1. PURPOSE OF THE REQUEST FOR PROPOSAL

- 1.1 The purpose of this Request for Proposal (RFP) is to invite proposals from suitably and experienced service providers to provide Oracle Identity Access Management (IAM) and Enterprise Content Management (ECM) services as described in the Scope of Work below.
- 1.2 This RFP will ensure that the GPAA receives a comprehensive service aligned with the deliverables and scope as specified below.

2. INTRODUCTION AND BACKGROUND

The GPAA administers the pension affairs of approximately 1,85 million government employees, pensioners, and beneficiaries. It has a national footprint of regional offices, co-location sites and a Head Office in Pretoria. In order to meet the changing needs of its diverse client base, the GPAA embarked on an initiative to consolidate all the various legacy solutions (Benefit Administration and Electronic content) used to administer the funds and schemes and at the same time replace it with current technologies that are aligned with the global industry standards and trends in terms of Benefit Administration, Client Relationship Management and Financial Management.

The GPAA makes use of different technology solutions to administer the funds and the schemes. Most of these are legacy solutions, not being capable of providing functionalities and capabilities used in modern solutions to service the clients effectively and efficiently. The clients that the GPAA must render services to spans several eras (age groups) with different levels of technology literacy.

In summary, the solutions/system used by the GPAA for the administration of benefits are:

- 2.1 Custom-built Benefit Administration System (Referred to as the CIVPEN system) hosted on an IBM mainframe (built in the early 1990s and is still the core system used for the administration of benefits). This system was developed using Software AG's Natural/Adabas hosted on the IBM mainframe running the Z/OS operating system. The data is stored in an Adabas database from where it is disseminated to other systems, mostly via flat files that are FTP'ed to the other environments/systems. Several HTTP/Web services are provided as part of the Benefit Administration solution for internal use by other systems of the GPAA to retrieve or update the Client database on the Benefit Administration system, which is still the Master Data repository for the administration of benefits. The services in this RFP are required to maintain and support the Benefit Administration mainframe application on the current hardware and software platforms until the future solution to replace the current Benefit Administration system is fully deployed and the current Benefit Administration and ECM systems can be retired/decommissioned.

The system has its own custom-built General Ledger (G/L), Payroll (monthly pension payments), Tax and Tax reconciliation and membership contribution management systems.

The system is used for the administration of the Government Employees Pension Fund (GEPF) and National Treasury (NT) products, such as Injury on Duty, Medical Finance, Military pensions, just to name a few.

The system provides functionality for both online and batch processing that is required for processing contributions received, payment runs and data management activities to and from the Benefit Administration system, as well as other calendar/seasonal processing.

- 2.2 PEKWA system that was custom-built using the VB6 programming language, which is no longer supported and not compatible with the newer Windows server and desktop software platforms. The system provides the functionality to scan and index content (using the Oculus Scan and Index modules customised for the GPAA) and the content, including the meta data is stored in an Oracle database. The system also keeps track of the locations and status of the source paper documents. The GPAA is in the process to migrate to Oracle's Enterprise Content Management (ECM) system as part of the future solution. The PEKWA system is used in conjunction with the Benefit Administration system, and the maintenance and support of the legacy ECM system will form part of the services required until the Oracle ECM solution is fully deployed for operational use and the legacy ECM system can be retired.
- 2.3 Custom-built Tax directive system used to facilitate and manage the tax directive requests from Benefit Administration system. The tax directive system exchanges tax directive requests from the Benefit Administration system and responses from SARS. The system has an online user interface to manually capture tax directive requests used by the GPAA's Payroll unit. The Tax Directive system was developed using the Java programming language (the solution is also due for replacement). The data is also stored in an Oracle database.
- 2.4 The GPAA has three main external interfaces that will require maintenance and support as part of the service, namely monthly membership contributions, benefit payments and Income Tax. There are a number of other interfaces with external/3rd parties to exchange data.
- 2.5 Custom-built Oracle BI Data Warehouse/Management Information and Reporting System, which is currently aligned with the current systems in use and updated daily from Benefit Administration system and the Oracle based solutions.
- 2.6 Custom-built Central Data Repository (CDR) that will be used to migrate data from the current Benefit Administration system to the CDR, which will in future be the Master Data Repository of the GPAA and to implement data quality monitoring and management tools until the new capabilities have been implemented.
- 2.7 Client contact centre (call centre service), that will ultimately be fully integrated with the back-end systems, which in turn integrate into the Benefit Administration system.
- 2.8 Client self-service mobile and web app, which was built in-house and is in the process of being expanded to provide more functionality and features to the clients of the GPAA.
- 2.9 Oracle IAM: Oracle Identity and Access Management (IAM) provides a robust framework for managing user identities, access controls, and governance across cloud and on-premises

environments. It is designed to secure enterprise applications and workloads while ensuring compliance with regulatory requirements.

2.9.1 Key Components of Oracle IAM: Oracle IAM architecture is built around several core components that work together to manage identities and access:

- Oracle Directory Services: This provides centralised storage and management of user identities, credentials, and attributes. It includes Oracle Unified Directory, which ensures high performance and secure identity storage.
- Oracle Access Management: This component handles authentication and authorisation for web-based applications. It enforces access control policies, enabling secure access to resources based on user roles and conditions.
- Oracle Identity Governance: This platform automates identity lifecycle management, including user account creation, modification, and access privilege assignments. It ensures compliance through identity intelligence and actionable analytics.

2.9.2 Features of Oracle IAM: Oracle IAM supports a wide range of features to meet enterprise security needs:

- Authentication and Single Sign-On (SSO): Simplifies user access across multiple applications with secure authentication mechanisms.
- Identity Lifecycle Management: Automates user provisioning, de-provisioning, and access reviews.
- Access Governance: Provides insights into access entitlements and ensures compliance through periodic reviews.
- Risk-Based Authentication: Incorporates context-aware and adaptive authentication to mitigate security risks.
- Integration: Supports hybrid environments by integrating with third-party applications, custom systems, and industry standards.

2.10 The implementation of the current IAM components was customised to fit the current GPAA structures and requirements.

Where

Ps = Points scored for price of the quotation or bid under consideration

4. GPAA SPECIFIC GOALS

4.2 THE GPAA Specific Goals that apply to bids above R1m (or in the event of panels, all quotations above R1m) include:

5. POINTS AWARDED FOR SPECIFIC GOALS FOR THIS BID

5.1 The following Specific Goals and points apply to this bid:

Note: Points out of 20/10 will proportionally be allocated for the specific goal applicable to this bid.

Specific Goals in terms of PPR2022 and Weighting (A (if applicable))	Points out of 20 for the 80/20 system (B1)	Points out of 10 for the 90/10 system (B2)	% Ownership To be completed by the bidder (C)	Points Claimed 80/20 To be completed by bidder (A x B1 x C =)	Points Claimed 90/10 To be completed by bidder (A x B2 x C =)
See example in 5.3.1 below					
% African ownership (100% of max points)	10 max	5 max	%		
% Coloured ownership (80% of max points)			%		
% Indian ownership (50% of max points)			%		
% women owned	5 max	0 max	%		
% youth owned	5 max		%		
TOTAL:	20				

N/A = Not applicable

5.2 Where reference is made to Locality, the following location and points apply:

	Desired Location (if applicable)
Municipality	Tshwane/Pretoria

5.3 Points claimed calculations:

- 5.3.1 **Ownership.** The points claimed will be calculated by multiplying the race weighting % by the maximum points for that goal by the % ownership by the race. For example a 70% African owned enterprise will score a $100\% \times 70\% \times 10$ max points = 7 points. If 30% of the enterprise is owned by coloured people, then an additional $80\% \times 30\% \times 10$ max points = 2.4 points, i.e. a total of 9.4 points for ownership.
- 5.3.1.1 Note that if GPAA requests proof of ownership, and the proof can either not be provided OR if the proof is dated after the declaration date, this will be deemed to be misrepresentation and GPAA will begin the remedy outlined below.
- 5.3.2 **Locality.** The points claimed for locality will be the maximum points if the bidder declares that they have Proof of Locality at the time of the declaration. If no proof of locality for the location described exists, then zero points must be claimed.
- 5.3.2.1 Note that if GPAA requests proof of location, and the proof can either not be provided OR if the proof is dated after the declaration date, this will be deemed to be misrepresentation and GPAA will begin the remedy outlined below.

6. SUBCONTRACTING

- 6.1.1 Subcontracting will be treated as condition of contract and not a condition of tender. The implication of this is that points will not be allocated to companies that submit a proposal with subcontracting where this was not requested.
- 6.1.2 Where subcontracting has been included as a condition of contract, all bidders will be assumed to agree with the condition of contract and so there will be no additional advantage for scoring points (note the fronting statement that follows).
- 6.1.3 Should a bidder voluntarily submit a proposal that subcontracts more than 25% of the work to designated groups, the bid may come under further scrutiny for signs of fronting. Bidders are encouraged to understand the fronting indicators as described on the Department of Trade, Industry and Competition website.

7. SUBMISSIONS BY CONSORTIUMS AND JOINT VENTURES

- 7.1 If a submission is made by a consortium or Joint Venture, the points claimed for ownership must be detailed separately on an attachment showing the following:
- 7.1.1 The percentage (%) of the contract allocated to each JV member or consortium member. This should also be included in an agreement to be made available on request by GPAA.
- 7.1.2 The percentage ownership by race category of each JV member or consortium member in each of the specific goals relevant to this bid.
- 7.1.3 The total points claimed will be the sum of the percentage contract allocation for each partner multiplied by the percentage weighting for the race category, multiplied by the percentage ownership in the relevant specific goal.
- 7.1.4 An example of the point calculation for JVs or consortiums can be requested of GPAA if required.
- 7.2 For small enterprises, the full points can only be claimed if all consortium members or the joint venture partners are either EMEs or QSEs (as permitted by the codes of good practice).

- 7.2.1 The points claimed for small enterprises is calculated proportional to the number of members/partners that are either EMEs or QSEs. If 2 of 3 of the consortium members (i.e., 66.67%) are either EME or QSE, then the points claimed will be 66.67% of the maximum points for small enterprises. For simplicity, points claimed for small enterprises will not be dependent on the percentage of the contract allocated to each JV member or consortium member.
- 7.3 For locality, full points can only be claimed if all consortium members or the joint venture partners are located in the specified area.
- 7.3.1 The points claimed for locality is calculated proportional to the number of members/partners located in the specified area. If 3 of 5 of the consortium members (i.e., 60%) have their businesses in the specified locality, then the points claimed will be 60% of the maximum points for locality. For simplicity, points claimed for locality will not be dependent on the percentage of the contract allocated to each JV member or consortium member.

- 3.1.1 Unless otherwise stated in the tender documents, respond to a request for clarification received on or before the deadline for clarification questions stated in the Tender documents and publish responses to bidders' questions on the GPAA website.
- 3.1.2 Consider any request to make a material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used to prequalify a tenderer to submit a tender offer in terms of a previous procurement process and deny any such request if as a consequence:
- a) an individual firm, or a joint venture as a whole, or any individual member of the joint venture fails to meet any of the collective or individual qualifying requirements;
 - d) the new partners to a joint venture were not prequalified in the first instance, either as individual firms or as another joint venture; or
 - e) in the opinion of the GPAA, acceptance of the material change would compromise the outcome of the prequalification process.

3.2 Issue addenda

If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date that tender documents are available until ten days before the tender closing time stated in the Tender documents. If, as a result a tenderer applies for an extension to the closing time stated in the Tender documents, the GPAA may grant such extension and, shall then publish the notice of closing time extension on the GPAA website and other media where the tender was advertised.

3.6 Grounds for rejection and disqualification

Determine whether there has been any effort by a tenderer to influence the processing of tender offers and instantly disqualify a tenderer (and his/her tender offer) if it is established that the tenderer engaged in corrupt or fraudulent practices or an effort by the tenderer to influence the tender process.

3.7 Test for acceptable tender

- 3.7.1 Determine before detailed evaluation, whether each tender offer properly received:

- the gross misplacement of the decimal point in any unit rate;
- omissions made in completing the pricing schedule or bills of quantities; or
- arithmetic errors in:
 - line item totals resulting from the product of a unit rate and a quantity in bills of quantities or schedules of prices; or

3.8.2 The GPAA must correct the arithmetical errors in the following manner:

- Where there is a discrepancy between the amounts in words and amounts in figures, the amount in words shall govern.
- If bills of quantities or pricing schedules apply and there is an error in the line item total resulting from the product or service of the unit rate and the quantity, the line item total shall govern and the unit rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line item total as quoted shall govern, and the unit rate shall be corrected.
- Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if bills of quantities or pricing schedules apply) to achieve the tendered total of the prices.

3.8.3 Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of the arithmetical error in the manner described above.

3.8.4 Where the GPAA provided the pricing schedule in an Excel spreadsheet format with the GPAA created formulae and one or more of the formulae is incorrect, then:

- The GPAA will correct the formulae and request the bidder to certify the correction(s); and
- Section 3.8.1 and 3.8.2 will not apply.

3.11 Evaluation of tender offers

3.11.1 General

Reduce each acceptable tender offer to a comparative offer and evaluate them using the tender evaluation methods and associated evaluation criteria that are specified in the tender document. The evaluation method for this tender is described in the specification document.

3.11.2 Method 1: Price and Preference

In the case of a price and preference:

- 1) Score points for price
- 2) Score points for specific goals as per Preferential Procurement Regulations, 2022
- 3) Add the points scored for price and specific goals.

3.11.3 Method 2: Functionality, Price and Preference

In the case of a functionality, price and preference:

- 1) Score functionality, rejecting all tender offers that fail to achieve the minimum number of points for functionality as stated in the Tender documents.
- 2) No tender must be regarded as an acceptable tender if it fails to achieve the minimum qualifying score for functionality as indicated in the tender invitation.
- 3) Tenders that have achieved the minimum qualification score for functionality must be evaluated further in terms of the preference points system prescribed in paragraphs 4 and 5 below.

The 80/20 preference point system for acquisition of services, works or goods up to a Rand value of R50 million

- 4)(a) The following formula must be used to calculate the points out of 80 for price in respect of tenders of an invitation for tender with a rand value equal or below R 50 million, inclusive of all applicable taxes:

$$P_s = 80 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where

P_s = Points scored for comparative price of tender or offer under consideration;

P_t = Comparative price of tender or offer under consideration; and

P_{min} = Comparative price of lowest acceptable tender or offer.

- 4)(b) A maximum of 20 points may be awarded to a tenderer for the specific goal specified for the tender.
- (4)(c) The points scored for the specific goal must be added to the points scored for price and the total must be rounded off to the nearest two decimal places.
- (4)(d) Subject to section 2(1)(f) of the Preferential Procurement Policy Framework Act, 2001 the contract must be awarded to the tenderer who scores the highest total number of points.

The 90/10 preference point system for acquisition of services, works or goods with a Rand value above R50 million

- 5)(a) The following formula must be used to calculate the points out of 90 for price in respect of tenders of an invitation for tender with a rand value above R 50 million, inclusive of all applicable taxes:

$$P_s = 90 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where

P_s = Points scored for comparative price of tender or offer under consideration;

P_t = Comparative price of tender or offer under consideration; and

P_{min} = Comparative price of lowest acceptable tender or offer.

- 5)(b) A maximum of 10 points may be awarded to a tenderer for the specific goal specified for the tender.
- 5)(c) The points scored for the specific goal must be added to the points scored for price and the total must be rounded off to the nearest two decimal places.
- 5)(d) Subject to section 2(1)(f) of the Preferential Procurement Framework Act, 2001 the contract must be awarded to the tenderer scoring the highest total number of points.

3.11.4 Method 3: Any other evaluation method described in the tender document.

The GPAA may also decide on any other evaluation method described in the tender document.

3.12 Acceptance of tender offer

- a) addenda issued during the tender period,
- b) inclusion of some of the returnable documents, and
- c) other revisions agreed between GPAA and the successful tenderer.

3.14 Publication of successful tenderer

3.14.1. Notify the successful tenderer of the GPAA's acceptance of his tender offer by sending an award letter to the successful tenderer before the expiry of the validity period stated in the tender documents, or agreed additional period.

3.16 Provide written reasons for actions taken
