1. INTRODUCTION

In 2008 in South Africa, the manufacturing, production, and usage of asbestos cement fibre as a construction material was banned as it was identified as a hazardous and contaminant material causing lung cancer and other serious respiratory ailment.

Asbestos was widely used for the manufacturing of asbestos cement roof sheet which despite its ban, has left a legacy of thousands of asbestos roofed houses scattered across the entire country mainly in old townships. A desktop survey has revealed that more than 20 056 low-cost houses constructed in the province are roofed with asbestos cement.

The Asbestos Regulations was promulgated in 2002 and then amended as the Asbestos Abatement Regulations 2020 to prescribe the method of working with and demolishing asbestos containing materials.

Due to growing health concerns, the National Department of Human Settlement has made the eradication of asbestos roofed houses a national priority.

It is to the above course that this tender seeks to respond to the eradication programme with the aim of providing a safe and healthy living environment for the people of Mpumalanga.

1. PROJECT OBJECTIVES

The project mainly seeks to eradicate all asbestos roofed houses in the province through the removal, disposal, and replacement of identified roof structures.

2. THE TENDER

The tender seeks to appoint **five (5) service providers per District** (i.e., Nkangala, Gert Sibande and Ehlanzeni) into a **three (3) year** panel for the removal, disposal, and replacement of asbestos roofed houses administered as a framework contract.

On enlistment onto the panel, call-offs or Instruction to Perform Works (IPW) shall be issued based on the tendered rates in the respective areas and District Municipalities tender for.

Service providers with a **CIDB Grading of 4GB and above** are required as the IPW and work allocation shall be limited to the CIDB grading of shortlisted service providers.

3. SURVEY DATA (PRELIMINARY)

The Department of Human Settlements requested survey data from the **seventeen (17) municipalities** in the province. These obtain data (i.e., number of asbestos roofed houses) is the basis in which this tender is developed.
