## **PART C3 SCOPE OF WORKS**

**The scope of work comprises of the Supply, Install and commissioning of New Ups Batteries in the National Lotteries Commission In Pretoria Hatfield**

### **1. Turn off and unplug the UPS**

- Before you begin, turn off your UPS and disconnect it from the wall socket to prevent any electrical hazards. Also, disconnect all devices connected to the UPS.

### **2. Remove the front or top panel**

- Depending on the UPS model, you may need to remove screws to open the battery compartment. Some models might have a removable front or top panel that gives you access to the battery.

### **3. Locate the battery compartment**

- Once the panel is removed, locate the batteries. They are usually housed in a compartment with easy access to terminals for replacement.

### **4. Disconnect the old batteries**

- First, note the battery connections—this is important for correctly connecting the new ones.
- Disconnect the negative terminal (typically black) and then the positive terminal (typically red).
- If there are screws holding the battery in place, remove them and take the old battery out carefully.

### **5. Install the new batteries**

- Take the new UPS battery (or batteries, depending on your system) and carefully place them into the compartment.
- Connect the positive terminal (red cable) to the positive terminal of the new battery.
- Similarly, connect the negative terminal (black cable) to the negative terminal of the new battery.
- Ensure the connections are secure, and the terminals are tightened. Do not overtighten, as this may cause damage to the terminals

### **6. Reassemble the UPS**

- Once the new batteries are connected, replace the panel or cover, and screw it back into place.

### **7. Power on the UPS**

- Plug the UPS back into the wall socket and turn it on.
- Test the unit to ensure it is charging the batteries properly and that everything is functioning as expected.

### **8. Check for a full charge**

- Allow the UPS to charge the new batteries for several hours or as recommended by the manufacturer, even if the UPS seems to work fine right after installation.

### **9. Test the UPS functionality**

- To verify everything is in working order, you can test your UPS by unplugging it from the wall to simulate a power outage. The UPS should continue to power your connected devices.
