**TERMS OF REFERENCE TO UNDERTAKE RESEARCH PROJECT COE 200201
“DEVELOPMENT OF AWARENESS AND TRAINING MATERIAL ON EARLY ENTRY
EXAMINATION AND MAKING SAFE (EEE & MS)”**

1. BACKGROUND

The Mine Health and Safety Council (MHSC) is a national public entity (Schedule 3A) established in terms of the Mine Health and Safety Act (MHSA), No. 29 of 1996, as amended. The MHSC is mandated to advise the Minister of Mineral Resources and Energy (DMRE) on Occupational Health and Safety (OHS) issues in the mining industry, relating to the development and implementation of the MHSC annual OHS research programme, reviewing and development of mining OHS legislation and dissemination (knowledge and technology transfer) of MHSC research outcomes to improve OHS conditions in the South African Mining Industry (SAMI).

The MHSC's analysis of the Occupational Health and Safety Reports from the DMRE during the calendar year of 2019 have indicated that FOG is still the leading cause of fatalities in the SAMI. A much more concerted effort is required to ensure that a positive impact is achieved in reducing injury and fatalities in this regard. This means that efforts to get to the heads and hearts of mine workers is required, constant reminders and creating awareness more effectively is essential.

Falls of Ground (FOG) has been the leading cause of injuries and fatalities in the SAMI for decades and has led to a number of interventions to prevent or reduce the effects with regards to occupational safety. In many cases, these injuries and fatalities occur at the beginning of the shift during the early entry examination (EEE) and making safe process (MS).

Chapter 2 of the Mine Health and Safety Act, 1996 (Act 29 of 1996) (MHSA), as amended, requires that the employer of every mine that is being worked must-

(a) ensure, as far as reasonably practicable, that the mine is designed, constructed and equipped-

FB
D

- i. to provide conditions for safe operation and a healthy working environment; and with a communication system and with electrical, mechanical and other equipment as necessary to achieve those conditions;
- (b) ensure, as far as reasonably practicable, that the mine is commissioned, operated, maintained and decommissioned in such a way that employees can perform their work without endangering the health and safety of themselves or of any other person

EEE & MS forms part of mines practice to ensure that mines are operated without risk to health and safety of employees and non-employees as per the requirements of The Mine Health and Safety Act 29 of 1996, as amended. Over the years, great strides have been accomplished with regards to improving occupational health and safety in the SAMI. However, gaps (human behaviour, culture, training, shift cycles, etc.) still exist that lead to avoidable accidents, fatalities and occupational exposures. This has led to a need to further popularise available awareness and training materials and initiatives in the SAMI.

2. REQUIREMENT

The MHSC seeks to appoint a service provider to assist with the Development of awareness and training material on early entry examination and making safe (EEE & MS).

Note:

1. **Research Service Providers must clearly outline how they will mitigate the risk of spreading the Corona Virus disease (COVID 19) during the execution of the project.**
