SECTION 3: RFP SCOPE OF REQUIREMENTS

1 INTRODUCTION

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority. All divisions operating under one umbrella, Richards Bay is one of Transnet Bulk and Break Bulk handling terminal divided into two namely, DBT and MPT.

The Richards Bay Port Terminal has experienced a significant increase in coal volumes over the last three years. This surge, primarily driven by the Russia-Ukraine conflict and subsequent sanctions on Russia, has led to increased demand for South African coal. Consequently, we are seeking innovative solutions from external providers to address the challenges brought about by this growth. This document provides an overview of the current situation and invites interested parties to express their interest and provide information on potential solutions.

2 BACKGROUND

Current auxiliary services, while keeping authorities at bay, are not sustainable. A re-imagination of the port terminal is needed, introducing systemic and proactive solutions to ensure business continuity. 3 KEY OBJECTIVES OF THIS RFP PROCESS

Transnet Port Terminals Richards Bay requests for proposals from the industry regarding how a world-class, technologically advanced BOP/Conveyor solution for coal can be achieved. This is a commercial event where we intend to enter into a commercial agreement with the winning BOP facility. Transnet, at its discretion (in relation to the valuation criteria) intends to award the successful bidder and enter into a commercial agreement with them. The successful bidder will be granted access to our infrastructure through a transparent and fair process. TPT Port Terminals will engage with interested parties and its customer base to ensure a fair, painless, and considerate transition.

1 REQUEST FOR PROPOSAL (RFP) OVERVIEW

1.1 Executive Overview

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority. All divisions operate under one umbrella, Richards Bay is one of Transnet Bulk and Break Bulk handling terminal divided into two namely, DBT and MPT.

The Richards Bay Port Terminal has experienced a significant increase in coal volumes over the last three years. This surge, primarily driven by the Russia-Ukraine conflict and subsequent sanctions on Russia, has led to increased demand for South African coal. Consequently, we are seeking innovative solutions from external providers to address the challenges brought about by this growth. This document provides an overview of the current situation and invites interested parties to express their interest and provide information on potential solutions.

1.2 Background

Over the past three years, the Richard's Bay Port Terminal has seen a sharp increase in coal volumes handled annually. The international price of coal rose from a low of USD 38.45 per ton in April 2020 to a high of USD 439 per ton in September 2022, reflecting an average growth of 456%. The terminal's coal volume throughput increased from a design capacity of 4 million tons to 11 million tons per annum (MPT and DBT combined).

1.3 Negative Impact of Coal Volume Growth

1.3.1 Increased Number of Trucks

The increased coal volume has resulted in a high number of trucks transacting with the terminal. The terminal's road infrastructure and stormwater system, including sedimentation ponds, were not designed to handle this volume. Recent challenges include:

- Non-functional stormwater drainage systems.
- Contamination of soil from waste and cargo stored in unpaved and undesignated areas.
- Air pollution affecting employees and surrounding communities.
- Marine pollution, risking the TNPA's dredging license.

1.3.2 Shift from Design

Originally, the RCB Terminal, comprising two terminals in one, was designed for distinct purposes:

- The Dry Bulk Terminal (DBT) handled export bulk commodities (coal, chrome, magnetite, mineral sands, woodchips) and import bulk commodities (sulphur, alumina, Petcoke, etc.), with coal handled via a conveyor servitude from a Grindrod BOP established.
- The Multi-Purpose Terminal (MPT) handled non-bulk commodities (containers, granite, steel piles, etc.).

The terminal now primarily appears as a coal bulk terminal, deviating from its original design.

1.3.3 Unplanned Auxiliary Expenditure

While the terminal has generated significant revenue, it has also faced unplanned expenditure on interventions to address regulatory contraventions, including:

- Customized PPE (dust masks and rompers).
- Dust suppression equipment (dust nets and water tankers).
- Stormwater jetting equipment.
- Industrial cleaning equipment (sweepers and graders).
- Dust monitoring services.
- General cleaning contracts (additional 200 port workers dedicated to clearing).

2 DISCUSSION

2.1 Current Status

Current auxiliary services, while keeping authorities at bay, are not sustainable. A re-imagination of the port terminal is needed, introducing systemic and proactive solutions to ensure business continuity. A high volume of coal currently in terminal stockpiles needs to be relocated to a back of port (BOP) site to follow a convenient, environment and cost-effective route into the port terminal for export operations, similar to existing conveyor solutions, linked to external parties

3 REQUEST OF PROPOSAL

Transnet Port Terminals Richards Bay requests proposals from the industry regarding how a world-class, technologically advanced BOP/Conveyor solution for coal can be achieved. This is a procurement event where Transnet, at its discretion, intends to award the successful bidder and enter into a commercial agreement with them. The successful bidder will be granted access to our infrastructure through a transparent and fair process.

Transnet will make available specific conveyor routes and berths. The business partner may reconfigure or enhance existing infrastructure. Clear demarcation of ownership, access rights, and responsibilities will be established. The conditions of the interface are as follows:

- The back-of-port facility must be outside the terminal boundaries.
- It must be preferably within a 5km radius from the Port of Richards Bay.
- The premises must have access to rail or be in a position to invest in rail siding that can handle at least 50 wagon trains.
- Sufficient stockpile and handling facility that is at least 50 000 sqm for staking, and capable of achieving a minimum of two (2) million tons per annum export operation.
- The interface must be able to connect to H02 and, or H03 conveyor belts.
- Available berths for export operations are 701 & 702.
- The operation may need to utilise a multi-shiploader at these berths.
- The partner will be responsible for energy supply for the proposed solution.

Transnet Port Terminals Richards Bay requests anyone in the industry with a sound and innovative proposal. TPT Port Terminals will engage with interested parties and its customer base to ensure a fair, painless, and considerate transition.
