NO	SCOPE OF WORK (DESCRIPTION SERVICES OR GOODS)	QUANTITY
	REQUEST TO APPOINT AN INDEPENDENT SERVICE PROVIDER TO DEVELOP THE NATIONAL TOURISM STATISTICS PLAN • The Tourism Sector in South Africa is identified as one of the key sectors that contribute to the country's economy through job creation and economic growth. The collection of tourism statistics and information allows for the monitoring and evaluation of the tourism sector's contribution to the South African economy. The use of tourism statistics and information by both public and private sector requires that the information provided be accurate and reliable to inform proper planning and decision-making. • There has been challenges with the availability and reliability of tourism statistics and information, and over the years the Department of Tourism together with key stakeholders have tried to mitigate these challenges through the work done within the Tourism Statistics Technical Committee. The committee's work includes amongst others, ensuring that correct standards and definitions are used as well as to ensure the quality and reliability key tourism statistics. • As part of the process to improve tourism statistics and information, during the 2021/22 financial year, the Department of Tourism developed a National Tourism Analytics System Framework (NTASF) which will serve as a guideline that will be used to develop the National Tourism Analytics System (NTAS). The NTASF provides amongst others, the key indicators, sub-indicators, data sources and the process of accessing available tourism statistics and information at global and national level (Department of Tourism, 2021). • While conducting the study to develop the NTASF, most stakeholders indicated that there were a number of challenges with the availability, collection and dissemination of provincial tourism statistics. The challenges include, amongst others, the use of different methodologies; inconsistencies in the tourism standards and definitions, concepts applied, different interpretations of provincial tourism data as well as inconsistencies with the provincial inbound and domestic tourism performance data available. Considering these challenges, for the financial year 2022/23, the Department of Tourism then conducted a detailed study that focused on the state and availability of key tourism statistics and resources at provincial level. The study aimed to better understand the state of tourism statistics and resources at provincial level and to identify the gaps and challenges with regard to the collection, analysis and dissemination of provincial tourism statistics. • The findings from the study also confirmed that there were still some challenges already outlined in the paragraph above. The study findings also indicated that there was a lack of understanding regarding the work that needs to be done in providing and analysing tourism statistics to report on tourism performance. There was also no collective agreement amongst the different levels of government on what is needed to be done at national, provincial and local level to improve the availability and quality of tourism statistics. • A recommendation emanating from the study included the development of a National Tourism Statistics Plan (NTSP) that details the importance and need for tourism statistics and a centralised database that could be used nationally, provincially and locally to access tourism information and statistics by all stakeholders. Furthermore, the NTSP should outline the programmes, projects and partnerships needed for the production of key tourism statistics and the development of this centralised database. The	1

development of the NTSP could be used as one of the tools currently used by the Department as interventions to address the challenges with regards tourism statistics and information.

The successful bidder will be responsible to execute the following:

- **Project Plan:** a project plan will outline the details of the process of developing the NTSP by the service provider. It will serve as a guide for the project execution and include the expected outcomes as well as the timelines.
- **Literature Review:** the literature review will be done through desktop research and will aim to get the current understanding and benchmark with similar projects that have been developed by other institutions or countries. The findings will be used as a guide for TORs that will be used to develop the NTSP.
- **Terms of Reference for the Development of the National Tourism Statistics Plan:** in order to develop the National Tourism Statistics Plan, Terms of Reference (TORs) needs to be developed. The TORs will be informed by the findings from the literature review to outline amongst others, the NTSP key purpose and objectives, indicate the approach that will be used to develop the NTSP, the stakeholders that will be consulted, process to be followed in approving the plan. The document will also be used to consult with relevant stakeholders for inputs and comments regarding the development of the NTSP.
- **Progress Reports:** progress reports on the status of the project would also be produced on a monthly basis or as required to track the status of the project and to identify and mitigate challenges that could take place which might affect the project deliverables. These progress reports would be presented at project management meetings.
- **Draft and Final National Tourism Statistics Plan:** draft NTSP will be developed for consultation with key stakeholders before it is finalised and submitted for approval.
- Furthermore, the appointed service provider will be required to develop presentations, present at all stakeholder consultation meetings and attend project management meetings.

Duration of Project:

- The project will commence as soon as the service provider is appointed and will end 29 March 2024.

Documents required from bidder:

- The bidder will be requested to submit a proposal of the work to be undertaken in order for the National Tourism Statistics Plan to be developed. The proposal could include amongst others, recommended approach, workplan, project team and relevant experience with similar projects conducted can also be submitted.

Cost:

- The bidder will be requested to give a quote regarding the work to be undertaken for the National Tourism Statistics Plan to be developed. The cost must be VAT inclusive and should be quoted in South African Rand.
