SECTION 3: RFI SCOPE OF REQUIREMENTS

1 INTRODUCTION

Transnet Pipelines (TPL) operates 40 geographically dispersed sites, including pump stations, booster stations, metering stations, Terminals and workshops, currently powered by Eskom and various municipal utilities. The existing energy supply is predominantly fossil fuel-based, increasingly expensive, and subject to reliability challenges.

2 BACKGROUND

Transnet Pipelines (TPL), a division of Transnet SOC Ltd, is responsible for the high-pressure transportation of petroleum products over a network that spans more than 3,800 kilometers across South Africa. In alignment with Transnet's Environmental Sustainability Strategy and national climate goals, TPL has committed to achieving net-zero carbon emissions by 2040, primarily by decarbonizing its electricity use, which represents a significant share of its Scope 2 emissions, which are indirect emissions from the generation of purchased electricity consumed in operations. Energy is a critical input in TPL's operations, particularly electricity consumed by large-scale pump stations and depots dispersed across five provinces.

As part of its decarbonization journey, TPL is initiating a Renewable Energy Implementation Program aimed at transitioning its energy supply to sustainable sources while improving energy security and reducing long-term operational costs. This Request for Information (RFI) serves as a market-sounding instrument to invite experienced Independent Power Producers (IPPs), energy solution providers, technology innovators, and financiers to provide non-binding responses that will help shape TPL's renewable energy procurement strategies.

Your submission should include in detail your proposed methodology, and preliminary program of expected activities.

3 KEY OBJECTIVES OF THIS RFI PROCESS

The following list of deliverables captures the minimum intent and objectives of the RFI process. Transnet requests all Respondents to assist with the achievement of these objectives by submitting the requested information as indicated below:

- Minimizing costs
- Improve energy security
- Compliance to Transnet energy policy
- Transnet's intention is to gain insight into the market capabilities, delivery models, financial structuring options and the technical feasibility of implementing wheeled renewable energy solutions tailored to its operational footprint.

Refer to **Annexure A** for detailed scope of works.
