2 INTRODUCTION AND BACKGROUND INFORMATION

Since 2017, DEDEAT continued to support the industrial sectors (furniture, electrical, electronic, metals, chemicals, plastics, automotive, energy, and agro-processing) through the establishment of a Manufacturing Support Centre (MSC). A self-help web-based portal with the functionality to allow companies to raise a ticket to request financial or non-financial support. Through the appointment of a service provider, the MSC provides 24-hour helpdesk support and the additional packaging of interventions to support manufacturing and agro-processing companies in the province.

In 2020 with the commencement of the Covid 19 pandemic and subsequent local down regulations, the MSC was utilised to be the point of entry for businesses to log their distress call and be assisted with financial support through the provincial Job stimulus fund.

The company tickets raised can be summarised as the following:

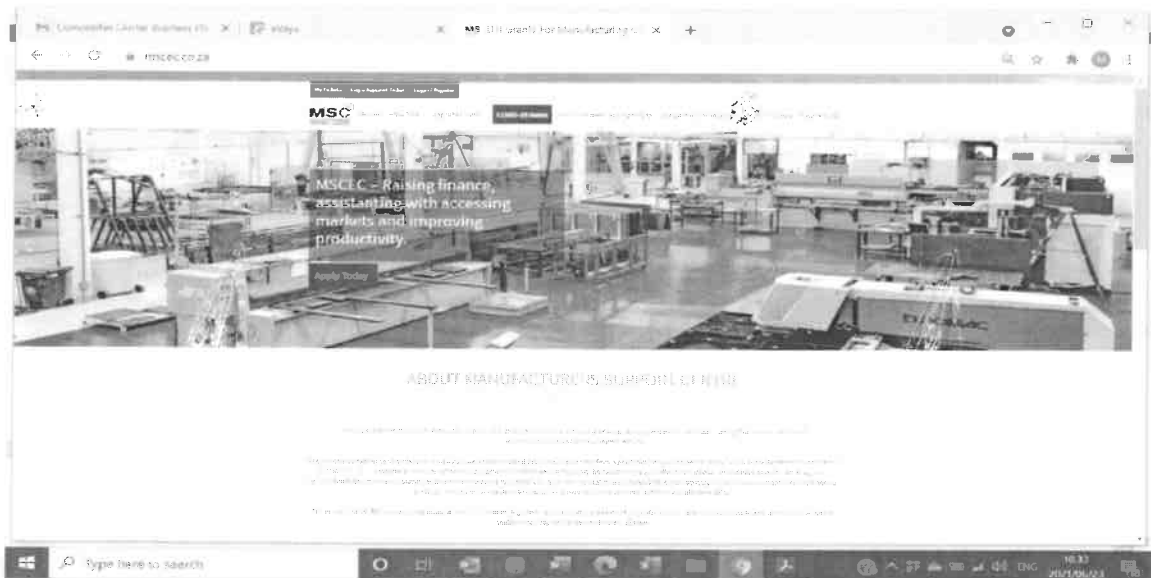

- Support with information on funding and or incentives (National-, Provincial- and Local government. (IDC, ECDC, and others);
- Support with Training layoff scheme application process hosted at the CCMA;
- Support with industrial infrastructure challenges – road upgrades ext.
- Support on company-specific competitiveness issues namely reduced markets, high logistics costs, labour issues, and high utility costs (electricity).
- Shortage of sector-specific skills.

These companies emphasise the importance of being supported by the provincial government on aspects affecting their sustainability.

The MCID programme intends to continue to achieve the following key objectives:

- Increase resource capacity (Appointment of a service provider to support calls from companies) to enable DEDEAT to provide fast-tracked support to distressed manufacturing enterprises;
- Provide a systematic approach for interventions linked to enterprises in distress;
- Obtain industry specialist services to enhance interventions for distressed manufacturing enterprises;
- Mitigation of risks associated with distressed manufacturing enterprises e.g. finances, challenges with governmental institutions ext.;
- Ensure early warning mechanisms to enable the Province to detect distressed manufacturing enterprises that may lead to plant closures and eminent job losses.

As part of the programme, a self-help web-based portal known as the Manufacturing Support Centre (MSC) was established and went live in 2018.

The MSC provides relevant companies with the following options:-

- Information on all government programmes available for financial- and non-financial support;
- Resource centre for manufacturers – acts and policies relevant to the manufacturing sector;
- Registering of a distress tickets for additionally support if not covered by above mentioned elements;
- Packaging of applications for financial support – Provincial job stimulus fund;
- 24hr helpdesk line for industry support.

Through the MCID programme, DEDEAT continues to gain the confidence of the industrial and manufacturing sector. The programme allows DEDEAT's Manufacturing unit an opportunity to directly engage manufactures and understand the challenges they experience with the strategic intent of developing a proactive stance on strengthening the competitiveness of the Eastern Cape Economy and reducing the effects of global economic slowdown and the ripple impact that it has on jobs in the manufacturing sector. The MCID programme was conceived and operationalized over the past 4 years.

In March 2020, the President declared a national state of emergency due to the global outbreak of C19. This led to a national lockdown which commenced from 23rd March. The lockdown was a decision taken to restrict the aggressive spread of the virus amongst the population. This was done to allow the national state structures to ready themselves to deal with the anticipated load from the rise of infections on the national health systems. This campaign was labelled "flattening the curve". The decision to lockdown was a responsible approach to preserving lives but would have some major impact on livelihoods. At this point, the Eastern Cape manufacturing ecosystem found itself having to deal with even greater challenges than usual. The Eastern Cape manufacturing economy was already weak prior to the lock down with poor global demand and high costs of operations all contributing to the sluggish competitive performance of this sector. The C19 national crisis presented an opportunity for DEDEAT to performance test the robustness and responsiveness of its Manufacturers Support Centre (MSC).

This was positively validated by 396 case raised impacting 10 743 jobs and 211 enquiries received through this online service from the business community. From the tickets raised, 155 cases were packaged for financial support through the provincial job stimulus fund hosted under ECDC.

The main outcome of this programme can be summarised as follows:

- Ensure early warning mechanism to enable the Province to detect distressed manufacturing companies that may lead to plant closures and eminent job losses.
- Facilitate financial or non-financial support to distress companies which will ensure the prevention of company closures and saving of jobs.
