***The test for substantive responsiveness [Step Two] must be passed for a Respondent's proposal to progress to Step Three for further evaluation.***

**1.3 STEP THREE: Evaluation and Final Weighted Scoring**

a) **Price** [Weighted score 80 points]:

Evaluation Criteria	RFP Reference
<ul style="list-style-type: none"> <li>fully completed priced offer</li> </ul>	<i>Section 4</i>

Transnet will utilise the following formula in its evaluation of Price:

$$PS = 80 \left( 1 - \frac{Pt - Pmin}{Pmin} \right)$$

Where:

- Ps* = Score for the Bid under consideration
- Pt* = Price of Bid under consideration
- Pmin* = Price of lowest acceptable Bid

b) **Specific Goals** [Weighted score 20 point]

- Specific goals claim form
- Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in Section 7, paragraph 3.2 of the specific goals Claim Form.

**1.4 STEP FOUR: Post Tender Negotiations (if applicable)**

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
  - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
  - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.

- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

### 1.5 STEP FIVE: Award of business and conclusion of contract

- Immediately after approval to award the contract has been received, the successful or preferred bidder(s) will be informed of the acceptance of his/their Quotation by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s).
- Otherwise, a final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.

## 2 Validity Period

Transnet requires a validity period of 180 [28 May 2024] Business Days from the closing date of this RFQ, excluding the first day and including the last day.

Bidders are to note that they may be requested to extend the validity period of their bid, on the same terms and conditions, if the internal evaluation process has not been finalised within the validity period. However, once the adjudication body has approved the process and award of the business to the successful bidder(s), the validity of the successful bidder(s)' bid will be deemed to remain valid until a final contract has been concluded.

## 1.0 SCOPE

- 1.1 This specification details Transnet's requirements for the supply of stationary Plantè vented lead-acid batteries or Gel valve-regulated lead-acid batteries.
- 1.2 This specification contains schedule of requirements (Appendix A) which shall be completed by the relevant Transnet Representative.
- 1.3 This specification contains technical datasheet (Annexure B) which shall be completed by the supplier and must be submitted as part of the tender documents.

## 2.0 BACKGROUND

Batteries are used in 3 kV DC traction substations for the following purposes:

- Tripping and closing of primary circuit breakers.
- Supply to protection relays.
- Closing and holding coil supply to DC high speed circuit breakers.
- 110 V DC supply to control panel.

Currently, Plantè Lead-Acid batteries are used in 3 kV DC traction substations for the supply to protection and control equipment when there is a loss of the auxiliary power supply. However, due to the maintenance intensive nature of this battery type, newer battery types have been investigated to replace Plantè Lead-Acid batteries.

One of the battery types investigated and approved includes Gel valve-regulated lead-acid batteries that were piloted in Bon Accord 3 kV DC traction substation for performance testing. This specification serves as a temporary solution aimed at allowing for the procurement of either Plantè vented or Gel valve-regulated lead-acid batteries, based on the depot requirements, while other technologies are being tested.
