The Handicraft Sewer skills program will expand the skills base and contribute to the development of entrepreneurs in South Africa. Typical learners include both male and female learners where the age profile ranges from adolescent to aged. They typically have little or no sewing knowledge, experience and skill. These learners typically wish develop sewing skills so that they may earn an income in the informal sector, home—based cottage industry, incubation hubs and development initiatives sponsored by religious organizations.

Career Pathways

The Handicraft Sewer skills program will also contribute significantly to the building of small businesses and cooperatives, and rural development and most importantly, job creation. The final garments and household articles/products could also serve to boost exports as part of the Arts and Craft trade. During the skills program development process, the South African Apparel Association and the South African Quilters' Regional Guilds were consulted.

Qualified learners will have acquired a range of competencies to select materials and sewing notions according to the nature and purpose of the final article, and to sew and assemble basic garments and household articles using domestic sewing machines as well as hand stitching. The learners will have a thorough understanding of training or commercial patterns and have selected materials and sewing notions accordingly.
