### SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

#### 1 BACKGROUND

Transnet Pipelines, wholly owned by Transnet SOC Ltd is the custodian of the country's strategic pipeline assets. Major operator of 2900km network of crude, gas, and multi-product pipelines in the South Africa economy. The pipeline business handles an annual average throughput of some 16 billion litres of liquid fuel and more than 450 million cubic meters of gases. The liquid products include crude oil as well as diesel, leaded, unleaded, petrol and aviation turbine fuels.

Have over 50 years' experience in pipeline operations (established in 1965) and a strategic player in hydrocarbon transportation in South Africa. Except for the NOC and Island View all depots and Jameson Park accumulation facilities are declared NKP sites. The actual pipeline itself is not a National Key Point.

The liquid fuels network traverses the provinces of KwaZulu-Natal, Free State, Gauteng, Northwest, and Mpumalanga. The intake stations are the two Durban refineries - the crude refinery at Coalbrook (Natref) and the Sasol 2 and Sasol 3 synfuel plants at Secunda. The network includes a tank farm, at Tarlton, with a capacity of 30 million litres which is used mainly for storage and the distribution of liquid fuels into Botswana. The gas pipeline, a converted line previously used for liquids, runs from Secunda to Durban via Empangeni. It has take-off points at Newcastle and Richards Bay as well as along the route between Empangeni and Durban.

Pressure in the pipeline network is monitored on a 24 hour-a-day, 365 days-a-year basis at the control centre at Transnet pipelines' Durban NOC. The National Operating Centre functions as a planning, control, and security hub. The NOC features state-of-the-art electronic video walls, which monitor and display SCADA (Supervisory Control and Data Acquisition) information, security access control and CCTV feeds from around the network and general information related to the entire pipeline process. The size and complexity of the video system is one of the largest and unique installations in Africa.

Transnet Pipelines' staff complement of some 600 is deployed across the pipeline network with the business itself being geographically decentralized.

The company owns and operates a 30-million-litre tank farm with road and rail loading facilities in Tarlton to facilitate cross border deliveries via road and rail to Botswana. The company also owns and operates a fractionator plant at Tarlton for the management of intermixture generated.

The company transports approximately 17 billion litres of product per annum and the product slate includes:

- Crude Oil
- Diesel 50ppm and 10ppm
- Unleaded Petrol – 93 Octane
- Unleaded Petrol – 95 Octane
- Jet Fuel
- Gas 600 cubes

The infrastructure to be protected covers thousands of kilometres within the TPL network. The Security department has a hybrid of in house and contracted security personnel. The in-house numbers are very limited and as such Transnet is seeking to partner to provide solutions for its specialized security.

## 2 EXECUTIVE OVERVIEW

Transnet Pipelines requires dedicated security to ensure reliable and uninterrupted services for pipeline operations. The risk to Transnet Pipelines in the event of wilful damage, and the potential capacity loss of the pipeline network and equipment, is too serious to be left to chance. This requirement for effective and efficient security is enhanced by the requirements of the National Key Points (NKP) Act and other relevant security standards and guidelines promulgated by the Government Security Regulator.

The newly enacted Critical Infrastructure Act has been gazetted and will repeal the NKP Act after the regulations have been promulgated. The selected service providers must share in the mission and business objectives of the Transnet.

These mutual goals will be met by contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation, and open communications. In this spirit of partnership Transnet and its service provider/s will study the current ways that they do business to enhance current practices and support processes and systems. Such partnership will allow Transnet to maximise benefits and minimise risk.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Service Provider's economies of scale and streamlined service processes.
- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing cost for both Transnet and the chosen Service Provider(s).
- 2.3 Transnet must receive proactive improvements from the Service Provider with respect to provision of Service and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Service Provider's leading-edge technology and service delivery systems.
- 2.5 Transnet end users must be able to reply on the chosen Service Provider's personnel for service enquiries, recommendations, and substitution.
- 2.6 Transnet must reduce cost by streamlining its acquisition of Service, including managed service processes on the group basis.

### 3 SCOPE OF REQUIREMENTS

#### 3.1 Service Description

a. Specialised Tactical Security Services

The overarching objective of this service is to secure the pipeline, not only from the direct criminals that carry out the activity but also from those criminals that support, organise, and orchestrate crime against the pipeline by creating an integrated, multi-faceted pipeline security service to appropriately secure Critical and Essential Infrastructure.

#### 6.7 STEP SIX: Post Tender Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
  - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
  - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).
- Over and above the negotiating of prices with the preferred bidder to get a market-related price, Transnet may engage preferred bidder(s) to negotiate reduced rates before or after the award of business to achieve cost effectiveness in all its contracts.

#### 6.8 STEP SEVEN: Objective Criteria (if applicable)

Transnet reserves the right to award the business to the highest scoring bidder/s unless objective criteria justify the award to another bidder. The objective criteria Transnet may apply in this bid process include:

- all Risks identified during a risk assessment exercise/probity check (which may be conducted by an authorised third party) that would be done to assess all risks, including but not limited to:

- the financial stability of the bidder based on key ratio analysis, which would include, but not be limited to Efficiency, Profitability, Financial Risk, Liquidity, Acid Test, and Solvency;
- a due diligence to assess functional capability and capacity. This could include a site visit;
- A commercial relationship with a Domestic Prominent Influential Person (DPIP) or Foreign Prominent Public Official (FPPO) or an entity of which such person or official is the beneficial owner; and
- Reputational and Brand risks

6.9 **STEP EIGHT: Award of business and conclusion of contract**

- Immediately after approval to award the contract has been received, the successful bidder(s) will be informed of the acceptance of his/their Bid by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s).
- A final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.

**SECTION 4: PRICING AND DELIVERY SCHEDULE**

Respondents are required to complete the Pricing Schedule attached as **Annexure F**.

Respondents are to note that Transnet will round off final pricing scores to the nearest 2 (two) decimal places.

**Notes to Pricing:**

- a) Respondents are to note that if the price offered by the highest scoring bidder is not market-related, Transnet may not award the contract to that Respondent. Transnet may-
  - (i) negotiate a market-related price with the Respondent scoring the highest points or cancel the RFP;
  - (ii) if that Respondent does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the second highest points or cancel the RFP;
  - (iii) if the Respondent scoring the second highest points does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the third highest points or cancel the RFP.

If a market-related price is not agreed with the Respondent scoring the third highest points, Transnet must cancel the RFP.

- b) Prices must be quoted in South African Rand inclusive of VAT.
- c) Any disbursement not specifically priced for will not be considered/accepted by Transnet.
- d) To facilitate like-for-like comparison bidders must submit pricing strictly in accordance with this pricing schedule and not utilise a different format. Deviation from this pricing schedule could result in a bid being declared non-responsive.
- e) Please note that should you have offered a discounted price(s), Transnet will only consider such price discount(s) in the final evaluation stage if offered on an unconditional basis.
- f) Respondents, if awarded the contract, are required to indicate that their prices quoted would be kept firm and fixed a period of 12 months, subject thereafter to adjustment (i.e. after the initial period of 12 months), utilizing the following price adjustment formula. **SECTION 11: SBD 9- CERTIFICATE OF INDEPENDENT BID DETERMINATION**

1. Section 4(1)(b)(iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds. Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
2. Transnet will take all reasonable steps to prevent abuse of the supply chain management system and to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
3. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
4. In order to give effect to the above, the following certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:
