1. DEFINITIONS

- a) **Quality Management System** - defined as a formalized system that documents processes, procedures, and responsibilities for achieving quality policies and objectives.
- b) **Quality Plan** - specification of the procedures and associated resources to be applied when and by whom to a specific object. "A document or set of documents that describe the standards, quality practices, resources and processes pertinent to a specific product, service or project."
- c) **Quality Assurance** - "part of quality management focused on providing confidence that quality requirements will be fulfilled." The confidence provided by quality assurance is twofold—internally to management and externally to customers, government agencies, regulators, certifiers, and third parties. The planned and systematic activities implemented within the quality system that can be demonstrated to provide confidence that a product or service will fulfil requirements for quality."
- d) **Quality Control** - part of quality management focused on fulfilling quality requirements." While quality assurance relates to how a process is performed or how a product is made, quality control is more the inspection aspect of quality management. An alternate definition is "the operational techniques and activities used to fulfil requirements for quality."
- e) **Supplier** – supplier - organization that provides a product or a service. A supplier is an individual or organization who provides businesses with either products, services, or both. A provider can be internal or external to the organization.
- f) **Sub-suppliers** - suppliers that will be utilised by tenderer to execute the scope of work deliverables. Sub-Supplier means any supplier who contracts with the Supplier for performance of the services for which the Supplier has contracted with the Service Provider.
- g) **A subcontractor (or sub-contractor)** is a company or person whom a general contractor, prime contractor or main contractor hires to perform a specific task as part of an overall project and normally pays for services provided to the project.
- h) **Quality objectives**: This term represents the plan laid out to ensure that quality results are achieved properly. They are measurable goals relevant to enhancing customer satisfaction and are consistent with the quality policy. The quality goals are specific, measurable (using key figures), and time-bound (SMART) intermediate steps to fulfil the quality policy.
- i) **Quality policy**: Overall intentions and directions of an organization with regard to quality concerns, as formally expressed by the top management.
- j) **Risk management**: The identification, evaluation and prioritization of risks to eliminate or mitigate their probability or severity or to leverage opportunities.
- k) **Documented information**: information that must be controlled and maintained. A process for identifying, reviewing and approving documents as well as using an appropriate format and media for the contents of the documented information is required in any organisation. Documented information must be available for those that need to access it, protected, version controlled and inactive/old versions (obsolete) disposed of properly.
- l) **Method statements**: It describes in a logical sequence exactly how a job is to be carried out in a safe manner and without risks to health/safety. It includes all the risks identified in the risk assessment and the measures needed to control those risks. This allows the job to be properly planned and resourced.
