The Council for Geoscience (CGS) is a schedule 3A public entity organisation as defined by the Public Finance Management Act (Act 1 of 1999). The CGS derives its mandate from the Geoscience Act 100 of 1993. The objectives of the CGS under the Act are to produce world-class geoscience knowledge products and to render geoscience-related services to the South African public and industry. The strategic position of the CGS is to ensure that its activities contribute to the national imperatives, namely to free the potential of individuals by improving the quality of life of all citizens, assisting in the growth and wealth of the country and eradicating poverty, especially in the rural areas of South Africa. - 1.3 To do basic geoscience research into the nature and origin of rocks, ores, minerals and the history and evolution of life and to understand the geological evolution of the earth. These findings are published in peer-reviewed geoscience publications nationally and internationally.
- 1.4 To collect and curate all geoscience knowledge for the country into the National Geoscience Repository and to make such information available to the public as far as it is possible.
- 1.5 To render geoscience knowledge services and advice to the State to enable informed and scientifically based decisions on the use of the earth's surface and its resources within the territory of South Africa.
- 1.6 To manage several national geoscience facilities on behalf of the country such as the National Seismograph Network, the National Borehole-Core Repository, the National Geoscience Heritage Collections (Geoscience Museum) and the National Geoscience Library.
