**DEPARTMENT OF
ECONOMIC DEVELOPMENT, ENVIRONMENT & TOURISM**

**TERMS OF REFERENCE
FOR
THE DEVELOPMENT OF LIMPOPO PROVINCIAL WASTE
ECONOMY (CIRCULAR ECONOMY) STRATEGY**

1. INTRODUCTION

- 1.1. Circular economy (CE) is emerging as a paradigm that promotes more responsible production and consumption patterns. Waste economy, also known as a circular economy, focuses on minimizing waste and maximizing resource utilization by reusing, recycling, and repurposing discarded materials. DFFE (2024) further illustrates waste economy as an economy that is restorative and regenerative by design and aims to keep products, components, and materials at their highest utility and value at all times, distinguishing between technical and biological cycles.
- 1.2. Circular Economy intends to develop a sustainable and resource-efficient economy as highlighted by Negrete-Cardoso, *et al.* (2022) in the three principles, namely: (1) preserve and enhance natural capital by controlling finite stocks and balancing renewable resource flows; (2) optimize resource yields by circulating products, components, and materials at the highest utility at all times in both technical and biological cycles; (3) foster system effectiveness by revealing and designing out negative externalities.

2. BACKGROUND AND POLICY CONTEXT

- 2.1. The Limpopo Provincial Department of Economic Development, Environment and Tourism would like to develop Provincial Waste Economy Strategy, in pursuance of Waste Phakisa resolutions and commitments. Furthermore, National Waste Management 2020, obligate that South Africa need to ensure that “implementing a waste-management system through the rapid expansion of recycling infrastructure, and encouraging the composting of organic domestic waste to bolster economic activity in poor urban communities” and to the need to “cut down on solid waste disposal as a preferred option. National Environmental Management Waste Act, 2008 (Act No. 59 of 2008), (hereinafter referred to as the “Waste Act”), preamble emphasize pollution prevention, ecological degradation, secure ecological sustainable development, which are key drivers to circular economy.
- 2.2. Section 16 and 17 of the Waste Act require that waste generators must be deliberate in pursuing circular economy in their business endeavors, whilst obligating government to ensure that all South Africans avoid, limit natural resources use and advance recycling, reuse and recovery. Limpopo expanded unemployment rate was reported at 43.1% for the first quarter of 2025. Furthermore, Limpopo's economic growth has slowed, with GDP growth declining to 0.2% in 2023 after a rebound from the pandemic, but the Limpopo Development Plan (LDP) projects a growth rate of 2.2% by 2030 by focusing on key sectors

like agriculture, mining, and tourism. Major challenges identified include high unemployment, climate change impacts on agriculture, and the detrimental effects of load shedding. Initiatives include promoting mineral beneficiation, agribusiness, and ecotourism, with recent investment pledges totaling over R120 billion to foster sustainable growth and job creation. Circular economy is at the center of ensuring that the initiatives identified in the LPG are realized

- 2.3. The process for compilation of the Strategy will be coordinated directly with the government, industry and business and communities. This proposed Circular Economy Strategy should among others be utilized as a source of information for economic development, environmental sustainability, and commitment of the Limpopo community in implementation of the LPG goals.
- 2.4. The National Waste Management Strategy 2020, and action plans also sets out clearly important aspects of waste management planning including effective waste beneficiation, waste minimization, reuse and recycling, strengthening green economy through waste management which all should form part of the Circular Economy Strategy.
- 2.5. There is increasing pressure on government, the public and industry to be more environmentally responsible, especially in terms of solid waste generation and management. National Waste Management Strategy (2020) advocates circular economy. A circular economy redefines economic growth by moving away from a take-make-waste industrial model to one that decouples economic activity from the environment and supports a just transition to renewable energy sources. The CE Strategy needs to illustrate that paradigm shift which emphasizes as these strategic entry points of the waste sector into waste minimization, waste prevention and waste as a resource,

3. **PURPOSE AND OBJECTIVES OF THE WASTE ECONOMY STRATEGY**

The Limpopo provincial government is committed to transitioning Limpopo to a circular economy. This is an ambitious goal, requiring major changes throughout the economy. Getting the transition right will generate major contributions to the Government's Missions to kickstart economic growth and to make Limpopo a waste diversion center, including accelerating to Net Zero waste.

To support the Government in achieving this goal, a Circular Economy Reference Group will be established and bring together industry, academic and policy experts with central and local government to develop an evidence-driven and actionable

Waste Economy Strategy for Limpopo. The Strategy will be underpinned by a series of roadmaps for reform in different sectors of the economy and their supply chains. The Strategy will form part of a much bigger Missions-oriented picture across the province, underpinned by the forthcoming National Waste Management Strategy, Limpopo Provincial Development Strategy, Waste Phakisa Initiatives and Climate Change Response Strategy.

The Waste Economy Strategy will complete that picture by focusing in particular on how we use our resources in the best way and to the best possible effect, deriving from them the maximum possible value before they become waste while also reducing emissions. Using our resources in this way will require major changes in behaviour and capability across the province, generating opportunities to invest in capital, technology, and jobs – and to align that investment completely with our environmental objectives.:

3.1. **PURPOSE**

The purpose of a Waste Economy Strategy *also referred to as Circular Economy Strategy* is to transform waste from a disposal problem into a valuable resource through principles of the circular economy

3.2. **OBJECTIVES OF THE CIRCULAR ECONOMY:**

- 3.3.1. Strengthen our waste economy (improved competitiveness / efficiency, local beneficiation)
- 3.3.2. Reduce dependence on resource imports (balance of trade)
- 3.3.3. Build resilience to shocks (natural or economic)
- 3.3.4. Unlock new waste economic opportunities (green industries)
- 3.3.5. Improve the sustainability of other investment (growth) areas
- 3.3.6. Create job opportunities in new economic sectors supported by waste
- 3.3.7. To minimize adverse social and environmental impacts related to waste management and thereby improve the quality of life of people;
