## **1. INTRODUCTION**

Camden is located approximately 15km from Ermelo, Mpumalanga, along the N2 road. The old ash dam is outside and north-west of the station. The AWRD's can be accessed via the gravel road leading from Oak Road just before the station's main entrance. Currently, the two compartments are silted-up with ash which reduces its original design capacity. Therefore, an urgent dredging of the dam's two compartments is required to restore its original capacity.

## **2. THIS REPORT WILL FOCUS ON THE EVALUATION OF SUPPORTING CLAUSES**

### **2.1 SCOPE**

This document covers the different aspects that will be evaluated and scored by the two-discipline Technical Evaluation Team (TET) to complete the technical evaluation of the Ash Water Return Dam Compartment 1 & 2 Dredging project- Civil Scope of Work enquiry.
