## **1. COPYRIGHT**

This document may be reproduced and distributed under the strict condition that the content hereof is not altered, unless the alteration has been done by authorized personnel stipulated the GDOH document control procedures are followed.

## **2. THE PURPOSE**

The purpose of this tender is to appoint a service provider for the supply, delivery, commissioning and maintenance of Low Dose X-Ray Machines for Gauteng Health Institutions for period of three years (36 months).

## **3. THE BACKGROUND**

The Gauteng DoH Forensic Pathology Service (FPS) is legally mandated to perform medicolegal death investigations of deaths due to “other than natural” (unnatural) causes, for purposes of facilitating judicial and related administrative processes. The main aim is to perform medicolegal autopsies and to identify and secure tangible, relevant and scientifically credible medicolegal evidence, in an economic and efficient manner.

A full body low dose X-Ray machine will improve the quality and speed of clinical service delivery of radiological investigations as well as expedite management.

This machine would help with polytrauma patients, gunshot patients, ingested foreign bodies, skeletal surveys, urinary stones, mass disasters, ventriculi-peritoneal shunts and can also be utilized for diagnosing certain medical conditions such as tuberculosis without requiring the patient to be taken to the radiology department. In the event of a mass casualty- it would assist with trauma triage. In the current pandemic, it could help with the diagnosis of the person under investigation (PUI) without moving them to radiology and risking contamination of the rest of the hospital.

Radiological technology is continuously being improved and low dose X-Ray machines have been developed, where full (whole) bodies can be X-Rayed within seconds,

Critically, the new X-Ray machine will be used in cases like non-accidental injury in children (child abuse), gunshot deaths, burnt bodies, decomposed bodies, identification processes and in investigations of sudden unexpected deaths, suspected cases of embolism and asphyxia deaths.

It will assist clinicians to reduce radiation exposure to patients as well as reduce unnecessary ordering of X-rays and overall expenditure.

It is of paramount importance that the procured low dose X-Ray machine has the following general attributes:

- low radiation exposure compared to “conventional” X-Ray machines;
  - that is easy to use, quick to screen a case and most of its functions are electronically manipulated;

**SPECIAL CONDITIONS OF CONTRACT GT/GDH/061/2023 THE SUPPLY, DELIVERY, COMMISSIONING AND MAINTENANCE OF LOW DOSE X-RAY MACHINES FOR GAUTENG HEALTH INSTITUTION FOR PERIOD OF THREE YEARS (36 MONTHS).**

- that there is negligible risk of physical and/or radiation injury to personnel;
- that it can take full- or part-body high quality X-Ray images within seconds, that can be saved, printed and included in post-mortem examination reports;
- that no “specialized” room / structural alterations to the facility are required to “house” and use the X-Ray equipment.

The procurement Plan of 2023/2024 has the Low dose X-ray machines as planned items.

Department of health is looking to acquire the Low dose X ray machines to comply with its mandate of delivering health care services to the communities. The acquiring of these equipment will include full service, repair and maintenance plan contract throughout the lifespan of the equipment.

## The scoring of the bids:

## 1) Weights:

Each specification will have a weight of 1, or a hash (#), which indicates the level of importance, as follows:

A specification (line item) with a weight of 1 is a specification with a standard level of importance that should be complied with.

A specification (line item) with a # weight is a specification with a mandatory level of importance, where the bid offer will be disqualified if the specification is not complied with.

## 2) Scores:

The column for the score is not included in the tender specification. However, it shall be included in the scoring sheets during the evaluation of the bids by the Bid Evaluation Committee. Each specification (line item) shall have a score of 0 or 1, which indicates the level of compliance, as follows:

- 0 - The specification does not comply.
- 1 - The specification is fully compliant.

### 3) Weighted Score:

The score of 0 or 1 of each of the specifications (line items) will be multiplied with the weight of 1.

#### 4) Total Score:

**4) Total Score:** The weighted score of each of the specifications (line items) will be added up to obtain the total score. **The total score for below is 60 points.**

The bidder must comply as follows with the specification:

i. The bidder must comply with all specifications (line items) with a # weight  
ii. **The bidder must obtain a minimum score of 51 or higher out of 60 points** in respect of specifications (line with a weight of 1)
