**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

- 1.1 To appoint a service provider to develop a detailed Draft Strategy for reducing food losses and waste prior to retail and that is associated with harvesting, processing and transport of food with food producers and retailers

## **2 INTRODUCTION AND BACKGROUND**

- 2.1 Prior to 01 July 2009 waste was managed through a fragmented legislative framework in South Africa. The promulgation and coming to effect of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) on 01 July 2009, provided a specific legislation in terms of which waste would be managed in a consolidated manner in South Africa. The Waste Act is based on the principles of the Waste Hierarchy, which requires that the generation of waste is avoided, or where it cannot be avoided that it is reduced, reused, recycled or recovered and only as a last resort treated and safely disposed of to landfill.
- 2.2 The implementation of the National Environmental Management: Waste Act, 2008 is done through National Waste Management Strategy. In line with the outcome-based planning approach of government, the National Waste Management Strategy (NWMS), 2020 is premised on outcomes which will see a future South Africa with zero waste in landfills; cleaner communities, well managed and financially stable waste services, and a culture of zero tolerance of pollution, litter and illegal dumping.
- 2.3 The NWMS, 2020 also assimilates the department's strategic approach to waste management with the commitments and directives of the Sustainable Development Goals 2030 and South Africa's National Development Plan: Vision 2030. It further integrates and provides an enabling environment for the DFFE's 2017 Chemicals and Waste Economy Phakisa and government's 2019 Good Green Deeds Programme.
- 2.4 As part of the 2017 Chemicals and Waste Economy Phakisa Lab deliberations and outcomes, initiatives to reduce volumes of waste ending up in landfill sites were defined with the main aim amongst others, of tackling waste issues by focusing on the generation of waste with the goal to take steps towards a circular economy where all "waste" material streams are re-used as resources and promoting waste prevention.

Food waste was identified as a waste stream that can contribute to circular economy and waste reduction. This initiative also sought to reduce food insecurity by creating a specialized program which will:

- 2.4.1 Undertake targeted research (e.g. conduct research into secondary market development and linkages to supply 'ugly but healthy' food to the needy)

- 2.4.2 Test, replicate and scale of new and existing tools and technologies to stakeholders across the agricultural value chain with the aim of improving production and decreased food losses between the production and distribution stages of the value chain.
- 2.4.3 The information, tools and technologies mentioned above will be broadly disseminated through a national multi-purpose platform which will be developed to support the capacity building efforts. This platform will aggregate and consolidates agricultural and food loss data to give all stakeholders access to information with which to make critical decisions which will ultimately contribute to South Africa's well-being
- 2.5 The NWMS, 2020 within the Waste Minimization pillar also identified food waste as an area that requires intervention, this is due to the growing environmental but also social and economic concerns, food waste is increasingly acknowledged as an urgent issue among governments, businesses, NGOs, academics, and the general public. In response, there is a mounting evidence base on the quantities of food wasted and the related emissions along the food production-consumption chain.
- 2.6 About one third (33%) of food produced for human consumption is lost or wasted. Approximately half of the 33% loss which is 16.5 take place during harvesting, with processing, packaging, distribution and retail accounting for a further 45% of wasted food – the remaining 5% of food waste is the responsibility of consumers.
- 2.7 The impact of food waste includes waste of resources such as water and energy through the supply chain, socio economic impact in respect of food security; it is estimated that 26% go to bed hungry and environmental impacts associated with waste and emissions of harmful gases.
- 2.8 One of the top priorities of government is food and nutrition security, which is seen to overlap across various national departments in South Africa; such departments include, the Department of Agriculture, Land Reform and Rural Development (DALRRD), the Department of Trade, Industry and Competition (dtic), the Department of Health (DoH) and the Department of Science and Innovation (DSI). Initially policy was seen as fragmented and under-resourced, however with the 2013 National Policy on Food and Nutrition Security, major inroads have been made to reduce hunger due to a lack of food. In efforts to address the issue of hunger and improve food security, especially in developing countries, food waste management is seen as an important driver (Oelofse and Nahman, 2013). Globally, food waste has become one of the important 17 items on the Sustainable Development Goals (SDGs) of the 2030 Agenda for sustainable development, of which the South African government is a signatory to. SDG 12.3 sets a target to reduce food waste by 50% by 2030 (World Wildlife Fund (WWF), 2017).

- 2.9 As a key intervention as part of the NWMS, 2020 Implementation Plan and in alignment to the 2017 Chemicals and Waste Economy Outcomes on Waste Minimization, a strategy for reducing food losses and waste prior to retail and that is associated with harvesting, processing and transport of food with food producers and retailers should be developed for implementation.
