SECTION 7: SCOPE AND SPECIFICATION OF REQUIRED SUPPLY / SERVICES

7.1 INTRODUCTION

7.1.1 BACKGROUND

The Catalytic Projects Directorate (CPD) has been established within the Economic Development and Planning Cluster of the Municipality, with the purpose of facilitating and driving land development programs and projects that are of a catalytic nature within the City.

There are currently approximately 30 land development programmes/projects that are being facilitated/driven in the Directorate. These programmes vary in terms of their public, private, and/or PPP status as well as the nature and scale of the programmes themselves. Many of these projects are mixed-use, combining commercial, industrial, and residential aspects, while others are purely industrial or commercial. In terms of scale, they also vary from site-specific developments to precinct developments to broader multi-precinct programmes.

Catalytic Land Developments Projects (hereafter referred as the Projects) are critical to the City's desire to achieve strong economic growth, sustainable job creation, and poverty alleviation. In this regard, the City facilitates development in priority nodes and corridors. To facilitate the projects, a range of partnership agreements typically have to be concluded with both the developers and other spheres of government as implementing agents, which stipulate how the parties will collaborate, and specific roles and responsibilities for planning, funding, and/or construction of infrastructure needed to unlock the catalytic programmes.

In line with the City's mandate, the agreements would essentially outline the City's intention to support specific catalytic projects in the areas of facilitating statutory approvals and bulk infrastructure development. Furthermore, broader agreements have sought to combine the efforts of the City with those of other spheres of government, in relation to funding such bulk infrastructure, and/or performing other related functions.

It is therefore necessary to appoint a service provider with the anticipated skills required to develop a framework and business processes that will serve as a guide for implementing catalytic programmes and projects.

“Work/Projects of a similar nature as defined in detail under the scope of services should have been completed/executed for catalytic land development projects or from the following similar project environment.

Item	Category	Examples
1	Catalytic precinct development projects	• Mixed-use development precincts • Urban regeneration precincts • Economic development nodes • Industrial and logistics parks

2	Public-Private Partnerships (PPP) projects	• Government infrastructure • Transport-oriented developments (TODs) • Commercial or mixed-use developments delivered through PPPs • Human settlement integrated with economic opportunities • Infrastructure-led development programmes
3	Development finance and investment projects	• Feasibility studies • Business cases for land developments • Infrastructure funding strategies • Investment attraction programmes
4	Integrated spatial planning projects	• Precinct plans • Spatial Development Frameworks • Local Area plans • Capital Investment Frameworks • Infrastructure Master plans

7.1.2 EMPLOYER'S OBJECTIVES	
TOPIC	COMMENTARY
Client's / employer's objectives	Project Purpose and Broad Objectives The main purpose of this project is to establish a dedicated team of professionals to develop a framework and business processes for implementing catalytic projects, using consistent, uniform methodologies and criteria for assessing and evaluating catalytic projects and programs across the four regions (North, North-Central, Central, West, and South). The objective is to address the following: 1. Develop institutional arrangements guidelines for collaboration between the eThekweni Municipality, Private Developers, and other spheres of government for the implementation of bulk infrastructure to support Catalytic Projects 2. Develop guidelines for the motivation for capital funding, taking into account the City's regulatory framework, interalia, SPLUMA, MFMA, Development Charges Policy, Rates Policy, Incentives Policy, The Municipal Fiscal Powers and Functions Act, and other relevant frameworks. 3. Develop a model to determine the project's bankability and the cost-sharing funding structure for bulk infrastructure required to support Catalytic Projects, taking into account all relevant legislation. 4. Develop an incentive programme to promote development across the four regions within eThekweni Municipality, prioritising identified areas of investment in the municipality's Spatial Development Framework. It is anticipated that the following key stream leads in their specialised fields, supported by the relevant team members, may be required to facilitate the development of business processes: 1. Project Lead 2. Development Economist 3. Project Finance Specialist 4. Infrastructure Specialist 5. Legal Advisor 6. Urban/Spatial Planner
Description of the services	The Professional Service Provider (PSP) will be required to develop a comprehensive framework, a guiding document for business processes for the implementation of catalytic land development projects that follow a strategic, logical flow, ensuring alignment with planning, funding, implementation, and governance requirements and approvals. This document will also outline the implementation timelines and outputs required for monitoring, reporting, and accountability. The framework will be developed in three phases over 36 months, Phase 1: Inception In this phase, the PSP and the Employer will set the foundation for the assignment by confirming the project understanding, refining the scope, finalizing the methodology and detailing the execution plan. It is to ensure alignment between the

	Employer and PSP before moving into substantive work As a guide, the Inception report should outline the key components, but not limited to: ○ Project understanding and interpretation ○ Methodology and approach ○ Detailed work plan and deliverables schedule ○ Budget and monthly cash flow ○ Stakeholder Engagement Strategy ○ Risk and assumptions framework ○ Quality assurance measures <i>Milestone: Sign-off of the inception report and project charter</i> Phase 2: Situational Analysis Background Information The Municipality has historically entered into/explored various agreements with Developers and other spheres of government, which have included: a) Generic MOUs outlining intent to collaborate for jointly desired outcomes b) MOAs wherein an Implementing Agent is appointed to implement bulk infrastructure that falls within the mandate of the Municipality. These appointments must be executed in accordance with Supply Chain Management (SCM) Regulations/Policy, Municipal Finance Management Act (MFMA) and any other applicable legislation. Some of the issues that have been encountered in the execution of these agreements include: i) Ascertaining the appropriate internal authority to authorize the Accounting Officer to enter into the agreement i.e. Council or Bid Adjudication Committee; ii) Structuring the Agreements for multi-phase developments in such a way that do not trigger MFMA clauses that may delay implementation, e.g. financial commitments beyond a 3 year period; a S33 process for infrastructure that takes long to plan and construct; compliance with SCM Regulation where a deviation from S36 is required to fast-track delivery; iii) Contract management issues in cases where the agreements were not aligned to standard industry contracts such as the General Conditions of Contract for Construction Works (GCC), especially in relation to payment processes and Force Majeure incidents. c) MOAs with other Service Authorities outlining roles and responsibilities around bulk infrastructure that is owned by them and needs to be implemented in the short term to unlock a catalytic programme. An example is an MOA for the de-proclamation of Kassier Road by KZN DOT, which was signed so as to facilitate funding by the City of this piece of infrastructure that is owned by another sphere of government. d) Services Agreements or Service Level Agreements: these are technical agreements entered into with Developers wherein the roles and responsibilities of the Developer and the City's line departments in relation to delivery of required bulk infrastructure, as well as funding thereof, are stipulated.
