2.	Item 562702 & Item 0028728, size and whether SPA SPB?	1. Material number 562702 – the belt size is XPB2280/5VX900 (SPB) 2. Material number 28728 – is SPC 5060 VBELT	28/08/2025
3.	Kindly ask for the drawing, if possible, of the Mill windbox liners spares	There is no drawing. As the description says it's long bar that is round and material type is Phosphor Bronze. Can they please use the dimensions given on description	28/08/2025
4.	I would like to enquire about the drawings, on the meeting the engineer noted that the station has a problem with the availability of the drawings but further promised to do his best to look for them. However, on question no.3 of the posted Q&A the answer says there are no drawings. Does this mean we will not be getting any drawings? I am asking because the manufacturing of pulleys and shafts are always seamless if there are as-built drawings from the client.	Unfortunately, we looked for those drawings and we do not have them. The shafts and pulleys we have to be standard sizes as per the description and will be machined to size at our machining workshop.	03/09/2025
5.	Kindly advise by the V-belts will it be 1000 set of seven belts which means it will be 7000 altogether? I just want to get that right	Yes, it is 7000 v-belts	03/09/2025
