

Lines Production Equipment

NB: Once off purchase

1. Generator AC:230 V,95 A,3,21 KW

Supply and delivery of 3-phase generator as to power up rockcreter machine.

The 3-phase machine needs to be procured in order to power-up the rockcreter machine that will be used for spraying the steel cross members/ lattices with a certain material of ash mix with a solution. This for ensuring that we devalue the steel and so that perpetrators that comes and steel members may lose interest as that alone will not make things easier for them.

2. Woodchipper (Shredding Machine)

Supply and delivery of Rockcreter Machine. The machine will assist more in trying to be environmental compliant in terms DAFF and NEMA when it comes to the disposal of cut stumps and brunches in residential areas. Since we are mandated to carry-out activity of cutting trees under powerlines especially the ones that has a potential to trip or flashover the line.

3. Set: Riveting Set, Antivandal Bolts / Sewage Bolts

Supply and delivery of Sewage Bolt Machine. The Sewage bolt machine will assist in ensuring that we replace the normal bolt and nuts with cut off or shred off nuts in order to delay the process of unfastening the bolts from our tower structures.

4. Rockcreter Machine

Supply and delivery of Rockcreter Machine. The 3-phase machine needs to be procured in order to power-up the rockcreter machine that will be used for spraying the steel cross members/ lattices with a certain material of ash mix with a solution. This for ensuring that we devalue the steel and so that perpetrators that comes and steel members may lose interest as that alone will not make things easier for them.
