

QUERY:

Good day

Thank you for the E1634GXLP MED pack. We can see the required labour and the P's & G's. However, while Appendix B (Maintenance Strategy) is included, it does not specify the **type, quantity, full description, or make** of the equipment/instruments. To prepare a complete and accurate material quote, we need a **detailed Bill of Materials (BoM)**.

Kindly provide (preferably in Excel):

1. **Line-item BoM** for all materials

- Equipment/instrument description
- **OEM/Manufacturer** and **part number**
- Technical spec: size/rating, range, process connection, materials, IP/ingress rating, hazardous-area classification (if applicable)
- **Quantity** per item

Many thanks in advance!

Best regards

RESPONSE:

Dear Valued Supplier

No parts supply required. Items listed on the maintenance strategy will be provided if replacement is required. Bidders should quote on maintenance services that include preventative and corrective maintenance. The information on the maintenance strategy should be enough.

Unless a specific make and model is indicated, Bidders should consider industry standard equipment within the CBMS field. A comprehensive list of equipment to be maintained is included in the strategy.

Kind Regards,
