Design and construct of the foundation for the shotblast booth within the Uitenhage Eastern Cape Region.

- Site Management resources should include at least, amongst others.
- **GEOTECHNICAL:** A geotechnical engineer evaluates the existing subsurface and groundwater conditions at the site. The selection of the design high groundwater conditions is critical and may require deep hole test pits, groundwater observation wells, or other methods. Assessment of groundwater fluctuations due to perched groundwater or surface flooding is essential. Soil testing may include grain size testing or performing laboratory permeability or field pumping tests for use in estimating permeability of the soils and tests to identify the risk of iron ochre clogging. From this data, the geotechnical EOR may perform analytical analyses to determine the flow rate, spacing of pipes, and the size and number of pumps and sump pits for the sub-slab drainage system. The pipe layout and the number of pumps and sump pits will vary significantly based on the subsurface conditions at the site. In addition, the geotechnical engineer determines if the natural soils may migrate (known as soil piping) into the drainage stone used for trenches and drainage blankets due to the water flow of water. The geotechnical EOR may implement design enhancements, including increasing the factor of safety on flow capacity, among other things, to address iron ochre or sedimentation buildup in the pipe.
Construction Manager
- **CIVIL:** The civil engineer analyses the existing site topography and stormwater runoff at the site. This includes minimizing surface ponding adjacent to the buildings and evaluating where and how to legally discharge and treat (if applicable) the water from the below-grade space Health & Safety Manager
- **STRUCTURAL:** The structural engineer designs the building slab, footings, foundation walls, and superstructure based on the design water pressures provided by the geotechnical engineer, including evaluating the impact of hydrostatic uplift on the structure. Failure of the sub-slab drainage system and the resulting water pressures on the structure should be considered, particularly, if there is no cut-off wall below the structure
- **ENVIRONMENTAL:** The environmental engineer will provide recommendations for mitigating contamination movement or treating groundwater, if any limitations exist
- **MECHANICAL/ELECTRICAL/PLUMBING(M/E/P):** Although it varies, an M/E/P engineer or licensed plumber, typically determines the size and layout of the interior

 piping and cleanouts following the relevant building codes using the flow rates determined by the geotechnical engineer. The M/E/P engineer selects the sump pits, primary and secondary pump sizes, on/off sequencing and elevations of primary and secondary pumps, the type of water level sensors, and the control panel. The M/E/P engineer or licensed electrician assesses the electrical demands for the sump pumps following the relevant building codes.

4.3, without limiting the generality of paragraph 5 above, there has been no consultation, communication, agreement, or arrangement with any competitor regarding:

- a) prices.
- b) geographical area where Goods or Services will be rendered [market allocation].

5 DISQUALIFICATIONS FROM TENDERING PROCESS

5.1 If the Tenderer/Service Provider/Contractor has committed a transgression through a violation of section 3 of this Integrity Pact or in any other form such as to put its reliability or credibility as a Tenderer/Service Provider/Contractor into question, Transnet may reject the Tenderer's / Service Provider's / Contractor's application from the registration or tendering process and remove the Tenderer/Service Provider/Contractor from its database, if already registered.

5.2 If the Tenderer/Service Provider/Contractor has committed a transgression through a violation of section 3, or any material violation, such as to put its reliability or credibility into question. Transnet may after following due procedures and at its own discretion also exclude the Tenderer/Service Provider /Contractor from future tendering processes. The imposition and duration of the exclusion will be determined by the severity of the transgression. The severity will be determined by the circumstances of the case, which will include amongst others the number of transgressions, the position of the transgressors within the company hierarchy of the Tenderer/Service Provider/Contractor and the amount of the damage. The exclusion will be imposed for up to a maximum of 10 (ten) years. However, Transnet reserves the right to impose a longer period of exclusion, depending on the gravity of the misconduct.

5.3 If the Tenderer/Service Provider/Contractor can prove that it has restored the damage caused by it and has installed a suitable corruption prevention system or taken other remedial measures as the circumstances of the case may require, Transnet may at its own discretion revoke the exclusion or suspend the imposed penalty.

6 TRANSNET'S LIST OF EXCLUDED TENDERERS (BLACKLIST)

6.1 The process of restriction is used to exclude a company/person from conducting future business with Transnet and other organs of state for a specified period. No Tender shall be awarded to a Tenderer whose name (or any of its members, directors, partners or trustees) appear on the Register of Tender Defaulters kept by National Treasury, or who have been placed on National Treasury's List of Restricted Suppliers. Transnet reserves the right to withdraw an award, or cancel

a contract concluded with a Tenderer should it be established, at any time, that a tenderer has been restricted with National Treasury by another government institution.

6.2 All the stipulations on Transnet's restriction process as laid down in Transnet's Supply Chain Policy and Procurement Procedures Manual (CPM included) are included herein by way of reference. Below follows a condensed summary of this restriction procedure.

6.3 On completion of the restriction procedure, Transnet will submit the restricted entity's details (including the identity number of the individuals and registration number of the entity) to National Treasury for placement on National Treasury's Database of Restricted Suppliers for the specified period of exclusion. National Treasury will make the final decision on whether to restrict an entity from doing business with any organ of state for a period not exceeding 10 years and place the entity concerned on the Database of Restricted Suppliers published on its official website.

6.4 The decision to restrict is based on one of the grounds for restriction. The standard of proof to commence the restriction process is whether a "prima facie" (i.e., on the face of it) case has been established.

6.5 Depending on the seriousness of the misconduct and the strategic importance of the Goods/Services, in addition to restricting a company/person from future business, Transnet may decide to terminate some or all existing contracts with the company/person as well.

6.6 A Service Provider or Contractor to Transnet may not subcontract any portion of the contract to a blacklisted company.

6.7 Grounds for blacklisting include: If any person/Enterprise which has submitted a Tender, concluded a contract, or, in the capacity of agent or subcontractor, has been associated with such Tender or contract:

- a) Has, in bad faith, withdrawn such Tender after the advertised closing date and time for the receipt of Tenders.
- b) has, after being notified of the acceptance of his Tender, failed, or refused to sign a contract when called upon to do so in terms of any condition forming part of the Tender documents.

- g) caused Transnet damage, or to incur costs in order to meet the contractor's requirements and which could not be recovered from the contractor;
- h) has litigated against Transnet in bad faith.

6.8 Grounds for blacklisting include a company/person recorded as being a company or person prohibited from doing business with the public sector on National Treasury's database of Restricted Service Providers or Register of Tender Defaulters.

6.9 Companies associated with the person/s guilty of misconduct (i.e. entities owned, controlled or managed by such persons), any companies subsequently formed by the person(s) guilty of the misconduct and/or an existing company where such person(s) acquires a controlling stake may be considered for blacklisting. The decision to extend the blacklist to associated companies will be at the sole discretion of Transnet.

7 PREVIOUS TRANSGRESSIONS

7.1 The Tenderer/Service Provider/Contractor hereby declares that no previous transgressions resulting in a serious breach of any law, including but not limited to, corruption, fraud, theft, extortion and contraventions of the Competition Act 89 of 1998, which occurred in the last 5 (five) years with any other public sector undertaking, government department or private sector company that could justify its exclusion from its registration on the Tenderer's/Service Provider's/Contractor's database or any tendering process.

7.2 If it is found to be that the Tenderer/Service Provider/Contractor made an incorrect statement on this subject, the Tenderer/Service Provider/Contractor can be rejected from the registration process or removed from the Tenderer/Service Provider/Contractor database, if already registered, for such reason (refer to the Breach of Law Returnable Form contained in the document.)

9.3 If a Tenderer/Service Provider/Contractor has or becomes aware of a conflict of interest i.e., a family, business and / or social relationship between its owner(s)/ member(s)/director(s)/partner(s)/shareholder(s) and a Transnet employee/ member of Transnet's Board of Directors in respect of a Tender which will be considered for the Tender process, the Tenderer/Service Provider/ Contractor:

10 DISPUTE RESOLUTION

10.1 Transnet recognises that trust and good faith are pivotal to its relationship with its Tenderer / Service Provider / Contractor. When a dispute arises between Transnet and its Tenderer / Service Provider / Contractor, the parties should use their best endeavours to resolve the dispute in an amicable manner, whenever possible. Litigation in bad faith negates the principles of trust and good faith on which commercial relationships are based. Accordingly, following a blacklisting process as mentioned in paragraph 6 above, Transnet will not do business with a company that litigates against it in bad faith or is involved in any action that reflects bad faith on its part. Litigation in bad faith includes, but is not limited to the following instances:
