<b>Scope of Works</b>	<p><b>1. Project Objective</b></p> <p>SANEDI is seeking an experienced solar water heating installation company to assist in troubleshooting an existing installation and fully operationalizing it once again. This system is located on a military base in Limpopo province.</p> <p><b>Objectives</b></p> <p>To assess the current 2x 1500L (15m<sup>2</sup>) installations for system failures and or obstructions and offer a costed breakdown of required interventions to return the system to full functionality without any extensive hardware replacement.</p> <p>SANEDI is inviting proposals from reputable and qualified companies with a track record of success in designing and building solar water heating installations to assess and troubleshoot a current dual-installation with minimal hardware interventions. Understanding and experience with the RESOL® DeltaSol® BX Plus Hardware and software interface would be a distinct advantage. The project is expected to be completed within 2 months.</p> <p><b>Key deliverables</b></p> <ul style="list-style-type: none"> <li>• 2x 1500L (15m<sup>2</sup>) fully functional solar water heating systems on 2 buildings with firmware and hardware operationally integrated</li> <li>• System O&amp;M training <ul style="list-style-type: none"> <li>○ Ensure that skills transfer is affected to SANEDI and DoD members on these specific systems</li> </ul> </li> <li>• Restore hot water supply to buildings</li> <li>• Ensure that all additional structures required for full system functionality are delivered (included in the quote in an itemized manner as required) <ul style="list-style-type: none"> <li>○ Ultimately allow for full occupation and utilization of these buildings.</li> </ul> </li> </ul> <p><b>Scope of Works</b></p> <p>A single site inspection for all interested parties will take place on <b>18 June 2026 at 10:30</b>, in Hoedspruit . briefing session.

Interested service providers are required to RSVP by submitting scanned copies of the identification documents of all staff members who will be attending the compulsory briefing session. This information is required to facilitate access approval to the military base.

The required documentation must be submitted by **15 June 2026 at 16h00**. The meeting spot will take place in Hoedspruit Town at 09h30. The exact meeting point details will be communicated only to service providers who have submitted their RSVP and the required documentation.

Already implemented:

- 2x 1500 litres pumped solar thermal water systems on two separate buildings (double story) with 15m<sup>2</sup> of flat plate collectors installed per system with roof mounted solar hot water collectors on two separate buildings
    - Collector Type: Flat plate collector RK2500N Alpin Easy Vertical (Green One Tech GmbH)
    - Hot Water Tank Type: Insulated BS Buffer Tank 1500L
    - System Specifications:
      - Collectors
        - ◇ 6 x RK2500N Alpin Easy Vertical
        - ◇ 2.34m<sup>2</sup> Absorber Surface Area
        - ◇ 1.4L liquid content (Water Glycol mixture)
        - ◇ 10Bar max Operating Pressure
      - Solar Station
        - ◇ 1 x SLS50\*E Stratified solar station
        - ◇ 26 kW power input
        - ◇ 8 bar max operating pressure
      - Freshwater Station
        - ◇ 2 x FWS30 Fresh Water Station 60l/min
        - ◇ Net volume 30 l/min each
        - ◇ Surface solar heat exchanger

        - ◇ 4Bar Operating pressure
  - Annual inclusive maintenance and repair to support the installed systems since installation
- Electrified animal deterrent system on two separate buildings.

Current system issues:

- Appears to be a software communication and/or upgrade requirement to main system functionality on solar and ringmain loops
  - RESOL® DeltaSol® BX Plus hardware and software
- Functional system hardware will need to be inspected and checked as a consistent pressure drop on the solar collector loop is being observed with no notable leaks visible

SANEDI requires both systems to be returned to full functionality, this requires system inspection, evaluation, costing approval and ultimately possible hardware and software interventions.

\*Note a full or partial functional hardware upgrade recommendation will not be supported except under extreme circumstances and evaluation by an internal technical team.

#### **Knowledge transfer**

The appointed service provider is required to allow SANEDI and SANDF members to be trained on system

operation and maintenance and be involved in the intervention.

**Requirements**

The selected service provider must have demonstrated experience in the installation of large-scale, pumped solar water heating systems for indirect water heating applications. The company must provide reference letters and a proven track record in this domain. Furthermore, the provider must have extensive expertise in both hardware and software components of the RESOL DeltaSol BX Plus system, as the existing infrastructure utilizes this hardware. The company must be able to minimise hardware interventions. Additionally, the provider must be willing to undergo security vetting by the South African National Defence Force (SANDF), and all on-site personnel must be South African citizens. It is also important to note that the project site is located at a considerable distance from SANEDI’s main office; therefore, the company must include transport and accommodation costs in their bid documentation.
