

Specifications for supply and delivery of 2 x BPI 2-wheel flatbed & drop side trailers or equivalent.

1. General requirement

The 2-wheel flatbed and drop side trailers are required as general-purpose agricultural trailers suitable for smallholder farmers. They must be robust, reliable, and adaptable for a variety of on-farm transport activities.

2. Technical specifications

Number of wheels: 2

Capacity: 3 ton

Total length including drawbar: 5100mm

Body length: 3600mm

Total width: 2300mm

Drop side height: 400mm

Fully compliant with South African road regulations and the eNaTIS system, including all reflectors and number plate holders.

3. Compulsory Requirements

- Supplier must provide at least one reference letter from a previous client for similar work or supply.
- A minimum 1-year quality warranty is required.
- Detailed specifications, Datasheet, and Image BPI 2-wheel flatbed & drop side trailers or equivalent must be submitted.

4.Special Conditions

- Training to be provided at delivery site for at least 2 operators.
- Delivery: Mpumalanga Province (exact location to be confirmed)
- The supplier shall provide a valid Roadworthy Certificate or Homologation Certificate (Letter of Authority) issued by the National Regulator for Compulsory Specifications (NRCS) for each trailer supplied.
- The supplied trailers must be fully compliant with South African Road Regulations and eNaTIS registration requirements, including all reflectors, lights, number plate holders, and VIN identification plates.
- Proof of eNaTIS registration capability (manufacturer's code or previous registration example) must accompany the delivery documentation.
- The supplier must ensure that the trailers are ready for registration and licensing with the Department of Transport upon delivery.
