eaves gutter and PVC down pipes.

R

Internal walls to be constructed of 42mm Chromadeck composite laminated polyurethane core panel interlocking system with tongue and groove interlocking joints sealed with an approved silicon sealant including fixing panels mechanically to base rail as per manufactures specifications.

Internal walls to be finished both sides with 0.5mm pre-painted "Frost white" hot dipped galvanised steel rigidised Chromadek sheeting.

Bottom of internal walls to be fitted with a aluminium base channel with 4 x 9mm rivets at 300mm centres on both sides and fixed to the floor slab with 6 x 50mm masonry anchors at 500mm centres including non-shrink grout.(See attached drawing 502- Internal Wall Base Detail)

Top of internal walls to be fixed to the underside of the roof panel with natural anodised extruded aluminium side wallplate fixed to internal wall including pop rivets at 450mm centres and 5.2 x 90mm long roof screws at 1000mm centers through both panels. (See attached drawing 506- Internal Wall - Head Detail Vertical Section)

All corner, edge and ridge capping, etc to be formed from 0.58mm Chromadek including rivets,sealant, etc. (See attached drawing 500- corner detail- horizontal section)

All units to be wired to connect to 220volt single phase (connection and supply elsewhere). The electrical installation to be in accordance with SABS 0142-1993 and each unit fitted with a wiring kit consisting of a distribution board, earth leakage , lights , switches, socket outlets and air conditioner isolators. All lights, plugs, geysers, interior and exterior electrical fittings to be insulated in accordance with SABS 0142-1993. Electrical compliance certificate to be issued with each unit.

Units to be provided with magnetic chalkboards and pinning boards.

Units to be provided with stairs and ramps where necessary to access the classrooms.

R

Main contractor to provide the electrical main supply to the prefabricated units and connect to the pre-wired units.

The Contractor shall prepare his own shop details. Immediately on receipt of the Architect's drawings, the Contractor shall satisfy himself that the design drawings contain all the information required for the preparation of the shop details. The said shop details and other drawings shall be submitted in duplicate to the Architect for approval at least 1 week before commencement of fabrication. The Contractor's drawings shall be complete in every respect and shall be checked by the Contractor prior to submission. One copy of each drawing will be retained by the Architect and, within 1 week after the date of receipt by the Architect, the other copy will be returned to the Contractor with the Architect comments or written approval, as the case may be. Before the commencement of fabrication, the Contractor shall obtain from the Architect approval of the shop drawings, in writing. The approval given by the Architect relates to structural adequacy and does not absolve the Contractor from the responsibility for dimensional accuracy.

Prefabricated Units

Note: The contractor it to take note of all the items above when pricing the prefabricated structure.

The contractor will be liable for the completion of any item that is not supplied by the prefabrication sub contractor.
