SUB-PROGRAMME OVERVIEW

The primary purpose of the Strategic Industrial Intervention Unit within Department of Economic Development, Tourism and Environmental Affairs is to drive industrialisation and economic transformation in KwaZulu-Natal through the development of Industrial Economic Hubs and Special Economic Zones (SEZs). The unit aims to create enabling environments that attract investment, enhance manufacturing capacity, and stimulate sustainable economic growth by developing well-planned, sector-focused industrial nodes across the province.

The mission of the Strategic Industrial Intervention Unit is to plan, develop, and coordinate catalytic industrial infrastructure and strategic economic zones that promote investment, job creation, and regional competitiveness. This is achieved through the establishment of Industrial Economic Hubs and SEZs, facilitation of public-private partnerships, and alignment of industrial development initiatives with provincial and national economic priorities, ensuring inclusive and sustainable economic development.

PROJECT SPECIFIC BACKGROUND

The KwaZulu-Natal State of the Province Address emphasises the province's commitment to sustainable development, climate change mitigation, and economic growth through the green economy. A key priority highlighted in the address is the transition towards renewable and alternative energy sources, including solar, wind, and other low-carbon technologies, as part of building a resilient and sustainable provincial economy.

The SOPA positions the green economy as a strategic driver of job creation, investment attraction, and environmental protection. It highlights the importance of investing in renewable energy infrastructure and climate-resilient initiatives to reduce dependence on traditional energy sources while addressing environmental challenges. Furthermore, the address aligns renewable energy development with broader provincial priorities such as:

- Economic growth and industrial development
- Infrastructure expansion and energy security
- Climate change mitigation and environmental sustainability
- Job creation, particularly for youth

This demonstrates that renewable energy is not treated as a standalone sector, but as a cross-cutting enabler of inclusive economic development in KwaZulu-Natal.

The KwaZulu-Natal Department of Economic Development, Tourism and Environmental Affairs plays a central role in implementing the green economy priorities outlined in the SOPA. As the lead department responsible for economic planning, environmental management, and investment promotion, EDTEA provides the policy direction, coordination, and implementation mechanisms required to drive renewable energy development in the province.

Key roles of EDTEA include:

- a) **Policy Development and Strategic Coordination** EDTEA develops and implements strategies that promote the green economy, renewable energy, and low-carbon development pathways. It ensures alignment with national and global frameworks such as climate change commitments and sustainable development goals.

- b) **Investment Promotion and Economic Growth**
The department actively promotes investment in renewable energy projects and green industries, helping to attract both public and private sector funding. This supports the establishment of solar PV projects, waste-to-energy initiatives, and other clean technologies.

- c) **Support for SMMEs and Green Enterprises**
EDTEA provides funding, mentorship, and market access to small businesses, cooperatives, and emerging entrepreneurs, particularly in the green economy sector. This includes supporting youth participation in renewable energy value chains.

- d) **Environmental Management and Climate Action**
The department is responsible for implementing climate change mitigation and adaptation strategies, ensuring that economic development occurs in an environmentally sustainable manner. This includes promoting energy efficiency, sustainable resource use, and environmental protection.

- e) **Capacity Building and Skills Development.**
Through partnerships and programmes, EDTEA contributes to skills development in renewable energy and green industries, enabling local communities to participate in new economic opportunities.

The installation of a Solar PV system at the Mandeni Youth Enterprise Park by Department of Economic Development Tourism and Environmental Affairs is important for the community as it directly supports reliable and affordable energy access for youth-owned businesses operating within the park. By reducing dependence on the unstable national grid, the project will help minimise downtime, lower electricity costs, and improve business productivity. This enables young entrepreneurs to operate more sustainably, grow their enterprises, and create local employment opportunities. In addition, the project promotes green economy principles by introducing clean, renewable energy solutions, while also serving as a practical demonstration site for solar technology and skills development within the community. Ultimately, the Solar PV installation contributes to economic empowerment, energy security, and environmental sustainability in Mandeni.

BRIEF BACKGROUND OF THE MANDENI YOUTH ENTERPRISE PARK

The Mandeni Youth Enterprise Park (MYEP) is a strategic economic development initiative established in Mandeni, within the iLembe District Municipality, to address the growing challenges of youth unemployment, poverty, and limited access to economic opportunities in the region.

a) Origin and Rationale

The formation of the Youth Enterprise Park was driven by the urgent need to respond to high levels of youth unemployment in Mandeni and surrounding areas. Local government, together with development agencies, recognised that many young people lacked access to business infrastructure, skills, and financial support, which limited their ability to participate meaningfully in the economy. To address this, the municipality adopted a structured Local Economic Development (LED) approach, focusing on:

- Skills development
- Entrepreneurship support
- Job creation initiatives
- Business incubation and mentorship

These interventions were specifically designed to build a sustainable local economy and improve the quality of life for residents.

b) Establishment and Launch

The Mandeni Youth Enterprise Park was officially launched in November 2017 as part of a broader programme of economic interventions in the iLembe District. It was implemented through collaboration between key stakeholders, including:

- Enterprise iLembe (district development agency)
- Mandeni Local Municipality
- KwaDukuza Municipality
- National Treasury
- The United Nations Industrial Development Organization (UNIDO)
- The International Finance Corporation (IFC)
- The Swiss State Secretariat for Economic Affairs (SECO) through the Vuthela iLembe Programme

These partnerships ensured that the project was not just infrastructure-based, but also supported by technical expertise, funding, and international best practices in local economic development.

c) Purpose of the Youth Enterprise Park

The Mandeni YEP was established to create a structured marketplace and business incubation platform where young entrepreneurs can operate and grow their businesses. Its main objectives include:

- Promoting youth entrepreneurship and SMME development

- Providing affordable and accessible business space
- Supporting skills development and job creation
- Enabling youth to transition from informal to formal economic participation.

The project specifically targets youth from disadvantaged backgrounds, ensuring inclusive participation in the local economy.

d) Strategic Importance

The formation of the Youth Enterprise Park is closely linked to broader regional economic strategies, including:

- Revitalisation of the Isithebe Industrial Estate
- Expansion of SMMEs and local supply chains
- Promotion of youth-led enterprises in emerging sectors, including digital and green economy initiatives

It also complements programmes such as skills training through TVET colleges and enterprise support initiatives under the Vuthela iLembe LED Programme, which further strengthen the local economic ecosystem.

e) Summary

In summary, the Mandeni Youth Enterprise Park was formed as a deliberate, multi-stakeholder intervention to tackle youth unemployment and stimulate economic growth in the iLembe District. Through government funding, international partnerships, and structured planning, the project created a dedicated economic platform for youth entrepreneurship, transforming underutilised space into a vibrant hub for business development, skills training, and job creation. To ensure sustainability and business continuity in this facility, the department of Economic Development, Tourism and Environmental Affairs will install a backup Solar Photovoltaic System with the following description:

- 30 KWp Solar Photovoltaic System
- 30KW inverter
- 30 KW battery
- 550W solar panels
- 12 000 BTU Unit

PURPOSE OF THE TOR

The purpose of this document is to solicit the services of Solar Panel installation providers to design, supply, deliver, install and commission the required 30 KWp grid tied solar photovoltaic system at Mandeni Youth Enterprise Park Rooftop. The grid tied 30 KWp Solar PV System capacity will consists of:

- 30 kW battery
- 30 kW inverter
- 550W solar panels to make the 30KWp Solar PV System capacity.
- 12 000 BTU Aircon unit

PROJECT OBJECTIVES

WHY THE PROJECT IS IMPORTANT

a. South Africans Turning to Green Energy

As South Africans turn to solar energy especially **Solar Photovoltaic** as an alternative energy source for relief from the hefty electricity costs, it could also be the best time for one to consider the green energy generation as an alternative source of power.

b. The rising popularity of Solar Energy in South Africa

Solar energy is rapidly gaining popularity in South Africa, driven by the need for reliable electricity, rising energy costs, and the shift toward cleaner energy sources. In recent years, solar power has moved from a niche solution to a mainstream energy option for households, businesses, and industries. This growth is particularly evident in rooftop solar installations, which have increased dramatically, reaching over 7 GW of capacity by 2025, surpassing some utility-scale renewable generation in the country. The adoption has been fuelled by frequent power disruptions, high electricity tariffs, and improved affordability of solar technologies. As a result, solar energy is now playing a critical role in enhancing energy security, reducing reliance on the national grid, and supporting South Africa's transition toward a sustainable and low-carbon economy. Below is a picture of the solar panel which is a critical component of the Solar PV System.

c. Solar Energy becoming popular in South Africa

Going for green energy proves to be one of the most efficient means to combat the life-threatening climate change crisis. It is one of the strategies that South Africans are effecting to address climate change.

d. The cost of implementing Solar Energy is manageable.

The setting up of Solar PV systems has been classified as cost-effective compared to cost of installing standard electricity and most other alternative energy sources like fossil fuels and natural gas.

e. Solar is a reliable off-grid Power solution.

Solar power banks with portable solar chargers have become a reliable power solution for people in areas lacking regular power grids. Innovations are bringing on board solar powered generators friendly to the environment without carbon dioxide emissions. The benefits of solar are endless, the cost of solar installation is affordable, and one has a pool of solar installers to get the job done.

f. Solar Energy supports recycling.

As solar panels come out of service, recycling plants can extract useful minerals like polymers, copper, silicon and parts like glass and aluminum that could be used for another purpose or even in the manufacture of refurbished or new solar panels.

g. Powering Renewable Energy

No matter their abundance, pollutant fossil fuels are exhaustible – once extracted and used, that means no more power. Solar energy is the saviour of the limited exhaustible energy sources. Nuclear engineers estimate that harnessing solar energy from 1% of the Sahara Desert could power the entire world.

h. Green Energy is climate friendly.

Unlike the fossil fuels that emit carbon dioxide in generating regular electricity ending up polluting the environment, solar energy does not produce environment contaminants. They are a clean and sustainable energy source producing electricity at molecular levels without carbon combustion.
