## **REGIONAL OPERATIONS AND COORDINATION**

### **BID NAME**

**REQUEST FOR INFORMATION FROM LEGITIMATE PRODUCERS OF  
DISINFECTANT WATER TREATMENT TECHNOLOGY FOR SWIMMING POOLS  
AND RELATED FACILITIES FOR THE CITY OF TSHWANE.**

### **BID NUMBER**

**ROC 09 2023/ 2024**

#### **1. INTRODUCTION AND PURPOSE**

The aim of this Request for Information (RFI) is to provide an early market engagement to assist City of Tshwane in obtaining information about alternative disinfectant water treatment technologies, resources and solutions for municipal swimming pools and related facilities.

#### **2. BACKGROUND**

The City of Tshwane is responsible for sport and recreational services to the communities including municipal swimming pools and related facilities. The City of Tshwane currently make use of 70 kg Liquid Chlorine Gas products and systems at the swimming pools. The availability of Liquid Chlorine Gas by the supplier base of the South African market has prompted the City of Tshwane to gauge interest from parties that can offer alternative disinfectant water treatment products, materials, components, equipment, and systems, as opposed to Liquid Chlorine Gas.

### 3. PROJECT SCOPE

The goal of this potential project is to contract legitimate producers of disinfectant water treatment technology who will be able to offer an alternative disinfectant water treatment solution. The alternative disinfectant water treatment solution offered would need to ensure that the quality of the water of all municipal swimming pools and related facilities comply with the requirements of the following legislation, National Norms and Standards regulations, and guideline to protect the bather from microbial pathogens:

1. Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act 54 of 1972): Regulations governing microbiological standards for foodstuffs and related matters.
2. SANS 241 Standards for Drinking Water.
3. The 2006 World Health Organisation (WHO) guidelines for recreational water environments (volume 2: Swimming pool water and similar recreational environments).

In terms of chemical parameters, both the WHO guidelines and the National Norms and Standards state that parameters such as pH, turbidity, residual disinfectant, and microbiological must be frequently monitored. The WHO guidelines further states that no harm should come from the pH or chemicals added to treat the water. The alternative disinfectant water treatment solution should also address the monitoring and evaluation of these parameters.

The products, materials, components, equipment, and system(s) of the disinfectant water treatment solution should address the risks of the City of Tshwane related to the unreliable availability of 70 kg Liquid Chlorine Gas cylinders by the supplier base in South African.

The alternative disinfectant water treatment solution must ensure that the quality of the water of all municipal swimming pools and related facilities comply to all relevant health and safety standards.

The optimal disinfectant water treatment solution to be procured will be determined by the solution's ability to switch from the current Liquid Chlorine Gas products and systems with the least impact. The offering must unpack how (the current Liquid Chlorine Gas products and systems will be switched over to the alternative disinfectant/ water treatment solution).

This will be determined at a later stage during the subsequent phases of the programme, preferably before issuing the Request for Proposals.

## **CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
