## **SECTION 2: BACKGROUND, PURPOSE, AND SCOPE OF WORK**

### **2.1 Background and/or Purpose of this Bid**

Airport security provides an environment wherein passengers, staff, aircraft, and airport property are given assurance and protection from accidental or malicious harm, crime, terrorism and other unlawful acts. The evolution of airport security environments and rapid technological advancement has in recent years highlighted the need for airports around the world to develop and co-ordinate their security systems and functions into well-managed and streamlined operations. Effective airport security management involves far more than having the right security systems in place - it requires systems to be integrated and services to be continually updated and managed from centralised locations.

As noted by the South African Civil Aviation Authority (SACAA), "the primary objective of international civil aviation security is to ensure the protection and safeguarding of passengers, crew, ground personnel, the general public, aircraft and facilities of an airport serving international civil aviation, against acts of unlawful interference perpetrated on the ground or in-flight". In response to the risk posed by these threats, Airports Company South Africa (ACSA) has deployed various security systems and techniques, such as access control and closed-circuit television, to ensure the safety of its airports. These systems currently operate independently of each other and are not integrated on a single platform. In addition, the lack of integration has resulted in suboptimal utilisation of the existing infrastructure.

An Intelligent Integrated Security Platform (IISP) will integrate individual systems and enable central operation from one application. Combining data from different sources will make systems more intelligent and, therefore, more effective.

The available platforms in the market are scalable and enable the integration of future technologies that ACSA is currently evaluating. It is envisioned that implementing an integration solution will assist the organisation to manage its security resources ("boots on the ground") in a much more coordinated and efficient manner which will drive down operating expenditure. The platform will also improve the monitoring and reporting of security-related incidents and consolidate security processes.

## **2.2 Scope of Work**

***See Annexure A – Scope of Work***

***See Annexure C - Service Management, Preventative and Corrective Maintenance***

***See Annexure D- Transformation requirements***

## **2.3 Pricing Schedule**

***See Annexure B – Pricing Schedule***

## SECTION 3: EVALUATION CRITERIA

### 3.1 Evaluation Criteria

- 3.1.1 ACSA will use a pre-determined evaluation criteria when considering received bids. The evaluation criteria will consider **mandatory administrative, functionality, Demonstration, and Price and Preference**. During the evaluation of received bids ACSA will make an assessment whether all the bids comply with set minimum requirements and whether all returnable documents/information have been submitted. Bidders which fail to meet minimum requirements, thresholds or have not submitted required mandatory documents will be disqualified from the bid process.
- 3.1.2 The requirements of any given stage must be complied with prior to progression to the next stage. ACSA reserves the right to disqualify bidders without requesting any outstanding document/information.

3.2 A staged approach will be used to evaluate bids and the approach will be as follows:

Stage 1	Stage 2	Stage 3	Stage 4	Stage 5	Stage 6	Stage 7
Check if all the documents have been received.	Mandatory Requirements	Evaluate on functionality or the technical aspect of the bid.	Demonstration evaluations	Evaluate price and Preference	Post tender negotiations. <i>(if deemed necessary)</i>	Security Vetting <i>(if deemed necessary)</i>

### 3.3 Mandatory Requirements

A list of mandatory returnable documents must be consulted to understand which documents are required at the closing date and time. Further, to the mandatory returnable documents/information ACSA will only consider bidders which have:

1. An OEM accreditation letter for the proposed solution.
2. A Certificate of compliance with Information Security Management, i.e. ISO/IEC 27001:2002 of the bidding entity or hosting entity.
3. Security and Data Protection Plan (How ACSA data will be protected and how unauthorized people are prevented from accessing ACSA's data)
4. Registration and attendance to Briefing Session

**Bidders that do not meet all the above requirements will be disqualified and not evaluated further. No Bid will be awarded to any person who is not declared Tax Compliant by the South African Revenue Service (SARS).**

### 3.4 Functionality

The functionality evaluation will be conducted by the end-user/operations/the Tender Preparation and Evaluation Committee which comprises of various skilled and experienced members from diverse professional disciplines. The evaluation process will be based on functionality criteria. The criteria will be as follows:

#### 3.5.1. Functionality Criteria

The functional evaluation will be based on a threshold, where bidders which fail to achieve a minimum of **78 points** on the functional stage will not be considered further in the evaluation. It should be further noted that a minimum qualifying score per criteria must be met as set out in the evaluation criteria. Failure to achieve **any** of the minimum scores would result in disqualification for further consideration even if the overall minimum total score had been achieved.
