1. PROJECT BACKGROUND AND GOAL

1.1 The user background to the project effort

The Gauteng Provincial Treasury (GPT) has the responsibility of promoting good governance in the province by acting as a steward of all financial issues. Among the responsibilities of the GPT include ensuring that strategies and major provincial objectives are aligned with the Transformation, Modernization, and Re-industrialization (TMR) program which is supported through the implementation of projects and initiatives. In this respect, the GPT supports all ten pillars by reprioritizing and ensuring that resources are allocated to all the new provincial priorities identified.

Treasury Regulation 8.2.3 states that “Unless determined otherwise in a contract or other agreement, all payments due to creditors must be settled within 30 days from receipt of an invoice or, in the case of civil claims, the date of settlement or court judgment”.

According to section 38(1)(f) of the PFMA, it is the Accounting Officer’s responsibility to settle all contractual obligations and to pay all money outstanding, including inter-governmental claims, within the stipulated (30 days) or agreed-upon period.

In support of the above, GPG automated the submission, scanning and processing of supplier invoices received through the "Readsoft" E-Invoicing software”. Approximately 480 000 invoices and associated documents are received and processed each year. This system also support quicker turnaround times for invoice submission and processing by reducing human intervention in the process.

Current E-Invoicing system challenges:

While the existing E-Invoicing system contains some RPA capability in the form of optical character recognition (OCR) software, the remainder of the automated invoice processing often requires manual capturing or human involvement to resolve errors and finish processing.

Among other things, the following problems were identified for all Gauteng Provincial Government (GPG) departments:

- a) The manual supplier registration process for electronic invoice submission resulted in delays and incomplete/ incorrect submissions.
- b) Manual data entry or correction of invoice errors.
- c) Delays in transferring e-invoicing information between system modules and applications
- d) Manual routing of invoices for resolutions of exceptions and approvals
- e) Limited online collaboration with suppliers tracking their invoices
- f) Inadequate user access management capabilities
- g) Inadequate reporting capabilities

1.2 The goal of the project

Appointment of a service provider to offer the GPG departments and trading entities a Web-based supplier invoice submission portal and robotic and cognitive automation (R&CA) for accounts payable processing tasks inside the SAP system. The proposed solution should be implemented in six months, with two months added for performance monitoring, support, and knowledge transfer.
