WORKS INFORMATION

1. Description of the service

Provide custom moulded and individually fitted hearing protection devices with the following specification:

- Acrylic material
- Durable, lightweight, robust, easy to clean and comfortable fit
- Leak tight seal fit.
- Manufactured according to European hearing standard EN 352 and the South African Bureau of Standards SANS 50352-2
- Marked with user's name.
- Adjustable valve

Conduct periodical service maintenance on provided custom moulded devices including Noise-Ban Elite devices already issued to Tutuka employees to guarantee effective protection against noise.

1.1 Executive overview

- Provision and maintenance of custom-made hearing protection where the service provider will come to site on a monthly based and conduct individual impressions of the users and then provide custom made hearing protection.

1.2 Employer's requirements for the service

- Come to site on a monthly based to conduct individual impressions of each user.
- Conduct a leak-tight test during the fitment of the protection device to guarantee effective protection against noise.
- Monitor and periodical service and maintain each custom-made ear protection provided and including the Noise-Ban Elite units that are already in use by workers at Tutuka Power Station to guarantee the effectiveness of the product for another 12 months.
- Train each user in the use and maintenance of the hearing protection device as well as the importance of protecting their hearing and the subsequent consequences of noise-induced hearing loss.
