SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

Over the years there has been an overwhelming need for track and trace functionality to support business and customers' requirements for provision of near real-time information of consignments on the TFR wagons. TFR remains committed to prioritising the provision of operational data through track and trace capability despite the delays in implementation.

In a quest to foster continuous improvement and customer satisfaction, TFR embarked on various feasibility studies in the form of Proof of Concept (POC) and pilots. In 2016 a study to investigate the capability and suitability of active track and trace technology was conducted. Between 2018 and 2021 a few POCs were done where suppliers participated in the Request for Information (RFI) to install active track and trace devices on wagons to test the feasibility of the technology. From the above independent studies conducted, there is sufficient information confirming the feasibility, viability and desirability of the track and trace technology.

TFR has also received requests from entities (i.e., Customers, Service Providers, etc), to explore an option of fitting track and trace devices on TFR's assets for the purpose of providing consignment related insights to customers.

To enable and realise the full benefits of track and trace capability, TFR operational information such as train numbers, ETA, ETD, consignment numbers etc., will be required.

It is against this background that TFR has decided to create a platform that enables stakeholders interested in the track and trace capability to collaborate with TFR in the provision of the service

Note the details of annexures below:

Annexure 1: Technical Compliance Sheet

Annexure 2: Technical Standard: Active Vehicle Track and Trace Device

Annexure 3: Technical Standard: Environmental Standards (Physical Characteristic of the Railway Environment in South Africa)

It shall be the responsibility of the interested stakeholders to establish partnerships/agreements where necessary, and to source, install, test, and operationalise the tracking devices on wagons to ingest the required information at their cost.

The interested entities shall be required to comply with specified TFR standards, terms and conditions and be subjected to a fee for the right of service.

NB: Please note that the active tracking and tracing of locomotives are not included as part of the scope.
