1. PURPOSE

- 1.1. The purpose of the TOR is to procure the services of a Professional Service Provider (PSP) to develop the national veldfire risk profile in line with research the Minister may commission to address the risk of veldfire [Section 30 of National Veld and Forest Fire Act, 1998 (Act no. 101 of 1998) (hereinafter referred to as the Act)] through, inter alia:
 - 1.1.1. Reduce veld fire risk to support sustainable use and protection of natural resources;
 - 1.1.2. Create awareness and shared responsibility with stakeholders to minimize the risks; and
 - 1.1.3. Identify the veldfire hot spot areas to be prioritised when implementing veldfire risk reduction measures.

2. INTRODUCTION AND BACKGROUND

- 2.1. The National Veld and Forest Fire Act 1998, Act no. 101 of 1998 (NVFFA) is the primary legislation regulating veldfire in South Africa. The purpose of the Act is to prevent and combat veld, forest, and mountain fires throughout the republic as well as to provide for a variety of institutions, methods, and practices for achieving the purpose.
- 2.2. These methods and practices include but are not limited to the formation of Fire Protection Associations (FPA), development and maintenance of a National Fire Danger Rating System (NFDRS), veldfire prevention through firebreaks, provision of veldfire risk profile, prescribed minimum requirements for firefighting, and enforcement mechanisms. Essentially, in this Act, obligations are placed on the landowners on which there is a risk of veldfire and citizens at large who may be affected by the risk of veldfire.
- 2.3. Veldfire, although it is vital in the management of the ecological ecosystem, is a natural hazard in South Africa. This assessment (risk profiling) addresses the requirement of the Department of Forestry, Fisheries, and the Environment (DFFE/ the Department) for a revision of the national veldfire risk classification developed in 2010.
- 2.4. As an Organ of State responsible for the implementation of the Act, DFFE requires a risk assessment and veldfire risk maps according to the requirements as set out in the National Disaster Management Framework (NDMF).
- 2.5. This assessment should integrate with relevant provisions in the Act, for example, the fire danger rating system. It should provide an assessment at the policy level, to support operational assessments and mitigation plans in the provincial and local spheres of government. It should integrate with bioregional plans in terms of the National Environmental Management: Biodiversity Act as well as Integrated Development Plans.

3. OBJECTIVES

3.1. The objectives of this project are:

- 3.1.1. To reduce the vulnerability and exposure of assets (social, economic, and environmental) to veldfire hazards;
- 3.1.2. Identify veldfire hot spot areas; and
- 3.1.3. Develop the veldfire risk management strategy based on identified assets at risk and the degree of risk evaluated.

4. SCOPE AND EXTENT OF WORK

4.1. The appointed service provider will assist DFFE with the preparation of a review of the veldfire risk profile that will be consistent with the Act and the policy foundation established in terms of the Constitution of the Republic of South Africa. The scope of the project is to:

- 4.1.1. Prepare a review and update of the veldfire risk profile developed in 2010 by the Council for Scientific and Industrial Research (CSIR) at the national, provincial, and local municipal levels;
- 4.1.2. Develop and implement a key Stakeholder Engagement Work Plan (SEWP), outlining a consultation methodology in detail as well as any plans for the facilitation of meetings or workshops that may be envisaged; and
- 4.1.3. Undertake consultation at local, provincial, and national levels with the following key stakeholders:

Table 1: Provinces

#	Provinces
1	Gauteng
2	North- West
3	Limpopo
4	Mpumalanga
5	KwaZulu-Natal
6	Eastern Cape
7	Northern Cape
8	Free State
9	Western Cape

- 4.1.3.1. Each provincial session must have a minimum number of relevant participants (i.e., Provincial Disaster Management Centres, Provincial Umbrella FPAs, Working on Fire, Forestry Industry, and other relevant stakeholders of Integrated Fire Management).
- 4.1.3.2. At local government, consultation must be arranged at the district council level inclusive of all local councils within a district, and the metropolitan level inclusive of all regions within the metro. Each consultation must include Fire Protection Associations, municipal and designated services, municipal disaster management centres, Working on Fire, and other relevant Integrated Fire Management stakeholders.
- 4.1.3.3. National sessions with key national sector departments and other private sector role players. Each national session must have a minimum number of participants working in Integrated Fire Management and related fields. Provided consideration can be raised, these must include the Department of Water and Sanitation (DWS), Department of Agriculture, Land Reform and Rural Development (DALRRD), Department of Public Works and Infrastructure (DPWI), Department of Cooperative Governance and Traditional Affairs (CoGTA), Department of Employment and Labour (DEL), Department of Defence (DoD), and
- 4.1.3.4. One national multi-stakeholder consultative workshop with a minimum number of role players inclusive of Municipal and Industrial sectors, Chief Fire Officers (CFO), Working on Fire (WoF), and participants working in the Forest industry.
- 4.1.4. Integrate inputs received from key stakeholders where applicable, and
- 4.1.5. Prepare a methodology and a memorandum that will provide a set of guidelines to follow when interpreting risk mapping over a given area.
- 4.2. The service provider will identify towns where consultations will take place, and DFFE will secure suitable venues within the identified towns for all the consultative sessions as set out in paragraph 4.1.3 above.
- 4.3. The service provider must prepare and submit monthly progress reports on the project including power-point presentations to the Department within 5 working days, at the beginning of each month.
- 4.4. While the project may run in two Financial Years i.e., 2022/23 and 2023/24, the service provider will be contracted for a period of up to twelve (12) months, within which it will be expected to deliver as per the deliverables outlined in paragraph 5 below.
