

REQUEST FOR QUOTATION (RFQ)

**FOR THE PROVISION OF CORPORATE THREAT ASSESSMENT FOR THE
SOUTH AFRICAN CIVIL AVIATION AUTHORITY (SACAA).**

1. INTRODUCTION.

The South African Civil Aviation Authority (SACAA) is an agency of the Department of Transport (DoT), established on 01 October 1998, following the enactment of the now repealed South African Civil Aviation Authority Act, 1998 (Act No. 40 of 1998). This Act was replaced by the Civil Aviation Act, 2009 (Act No. 13 of 2009), which came into effect on 31 March 2010. As outlined in the Public Finance Management Act (PFMA), 1999 (Act No. 1 of 1999) (as amended by Act No. 29 of 1999), the SACAA is a Schedule 3A public entity. The PFMA designates the SACAA's Board of Directors as the organisation's Accounting Authority responsible for governance, while the Minister of Transport is the Executive Authority.

The Civil Aviation Act provides for the establishment of a stand-alone authority, mandated with controlling, promoting, regulating, supporting, developing, enforcing, and continuously improving levels of safety and security throughout the civil aviation industry. The above is achieved by complying with the Standards and Recommended Practices (SARPs) of the International Civil Aviation Organization (ICAO), while considering the local context. The SACAA, through a Ministerial order, is mandated with the administrative functioning of the aircraft Accident and Incident Investigation Division (AIID), while the Department of Transport is responsible for the functional running of this unit.

2. INVITATION TO BID.

The purpose of this Request for Quotation (RFQ) is to solicit quotes from potential bidder(s) for the following items:

DESCRIPTION OF GOODS/ SERVICE REQUIRED		THE PROVISION OF CORPORATE THREAT ASSESSMENT FOR THE SOUTH AFRICAN CIVIL AVIATION AUTHORITY (SACAA)	
ITEM/ SERVICE DESCRIPTION/ DETAILED SPECIFICATION			
The South African Civil Aviation Authority (SACAA) invites proposals from suitably qualified and experienced service providers to conduct a comprehensive Corporate Threat Assessment across our entire IT environment for the South African Civil Aviation (SACAA). This assessment must include, but is not limited to, all internal networks, external-facing systems, web applications, cloud platforms, business critical assets and any associated digital infrastructure.			

The primary objective of this engagement is to proactively identify, analyze, and document potential security vulnerabilities, configuration weaknesses, and threat vectors that could impact the confidentiality, integrity, and availability of SACAA's information assets. The assessment should be conducted in alignment with internationally recognised cybersecurity frameworks and best practices, including but not limited to ISO/IEC 27001, the OWASP Top 10 (2025), and the NIST SP 800-115 Technical Guide to Information Security Testing and Assessment.

The selected service provider will be expected to deliver a detailed threat analysis report, complete with risk ratings, actionable remediation recommendations, and a prioritised roadmap for mitigation. Additionally, the assessment should provide insights into SACAA's current security posture, gaps in controls, and opportunities for strengthening our cyber resilience.

Internal Assessment Test

Evaluate internal network security, including potential threats within the organisation.

Internal Network

- Active IP Addresses = 800
- Workstations = 700
- 80 Servers = 80

Information Security Management

The Information Security Managed service should provide an additional layer of capabilities around South African Civil Aviation Authority's existing IT security mechanisms (e.g., Anti-Virus software, patch management, Intrusion Detection Systems, and event monitoring). It should also offer the proactive identification of inconsistency that could indicate organised IT security breaches or straightforward configuration errors.

Vulnerability Identification, Reporting and Management

Provide a solution and guidance on improving the Cyber Security posture, catered to South African Civil Aviation Authority specific needs. A Detailed Framework and execution plan to be supplied in detail.

Risk Identification and Management

To provide a service offering that will add the required benefit to the South African Civil Aviation Authority, a Vulnerability and risk evaluation/identification must be performed and cover the following technical capabilities.

- Network Discovery:
- Anomaly Detection:
- Vulnerability Analysis:
- Risk Management:

Mitigation Approach

Categorise vulnerabilities according to criticality and risk. The proposal should also highlight how these will be addressed. This should Include:

- External Vulnerability scanning
- Internal Vulnerability scanning
- Reporting – Technical and Executive

Wireless Security Test:

Assess the security of wireless networks and access points.

External Assessment Testing:

Assess the security of our network perimeter from external threats.

Number of websites = 20

Web Application Testing

Identify flaws in hosted applications including authentication, input validation, and session management. The Testing should be based on the Open Web Security Application Project (OWASP) framework, covering the following areas:

- Injection
- Broken authentication
- Sensitive data exposure
- XML external entities (XXE)
- Broken access control
- Security misconfiguration
- Cross-site scripting (XSS)
- Insecure deserialization

- Using components with known vulnerabilities
- Insufficient logging and monitoring

Web Application Areas of Evaluation

Provide detailed information on vulnerabilities in web applications

CIS - Centre of Internet Security

Validate working controls, gaps in current controls, and identify missing controls. Provide information on how CIS controls and mitigation is done

Other Requirements

The testing will be a **grey box vulnerability assessment** and penetration test. The service provider will receive limited information, including physical access to the building, target IP address ranges, and the website URL for web application assessment.

For the Internal Assessment, the provider will first attempt to bypass the network perimeter security. If this is unsuccessful within the agreed timeframe, they will be given standard network access to complete the test, ensuring that the objectives are met

The service provider must deliver **three presentations and reports** tailored to different audiences:

1. **Management** - focusing on operational insights and key findings.
2. **Exco** - highlighting strategic implications and high-level outcomes.
3. **Audit and Risk Committee (ARC)** - addressing risk management and compliance aspects.

Each presentation should be designed to meet the specific interests and priorities of the respective audience.

The service provider should conduct a **remediation assessment** specifically targeting critical and high-priority findings. This assessment should ensure that identified vulnerabilities have been effectively addressed and mitigated.

3. DURATION OF SERVICE.

3.1 The required service is for once off.
